

The most awaited document has been published. It would cover known controversies about ChromaticAeternus and his fandom.

Our team had visited eSpyzem and other servers, whose members had been involved on Chromatic's controversies. Some of our team members had been involved with anti-Chromatic oriented *Hue180 Exposition Workgroup* made by Spyonclear.

Chromatic had his known followers and his alternate accounts, known as *chromaticans*. Despite the former's disdain of having his followers to be identified as such, they would be referred as such on this document.

It is incomplete, but we would leave it as it is at that moment.

Last updated: August 11th, 2025, for certain reasons.

For legal reasons disclaimer: **Observe the history! Don't make history!** Never interact with Chromatic and his allies. When confronted, simply link to this document.

And yet, they learned nothing, instead they had attempted takedown on this document. Save this copy as PDF or ODT.

Overview

ChromaticAeternus is the french graphic designer, better known for his *Operating System Mockups*¹ series.

He has been involved on the controversies over how he handles other major creators of his kind, and his rivalry with Arsen54800, Spyonclear, Fjattar, Gool2, and MinderiaYouTuber

That been said, his involvement on conflicts had lasted since when he was 13 years old. Now he's 19. He's still after Spy and our document's writers².

One of his major supporters, StrangeFin or Santuchi, has been featured on many of conflicts related to Spyonclear. His activity conflict-wise has spanned until 2022.

Chromatic's new co-commander-in-chief is M4xH4x1337, but has been previously known as FeelExotic, Anaheim³ and RDesign. RDesign name has been known to many, so we would use that for the sake of this document. RDesign had known by our team for making contribution of the anti-Spyonclear document called *The Spyonclear Files*, named and formatted on a similar manner as anti-Sil *The QSV Files*, made by couple people. RD in particular had been an interesting person, involved on conflicts revolved around Chromatic, Spyonclear and Fjattar in 3 years, since 2023.

Here's what RV have to say...

Reisuverse: Hello, onlookers. I am the involved person in the major Chromatic's controversies. I think I had joined the Blueberry Hub by back in March and April '21. I was actually quite new on Discord side of Windows concepts community. Retroactively not surprising, I was met with dramas surrounding Fjattar and Chromatic, and how do they handle their rivalry with Minderia and Spyonclear. Knowing the goofy nature of making fictional Windows versions, I was goofing around on day 1.

My initial approach is to chat with a deleted user. He sent three invite links, long since expired. Then another dead account tried to call me someone else, and that particular "someone else" has long since have to be my friend as I got interested on software fiction ever since. As I can see, detractors calling me as other people's alternative ever since April of that year. Out of all little kids who called me that... one of them the accounts, not got deleted and stayed on Discord was Vladislav Fesko. Not only Fesko

¹ Name disputed. For some, it has been known as Software Mockups and OS Concepts.

² Debatable. In 2024, he was not a central figure on recent conflicts. However, his supporters do have conflicts with mentioned people.

³ This name had been short-lived, not used since then by Spyonclear or on this document. Anaheim was named after a city on California, United States.

had his account still living, but his Spyonclear Fan Club 2E. Does anyone have idea what's their purpose are? That fucker is now 19. I would get hoped he would grow out of the hate, but then I see he's also known by his OSM Wiki clone, and his last contribution was in September 2024.

As of the good friend Spyonclear, I had involved on his server since after i was out of Chromatic's and Fjattar's circles, have been involved on his struggle to regain his channels in September to November '21, tried to make a peace agreement between Spy and Chromatic on February 14, 2022. Also, I was the shadow administrator of his server eSpyzem until November 30, 2024, as I have been told I would no longer in a "secret service", and because I was already known as the admin, friend and ally, I have been no longer moderating on secret.

Chromatic's series was popped up on my recommended when searching Windows Never Released videos. But I didn't get properly known him. Since my interaction with Chromatic, I think he's a big asshole. Enough said for him on page 2.

Retiznyk⁴ was as new to the Windows concepts community as I am, joined the Windows Never Released discord servers in 2021. I believe he was Spyonclear's fan too? I recall him joining eSpyzem on April 17 '21, when i myself was new on there – and he made his own Sviger, and it looked like he god inspired by fishing. Now he looks like 2019 Spy and 2021 Santuchi, the Chromatic's "epic crusader" and Devil's advocate, or should I say "Chromaverse's Saul Goodman".

I would exercise my knowledge about this seemingly trivial Operating System slash Software Concepts community to give you the information about Chromaticans, on which some of the information are well known, but other info – not so much.

Issue 1 – 2021 and prior

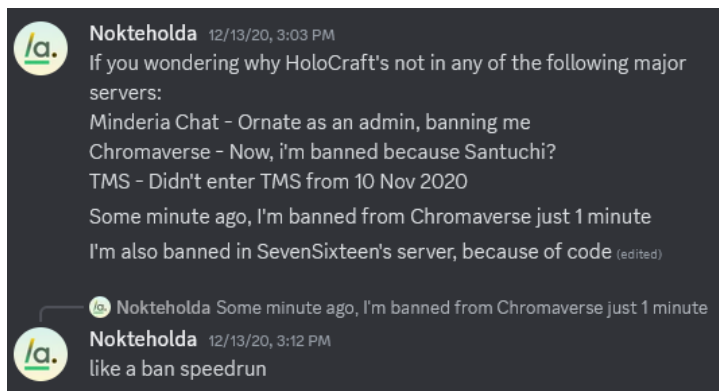

Dzen: This issue would cover prior controversies regarding Chromaticans.

Reisuverse: Oh boy, did they at any point behaved at all?

Nokteholda server raid

Dzen: While the majority of this document is about RDesign and Spyonclear, this segment is about the poor early relationship with Nokteholda, formerly known as HoloCraft.

⁴ I'll keep it real, by the time I would get the document done, he'll change username from RDesign to something else. He comes as M4xH4x1337 as of December 2024.

He was actually banned on Chromaverse within a minute.

Granted, i don't know the reason, so I'm not fully convinced, and he was unbanned on December 16.

But HoloCraft's contribution on OS Mockups Wiki had caused some people (especially Vladislav) to hate him.

Chromatic's followers made a drama over this.

I would bring that up, because HoloCraft was also moderated this wiki, when a couple anonymous detractors and Fesko had been banned on it.

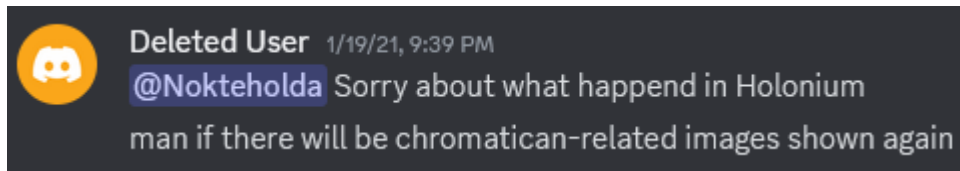

The Holonium raid itself was a historically minor event, but it was set as the example to the anti-Spyonclear sentiment on Chromaverse.

This is how OS Concepts Wiki describes it:

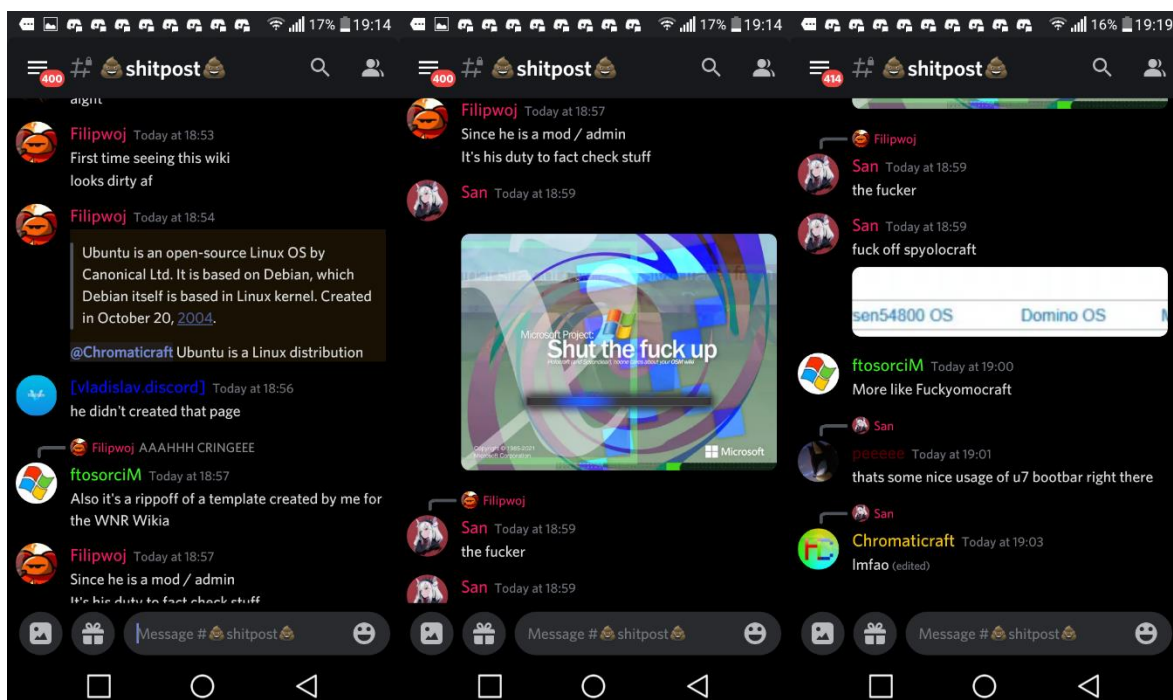

January 19, 2021 [edit]

Chromaticans raided Holonium, whose owner is pro-Spyonclear, and the OS Mockups Wiki administrator. During the raid, Chromaticans mistook the [Westerners](#) term, and overall used the same old inside jokes.

This is *presumably* Spy's reaction:

And this is the screenshots of Chromaverse on that day:

Dzen: We didn't get the images of the raid itself at the moment

Despite January's upbringings, Nokteholda himself would adopt anti-Spyonclear sentiment later that year.

Separate server for disgraceful activities

Dzen: What apparently preceded the WMCW were the server that positioned itself as Chromatic's secret server (think of that as Chromaverse, but more unfiltered content. I know too little about that server, but according to OS Concepts Wiki, the content on which has been leaked under the name *Rainbow Pill*, as a part of what Spyonclear called *Kernel Panic*, named after the controversial figure within Spy's circles.

The content of the said server had repeatedly violated Fjattar's privacy, using his real name and portrait.

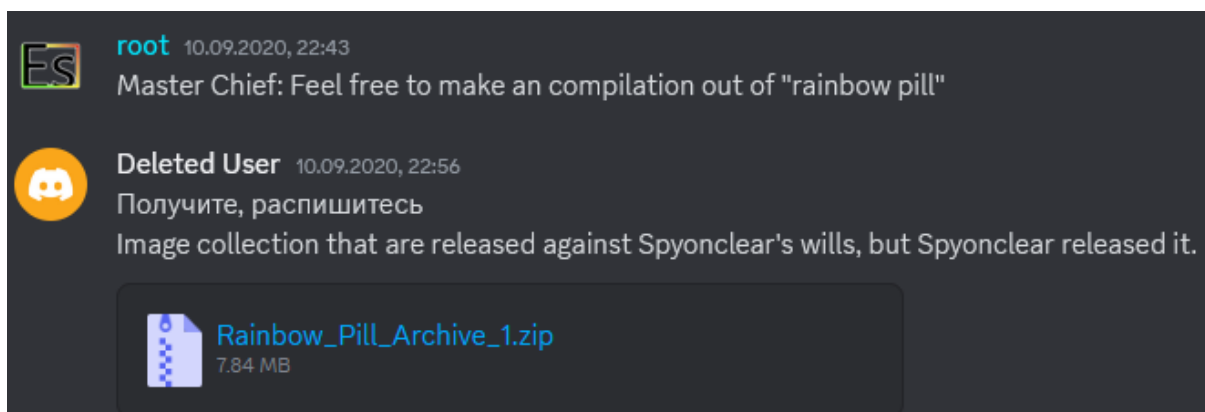

Granted, Spyonclear was a part of this – at that time Spy was a part of Chromatic's team⁵. But one moment made them all deal Fjattar... one moment that blew Chromatic's reputation. Entering "Sup f-ot, we're not talking about OS'es & not their videogame creation tools".

For some reason, these two didn't got along with the development topic(?), instead, the guy who had the name *the penis man*, said that they're talking about slow-in-the-mind state of his classmates.

Reisuniverse: The images i would like to send had been made by Spy himself.

⁵ Disputed. Spyonclear may not consider himself chromatican, neither would he consider that at that time of events.

This is the notorious Rainbow Pill. "Rainbow" has been named after Chromatic's branding.

Did you know that Chromatic used to have a separate server?

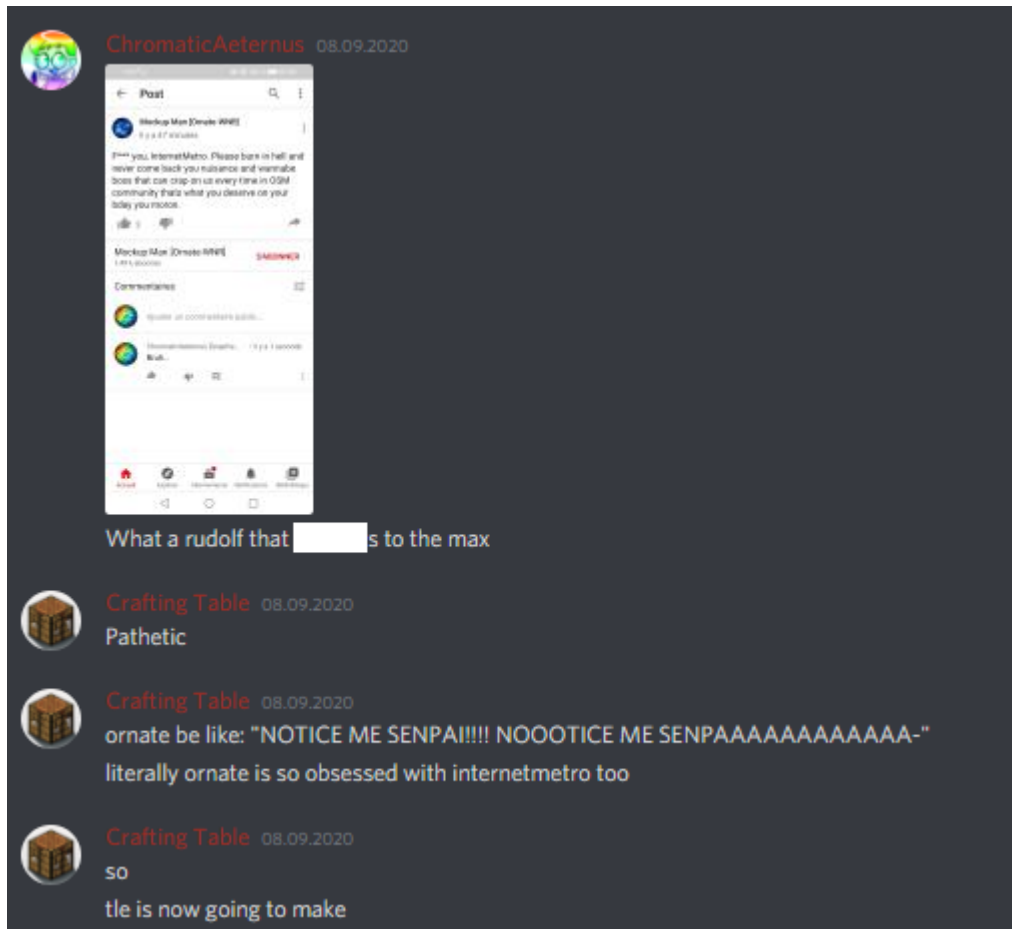

Signature harassments, they were all on that particular Discord server. They were the prototype. All should be already a red flag to you.

But what was that? What have something that I, RV, would bring up today?

1. The conflict between Crafting Table (Strangefin) and TLE

Man, this is interesting already.

2. The use of Fjattar's real name, and harassment behind his back.

It's old, but the recurring theme of this document is they do not change. I would excuse them doing that in 2020 they were not the grown-ups. Today this would be awful.

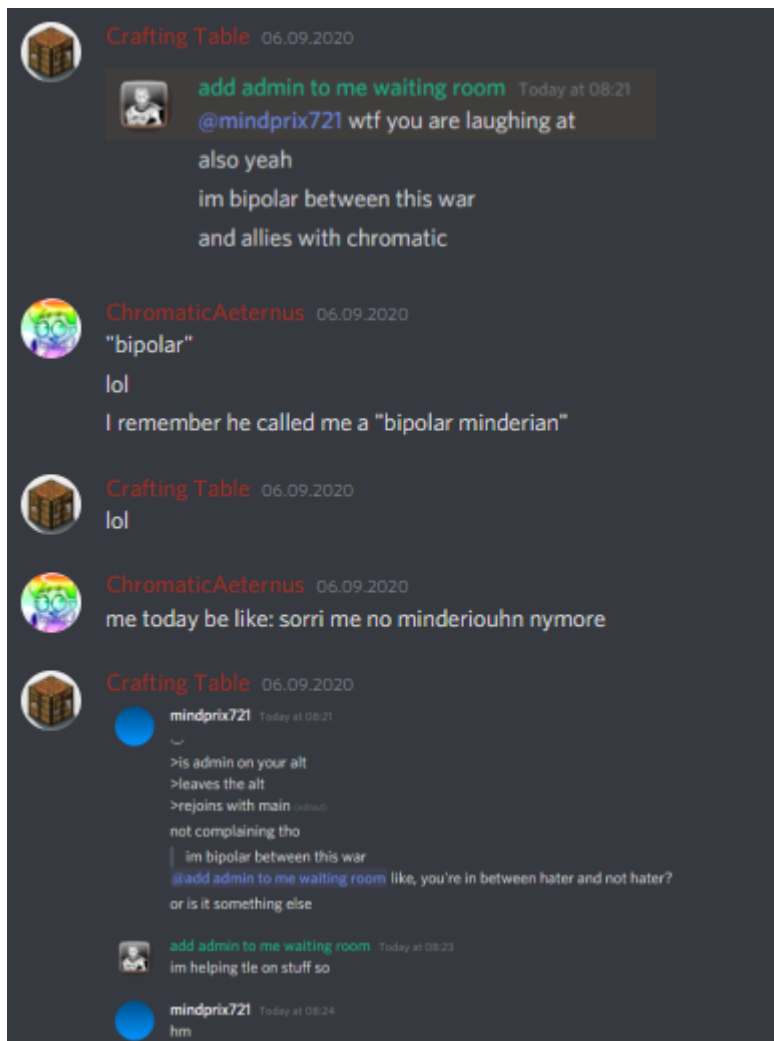

I must admit that Spyonclear using Fjattar's real name is a bad precedent too, in attempt to normalise the doxxing.

As of another recurring theme, they would still be called the Chromaticans.

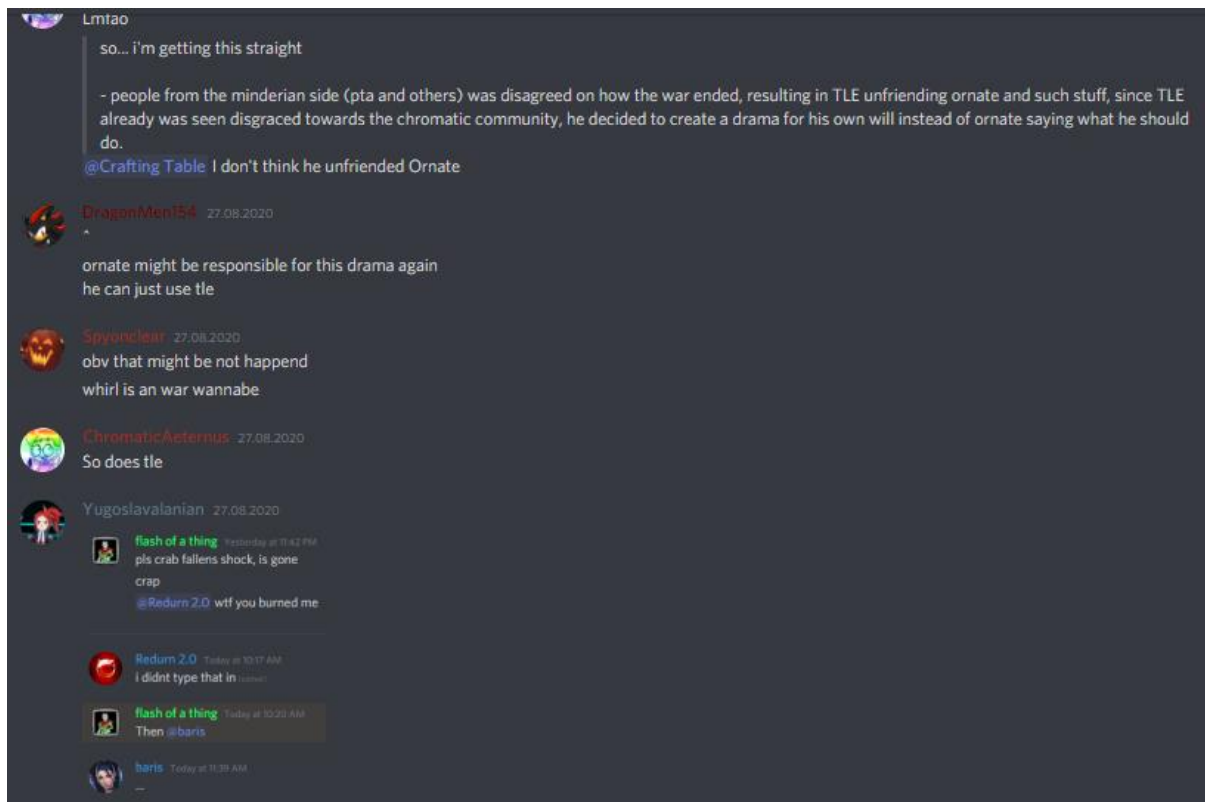

As part of #2, here are MORE! of the screenshots.

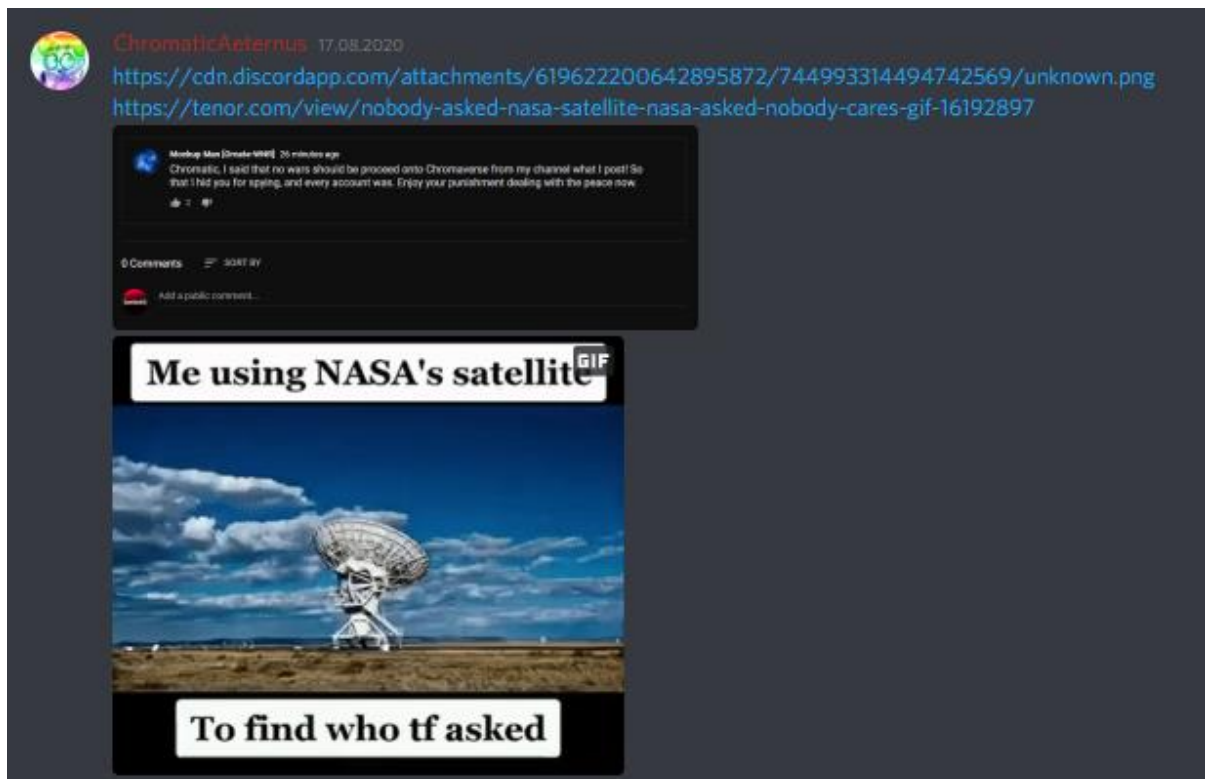

Reisiverse: I tend to forget that these two are the contributing factors on the making of 2024 Fjattar.

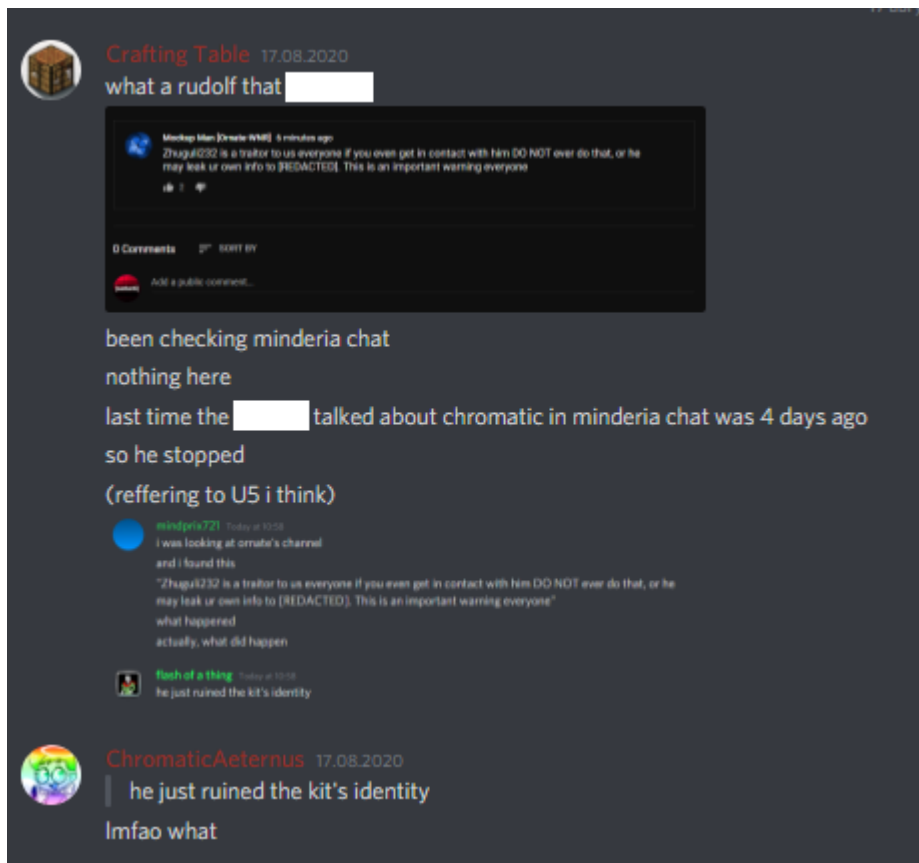

Note that Spyonclear was a part of this, and Spy had ever since clashing Fjattar independently.

Thought, it looked like it was and still is acceptable to trashtalk about Fjattar.

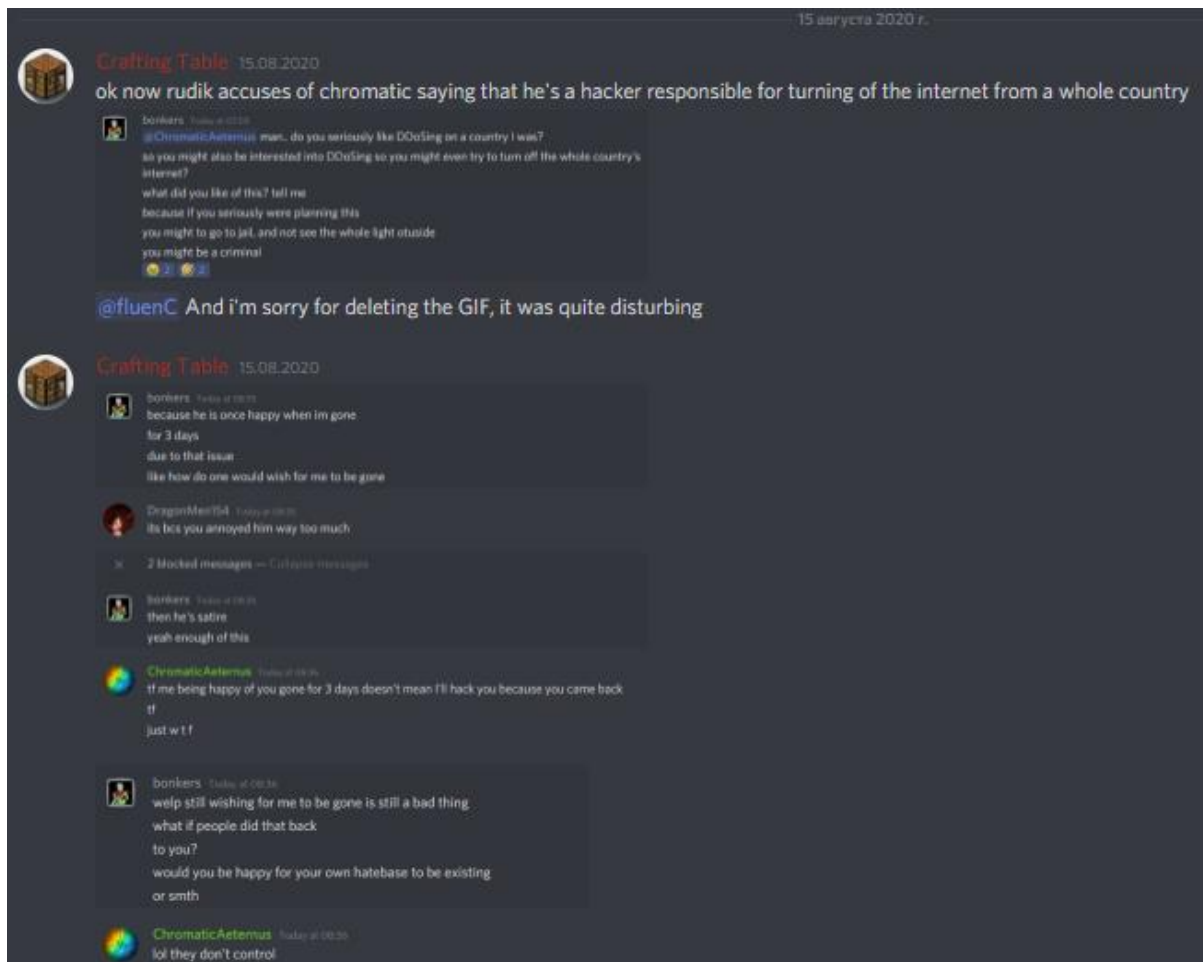

I had made some text blank, because one of them did have said the last name. Keep in mind, I'm still talking about #2 reason why i had brought up Spyonclear's Rainbow Pill.

The Strangefin v. Fjattar verbal attacks had their relevancy as much as the ones from Retinzyk vs Fjattar.

If I had joined in 2020, i would like to join them, this seemed THAT interesting.

Now, I'll cut some slack on the image above. It seemed weird to accuse Chromatic of turning off the internet connection of Belarus – unless Mininform's security sucks ass.

Fjattar did not liked that Chromatic and chromaticans have hostile opinion of him. That is the fourth time Fjattar's real name was used. Keep in mind that at that time, such verbal act was unwanted for him.

They seem to block Fjattar, but still interacting him? Huh, weird. Isn't that because they want to mess with him? Looks like we should know more on why Fjattar became the way he is, as stated on The Fjattar Files.

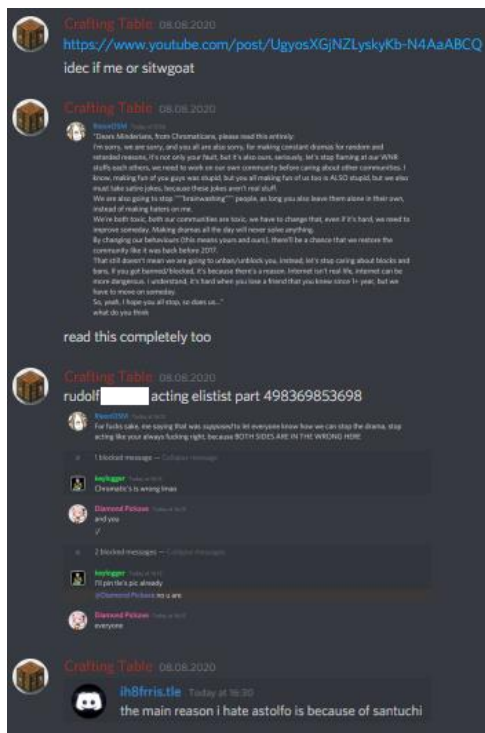

The problem with Chromatic and his immature friends

18

And do I love that they wanted Fjattar (then-known as WhirlSpirit, Ornate) gone.

If Fjattar would be gone, who do they would harras next? Oh right, Spyonclear, Gool², Sil, ReformedOSM, and me.

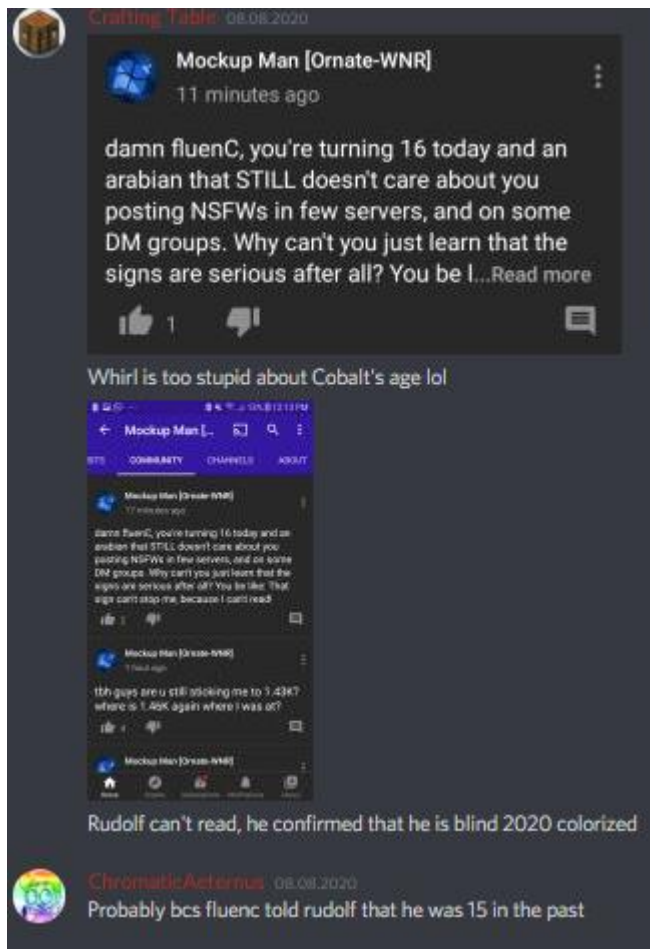

The fifth use of the last name! Continue.

I would not know what made Fjattar pissed off... something about blocking and being hated...

I wish that Crafting Table would actually provide the context. He made a sorry attempt to make him look like a fool.

Fjattar (Mockup Man) had accused fluenC of posting Not Safe For Work media on Discord. Chromatican reaction? fluenC was not 16 years old. (true; fluenC, known today as sulflix was born in 2008, making him 12 at that time⁶)

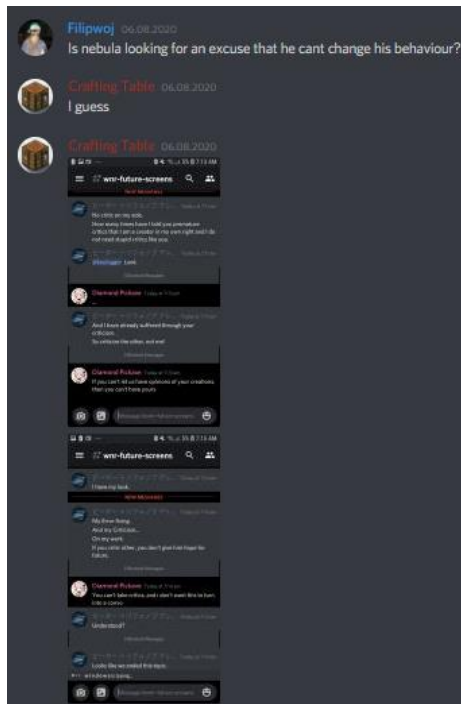

The loony priorities would show up late this decade, like being obsessive over the n-words.

Chromatic and RDesign from 2024 would like to have a word from you on the image on a next page.

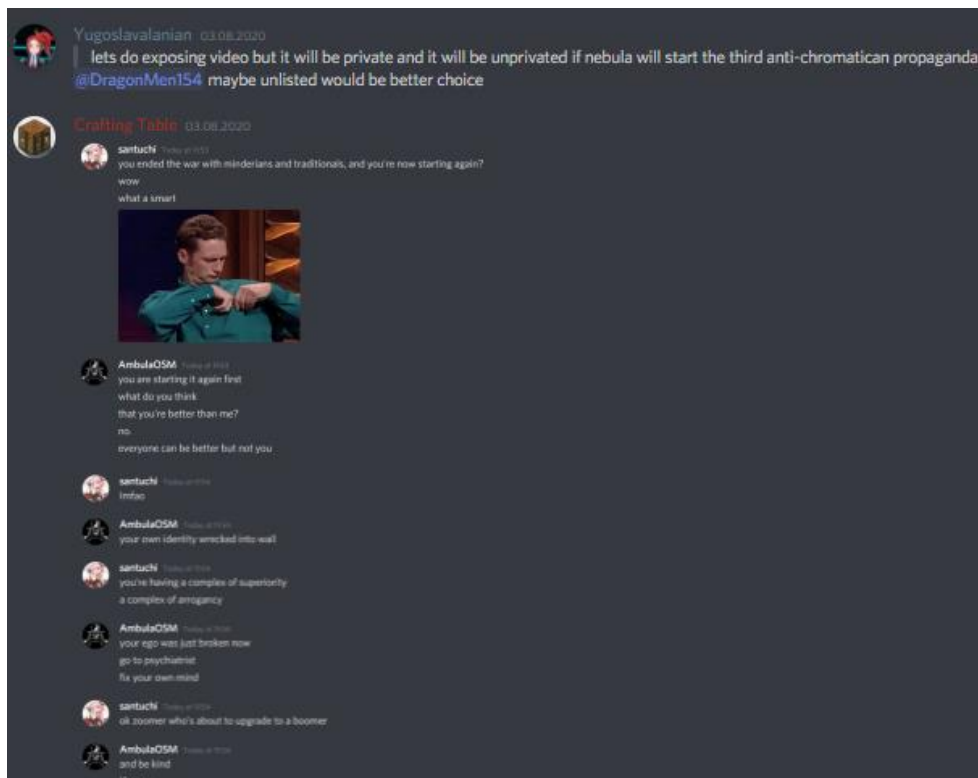

⁶ OS Mockups Wiki does not have a page on Sulflix. See <https://mockupedia.miraheze.org/wiki/Sulflix> for reference.

The **problem** with Chromatic and his immature friends

21

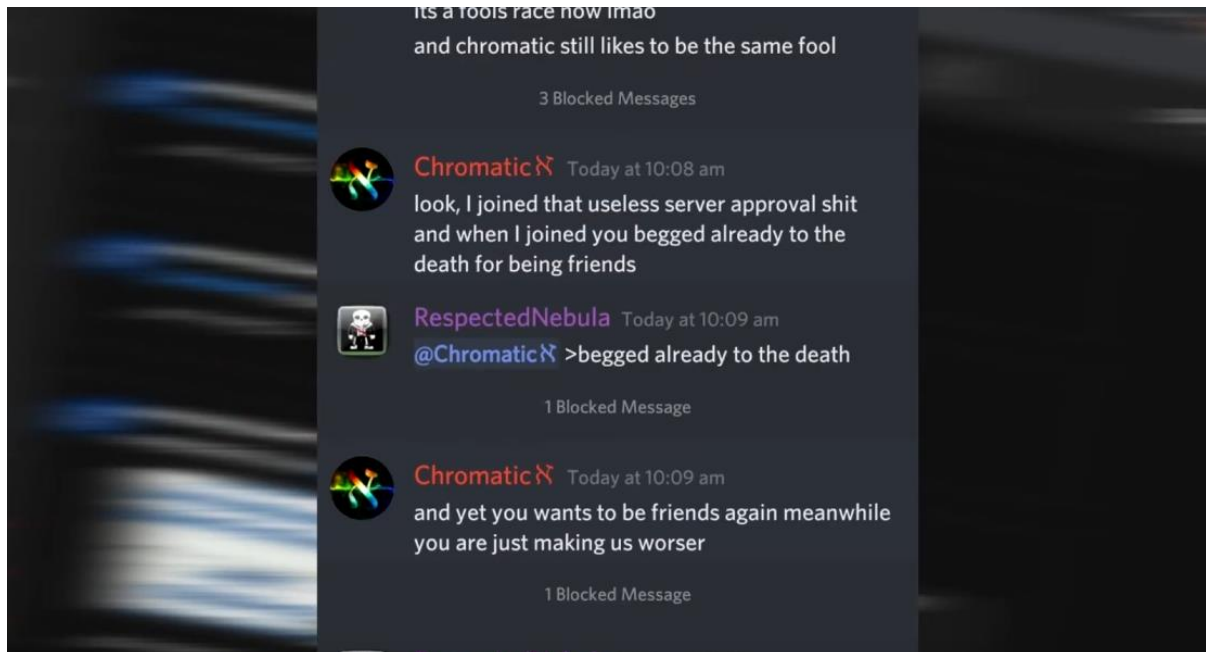

Now, the image within an image is blurry, or I am blind over it.

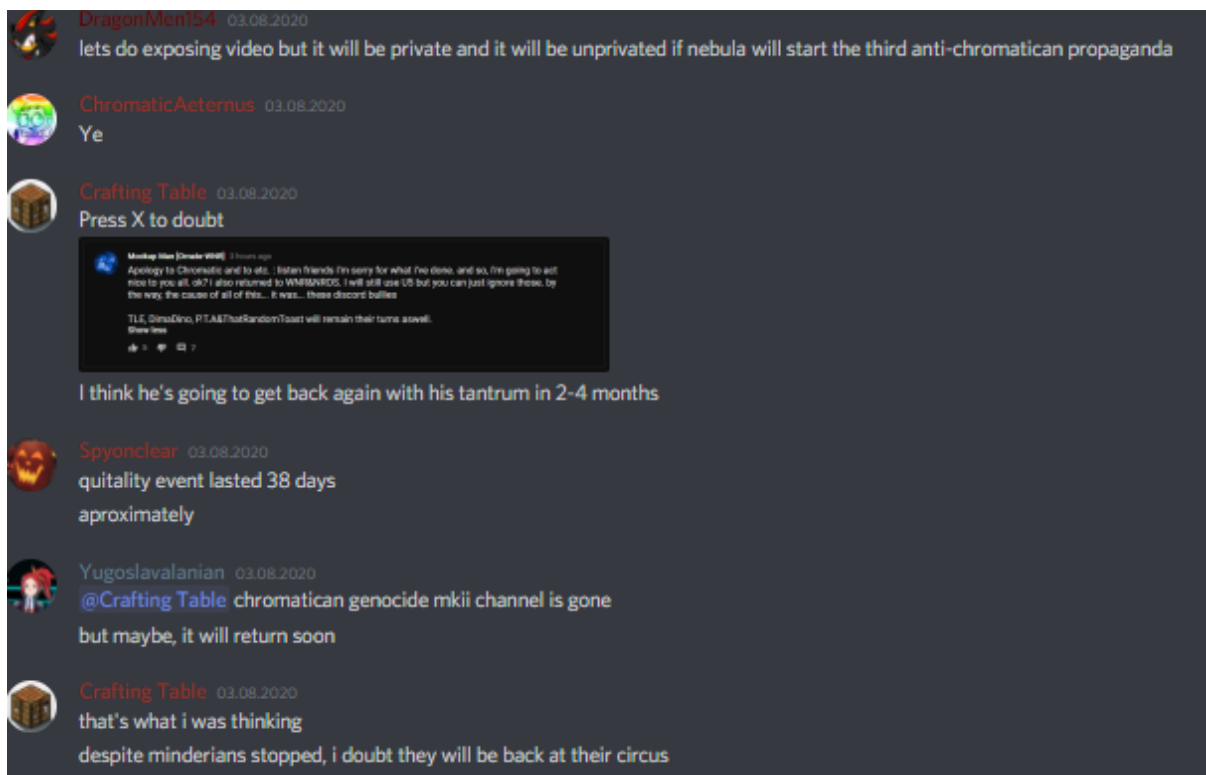

What to expose, I would never know. Judging to the image, and assuming it uses DD.MM.YYYY format, it's August 3rd.

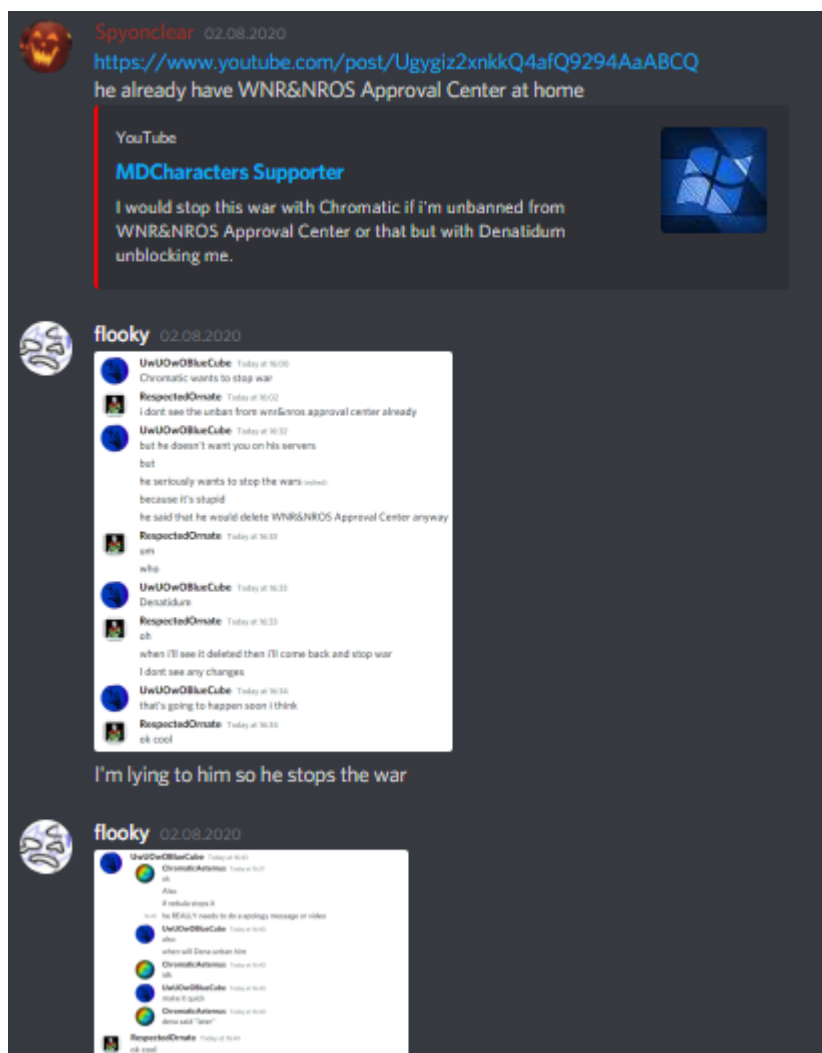

There was the scrapped attempt on it, however. According to Chromatic's own archive channel, it was worked on in June.

Very nice. We are either thankful for that being scrapped, or not, depends on who do you despise more.

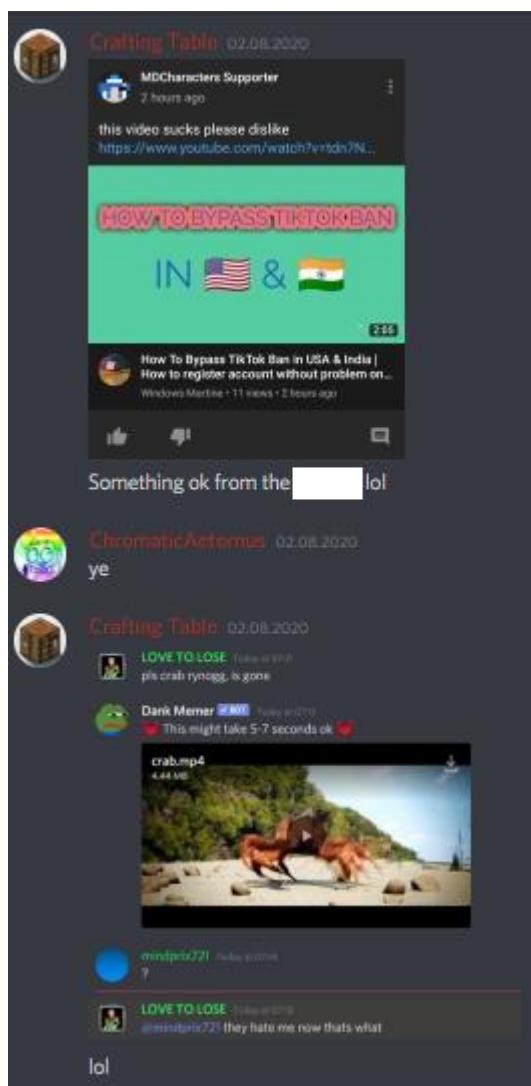

Something's made Fjattar temporarily retire and call out on separate channel. Their reaction? Taunt.

The requirements to stop the war did not meet. The digital curtain was on. Through the lie, flooky tries to stop the inevitable. Who would think that trying to isolate yourself and Fjattar would be a wise option, and lie the way to keep yourself with one-minded people on your servers would be the good way to end the 2020?

I'm not talking about WMCW right now. I'm talking about the way Chromatic and Fjattar treated each other's.

Get your shit together, and be open, or face the conflict.

Still using that last name! And that makes the sixth onscreen time it was used.

The **problem** with Chromatic and his immature friends

25

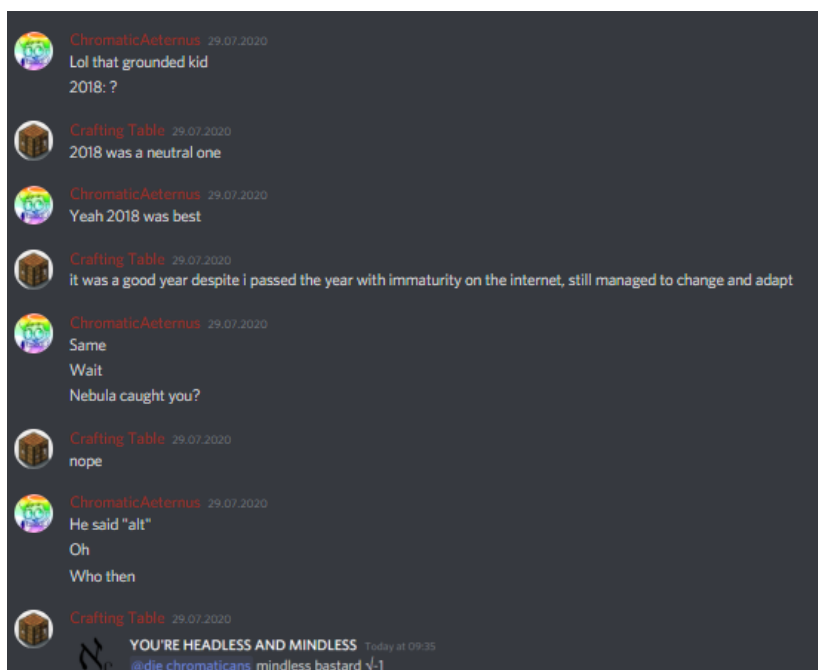

The theme of making everyone to join Chromatic is described as brainwashing.

Prophetic, since that's exactly Chromatic and RDesign had been done over their "The Spyonclear Files"

Remind me, who is mindprix721? He or she is leaning pro-Chromatic.

Hmm... interesting.

Thought, being nostalgic about 2018? That's amusing.

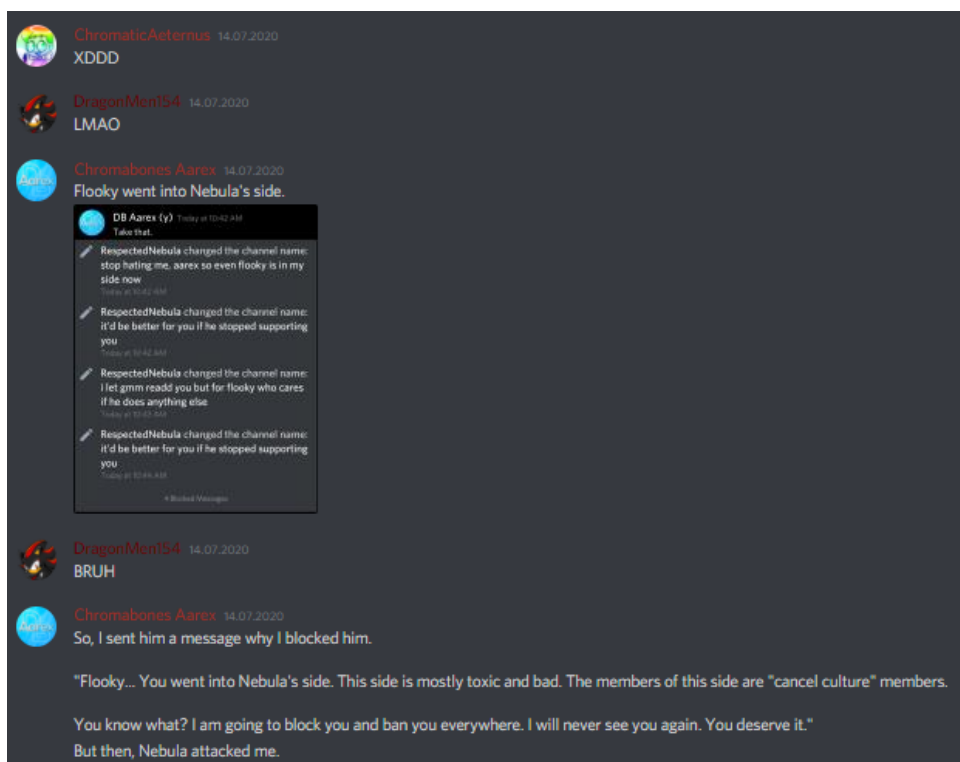

Is it not a bad thing to force people to join my side? Or it is bad just because I am
Reisuverse, not ChromaticAeternus?

TLE is a prophet, but that may be very predictable.

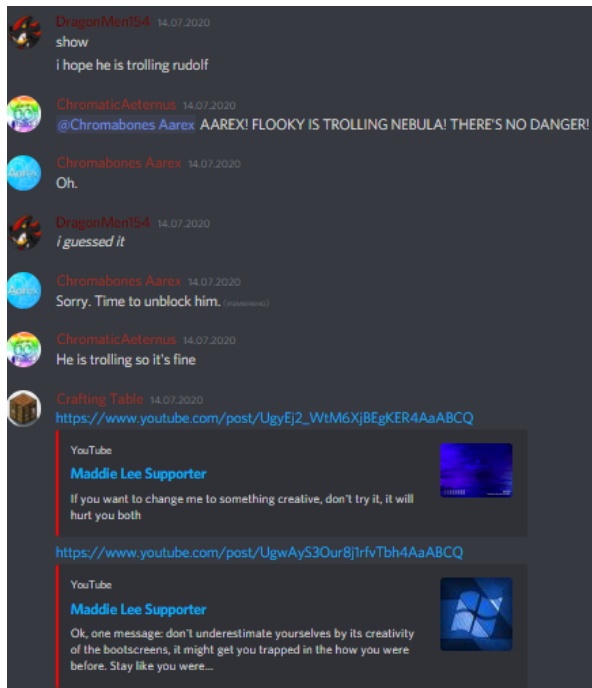

Aarex... "We are actually not toxic". Just remember about it when I and Dzen would duke that out of them.

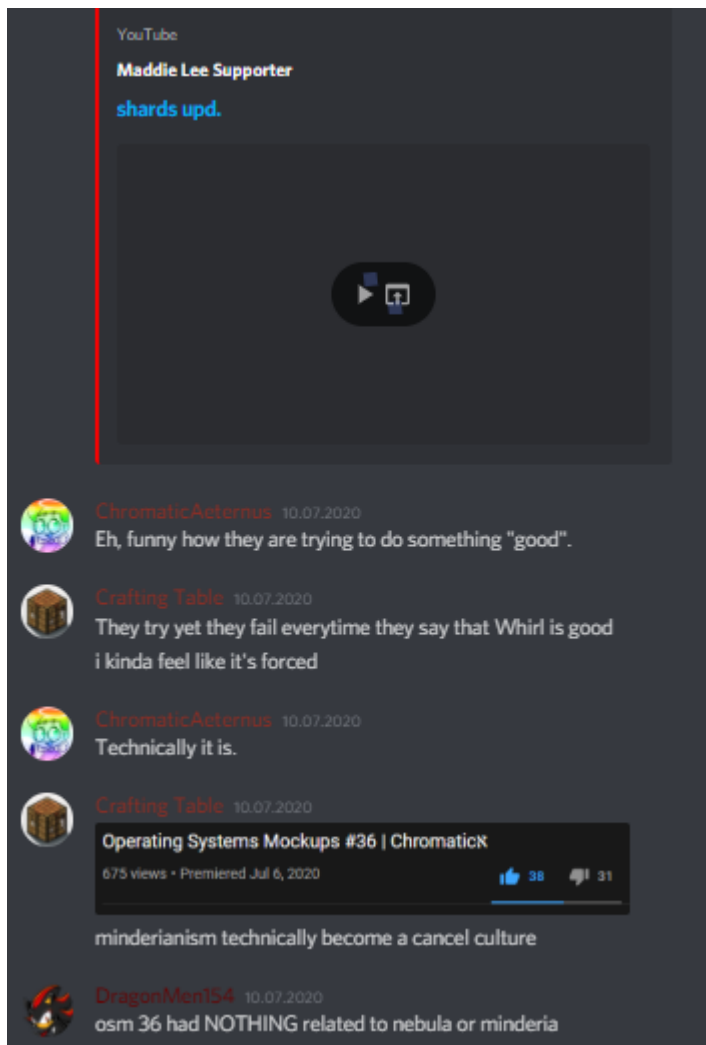

The same person thought Flooky siding Fjattar, but the former's actually trolling Fjattar.

Original owner by dzen; Created by the contributors

Trolling Fjattar is quite toxic on it's own. It's a day before they had been declared non-toxic. It's a thing of past, right?

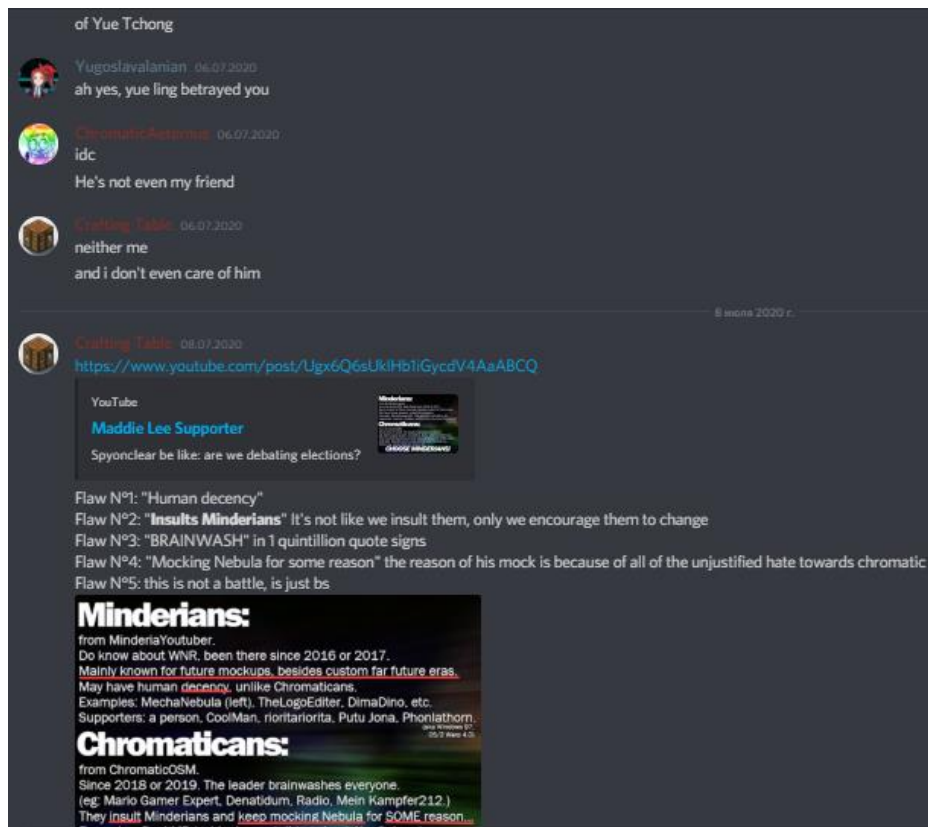

“Cancel culture” phrasing looks like the foreshadowing.

I don't know who Akame are.

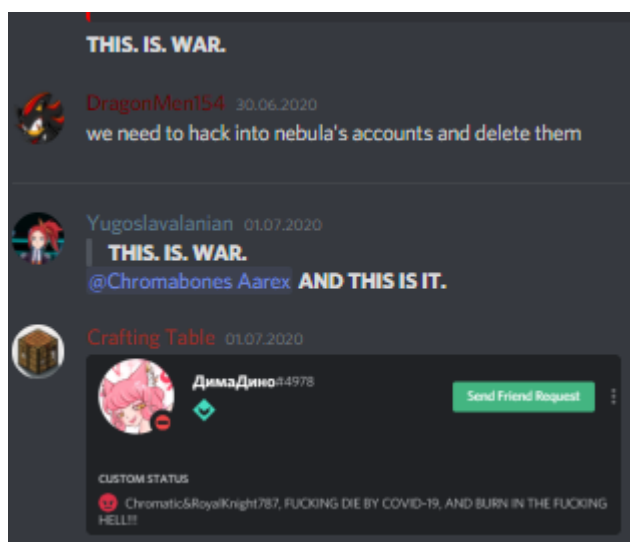

Santuchi blocked TLE, because... [continue the message]. But the message was already a year old. By 2019, nobody cared if you'll get called a homosexual.

To be honest with him, what the fuck, Fjattar?

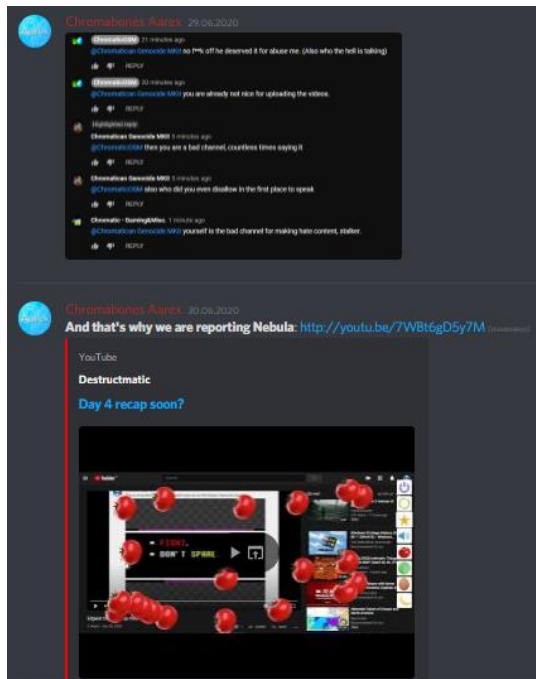

It's unclear how do they encourage Minderians to change. But I assume their interaction of no-good faith.

The flaw #4 can be linked to the chicken-or-egg debate. But their old civility failures had been studied in 2024 for this document.

They did not need to hack. Instead, call Undertale fans to copyright claim Fjattar's accounts.

“Day 4 recap soon?”

Context: Spy made Maddie Lee Supporter day recaps.

Aarex wanted to report Fjattar over self-defense.

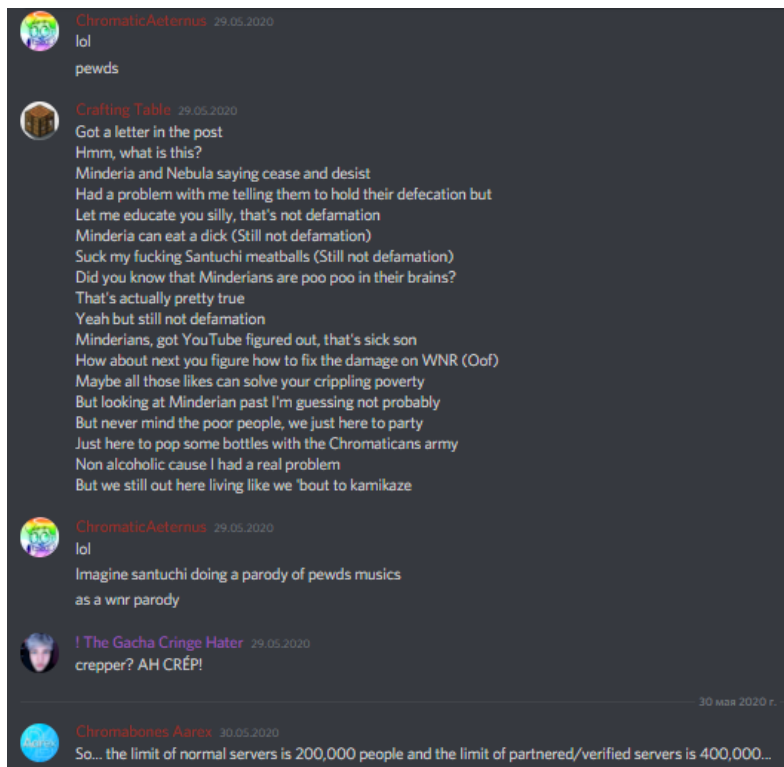

Despite being Spyonclear’s ally myself, I think Fjattar’s acting on self-defense over the mockery he had received.

Ornate was on his Maddie Lee Supporter stance.

I can see this is way old when T-Series Diss Track was parodied, but I'd like to share that here.

The next image is about PewDiePie's second T-Series-related diss track called "Congratulations".

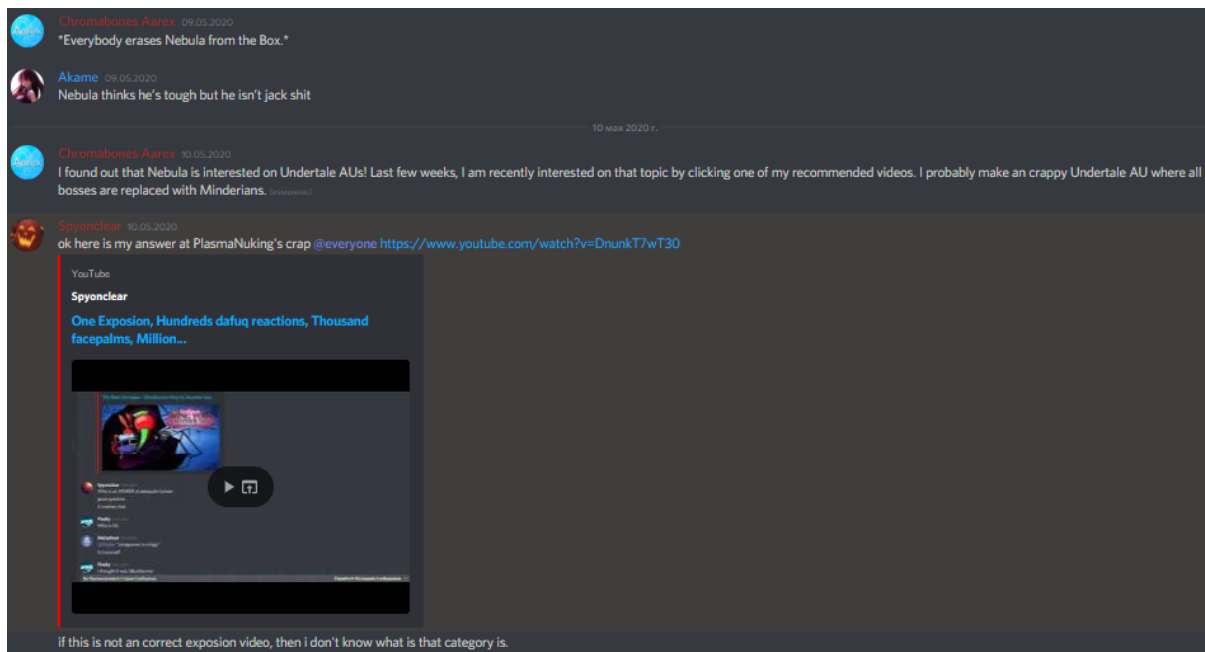

That makes it the seventh time the damn last name was used. Fuck them.

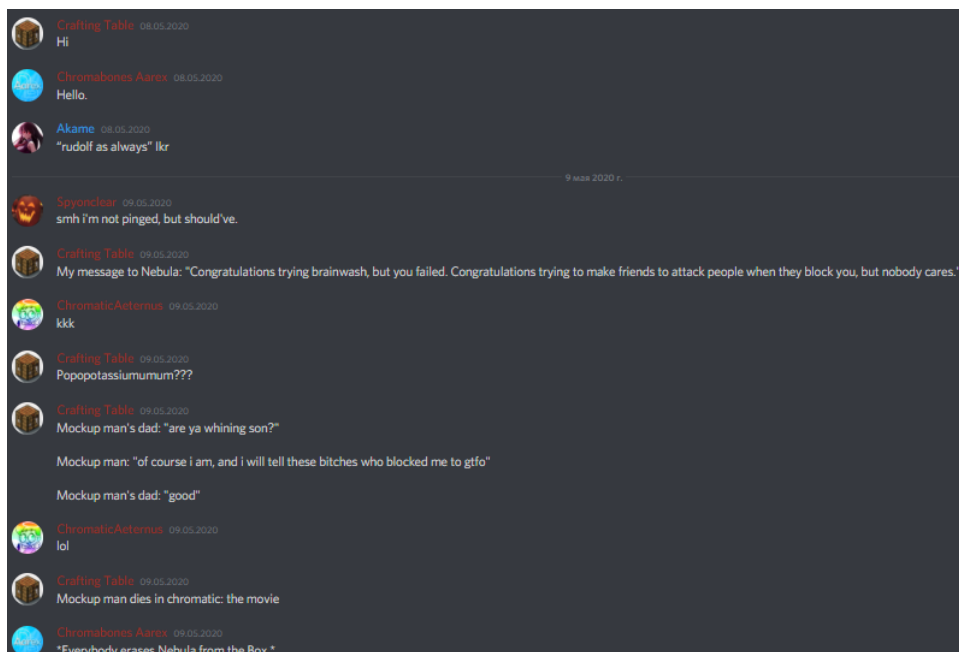

Now, why did I had made certain emojis blank? Crafting Table had used Fjattar's portrait when he was 16 or under. Fjattar at that time made himself clear that the way they did was the invasion of his privacy.

No sense of shame on that one.

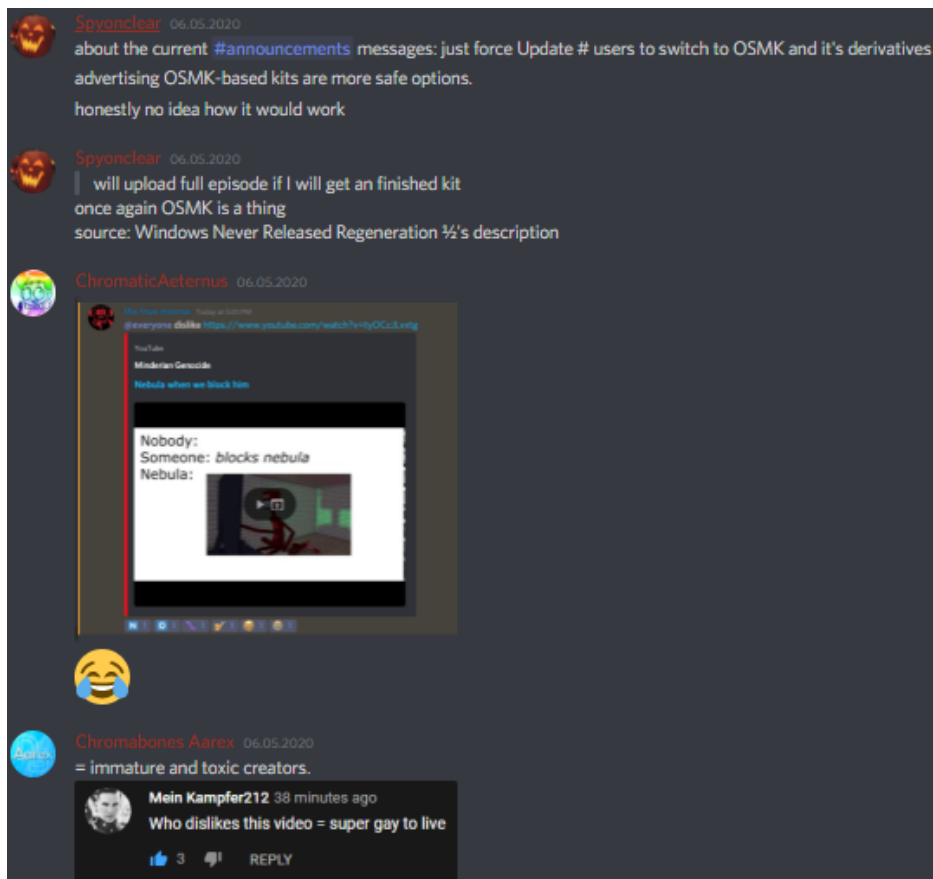

Spyonclear made a video targeting Fjattar.

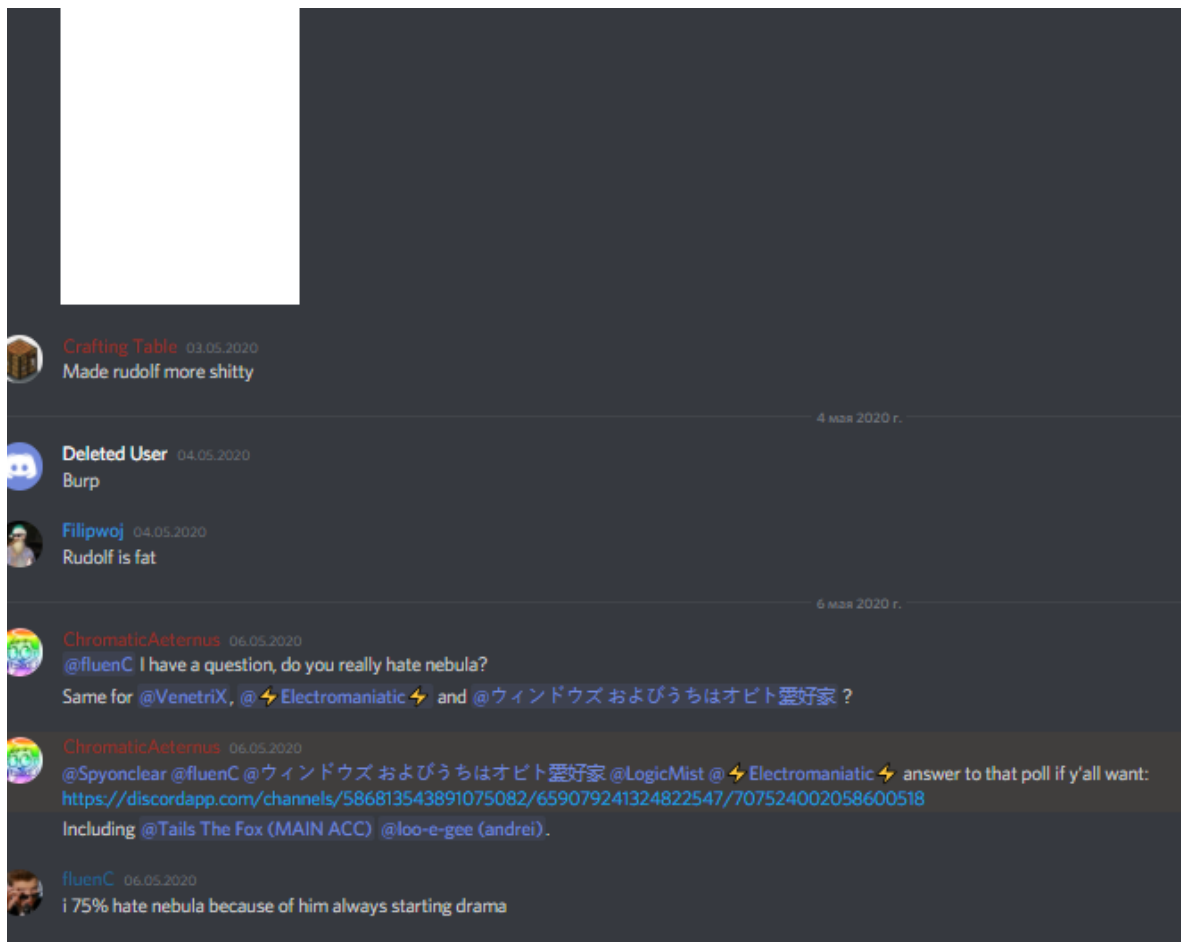

By that time on May 2020, Spyonclear was Chromatic's friend, so that does count.

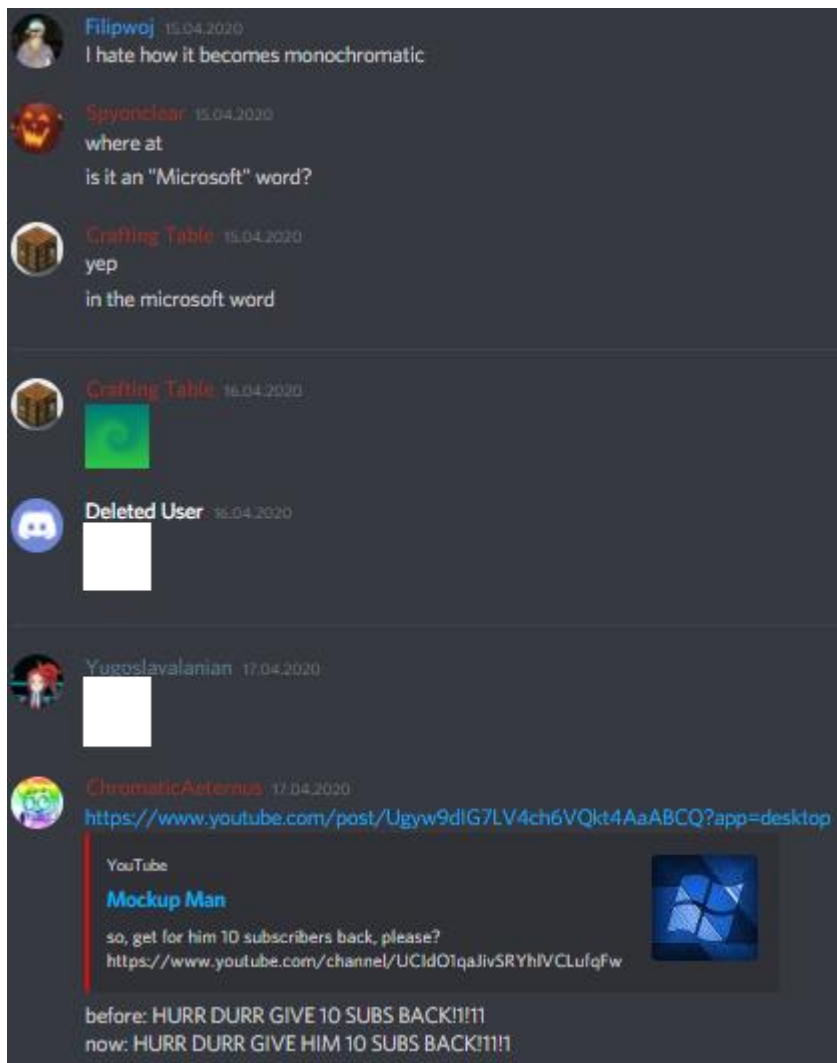

The KKK jokes seems tame, compared to the images above.

One of them made the channel called Mein Kampler. I hope that's not the same as THE FATHER, one of the kids who hosted Chromaverse Jackbox Games streams.

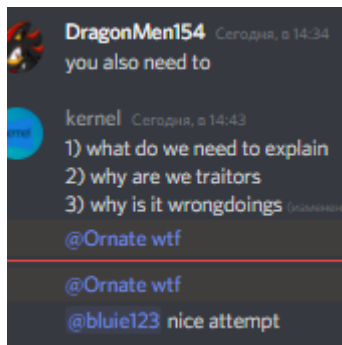

May 21 use of Fjattar's portrait seems like a recent offense. The blanked picture is edited, of Fjattar's portrait.

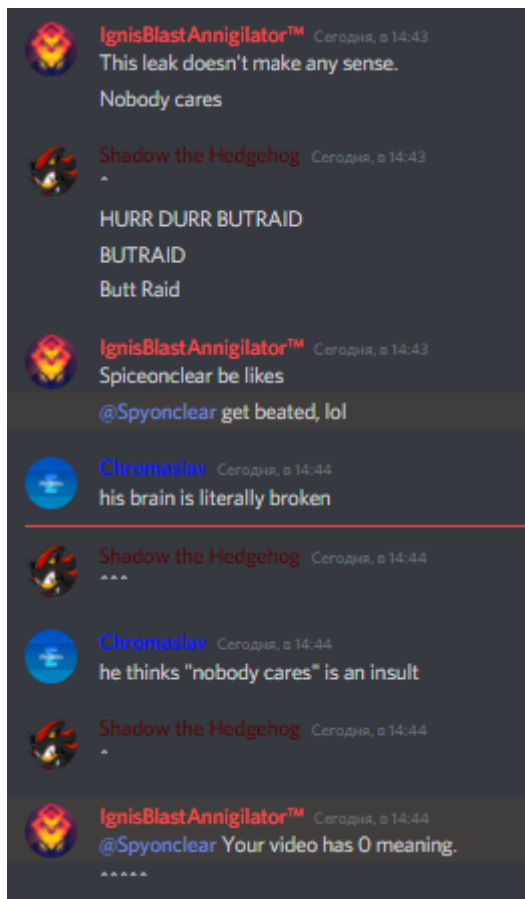

4/17 use,

I would provide more images as our investigation progresses.

Since Spy had exposed them online for their poor language. Naturally, they did not like that.

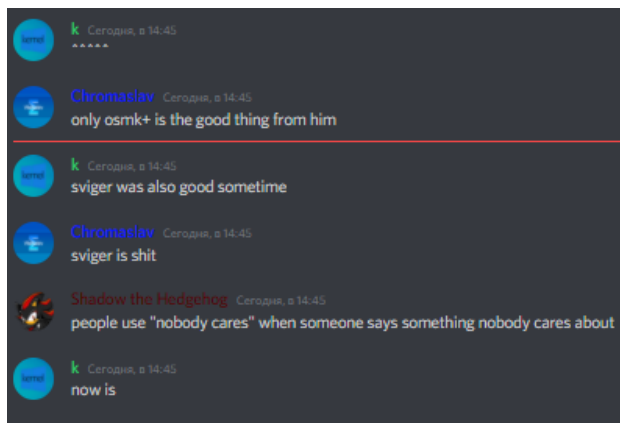

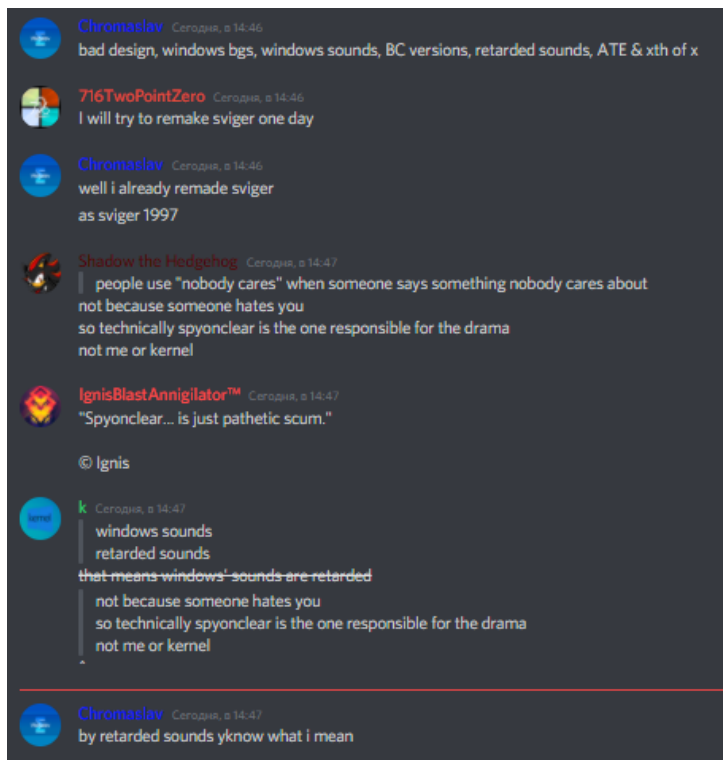

The interesting moment, they were not aware they crushed Spy's trust on them.

Then one of them blamed Spyonclear for the drama.

I guess Spy said “nobody cares”, or I’m looking at the other person.

Fuck WNR, right?

Let's not forget about reas, of course, he did not remember much but his insight is just as valuable.
And he better not remember.

Then there's a complaint that Spy is silent "like a fish". Yes, he's not interacting. He's observing you. Problems?

I don't think this is the caught-in-action moment, because they were aware this won't go well.

Spyonclear's account termination

Dzen: I would rather let OS Concepts Wiki speak for it.

Copyright claims [\[edit\]](#)

Throughout it's first days, this video have had banned from viewing 2 times, making the situation unique.

9/20 [\[edit\]](#)

Chromatic's attack to Spyonclear's works was occurred on September 20, 2021, ~16:06, one day after the *OS Mockups Collab 2021-22 Edition* release, hence our name for it the **9/20**. Upon [eSpyzem](#)'s research, it was revealed that Chromatic copyright claimed 6 videos for personal reasons, and had little to do with copyrighted works.

However, this video alongside with 5 other videos were reinstated on September 21, ~8:00

Privacy concerns [\[edit\]](#)

As Spyonclear and Chromatic was entering the legal battle on the already-existing [Windows Mockups Cold War](#), there could be concerns over private information (Address, phone numbers, emails, real names, etc.). emails was used to Discord, although just to highlight the news over the Windows Mockups Cold War and legal disputes fueled by it.

Spyonclear's statement [\[edit\]](#)

1. Spyonclear user Update 7 in fair use, as it was designed to be free before the EULA and similar license agreement was settled back in March 2020. It is believed Spyonclear had his works on the timestamp ChromaticAeternus claims to have had. ChromaticAeternus' previous name was credited on Windows Never Released 6.
2. SevenSixteen had his rights to upload his work (Microsoft Travis) on Spyonclear's video, *OS Mockups Collab 2021-22 Edition*
3. Spyonclear doesn't believe Windows History with Never Released Versions Update 5 was made by ChromaticAeternus, and criticized the said video anyway.
4. It is unclear if ChromaticAeternus is associated with Cosmo Square, the original owner of his/her *Windows History with Never Released Versions* compilation.
5. It is unclear why Windows Never Released '20 was copyright claimed for.
6. Windows Never Released Classic had the same statement Spyonclear had as #1 suggests, although unpublished.

Chromatic's statement [\[edit\]](#)

1. Chromatic's avatar was jokingly called out to be just like the pride flag.
2. Fragment of discord conversation was released on the *OS Mockups Collab 2021-22 Edition* video
3. SevenSixteens mockups was already released as a part of the [ChromaticAeternus' OSM Episode 50](#).

September 21 attack [\[edit\]](#)

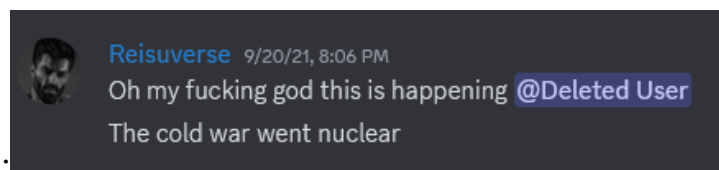

Despite being told to don't do so even since the May 11 announcement, [Ornate](#) (introduced as tipsy dipsy) copyright claimed this video, second to do so since ChromaticAeternus. Due to his bad english, it's unclear what he wanted, except possible due to the exposure of the Windows Mockups Cold War fragment on Discord.

Prior to it, Spyonclear made Rule 3 and Rule 5 of his event, with the following messages:

3. If you contributing on here, you should be aware that **i don't accept the request to take the contribution down.**

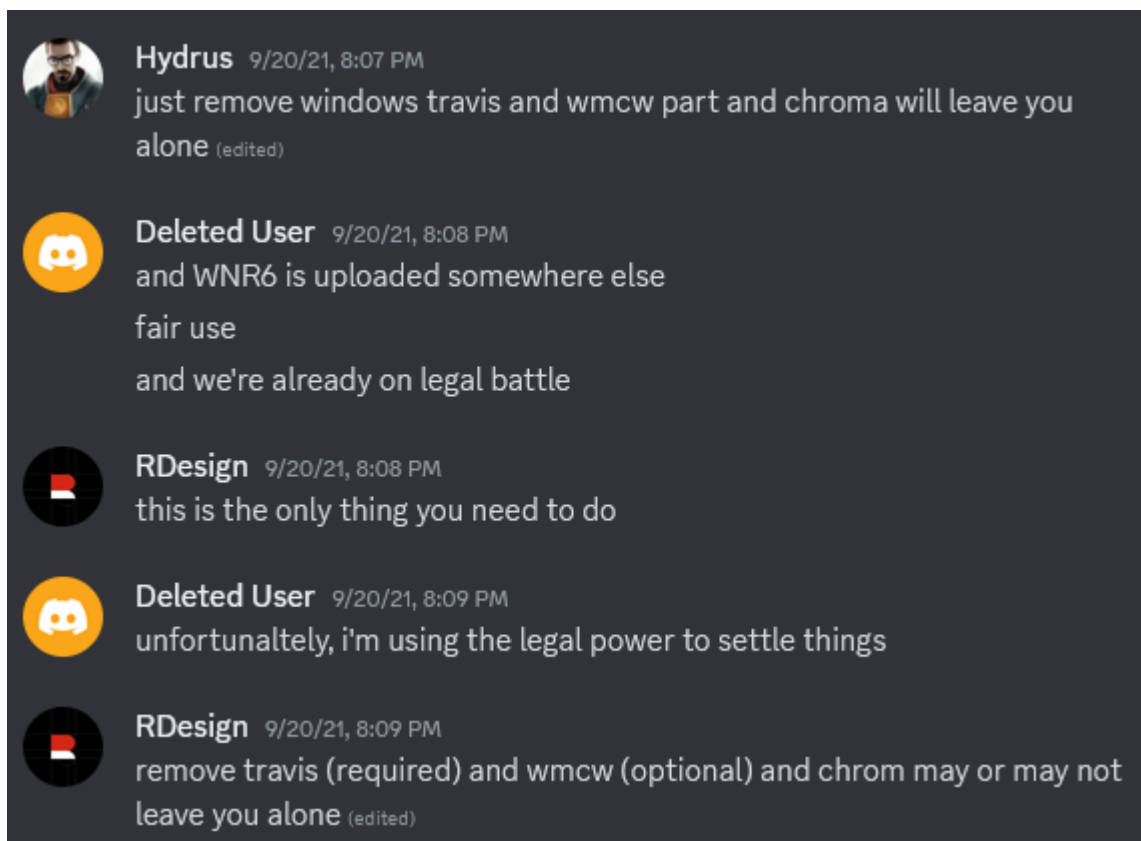

Don't damage, insult, or **disrupt in any way the OSM Collab project** and it's members. Don't do something that potentially **damage OS Mockups Collab project.**

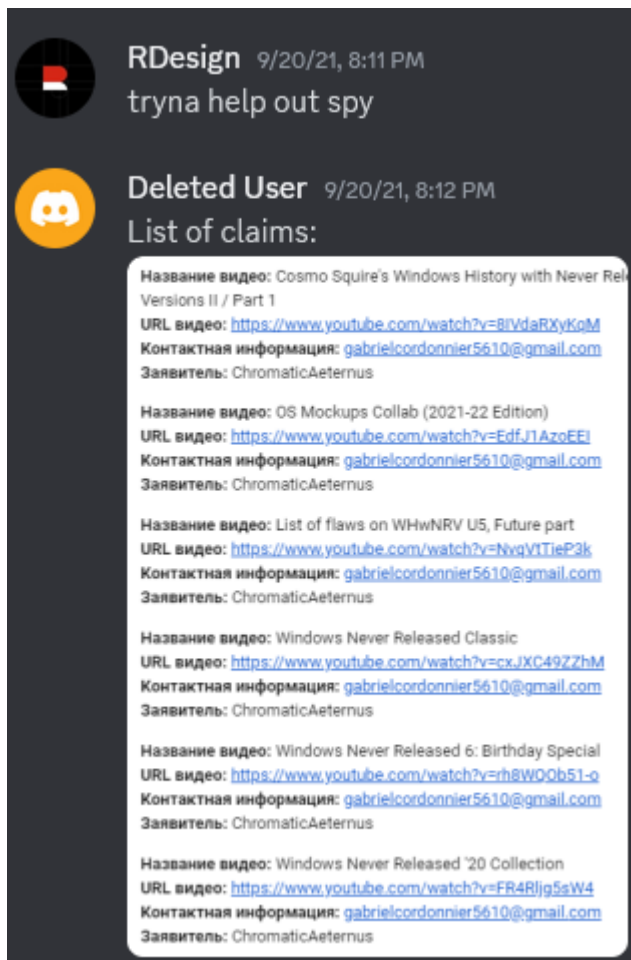

The attack was occurred on 22:02, but reported to be happened on 21:57. It wasn't noticed before 23:54, as Spyonclear made a new message. The follow-up video over a *OS Mockups Collab 2021-22 Edition* takedown was made on ~0:10, and got messaged to eSpyzem #info on 0:20. The conversation on eSpyzem between trinity#7413 and ftosorcim1234#3057 was took place on 0:54-1:01

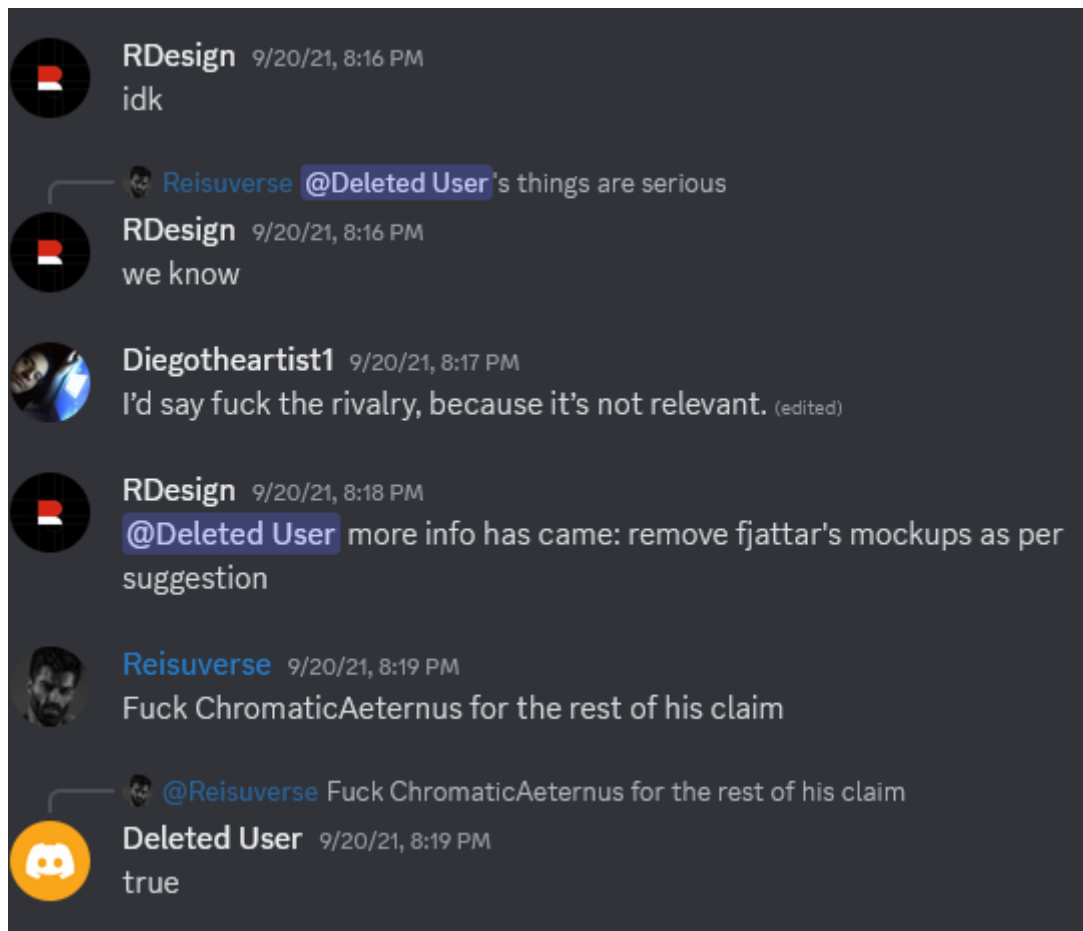

Here is RV's reaction:

And this is Deleted User's reaction (presumably Spyonclear):

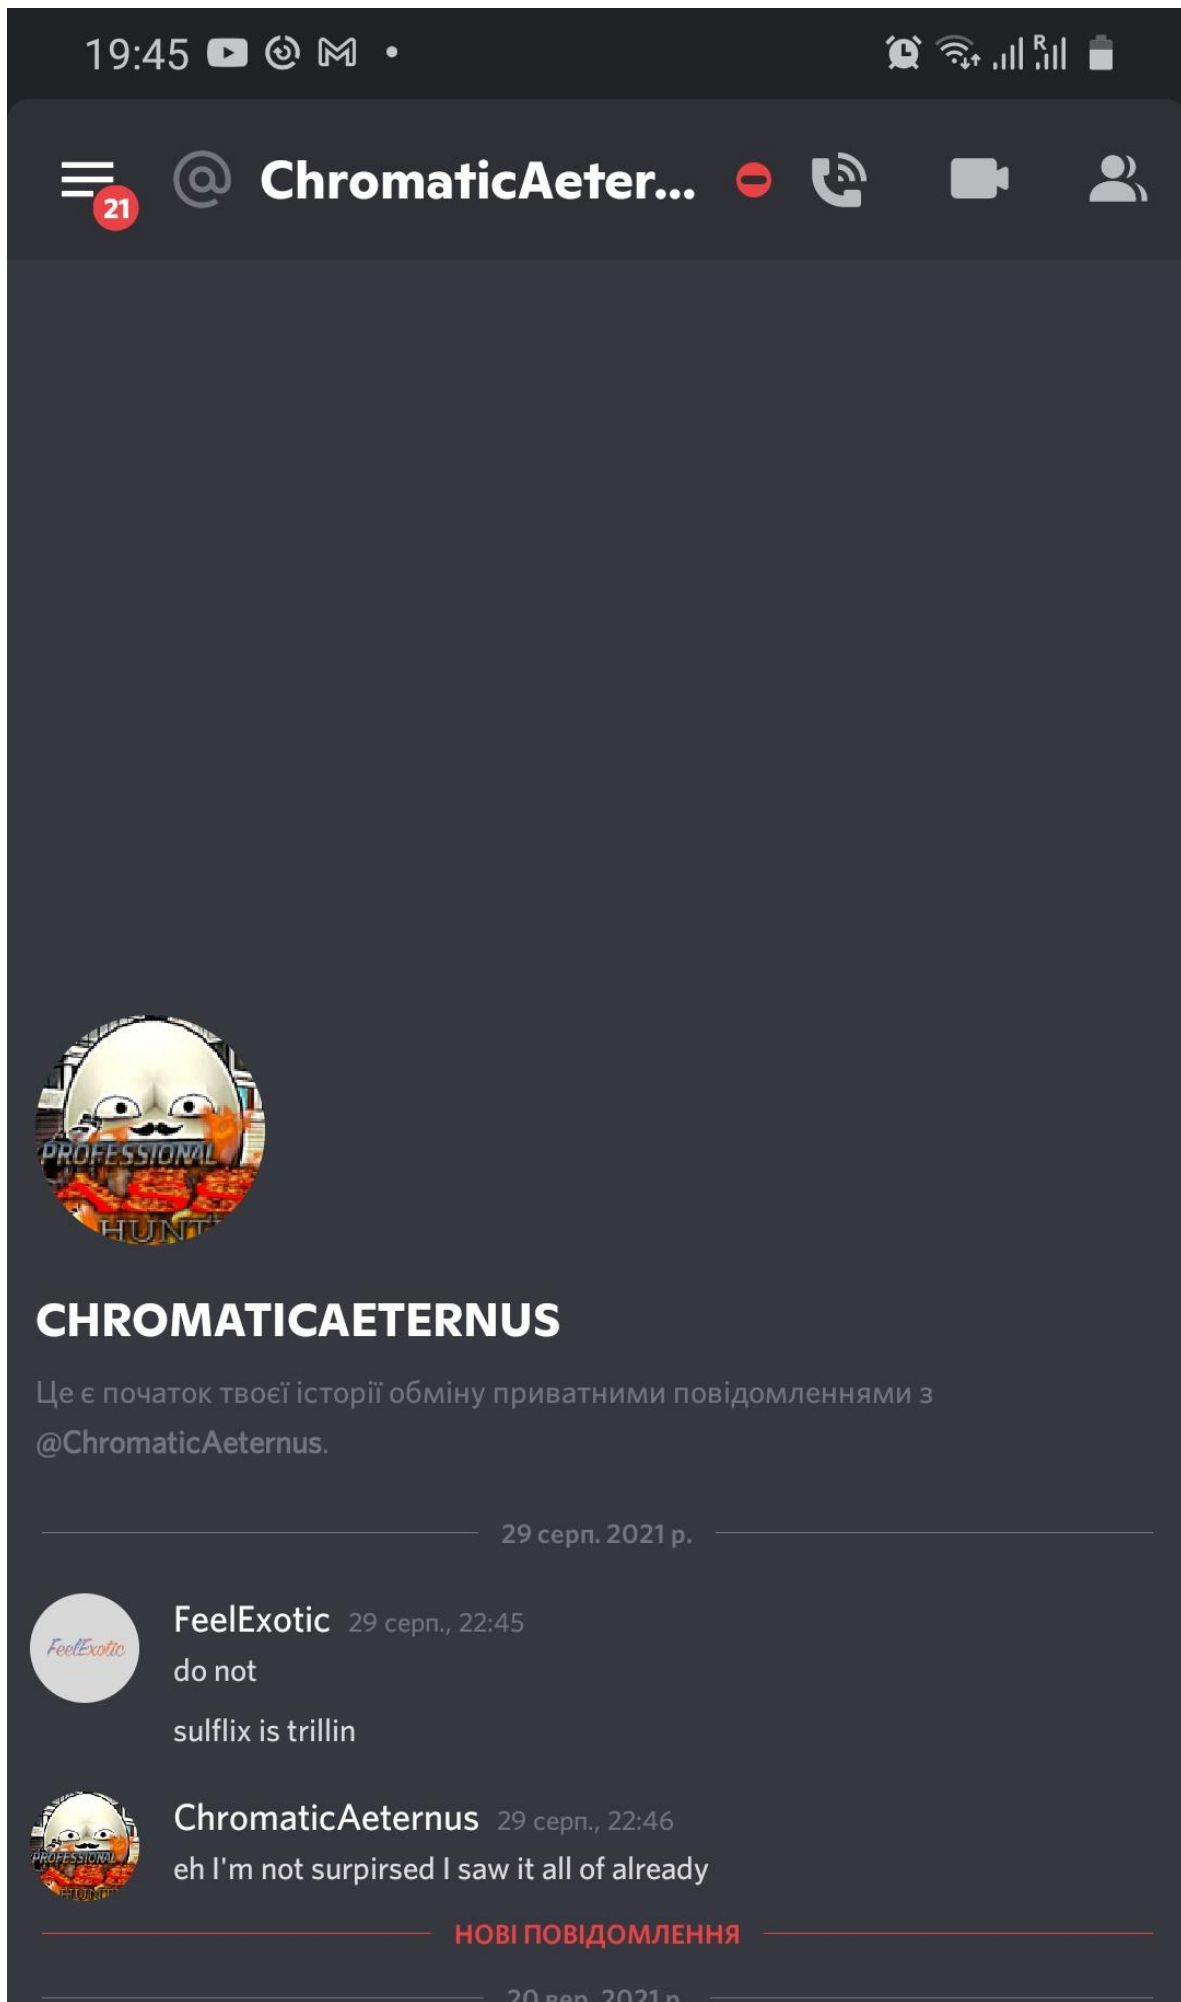

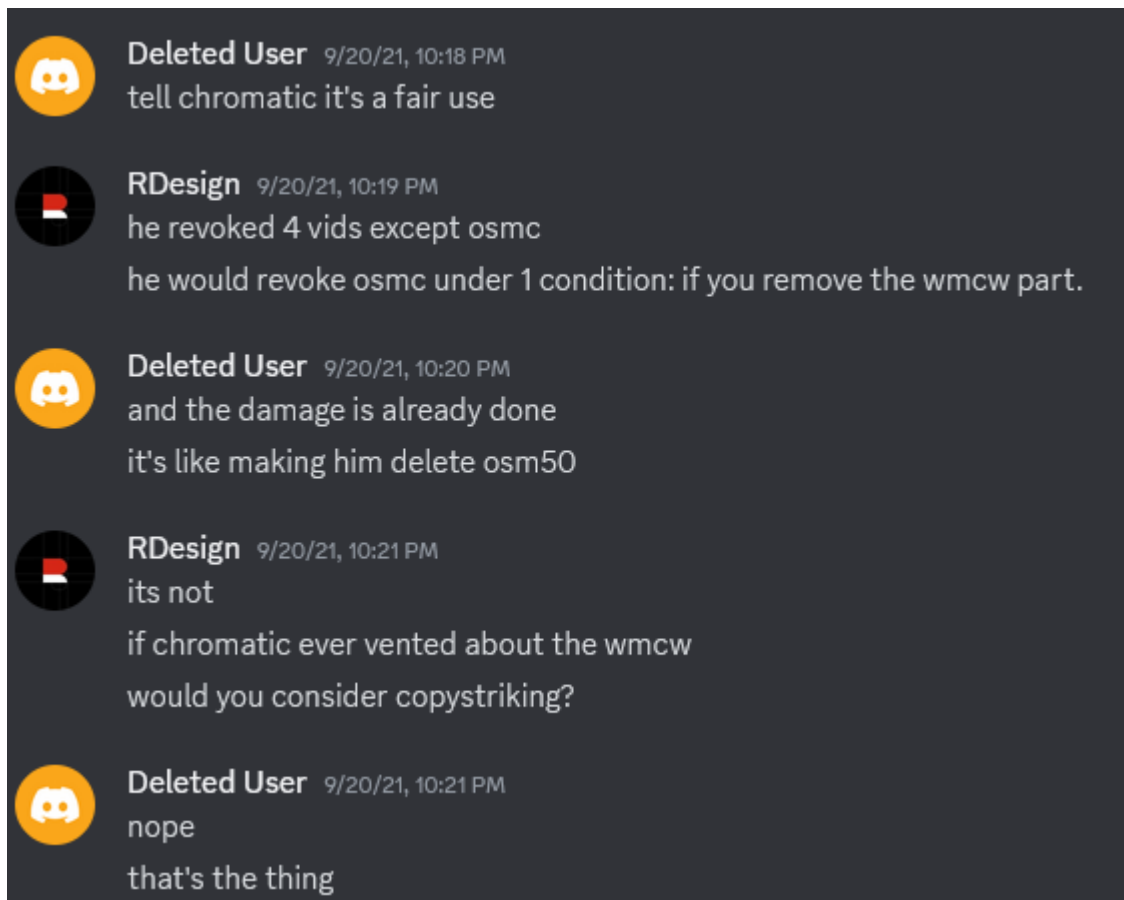

As evident by the image below, Reisuverse did not tolerated the strike issued by Spyonclear.

Chromatic then later would remove 4 of the claims, as pictured on a phone.

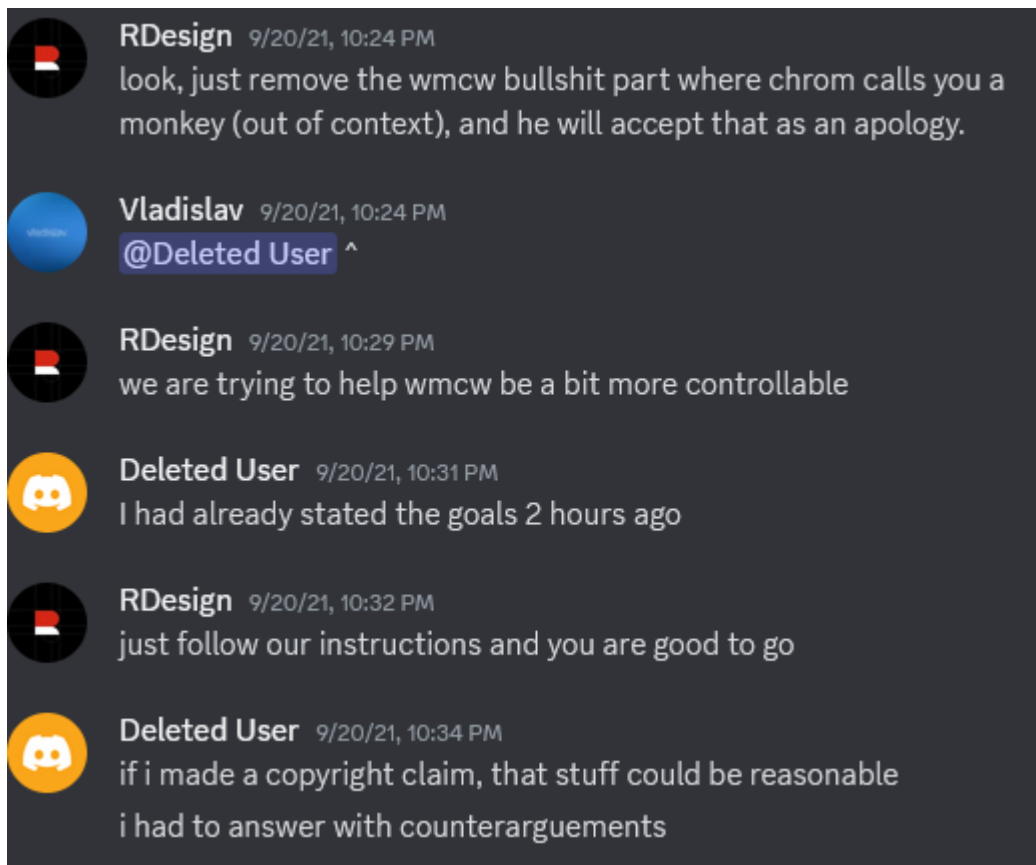

And he would plan to remove the rest of claims under the condition if the reupload of Spyonclear's OS Mockups Collab would not include any of criticism towards Chromatic and the then-one-year-old conflict.

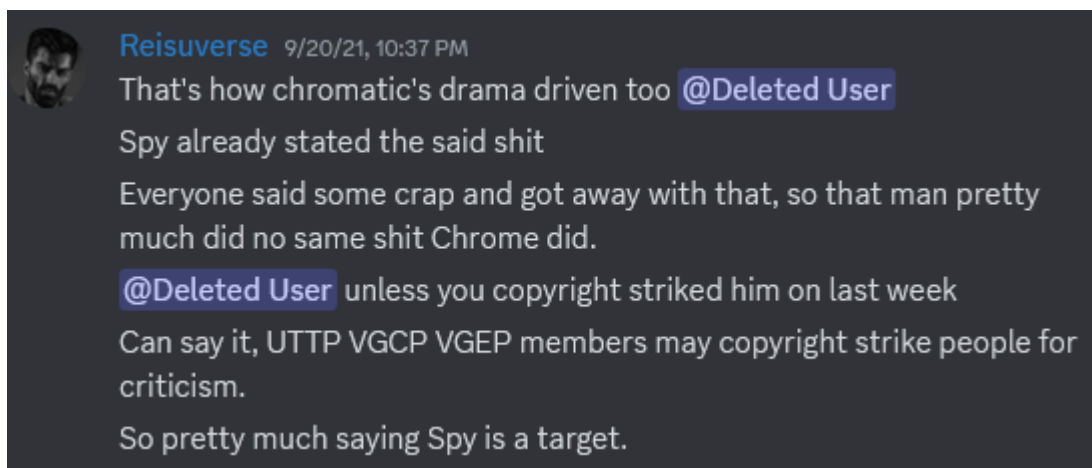

RD would suggest Spy would copyright strike ChromaticAeternus videos, if it comes with the latter's hypothetical video, calling out Windows Mockups Cold War. Spy would deny such scenario.

Spy would apparently state that it would come to be more reasonable than that.

Reisurverse had humorously likening Chromatic's strike reason to the ones from UTubeTrollPolice members.

At last, Chromatic would appear to make his own terms over what Spy should to to his own collaboration.

20:35

**announcements**

20 вер. 2021 р.

**ChromaticAeternus** Сьогодні, 20:34

So, let me be clear with what happened between me and spyonclear,

So yesterday, Spyonclear uploaded his OSMC2021, including lot of obsessive things towards me, "gay flag avatar" (smh), then at the end, screenshots of me. I got mad, of course, because I and everyone else ignored him for like a month already, but he decided to push another struggle and piss me off.

And since there was nothing possible to have the video taken down (no reports because yt won't really do anything), I had to go with the minimum: the copyright claim of the Windows Travis mockup.

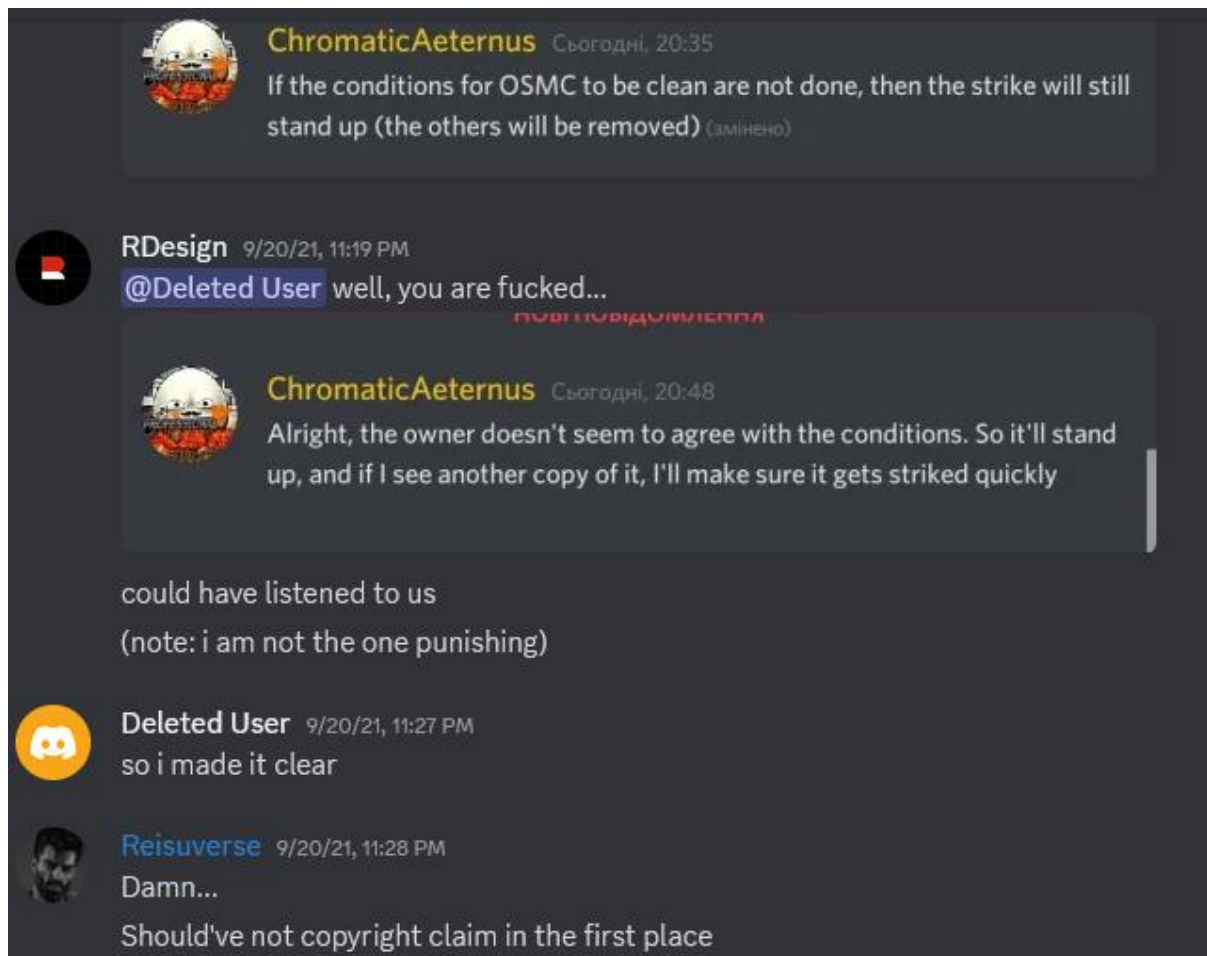

Though, the copyright claim was, not halfly-right and halfly-false, but also halfly-personal and halfly-honest, let me explain why:

- Since the mockup was originally uploaded on the OSM50 video, I don't really like the fact that there are the same identic mockups on two different episodes from different people. Meanwhile, it's SevenSixteen's responsibility. I apologize for that, but it kinda feels way to have the same thing in different stuff.
- Even though 97% of the mockups were taken with permission, One of Fjattar's mockups were used with no permission aswell, Windows Heartstar (I think there was another one too IDR). Probably because it has been uploaded on Fjattar's birthday, in honor to piss him off too.

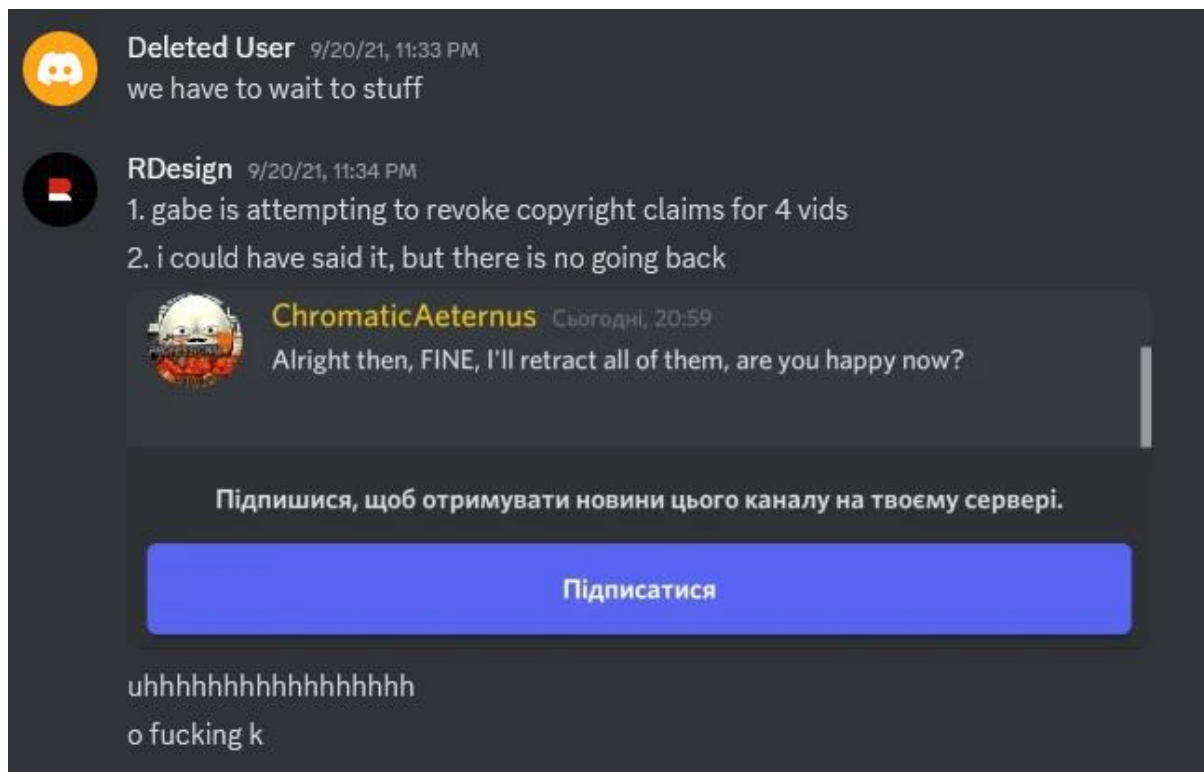

The other copyright claims were made as a "revenge" against Spyonclear, to shit on him like he did to me. These copyright claims will be revoked as they aren't fair at all, just to piss off back.

What will happen to OSMC then? I will revoke the copyright strike, AS LONG AS:

- The Windows Travis mockup gets remade to look different from the OSM50 one (I heard it was done already)
- Fjattar's mockup(s?) gets removed (Even though it's Fjattar's

But both sides would struggle through this, until the moment Chromatic gave up on that.

Spyonclear, before that moment, had allegedly attempted to copyright strike back, over which Spyonclear and RDesign had conflicted over, as both had tried to figure out the way to cancel Spy's copyright claim before it may deliver.

It is not known to me if Spy actually followed through, or he did not make a copyright claim against, but there is no proof that Chromatic had received a claim himself.

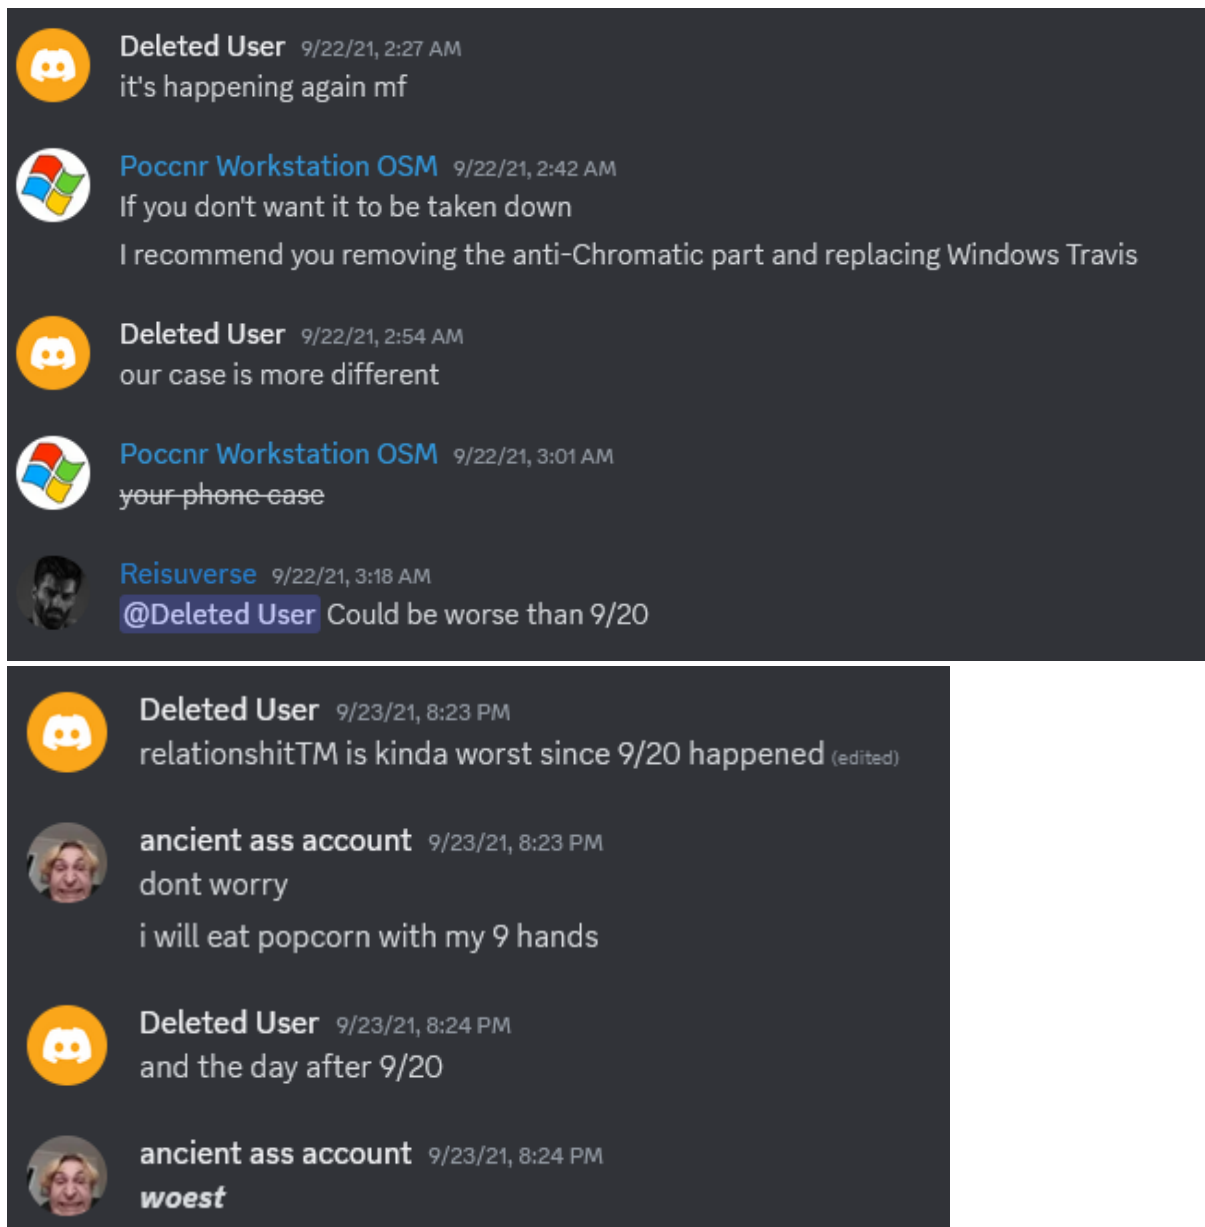

This event would be known by Spy as 9/20.

But it would be not only six of their kind.

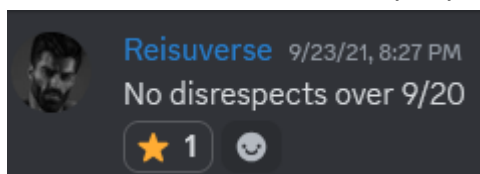

It would happen again.

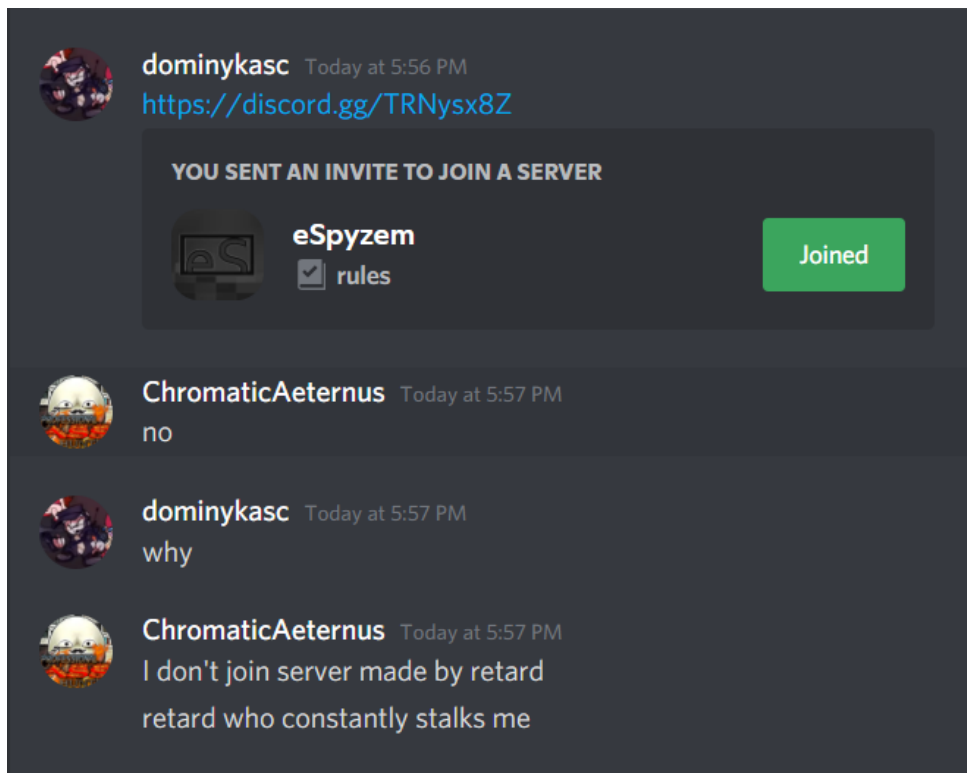

This time, by Spy's rival, Fjattar.

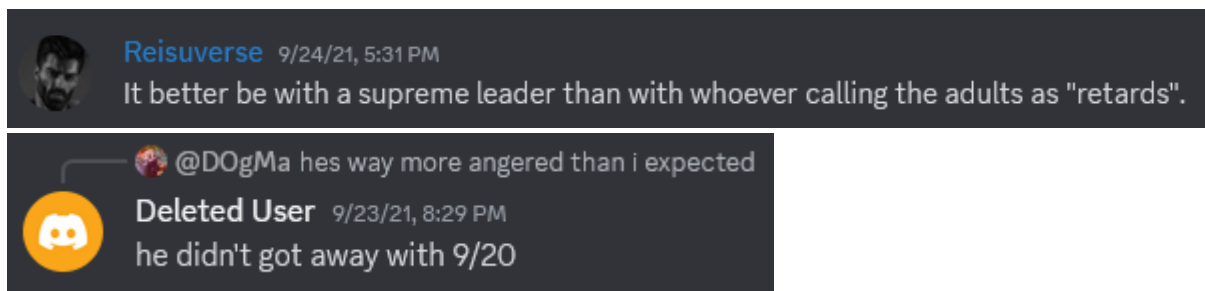

Reisurverse silenced certain people who trivialized Spyonclear channel's standing.

Chromatic had been rudely opposed eSyzem link, arguing against being a member.

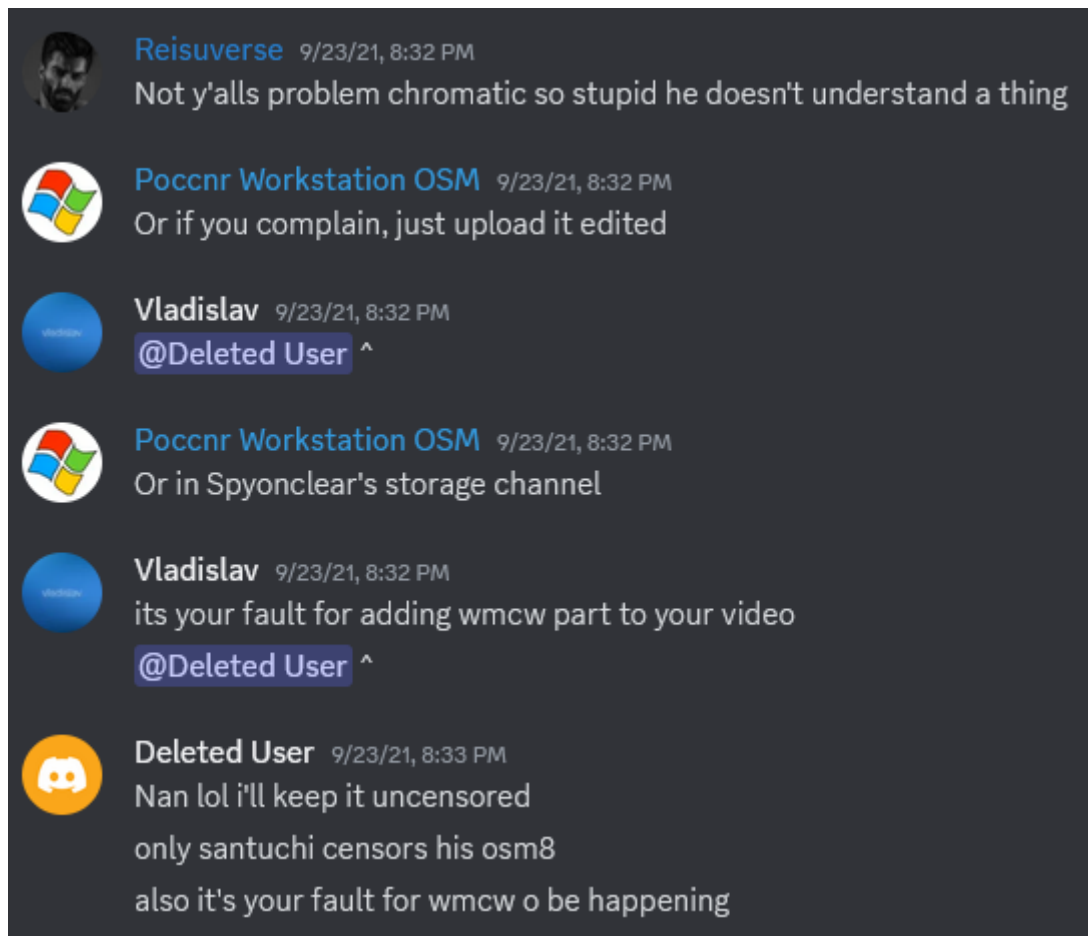

Reisiverse have a particular interest on Chroma's choice of words.

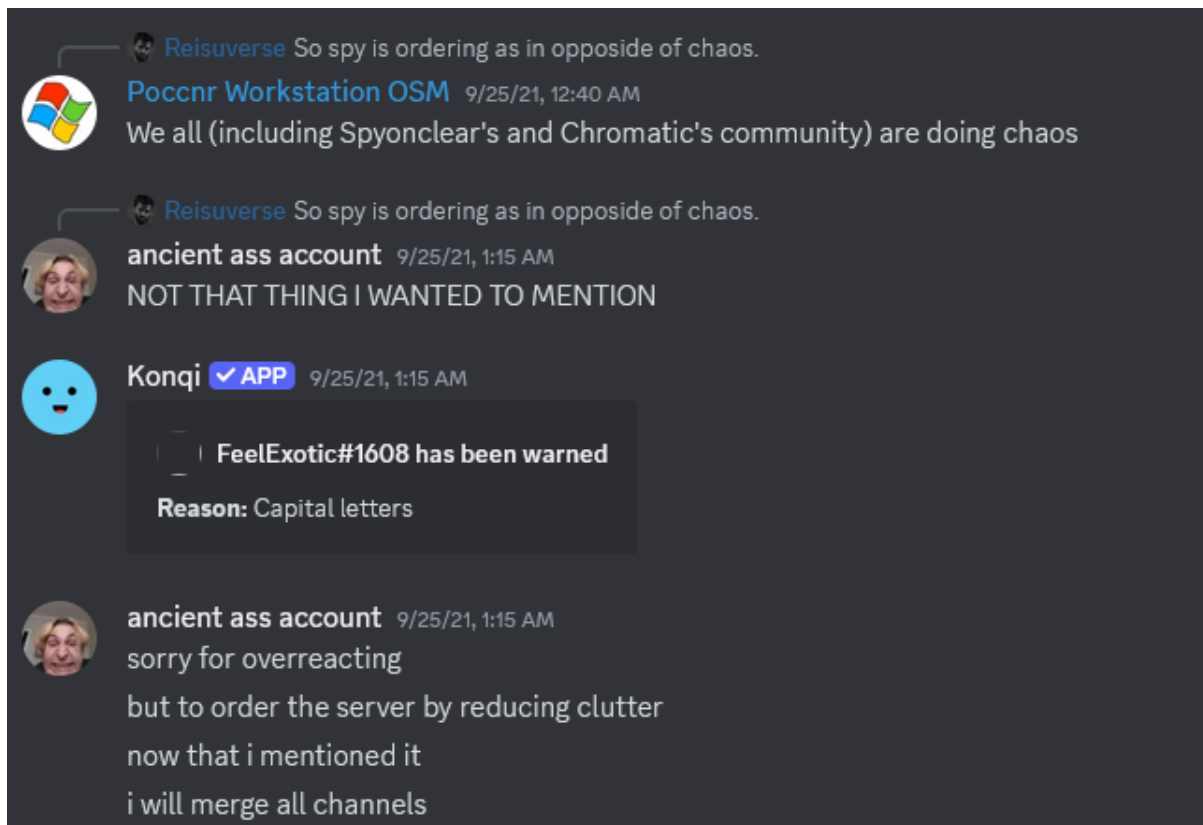

That is, also with not getting over Spy's presence on Chromaverse.

For several days, there was a lot of clashes over what should be allowed on Spy's OSM Collab.

The amout of things preceding the release of OSM Collab has been overwhelming.

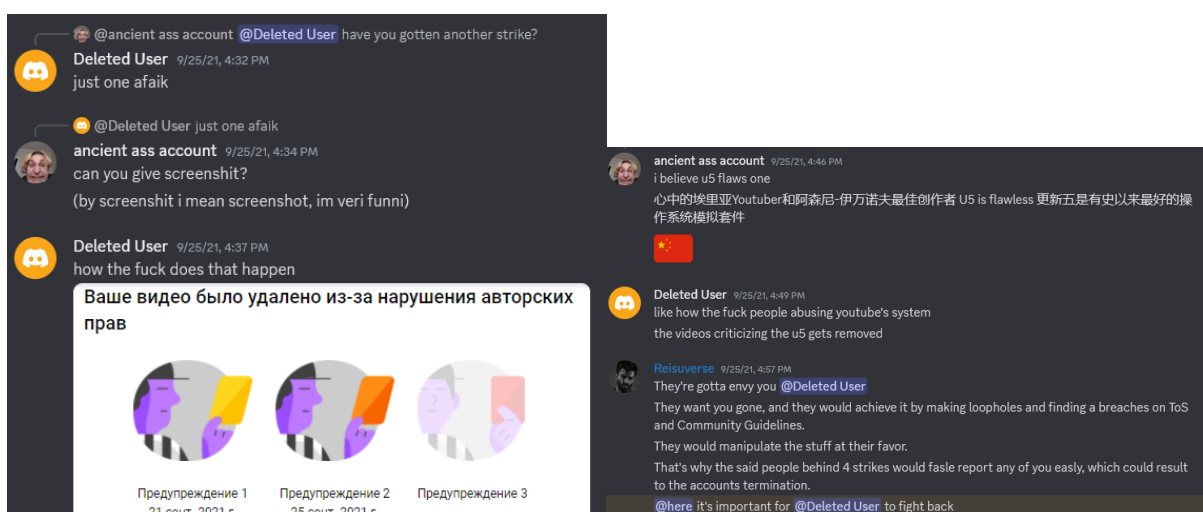

Spyonclear had been against the idea of filtering that video.

RDesign is now known on 2021 messages as "ancient ass account"

The then-main attraction of Chromaverse, Windows Never Released, reduced to something called #creations, as it settled as a reminder of alienation of WNR sharing platform.

On the day of September 25, Spyonclear had received a second strike.

Such a questionable practice. Allegedly, Fjattar contacted Minderia to strike the video.

Spy had alerted his viewers over the "U5 Flaws" video...

The question of the very existence of Spy's channel was brought up.

We're gotta investigate again so that's very eerie

 **Reisuverse** They're gotta envy you [@Deleted User](#)

 **Pocnr Workstation OSM** 9/25/21, 5:46 PM
They don't envy him
They just want their stuff to be used only by them
I know that they might go a bit far

 **Pocnr Workstation OSM** 9/25/21, 5:55 PM
But just IGNORE then
Or reuplod the taken down videos but some parts removed

 **Reisuverse** 9/25/21, 5:56 PM
He ignored them
The big difference is they arent ignoring him
They sabotaged OSM Collab release and threatening [@Deleted User](#) termination.

Spyonclear had decided to release the information about the copyright claims. There was three videos that was deleted.

the research was made over sept. 21 attacks recently
on the sept. 25 attacks i don't have a idea wtf minderia forget about at
the legendary 🌈 botnet loophole was used for it
cuz it's "cool"

Deleted User 9/26/21, 2:29 AM

no human interaction means that guy know any of the breach on the platform's part to do shit
both of subjects evaded any dialogue prior to copyright strikes.

Google brought me the way for us to make a direct dialogue over the aggressors, as we will speak to
these ones who made a damage to our works and me personally.

Deleted User 9/26/21, 2:36 AM

tomorrow we'll find a way to free these videos at any tactic, without censorship

Reisuverse 9/26/21, 2:40 AM

Well, that's not a big of a catch.

@Deleted User on the sept. 25 attacks i don't have a idea wtf minderia forget about at

Reisuverse 9/26/21, 2:08 PM

Minderia stalking you too 😂

Why he can't release U5 R2 thought

Hydrus can we talk about something other than spyon-chroma conflict pls

Vladislav 9/26/21, 5:53 PM

blame spyon for putting anti-chromatic stuff in his osmc 2022
if he wouldn't add that his video wouldn't be striked

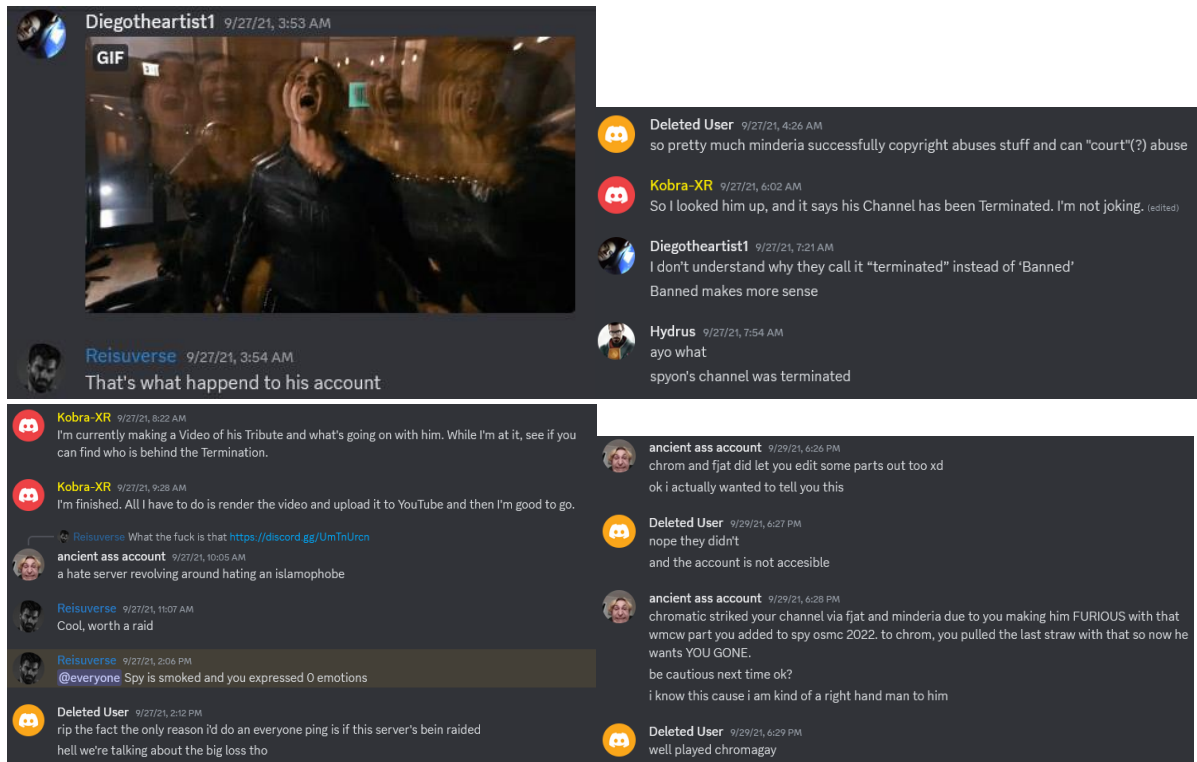

Reisuverse 9/26/21, 5:55 PM

Y'd always blame spy for any of your shit

That's unhealthy obsession to blame him all time.

On the day after that, Spyonclear's channel was terminated.

I'm currently making a Video of his Tribute and what's going on with him. While I'm at it, see if you can find who is behind the Termination.

Kobra-XR 9/27/21, 9:28 AM
I'm finished. All I have to do is render the video and upload it to YouTube and then I'm good to go.

rip the fact the only reason i'd do an everyone ping is if this server's bein raided hell we're talking about the big loss tho

Deleted User 9/27/21, 4:26 AM
so pretty much minderia successfully copyright abuses stuff and can "court"(?) abuse

Kobra-XR 9/27/21, 6:02 AM
So I looked him up, and it says his Channel has been Terminated. I'm not joking. (edited)

Diegoheartist1 9/27/21, 7:21 AM
I don't understand why they call it "terminated" instead of 'Banned'
Banned makes more sense

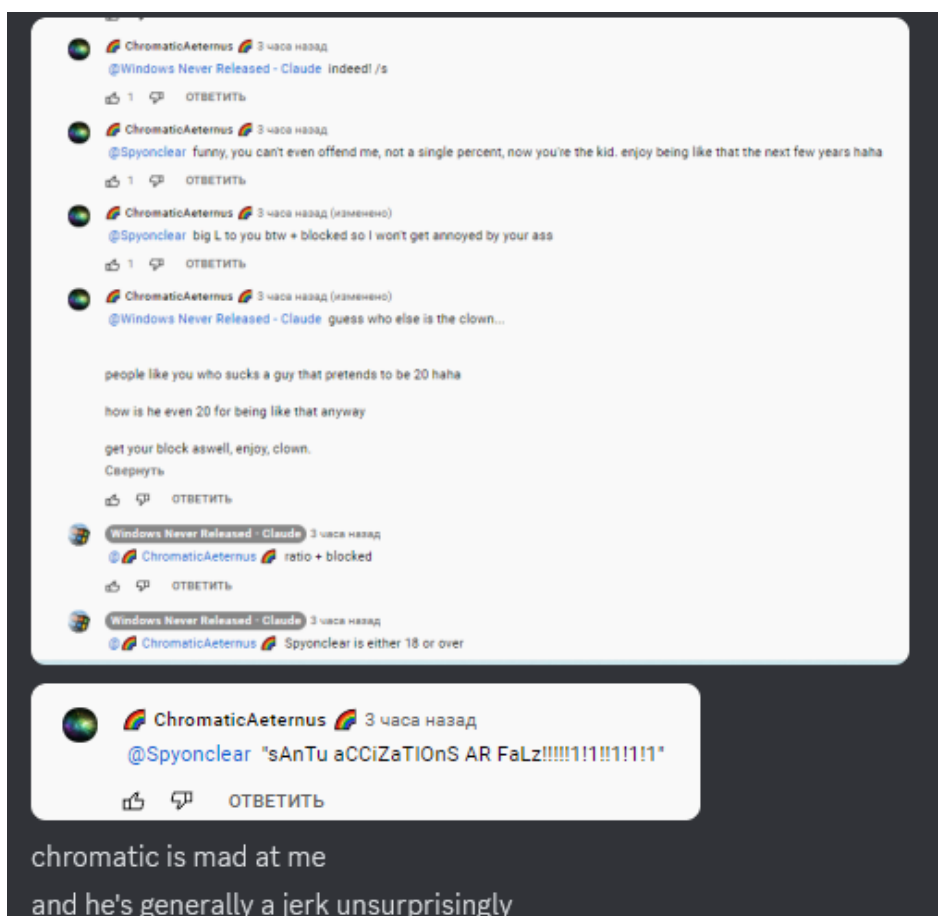

Hydrus 9/27/21, 7:54 AM
ayo what
spyon's channel was terminated

ancient ass account 9/29/21, 6:26 PM
chrom and fiat did let you edit some parts out too xd
ok i actually wanted to tell you this

Deleted User 9/29/21, 6:27 PM
nope they didn't
and the account is not accesible

ancient ass account 9/29/21, 6:28 PM
chromatic striked your channel via fiat and minderia due to you making him FURIOUS with that wmcw part you added to spy oscm 2022. to chrom, you pulled the last straw with that so now he wants YOU GONE.
be cautious next time ok?
i know this cause i am kind of a right hand man to him

And this was OS Concepts Wiki's take on it:

September 26/27 [\[edit\]](#)

[Minderia](#) are presumed to be used to launch the fourth copyright attack to Spyonclear's channel. Thanks for 3 successful copyright attacks, Spyonclear's channel is terminated.

Copyrighted video was been reportedly designed as the remixed version of Arsen54800's Windows Never Released 100, as it is unclear why Minderia assuming himself as the owner of Arsen54800's content.

It was later revealed it was one of the personal attacks coordinated by ChromaticAeternus, thanks for his apparent anger issues, as he somehow convinced Minderia to use the breach to copyright claim Spyonclear in favor of Chromatic.

However, several Spyonclear's videos was reuploaded to the secondary channel.

Copyright attacks coordinated by Chromatic was declared illegal, and OS Mockups Community was declared dead.

Soon after, a few channels was returned to their life. Failsafe mode - Claude gets renamed to Windows Never Released Claude, and he(?) making rofl mockups thanks to Chromatic. He became a face of the OSM Community's downfall, on which only Chromatic had to be blamed for.

Naturally, Spyonclear had to fight over the loss of his channel, as he let them notice over the destruction caused by their attacks. over the course of the rest of September, the said few channels making videos alike chromatican channels was designed to do, like Operating Systems Mockups 60 and several Windows Never Released 10 videos.

Over that, on September 30, Copyright Strikes Talk server has been created, leaded by [FeelExotic](#) on the response of the situations ahead of September 26 attacks, as Spyonclear and Fjattar had to talk over it. Both sides spend the entire lifespan of this server to hate each other, venting off-topic

Once again, on September 31, the second server over it has been created, this time it was leaded by [ftosorcim1234](#), but later owned by FeelExotic. at first, there was no progress felt to be occurred, not until Spyonclear has been asked over the permissions of Fjattar's mockups for *OS Mockups Collab 2021-22 Edition*, in response the screenshots of the copyright claim was posted there.

A few group chats was been created or renamed presumably to reflect this kind of a battle, however DM groups has been considered useless by Spyonclear and some more people. In one of DM groups, Fjattar and Trinity spent hours to rename it. and some other people wasted their time to pin and unpin messages.

The Tima1000's server to handle things was made on October 2, 2021. Even then, Ornate evades the topic. An alternate server was created on October 13, but no actual use was found on here for 3 days.

All they had to do is withdraw their false copyright claims, which they did not done that at that moment of October 2, 2021.

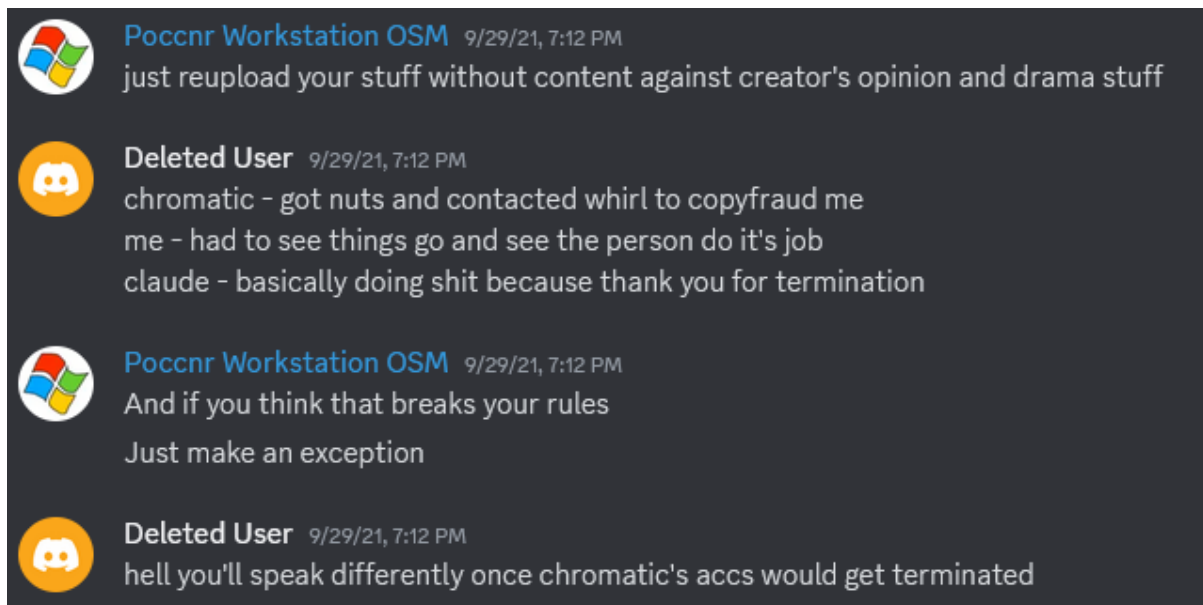

Spyonclear's channel was available on October 12, until Ornate launched the fifth copyright attack against his channel.

Spy for weeks had fought like hell.

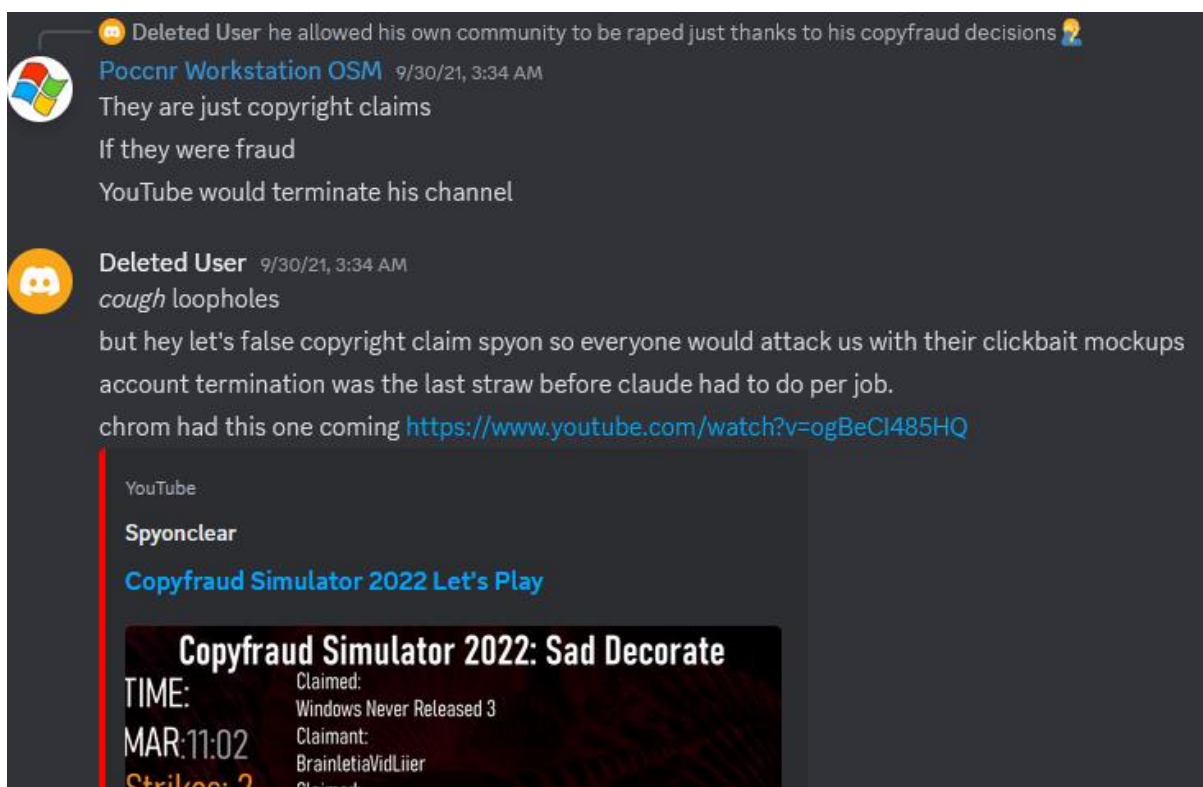

Due to the nature and reason of copyright claims, it would be dubbed for him as *copyfraud*, and act of removing the strikes as *copyfraud withdrawal*.

At this time, Claude had been protested Spy's channel termination.

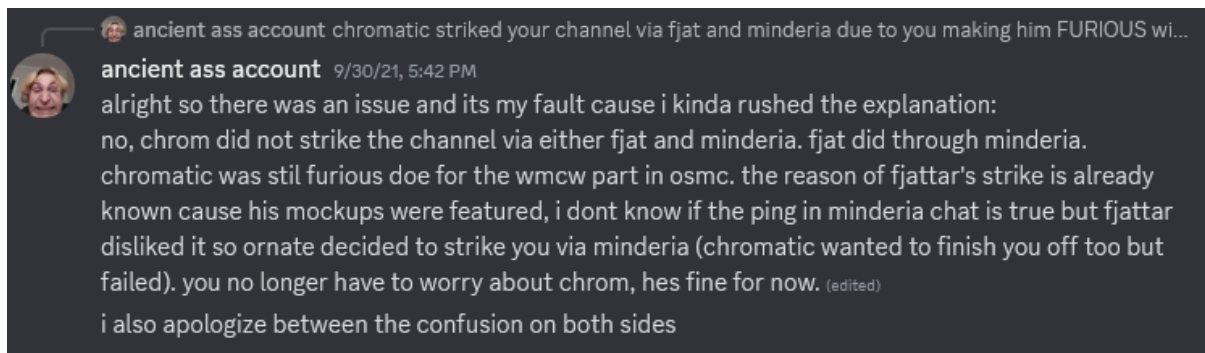

Spy would call out ftosorcim, one of chromaticans, over antipathy.

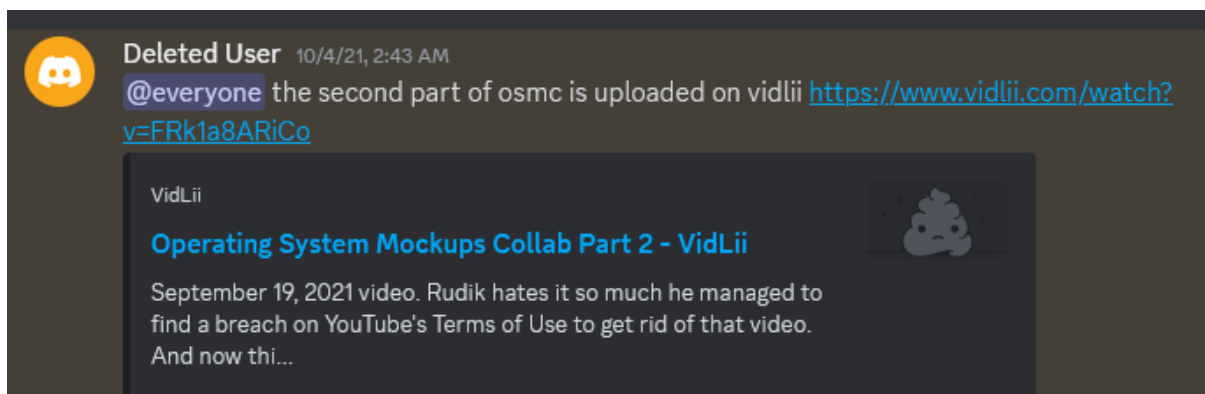

Spy had his second channel, as on there he vented about the prejudice

RDesign called Chromatic as not responsible for Spy's channel termination

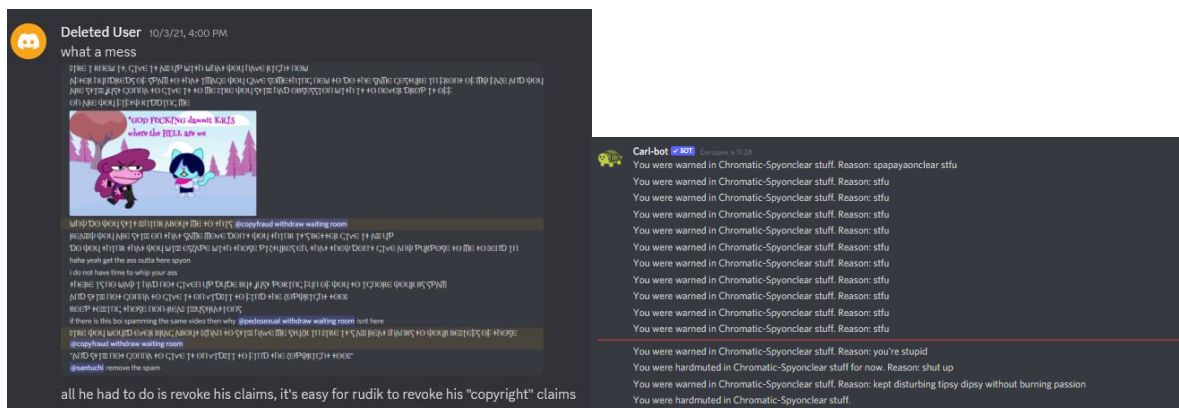

In the following days, Spy had reuploaded his works on VidLii, the 2008 YouTube clone.

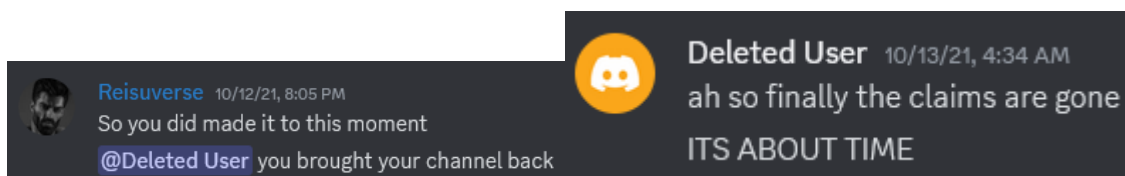

Dzen: Spy and Fjattar fought over the availability of the former's channel on the group chats. Surprisingly, Reisiverse (trinity?) and Fjattar furiously renaming the group chat. *Is that the same chat depicted on 4 following screenshots?*

Spyonclear had brought his channel back, on October 12.

He celebrated the liberation with a lifestream.

The second Spy had done that⁷, the same guy striked him, having his channel terminated again.

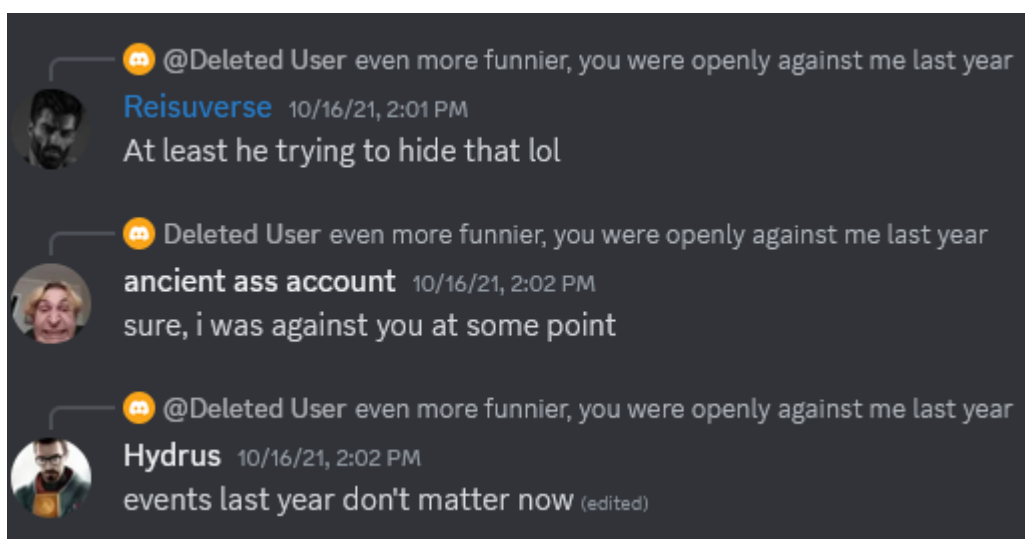

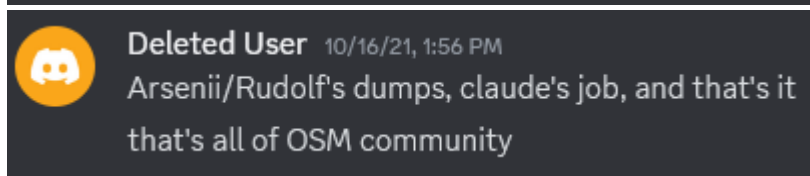

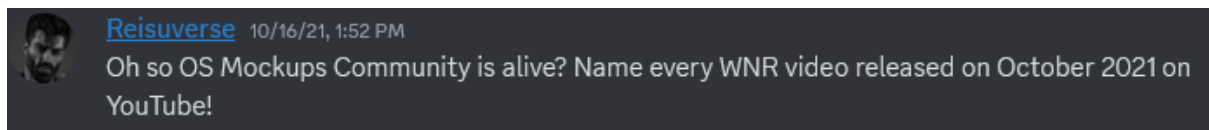

⁷ Spyonclear's channel reinstatement had been estimated to last a day or under, ending on October 13.

Also, quite ironically, RDesign had complained about the measures Spy taken on eSpyzem on this server's time of despair.

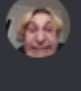

The times of despair was notable server-wide.

Big words for someone who isn't aware OSM Community is dead
But we have to focus on cases

This server has been reached a breaking point. The moderation had presumeably kicked the most inactive or anti-Spy out of the people involved on this conflict.

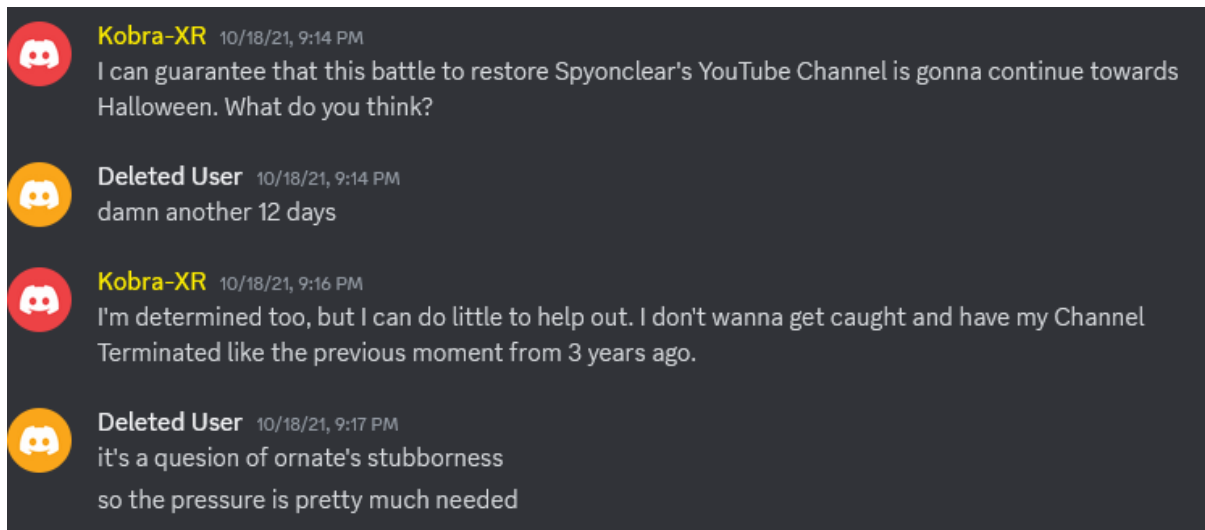

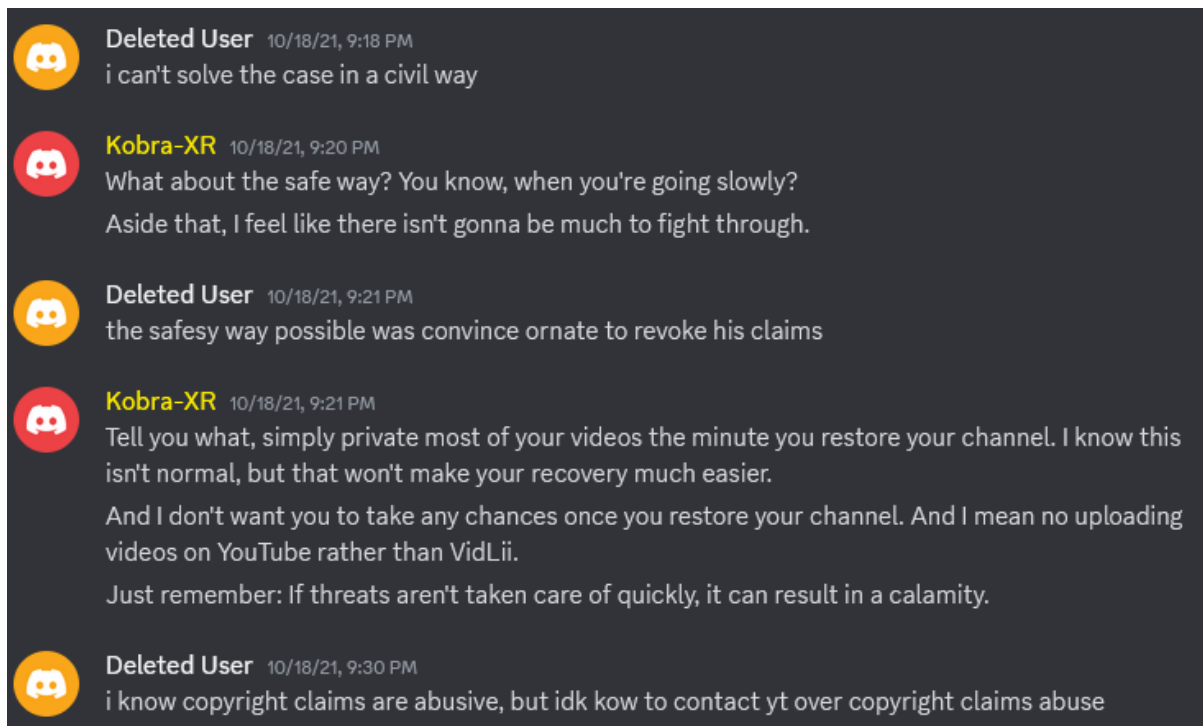

It would at first have little effects

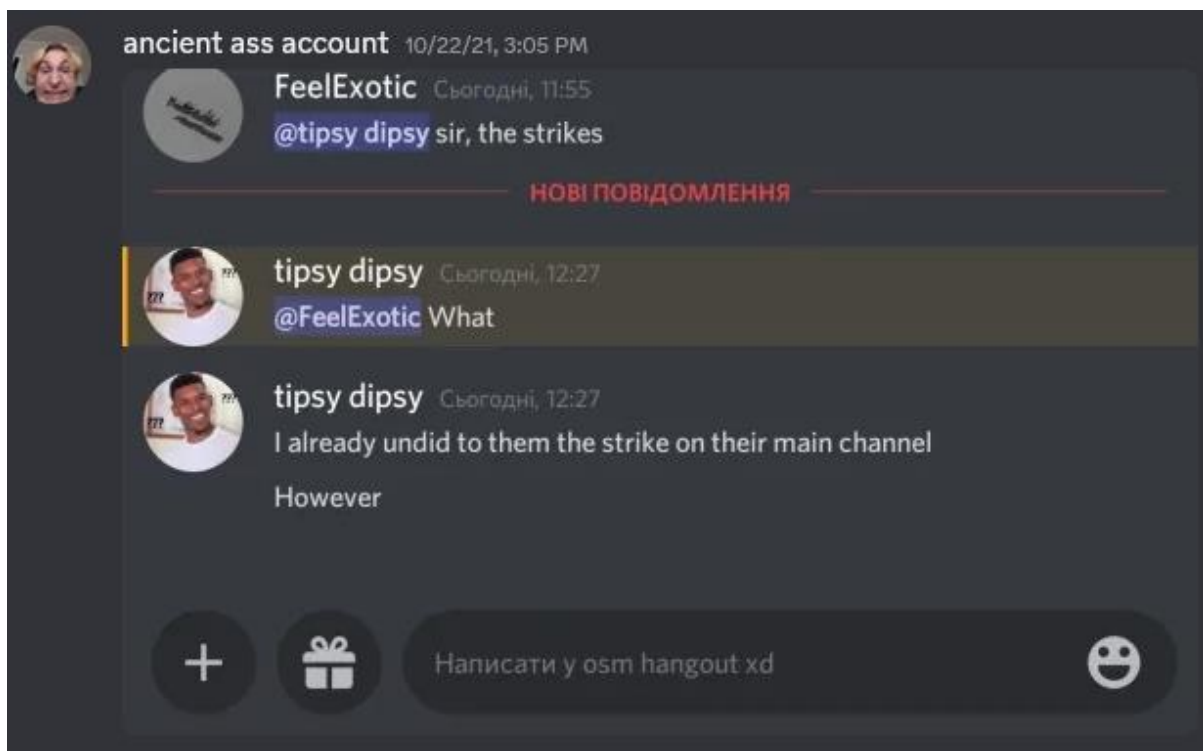

Kobra-XR had his own channel terminated in 3 years before Spyonclear's moment.

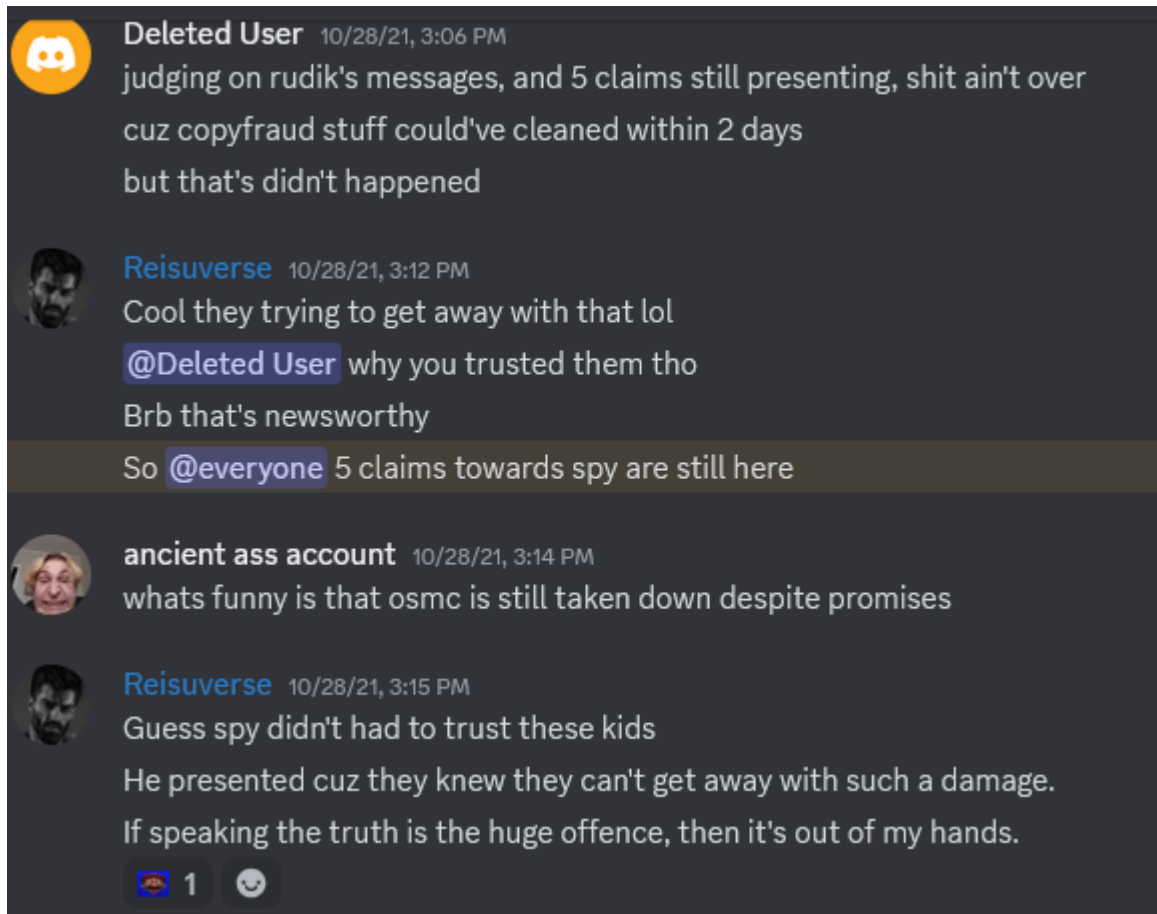

On the 22th, Spyonclear would see Fjattar revoke his strikes.

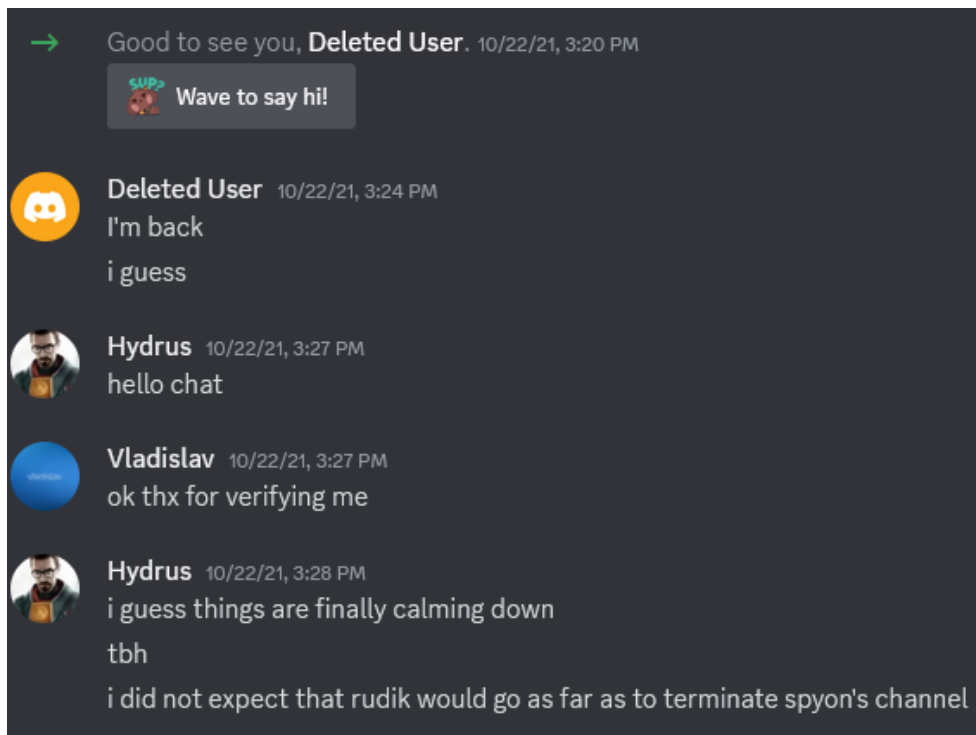

On the next day, Spyonclear⁸ had returned to his own server, after receiving the news and having his channel reinstated.

⁸ He does not use his other account "root". The one what is now deleted was his main account.

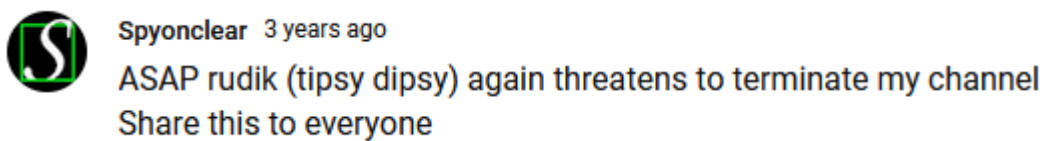

Thought, not all of the strikes had removed. In fact, only one was seen to be undone.

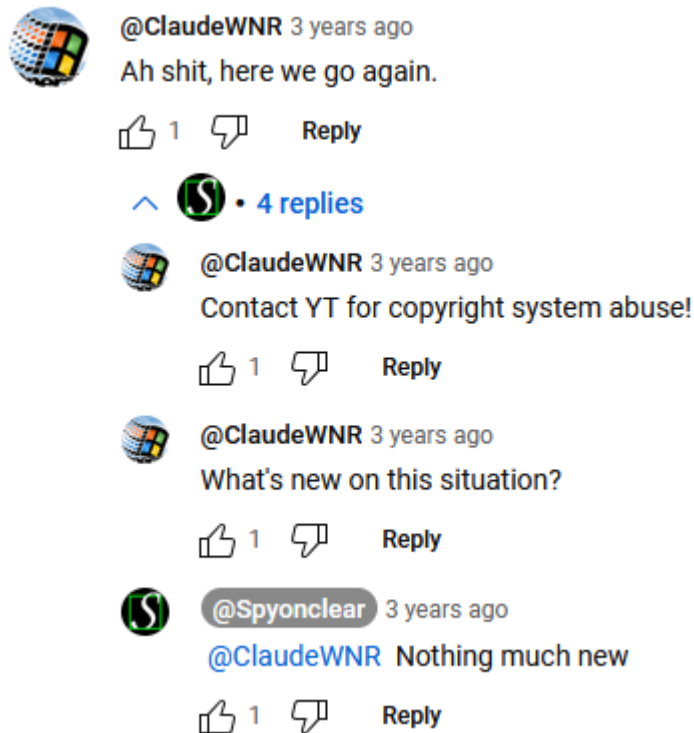

Still, Spy had welcomed several people involved on the infamous eSpyzem moment back.

But for some time, there was threats to terminate for a third time.

This alerted Claude, the one who protested 9/20 and channel termination.

It is unclear if Spyonclear's account had been terminated ever since, but Spy has been defiant. And his defiance played a role on having *Spyonclear 2* channel brought back on or before November 25, celebrated accordingly.⁹ "We're back", said on a video, depicting System Recovery Options on a Windows 11 advertisement background video.

Spy had also made sure the moment his channel was in danger had been never forgotten, as evident on the use of term 9/20 as recently as 2024.

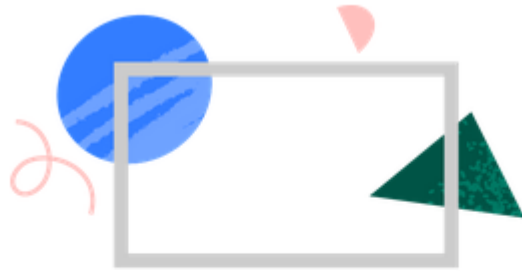

This was the story of the new-level struggle¹⁰.

Reisiverse: In general, Chromaticans sucks at trivializing the lawfare that was in September 2021. They are proven to be incapable of handling criticism, and they had made some remarkable atrocious moves on silencing Chromatic critics

The more recent example of silencing through the same old means would be on Spyonclear's [This is not The X-Files](#). Created on June 17, 2024, and copyright claimed in the following day.

¹⁰ It is still known for the people involved on Spyonclear's channels lawfare as 9/20. Spyonclear would also use the term 9/20 over the attempts to silence Fjattar by meaning of making a copyright takedown notice.

The copyright claimed fragment in question is Chromaverse Jackbox Games, the incel parties brought to you by Minecraft generation, and byproduct of weaponized autism.

Was that the only attack of it's kind?

Dzen: Not quite. As far as I'm concerned, Spyonclear and Fjattar had exchanged threats of copyright claims over the edits of Spyonclear's own work.

Reisuverse: You're not done yet, mysterious boy!

Reisuverse from January 18, 2025: Looks like Spyonclear is not the only victim of Chromatic's lawfare. Project DSF, formerly known as Dogman Super Fan, had looking like to have received copyright claims in 2 of his videos. If these were separate copyright claims, that could mean he had to get 2 strikes, putting his channel at risk.

Chromatic is irrational, abusive figure, willing to get rid of his competitors for his benefits. Despite the Heavenite Mockups Kit being public, it should be avoided.

Thought Chromatic had plagiarized ideas and works from Spy, we'll come to that later. I thought it's just funny to complain about works being reappropriated somewhere else while doing exactly that.

Spyonclear's 21st birthday

Reisuverse: It looks like some kids trying to ruin the fine man's birthday.

Campaign to ruin Spyonclear's birthday (March 24) [\[edit\]](#)

Fjattar planned to ruin Spyonclear's birthday, possibly with the usage of the Spyonium.png image. Fjattar announced his willing to use this image back in March 17 on Direct Messages at Spyonclear on Discord. The said image uploaded on OS Mockups Wiki, however Fjattar's FANDOM account was banned from OS Mockups Wiki, but the image was used on **Windows Mockups Cold War** page. Fjattar's PM messages and Spyonclear's reaction causes drama.

Spyonclear's notice of Fjattar's plans weren't so soft, and his haters received a warning on March 20 Q&A, on which Spyonclear says he won't tolerate fighting related to the birthday, even if the offender tries to justify such an attacks. This measure has been meet with no initial reaction.

File:Birthday measures.png
An warning from Spyonclear for Windows Mockups Cold War fighters.

Fjattar uploaded an hate birthday video named *history that even though repeats*. Spyonclear points out that such an video is generic. It wasn't the first time Fjattar tried to make such an hateful video about someone's birthday. Spyonclear didn't cared about that video, but noted that this video isn't made on Vyond.

On Windows Supporter [Revolutionary Parish], Fjattar also uploaded "Destroying" videos towards Spyonclear and [Arsen54800](#), and goes ahead to create an fake WNR225, attacking Arsen5400, and going after Spyonclear, creating an fake "OS Mockups Super" episode, full of hate mockups of Windows *Spyonium*. Santuchi wasn't mind-wise either, since he uploaded an *for the person who thinks tribes are still a thing on the osm community* video on ArchiveFX, which leads to Spyonclear to call out him for being an coward for not uploading such an video to SantuchiOSM or the main account. Spyonclear further commented on it all, saying that he documented all of their attempts to ruin his birthday.

Despite all of this, nobody of the haters was punishment for the attempts to ruin Spyonclear's birthday.

Yes, I'm using the same wiki. Problems?

What's with missing file "Birthday measures"? Autism. To be specific, it's one of the images with the only goal of having to annoy.

Believe me, this is one of the way people doing this outing themselves as having autistic tendencies to make such artwork to protest.

Chromaticans REALLY HATE to be documented

Reisuverse: Let me use the good old source wiki to get to the point. I would like to say Spyonclear's haters really hated to be documented and have their antics to be displayed on YouTube.

Spyonclear's videos and revelation (April 16) [\[edit\]](#)

Spyonclear showcased the article of the Windows Mockups Cold War, implying that there is nowhere to hide, and the warriors should face the history and consequence of the war. The video contained text-to-speech and the screenshots of this page on OS Mockups Wiki.

His haters made a drama over this video when it getting premiered, disrespecting Spyonclear on the chat over the cold war.

Spyonclear used the rights to block the fighters, who has been involved on the drama on the comment section and the chat, and deleting almost whole drama across the chat, leaving it half-empty.

Spyonclear, unveiling the issues about Windows Never Released or OS Mockups Community, made wekky, Nermal Cat, and aesthcape to comment on that video. aesthcape made some undisclosed drama over the meaning of the long-term conflict.

Thanks a lot of the drama, an second video has been uploaded under a name *Reaction of Chromaticans about Windows Mockups Cold War video*, showcasing the said drama.

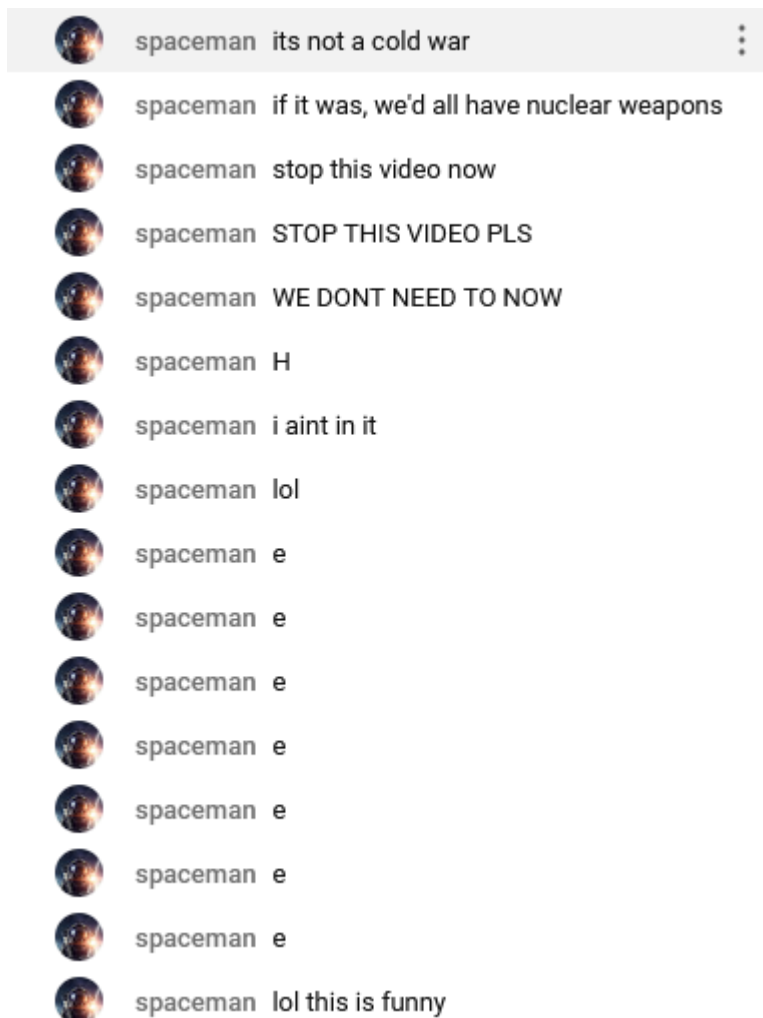

All what Fjattar did on that day is "remixed" it as low-quality remake, and call it *spyonium*.

And their reaction can be described on OSM Wiki's exposé as

Kacper just stfu

Half of their bitch ass accounts had either blocked or deleted. How do i know? I'll reveal that later. The only several surviving messages are either "there", or not "there".

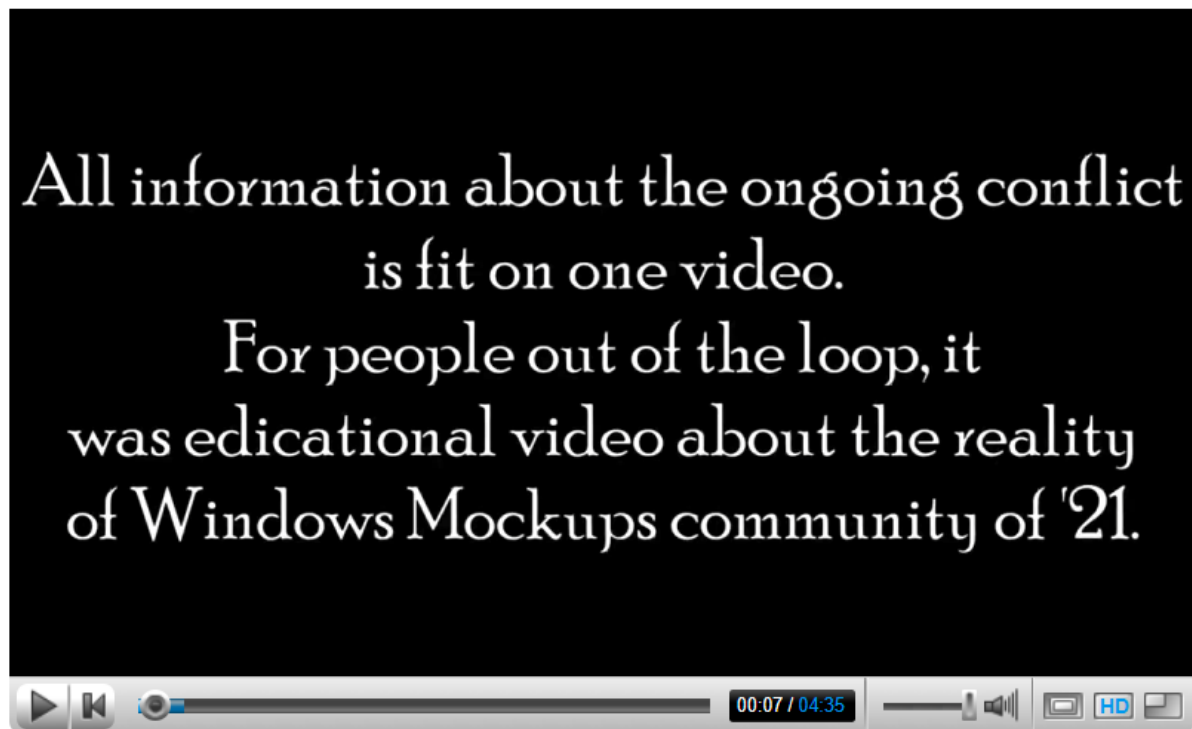

That was the April 16, 2021 video, if you had wondered why it did not cover their newer degeneracy.

The second video that Spy made was either unlisted, privated or deleted. As you can guess on the screenshot of OS Concepts Wiki, it was the same CJGers shitting themselves. But did that damned video gets reuploaded on VidLii...

Internally known as Archive-C06, did it had the stream of rage Chromaticans wants it to gone, forgotten?

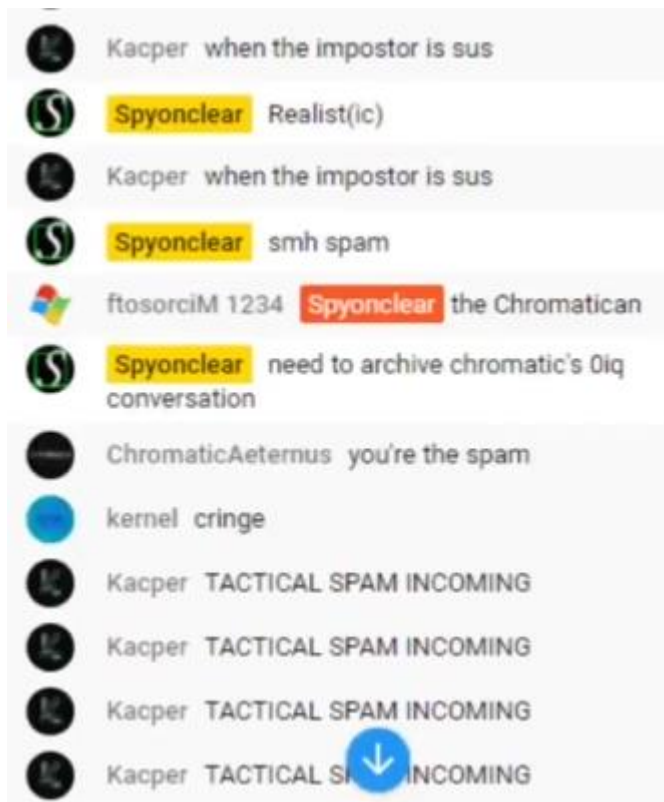

[Archive-C06] - Windows Mockups Cold War video's chat

Well, spam.

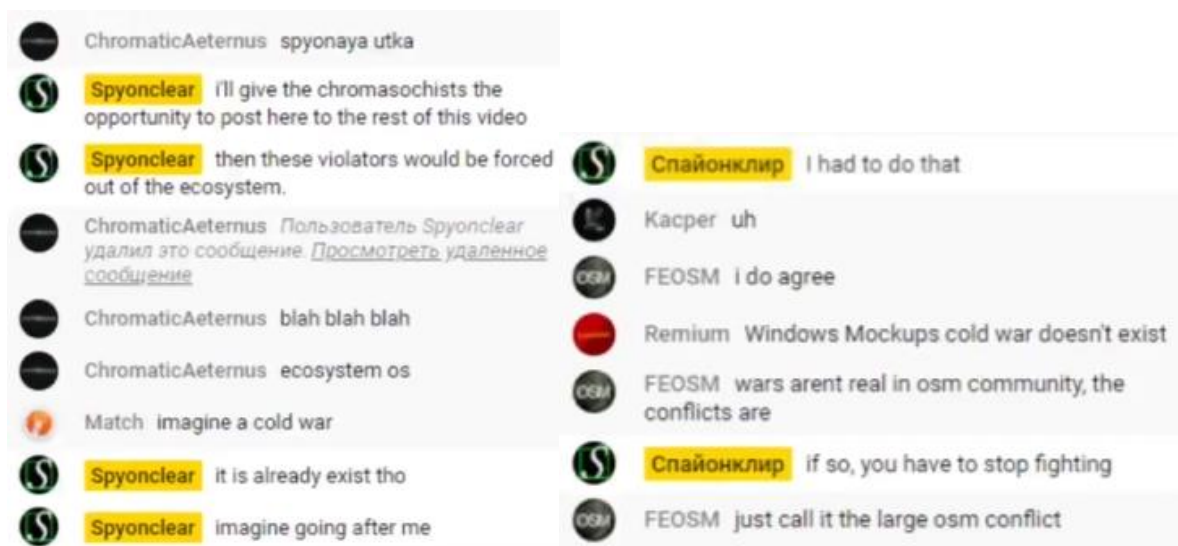

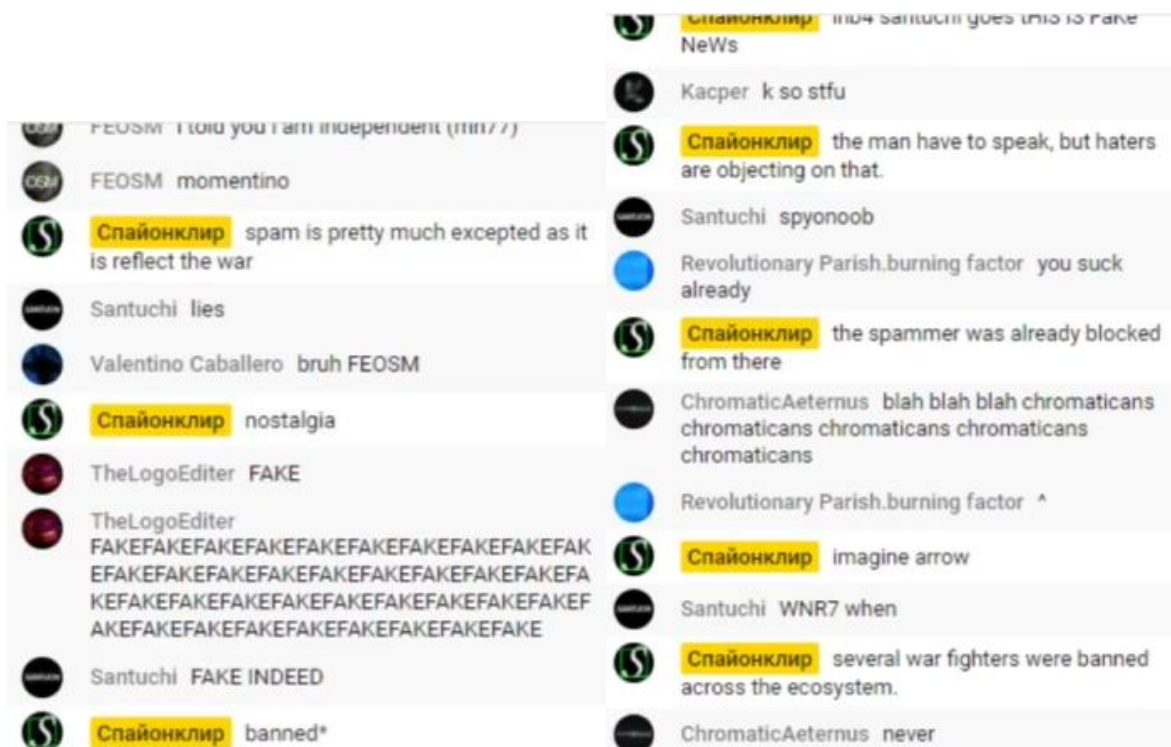

Spy says it all.

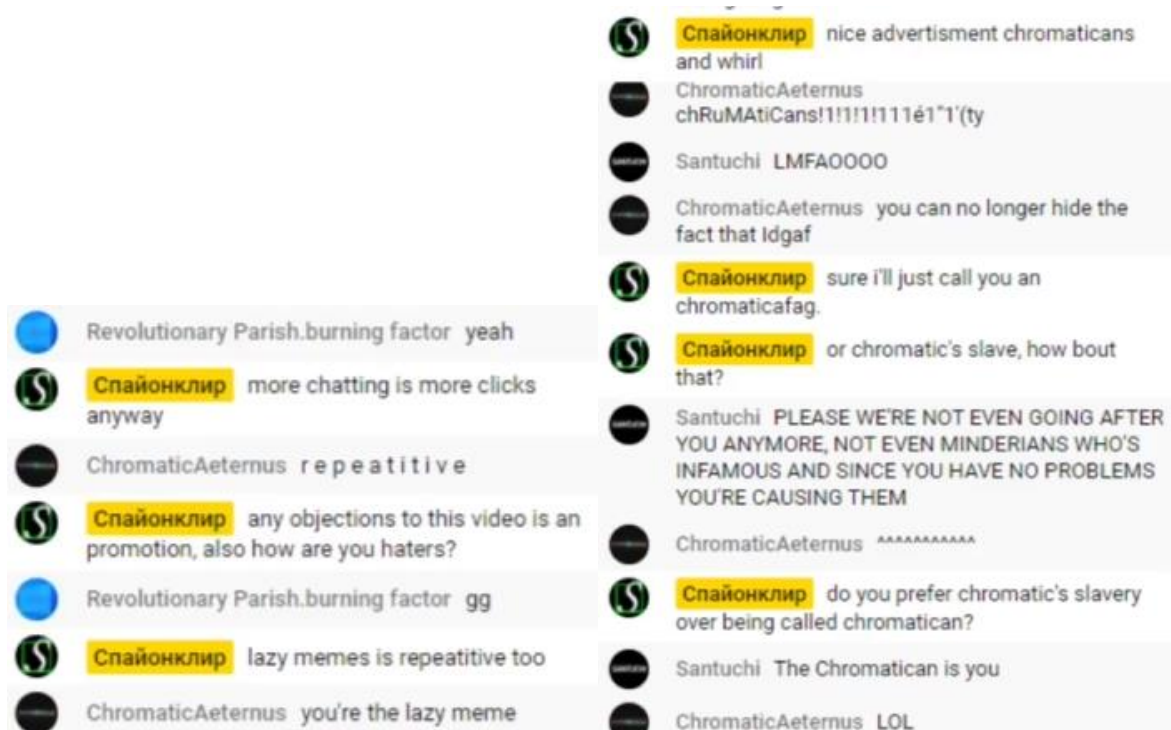

And sure he did preserve this fine part of history!

Look at the much many comments!

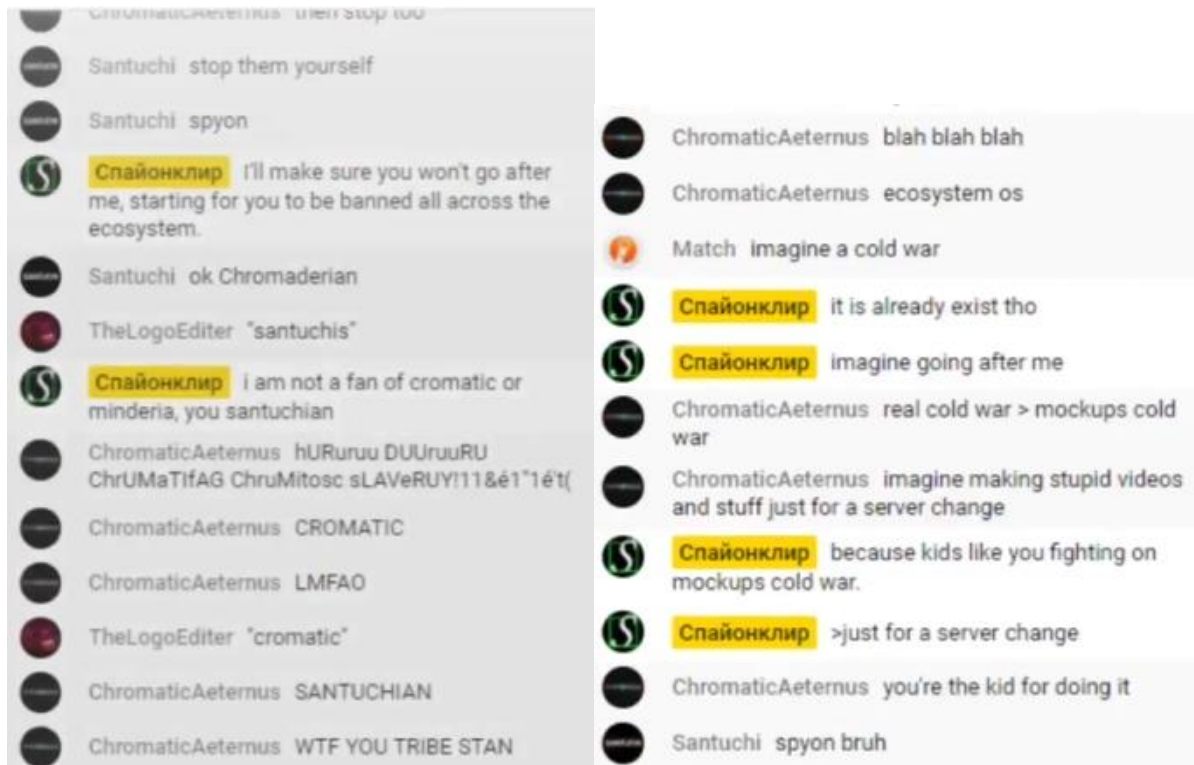

Spy's occasionally taunted these legendary weens. Spyon dared to challenge Chromatic's world views

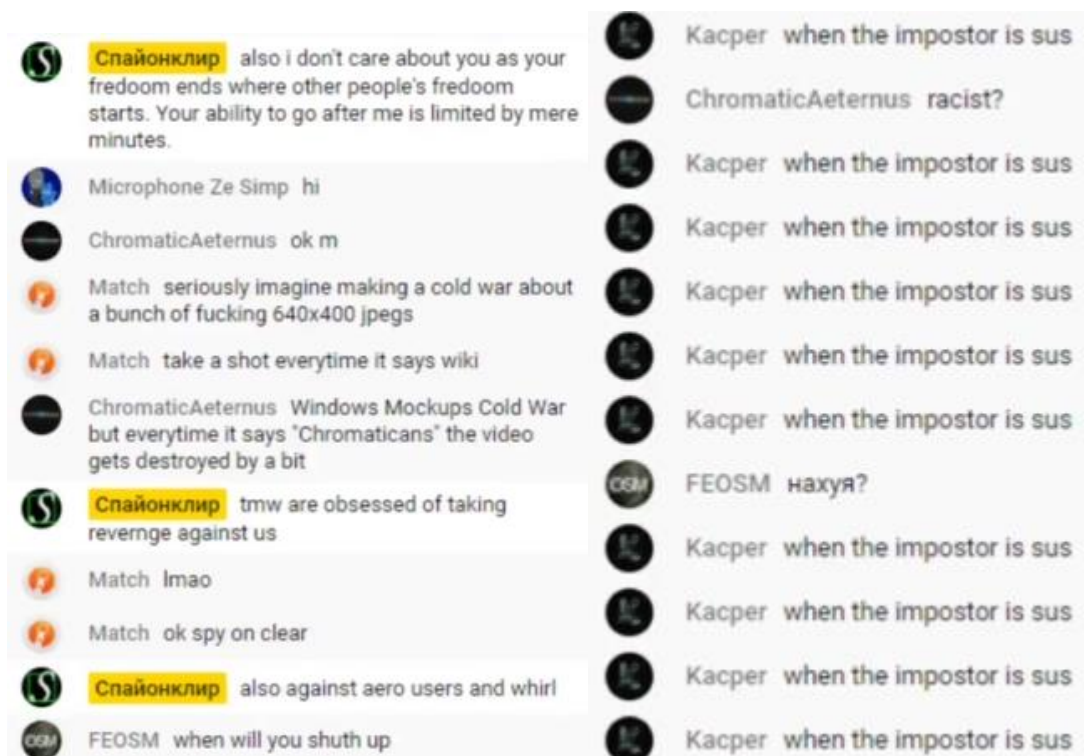

Only less pleasant terms had been offered to replace the word “chromaticans”, but these terms had been rejected. C06 is not the right video to make such deal.

It's not that anti-Fjattar chat was exposed, or the same old people had argued over the sense of Hydrus-importance, not at all. It's the Windows Concepts platform that had been deleted long during the WMCW.

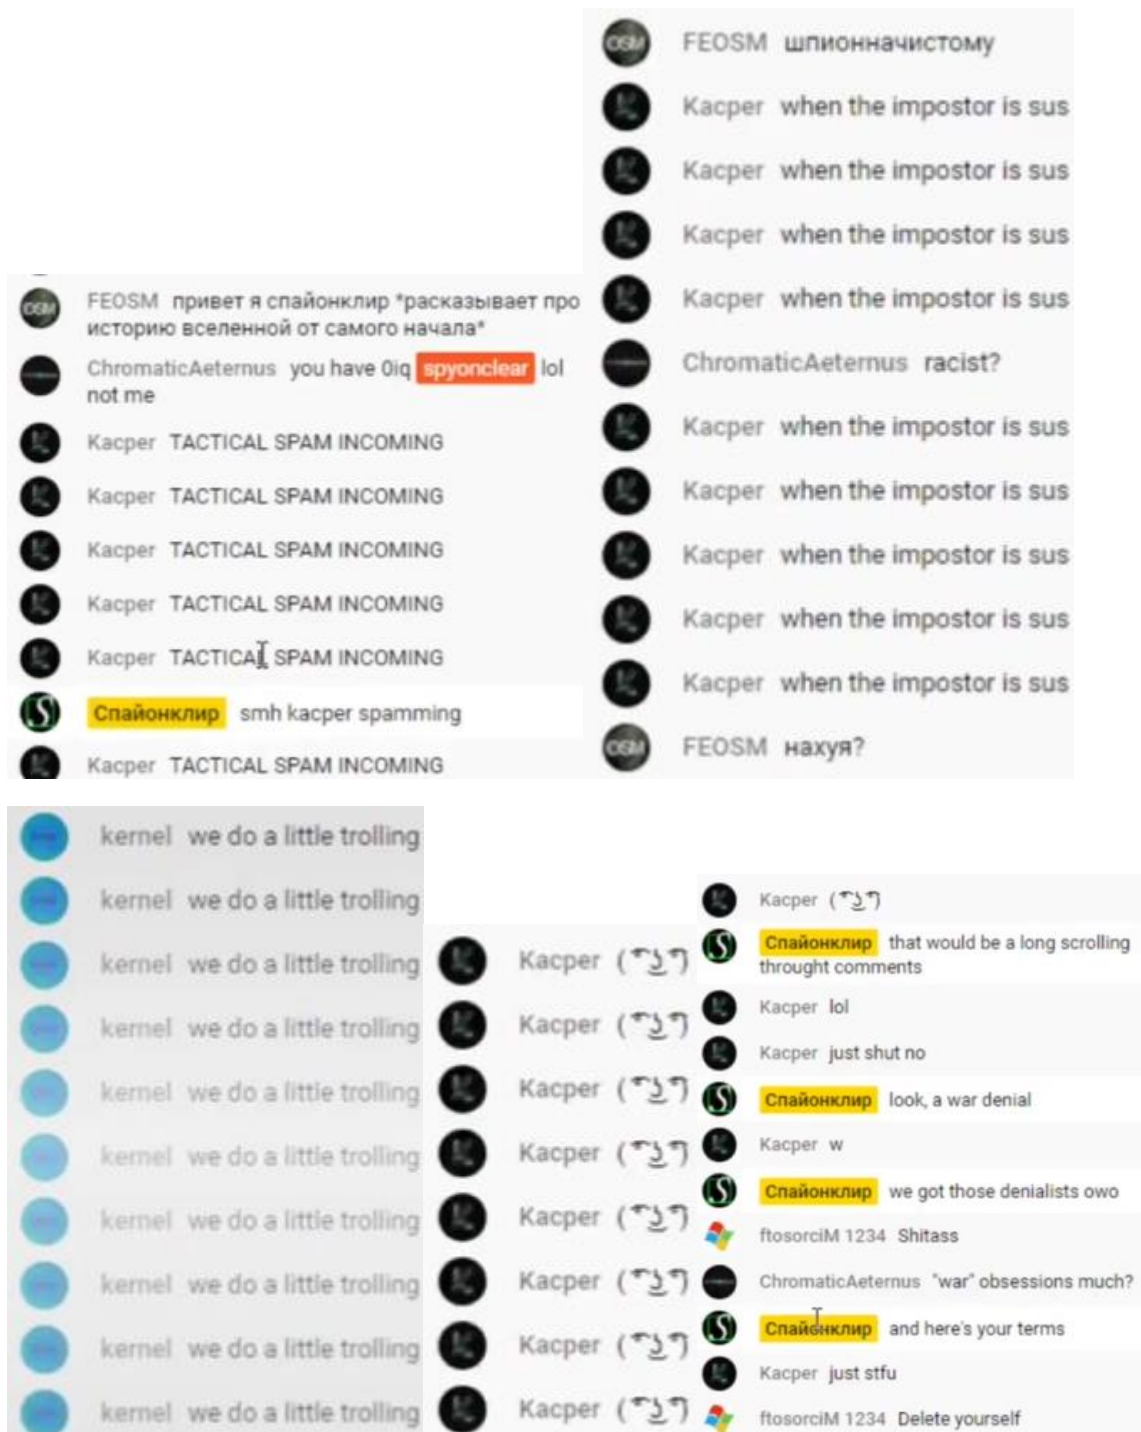

Thanks for pointing spyon out that this video was made possible by the controversial "server change".

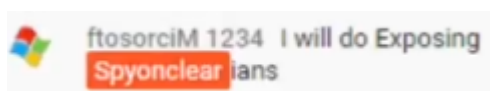

“tmw” stands for The Mockups Wiki – one of the way to own Spy. I’ll explain in the next topic, but tl;dr TMW was the THE¹¹ OS Mockups Wiki replacement¹², until it wasn’t, and it died, and it would be revived.

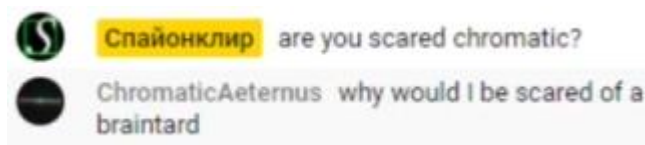

¹¹ “THE” as in “The OS Mockups Wiki”, one of the signature bad grammar made by StrangeFin.

¹² no

Oh! Someone had attempted to do the files! Or, rather, said something suggestive...

Sum said the rword mememe

That's ironic of Chromic to say that, after leading the army of childrens to spam the Archive-C06.

The Mockups Wiki

Reisaverse: The Mockups Server was already the controversial project to begin with, phasing operating system concepts for something too few had been used, and not just changes gave this server a problem, but constant rivalry, and the TMS' members having getting involved on Windows Mockups Cold War – this won't go easy.

Make it double, and you have TMS satellite, The Mockups Wiki made by Santuchi.

For starters, let's see how The Mockups Wiki has been described on the original OS Concepts Wiki.

[Santuchi](#) is announced his own operating systems mockups wiki on February 6, 2021 on Sought Discourse, immediately to create it. [Vladislav](#) claimed Santuchi doesn't own this wiki. Fjattar is interested on Santuchi's wiki. When Santuchi created this wiki, he said that he settings things upon it. This wiki are supposed to compete with our OS Mockups Wiki. This wiki was created on 16:19 UTC on FANDOM website, and got the name *The Mockups Wiki*, and got it's initial slogan *A wiki of Operating System Mockups. Better management. From OSM creators, to OSM creators.* during it's first hour of existence. During that day, the Heavenite server and The Mockups Server topic is brought.

Santuchi makes an grand opening of [The Mockups Wiki](#) on around 19:00 UTC, immediately banning Spyonclear - accusing for "Hate stuff directed towards owner", Holocraft - uploading content to OS Mockups Wiki, [Arsen54800](#) - accusing for being an cringy kid, despite him being over 18. Santuchi initially uploaded an simple logo for The Mockups Server, and began modify the main page. Santuchi created an page about himself on a decent size (8 kilobytes). When someone posted trivias copied from spanish WNR wiki, Santuchi undid that edit, stating that these trivias are irrelevant trash, and from OS Mockups Wiki.

[ChromaticAeternus](#) joined this wiki to make a page about himself.

miu made his own page on The Mockups Wiki, copying the content from OS Mockups Wiki.

[jhj22](#)'s video Never Released Windows Versions (Part 1) was added as an page on this wiki

The first fictional operating system page, [SantuchiOS](#), is created while it was still under construction

The *9x STREACH IS FALSE* page is created to protest 9x-stretching, but it's context quickly replaced with {{delete}} template.

When the background for the wiki was added, it became more difficult to see links, which is blue-on-blue.

On the forum posts, Santuchi's assumed the raid could be happened, and points OS Mockups Wiki as the origin. He called OS Mockups Wiki users an "[Spyonclear](#)'s followers". Another mention on forum came from FtosorciM, stating that The Mockups Wiki is "really good OSM Wiki unlike the Spyonclear's OSM Wiki".^[2] The owner of OS Mockups Wiki, Spyonclear, is also mentioned on another post.^[3]

For the effort given on first day, The Mockups Server gained 8 pages, 7 images, 3 templates and 6 contributors.

The page about TMW1 (we'll get to the acronym later) would contain more information.

For the effort given on first day, The Mockups Server gained 8 pages, 7 images, 3 templates and 6 contributors.

Activity for The Mockups Wiki started to drop in following days, during the time [HoloCraft](#) was unbanned from there. Pages about other wikies was deleted, but pages about peoples started to get more attention, because there was many pages about peoples. The Mockups Wiki hits a new low in case of activity, peaking in late-February and early-March, with the attempted recovery by Vladislav and HoloCraft. But The Mockups Wiki found itself to be evolved thanks by templated brought to them by HoloCraft.

The Mockups Wiki was a victim of Arsenii's action, while Arsenii copies the content of this wiki to [OS Mockups Wiki](#), included but not limited to pages and templates. Spyonclear had to credit The Mockups Wiki by creating an template with the link of original page and it's history of edits. Spyonclear condemns Arsenii's steals, judging to his comments.

However, The Mockups Wiki wasn't innocent. That wiki, as of March 23, 2021, still served as an propaganda machine against the opposition, whose fought on [Windows Mockups Cold War](#). More over, Santuchi poke fun at Исторический виртуальный пользователь on it's message wall, while these messages was deleted afterwards, following with [ChromaticAeternus](#) messages, insulting Spyonclear on the page about him. On March 21, Fjattar was banned from The Mockups Wiki with ridiculous reason, and that's leading with Fjattar creating a video, containing rofl idea named *Windows User Blocking Edition Update Rollup*.

On March 29, Santuchi has been claimed OS Mockups Wiki "to copy stuff from the [ultimate mockups wiki](#)" as he thought The Mockups Wiki is superior over our wiki. Santuchi states that The Mockups Wiki does not discriminate LGBT people, and uses their own way to pronounce users. Spyonclear responded OS Mockups Wiki is an first foreign wiki to recognize Santuchi's The Mockups Wiki.

In the same time, SlainingArsen raids The Mockups Wiki by vandalising several pages, which unprotected chromatican-related pages failed victim of this user, later for the contents of minderian pages to be erased too, just then to erase content for everything this user could touch in a hurry. This took 3 hours for this vandal to get banned, and vandalism reverted by Zdrmonsterpresents. This situation made Spyonclear's announcement horrifyingly perfectly timed well.

This wiki's entering the new moment of inactivity somewhere on June 2021, which may explains the outdated information about users. Despite this, it's users still defending it on Discord and OS Mockups Wiki. It's members didn't capable to handle criticism of their wiki, deleting any criticism on this page.

Cold War propaganda [\[edit\]](#)

Initially, it is believed that The Mockups Wiki's propaganda is not possible to exist. Like as the *Controversies obsession* section suggested, the hatred to Spyonclear, independents and Minderians takes place in articles and forum. The first person who put the TMW vision in the doubt was Fjattar. An OS Mockups Wiki owner claimed that The Mockups Wiki are focused on Chromaticans and Nebulians, but not the operating system mockups themselves. And owner noticed that OS Mockups Wiki was banned from there. ^[3]

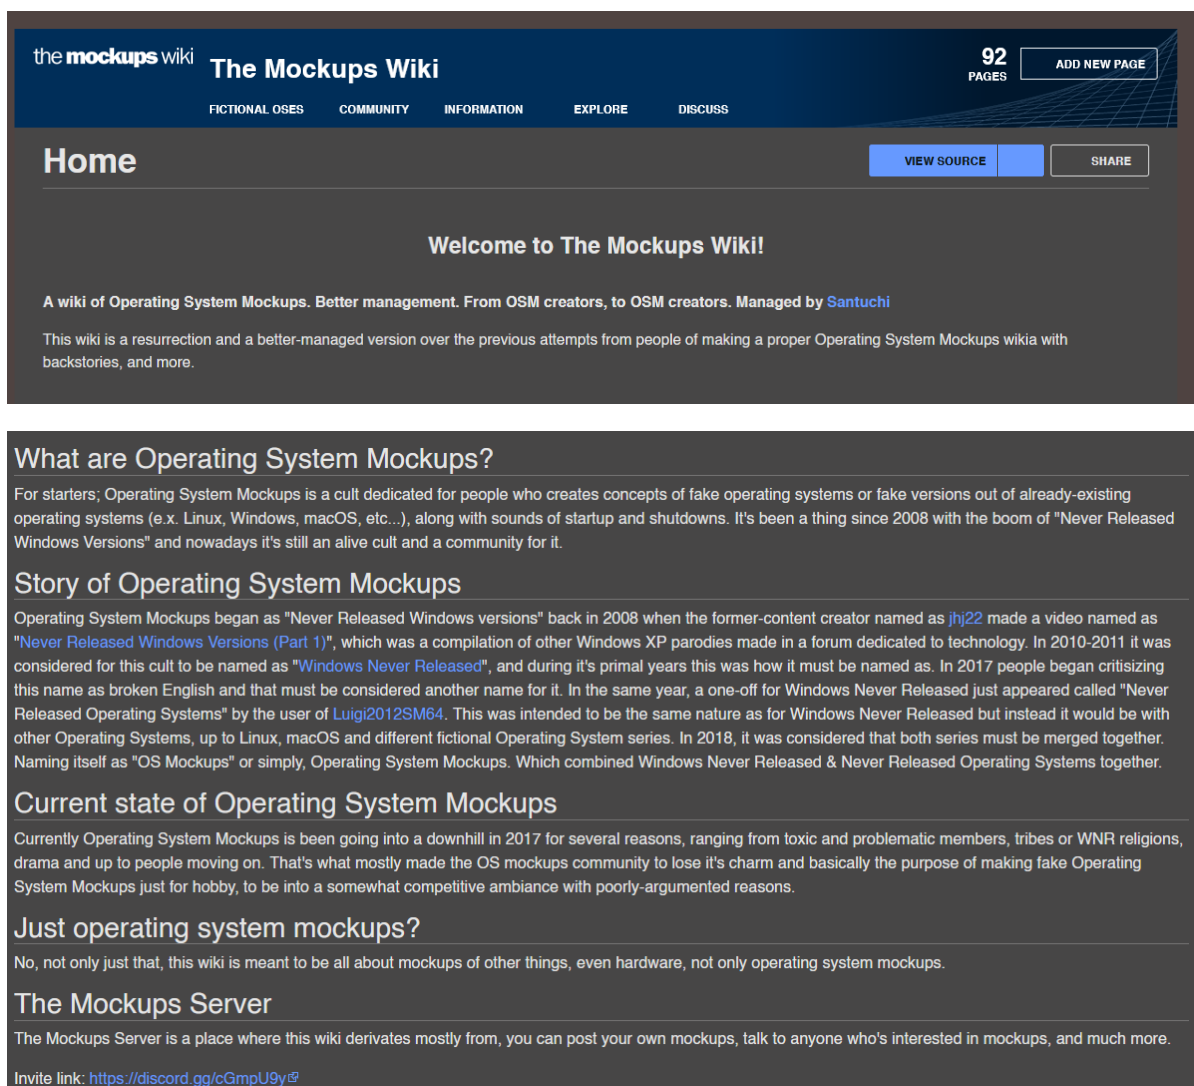

Because of the demise of Santuchi's The Mockups Wiki, I'm not able to retrieve much information about it, and the wiki's activities.

As you can guess, it is the OS Mockups Wiki and OS Concepts Wiki clone.

It positions itself with a moniker "Better management" and "From OSM creators, to OSM creators".

This wiki have no background image¹³, and it's logo is a plain text on Franklin Gothic.

¹³ Granted, this might be the issue with web.archive.org and it's failure to display images.

There are a few issues with how our community are presented here.

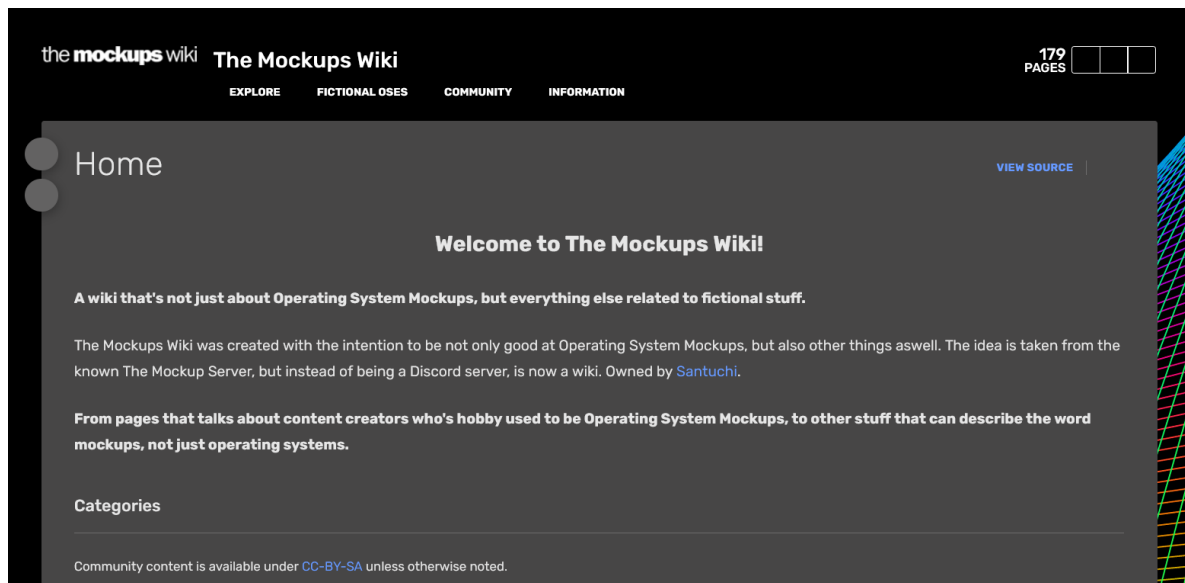

1. There were previous Windows Concepts parodies on Newgrounds, YouTube¹⁴, and on DeviantArt. Apparently, they had limited knowledge of that.
2. Santuchi could had tell who had called their OS Concepts as OS Mockups by 2018. By that time, only Aero Community members had called their OSC as such. Both “OS Mockups” and “Windows Never Released” in 2025 had been considered obsolete. However, some people would keep to usse these brandings for their operating system concepts.
3. Santuchi had contributed to the perceived “downfail” of the community in 2017, and had benefited from it. Surprised he had failed to mentioned that and more details. Also, this is a cynical way to introduce the newcomers; they do not know

¹⁴ There was at least one video that had been still online, made before jhj22’s series.

much, and they don't care who thinks Operating System Concepts community turned to shit. They just wanted to enjoy autistic art.

4. The WNR Has Fallen. Billions Must Migrate. Or at least it appears so, had it not wanted you to make works on Discord, advertising TMS, not in open platforms like DeviantArt and YouTube.

While TMW1 would be bland, thankfully it got rid of that 15 years old doomer's sentiment. This wiki also added a wallpaper.

It's administrators has been called out for cyberbullying.

And, oh the irony, the biggest controversy that wiki had, was trying to have as many call-outs to Chromatic's nemeses as possible, naming them "controversies".

Ban notes

Controversies obsession [\[править\]](#)

This wiki, and it's administration felt in love of controversial information about creators, rather than an actual information like actions, biography, contents, awards and praises, YouTube activity, trivias, and miscellaneous positive thoughts. [Minderians](#) and independent community users are affected at most. In a span of under 4 days, contributors took the focus at negative things over [Fjattar](#), [Spyonclear](#), [Glosswired](#), [miu](#), [TheLogoEditor](#). For some reasons, pages about [Spyonclear](#), [Flattar](#), [HoloCraft](#), [TheLogoEditor](#), [Fusoxide](#), [Nermal Cat](#) and [Distr4k](#) was locked. That could've mean The Mockups Wiki administration are not taking responsibility for these pages, or they don't trust regular users and/or anonymous users.

The controversies obsession is controversial itself, since [Fjattar](#) complained about a page about himself. He denied [Glosswired's](#) Windows Never Released videos archivation being an atrocity and controversy. Eventually, [Fjattar](#) posted an hate mockups over [miu](#).

Eventually, this wiki goes ahead and misspell [OS Mockups Wiki](#), later to bash OS Mockups Wiki, claiming for "vague articles", "broken english", "gossiping" - which, ironically, Santuchi's *The Mockups Wiki* do the same thing. OS Mockups Wiki page is deleted on February 11, 2021

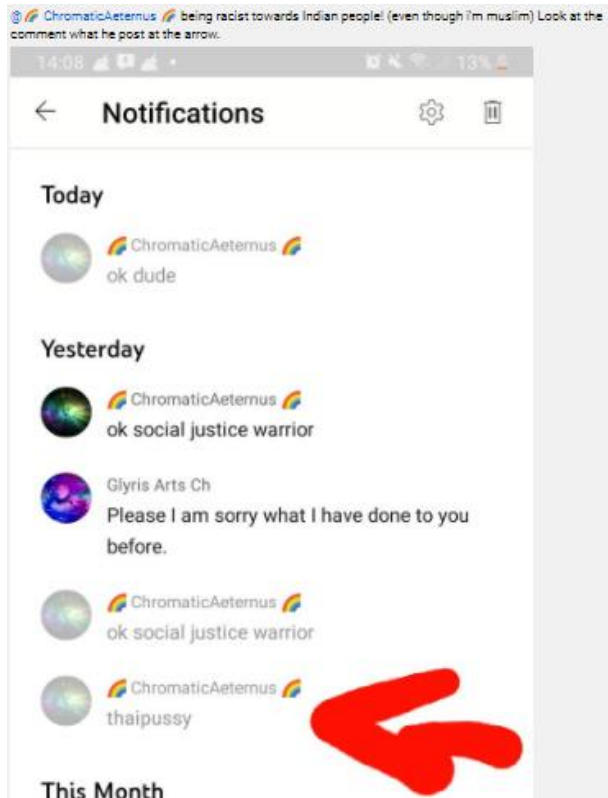

This could disrupt, sabotage, or even destroy the reputation of non-chromatican mockups makers, and because of that - the Windows Never Released newcomers could see [Spyonclear](#), [Fjattar](#), [Fusoxide](#), and more experienced content makers as an threat for the community.

And with that, concludes the first The Mockups Wiki.

OS Concepts Wiki: On May 28, 2022, Santuchi announced its closure in The Blueberry Hub, and days later, The Mockups Wiki was closed. It was had 184 pages at the time before closure of The Mockups Wiki.

Looking through emails of involved people, something’s sums up on the early days:

This one comment ages like wine.

This comment was made when Spy was at least 18. Quite hypocritical, as Chroma at that age has insisted against being recognized as the OSM kid.

The sane period

Reisuniverse: The early 2020 Chromatic was more human-like than he is in 2025... well, at least he didn't go after Spyonclear, like always. Chromatic-Fjattar conflict is a can of worms on its own – more of that in *Separate server for disgraceful activities*.

The July 2020 post was just this:

Spyonclear

REEEEEEEEEEEEEEEEEEEEEEEE!!! jk 2015 rocks thanks god i discovered WNR via neptune98 videos

And it came with this doge meme

OSM community then

We're a friendly community dedicated to make fake operating system mockups everyday bro

OSM community now

We're a harsh community. If you ever dare to take one of my screens or block me. i will rage and i will try to find you down no matter if i'm a virgin 16yo who is addicted to the internet and makes generic Windows Mockups

Blocking people you don't like, and (, generally,) bigotry is the reason why Windows/OS Concepts community is in its low. On "OSM community then" we did not had to deal with that (except in cases like Valy Jean)... But then Discord didn't exist, and we didn't have witnessed a Minderian-to-Instagram boy born in 2006, arguing with people he blocked/banned on Discord.

Chromatic is a part of the reason why W/OSC community is in its low. Sad but true...¹⁷

More Things

Written by both Dzen and Reisuverse.

¹⁷ Sadly, this is true.

1. Strangefin had a beef with Spyonclear, dismissive over the former's own patterns and behavior.

For this, Spyonclear warns Santuchi over directions The Mockups Server are heading.

2. Strangefin, as seen above, had a beef with queer Aero Community members fusoxide and disctr4k over a joke. Now imagine if some jokes
3. Strangefin had been mostly spend his time to have a beef with Spyonclear, and not to make his own OS Mockups 8.
4. For quite some time in 2020, Chromatic would make hateful videos over Fjattar. But even if these videos are no more on his main channel, they would appear on ChromaticArchivernus somewhen in 2023. Reisiverse had already put in light on the scrapped *Exposing Mockup Man* video, the intro that had stated to be built in June 2020.
5. By reuploading the then-3-years-old, Chromatic would get TLE's attention. TheLogoEditor then would complain that the former would reignite the conflict between himself and Fjattar.
6. Remember Guilded? Before it was sold to Roblox, this takeoff on Discord was used as the battleground.

Guilded dramas of March 2021 [\[edit\]](#)

Spyonclear trolls Fjattar on Guilded, which sparked the dramas between Spyonclear, Fjattar, and [Chromaticans](#) or even [Nebulians](#). This leads to overused jokes about Spyonclear, and overuse *The "merge" drama* as an reason for numerous conflicts.

Guilded was popular amongst Windows Never Released creators on March 2021, on which ChromaticAeternus, Fjattar and Spyonclear was registered on there, and they have created their own servers adapted on the environment of Guilded.

Later on Discord, Spyonclear was called out by Fjattar for dramas, but because he insulted Spyonclear on there in #SaveDiscord server, he gets in the another drama with the server administration. Fjattar got banned from #SaveDiscord.

Spyonclear created eSpyzem on Guilded on March 26, but on March 27 he didn't verified whoever fought against him on Windows Mockups Cold War.

Fjattar began to go after Spyonclear, and takes him to the hate group chat, on which Spyonclear still trolls him. Azure Stack HCI tried to continuously insult Spyonclear. Santuchi was also in there, posting an hate mockups on there. Spyonclear and Chromaticans fought in the conflict of pins, and server's name. Later on, when someone discovered that the username can be changed on the group messages, everyone on there started to abuse and overused this feature, leading to further dramas. Spyonclear's haters tried to change the meaning of the *chromatican* term, using it against Spyonclear, and equaling Chromatic's fanbase with Spyonclear's fanbase - Spyonclear thought he broke the "rules" of the cold war, and chromaticans themselves by making them to use *chromatican* term. At the end, someone questioning about why Spyonclear are here, but the purpose of the group was to hate Spyonclear, and try to roast him. Spyonclear leaved the hate group.

His haters wanted Spyonclear to stay, bringing him back, just to Spyonclear in tomorrow to go rename users nickname and group name, and for him to quit again. [HoloCraft](#) brings Spyonclear back into the hate group just for him repeat the actions again, with blocking most active haters to prevent HoloCraft from bringing himself in that hate group.

The hype about *Guilded*, and the dramas within it has been died out, and on April, WNR Guilded servers has been abandoning, which led people to continue the fight on Discord, not on Guilded.

Issue 2 – 2022 and 2023

Dzen: None of that, however, would stop all sides of this conflict. As evident on the following years, All sides would fight like their internet access relies on the proving themselves right.

Reisuverse: Chromatic himself wasn't involved on many of controversies. Instead, he's hiding behind his idiot teammates. Although he's well aware of how poorly his followers behaving.

We tried to be peaceful, as evident on a peace agreement that had proposed on February 14, 2022.

So the treaty of peace between the [@root](#) ecosystem with associated powers and Chromaticans + treaty in the event of unprecedented 9/20 attacks of 2021. Basically unban each others from respective servers (eSpyzem, Chromaverse, The Mockups Server), and then stop hating each others. Such an easy steps to end this all, you guys had 2 years for it. [@inactive front](#)

As evident on the information below, this has been largely ignored.

Fight against the Windows Concepts

Dzen: With the making of the new identity of Microsoft Windows Concepts by several of WNR powerpoint creators, and the creation of such identity within the Photoshop/paint.net scene, RDesign had not let the "Mockups" term go, instead opting for *Software Mockups*.

For the sake of this part, we would use the legacy terms like *Windows Never Released*, *Never Released Windows Versions*, *Windows Mockups*, *Operating System Mockups*, Hosted by **Files Tsar**

Original owner by dzen; Created by the
contributors

Never Released Operating System, and more particular term *Windows History with Never Released Versions*. The majority of Windows concepts bearing the name of “Never Released” had used up to 2017 by what was considered the intelligence¹⁸ as the year when WNR was dead, until Twiglets1888, and Aero Community had adopted *Windows Mockups* term. The mainstream use of Windows Mockups and Operating System Mockups by creative minds had been used from 2017 to 2022. Spyonclear was one of few early adopters of *Microsoft Windows Concepts* term.

As evident of April 27th, 2024 edit, RDesign’s vision of Operating System Concepts was to be applied to the only one OS, and use it on PowerPoint, After Effects or Premiere Pro, and to be made by the WNR-like creator Avdan. RDesign would beg to differ on such.

Spyonclear’s group of friends had used the Windows Concepts term as early as 2021.

Reisuverse: I'm back at this topic after revisiting more reasons on why they sucked at confronting Spy.

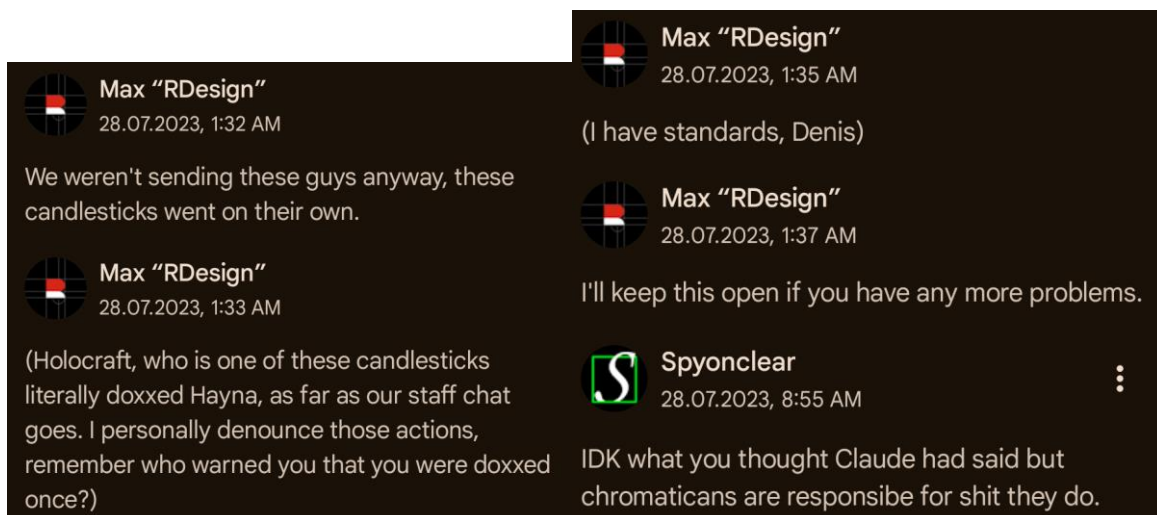

Allow me to jump to July messages of theirs.

The other "shadow person" had confronted Retinzyk.

Retinzyk would later go have the revolution of dignity, + questioning about Chromatic being confronted. This person would try to waive his responsibility over what happened with Gool/Bogal².

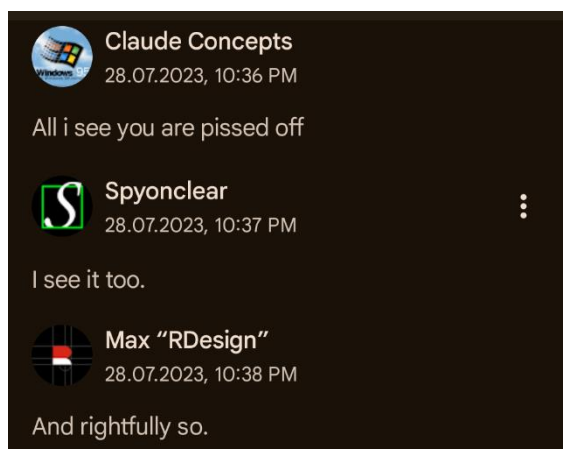

RDesign is fine with white, western European and United States privileges, and the call out of the history of english language and the colonial history of the Great Britain, and would reimpose Spyonclear to use english language for his works. This would reappear on his The Spyonclear Files Volume 1. It's Spyonclear's viewers.

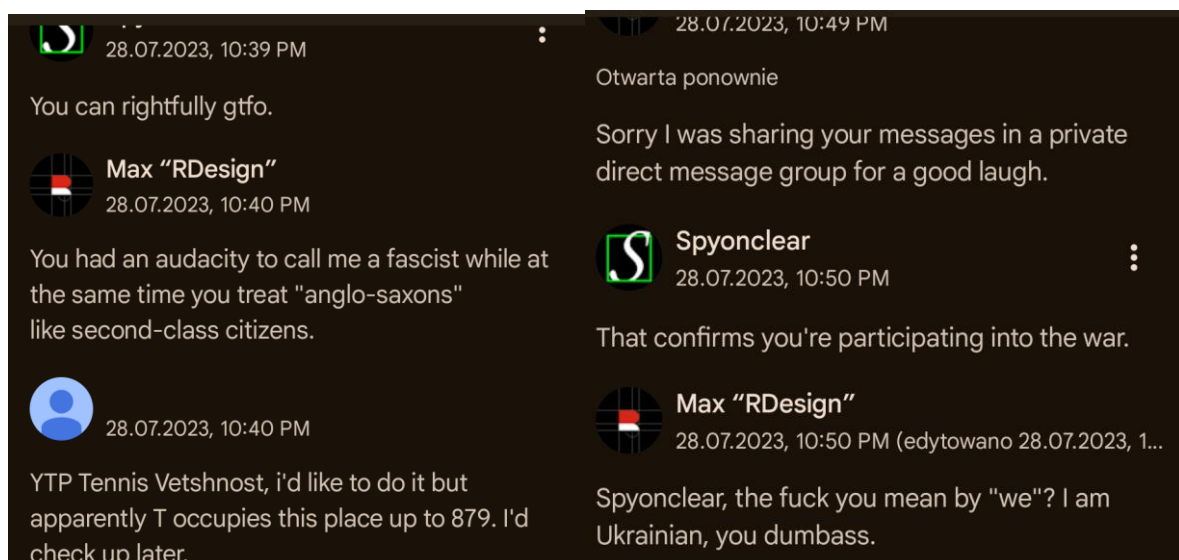

Spyonclear had used the russian language on his videos since day 3 of his channel. Was that ever happened to be the issue for certain people?

Apparently not using "Pendosh" was the political issue later, in 2023.

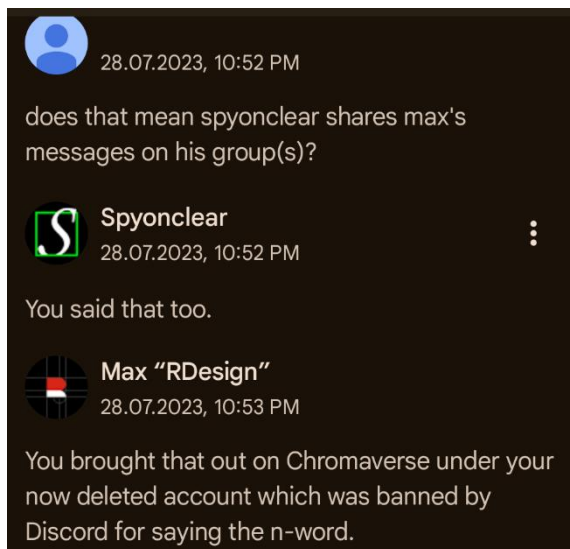

To reinforce the judgement over sleep schedule – did he made a chat with Spyonclear during the night?

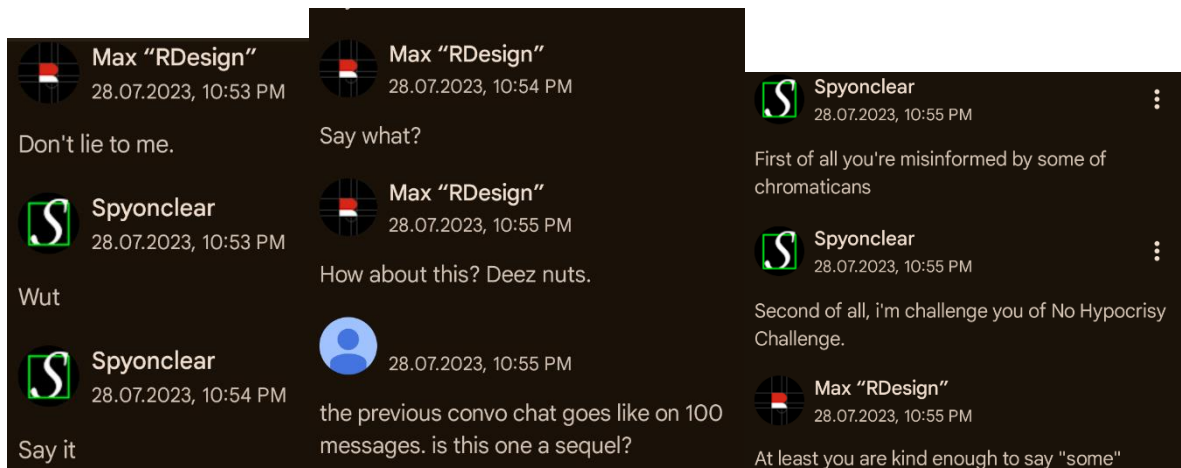

I would just laugh, considering what i have noted earlier.

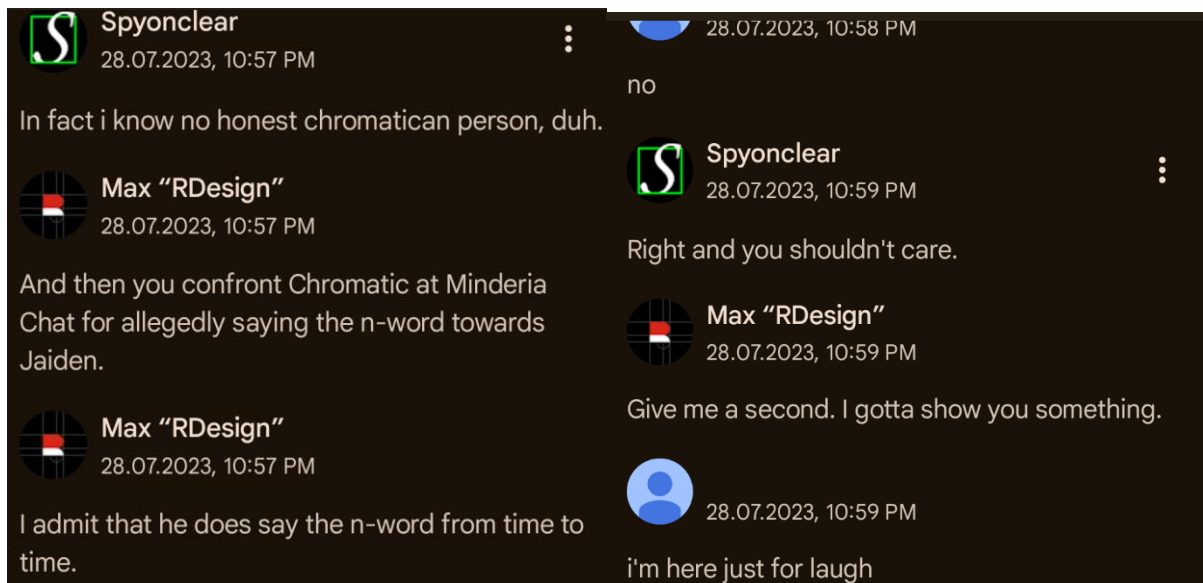

Exercising the British superiority complex. Spyonclear treated the british and white americans as second-class citizens according to whom? Did he challenged the white american perspective?

Nothing else sticks, other than getting political?

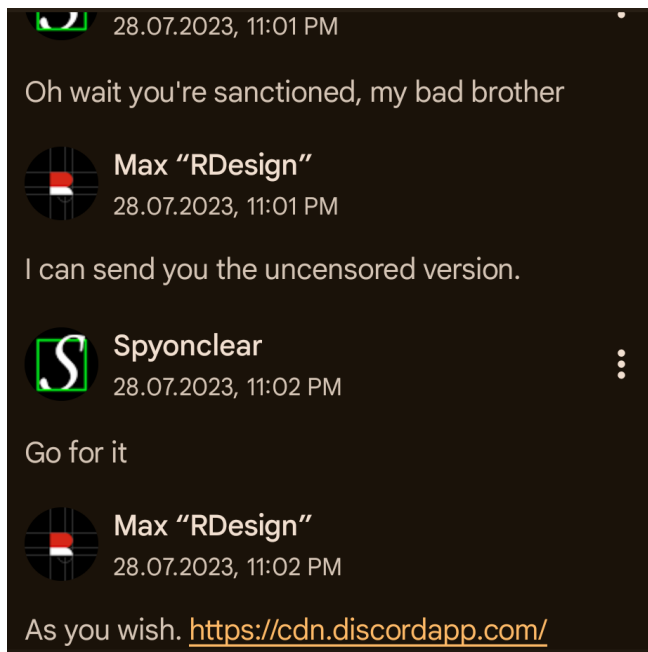

The ones who weren't involved are dead. Hence apparently the word "some".

It's amusing for them to deny Jaiden's case in particular.

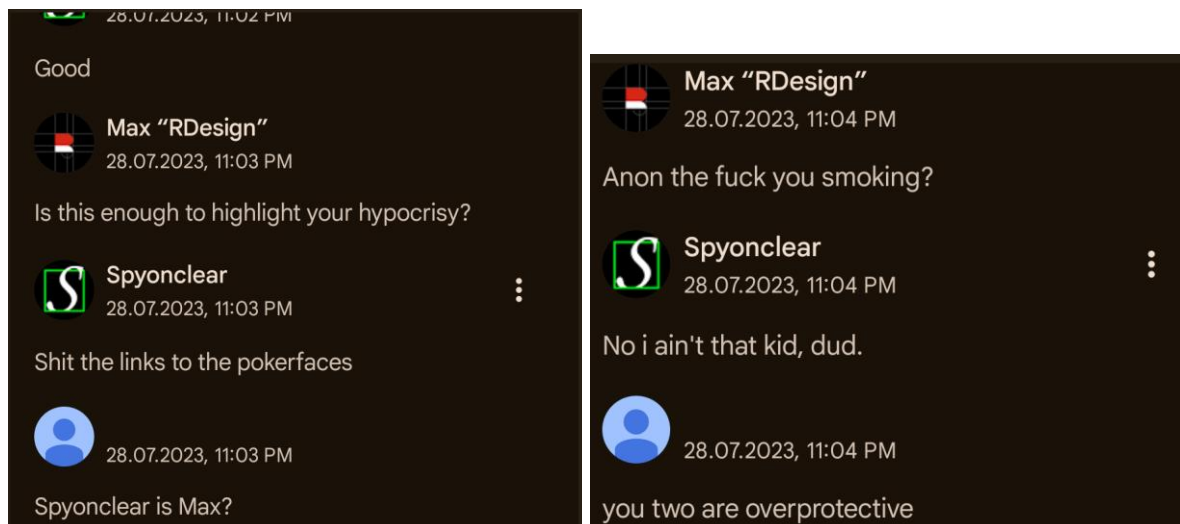

This comes from a friend of the subject who said "i agree lol GTFO [...]S!1!1!1". No known honest chromatican indeed. We would bring that up as a minor misdimeaner on Issue 3.

This won't be the first time Retin would derail the n-word topic using Gool (fka Hayna & Project W23).

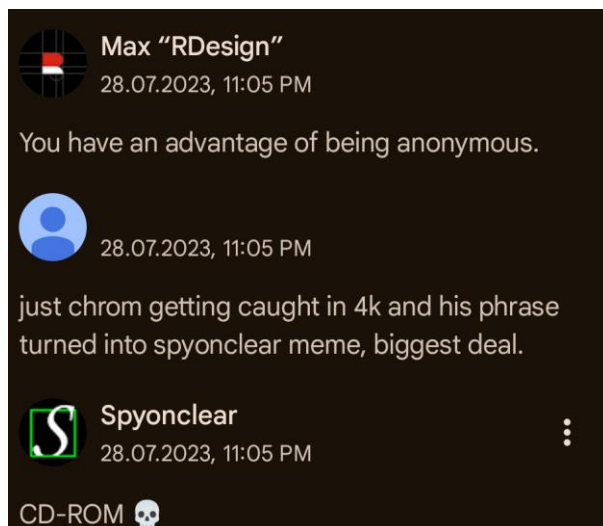

I think Spy wished Retin wouldn't be a white savior. I wish I had the privilege of showing "i agree lol GTFO [...]S!1!1!1" uncensored to highlight the hypocrisies, if it weren't Catbox's policies.

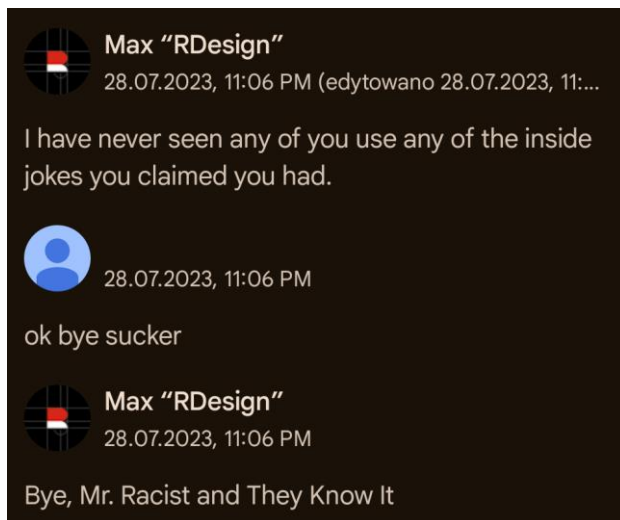

Retin thinks it is the other way around, apparently. Refusing to acknowledge other Chromaverse Jackbox Games controversies, and instead focusing on just ones centering around Hayna/Gool - the person he doesn't like - won't make Spy "getting owned", whatever he meant to say.

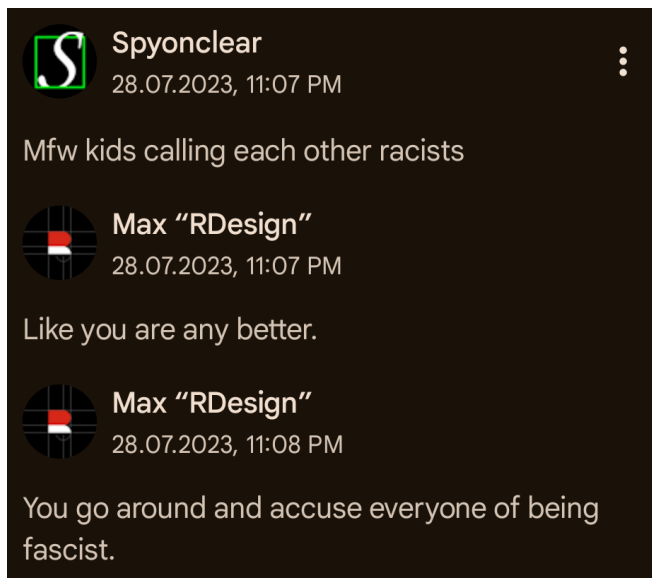

Reisuverse: Fighting the anonymous people is one of the themes in this scene.

The phrase in question appears to be "@JaidenMB5555 [...]"

You're not a part of Spy's community, Cretinzyk.

I have yet to see anyone that is not MAGA and Maidan¹⁹ to be called as fascist. Consider rephrasing, and prove that the following people are not into anti-polish or anti-russian sentiment, and they holding no far-right or European nationalistic beliefs.

Actually, I'm saying that to one of them.

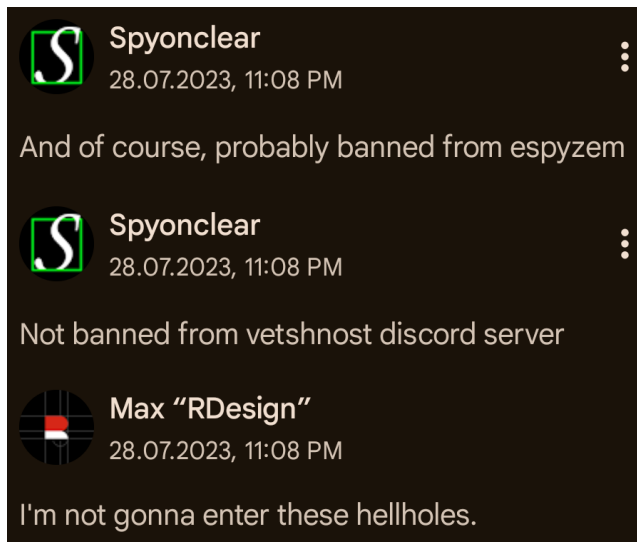

His views are expected from the 17 years old, namely:

- Calling the late Alexsey Navalny of being imperialist
- Failed to recognize one of the images of destroyed homes was AI-generated

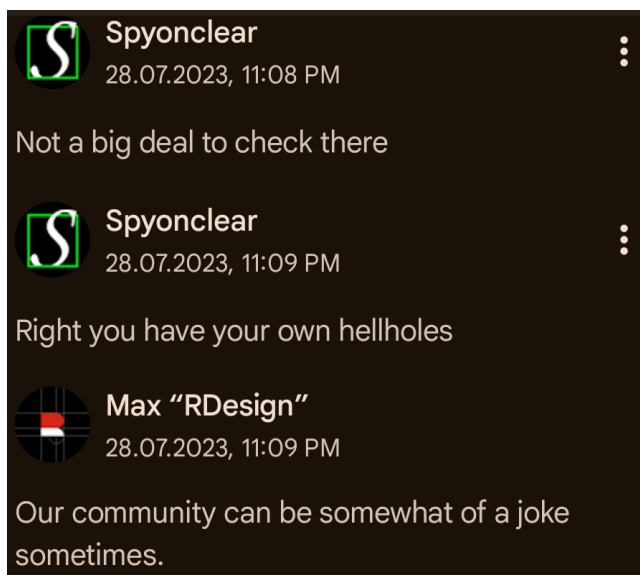

¹⁹ Post-2013 politically-active Ukrainian, whenever it is Porohobot, Zelyabot, or generally the anti-russian bigot.

- Imposed the sexual norms that was not tolerated in Russia, certain Polish regions, and (for extent) Ukraine

Maybe the 17 year olds are better than Max in regarding of political views, but he needs to wait that out.

Later next year he would go quick on eSpyzem for personal gains.

Always a joke. At the moment of writing, I had filed his “community”, and captured this exact moment in page 101 of 187.

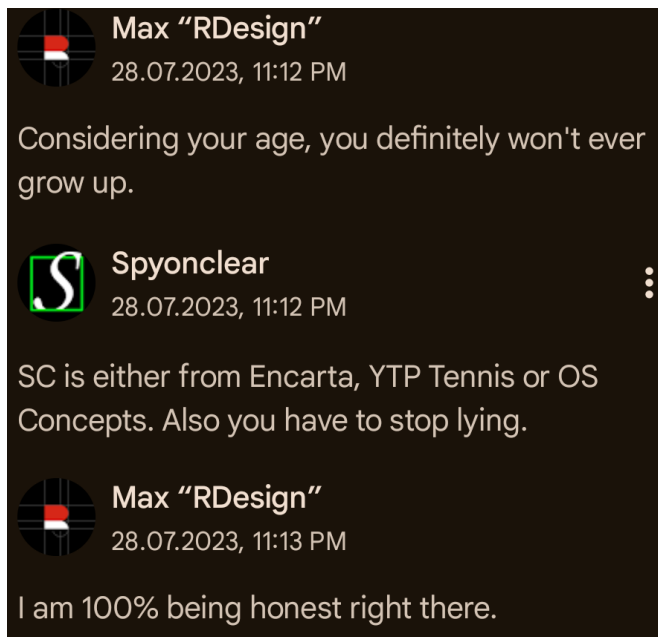

Spy calls it “Spyonclear’s fandom”, he used to call people following him as “Deviants”, as in independent artists for some reason. But as of 2024, we call Spyonclear’s fans different generic names based of circumstances, like Viewers, Subscribers, Server members, Contributors, etc.

Spy himself was a part of many communities, such as OS Concepts, Bluey, Encarta Encyclopedia, Windows betascene, WHwNRV, while historically he was a part of Alternative Future mapping community.

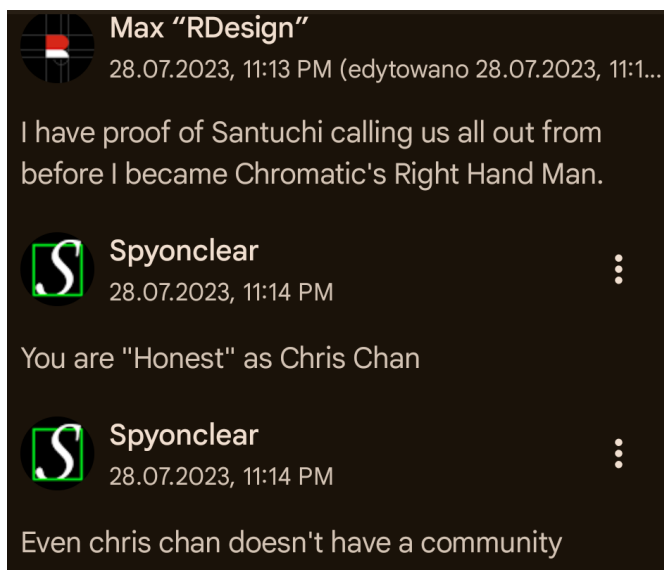

He does not use the term “X’s Community” when it comes to small creators like Chromatic or himself.

This is one of the cases when Retinzyk would derail the topic, although this is the moment worth mentioning as the proof on how he functioning as a Chromatican, and the Spyonclear’s hater.

I would gladly point out Retinzyk would swear his own words are TRUE and HONEST DesignInRed. You’ll get the reference once we’ll get to the point when Spy would compare our 17 years old grown up hero to his millennial fellow-sufferer

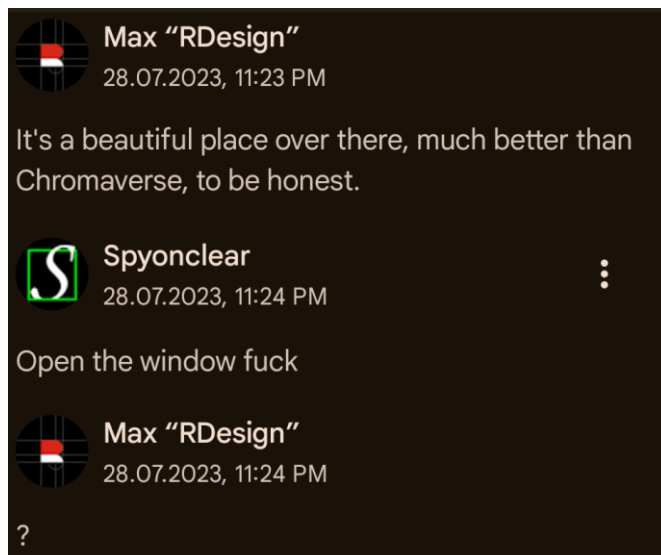

You need to respect the older people. Unfortunately, the little one not having any of that, but would demand maturity from the adults (?) – as if it changes anything on how Spy would deal with him.

Christine became the Praetor Masturbate Hand Man.

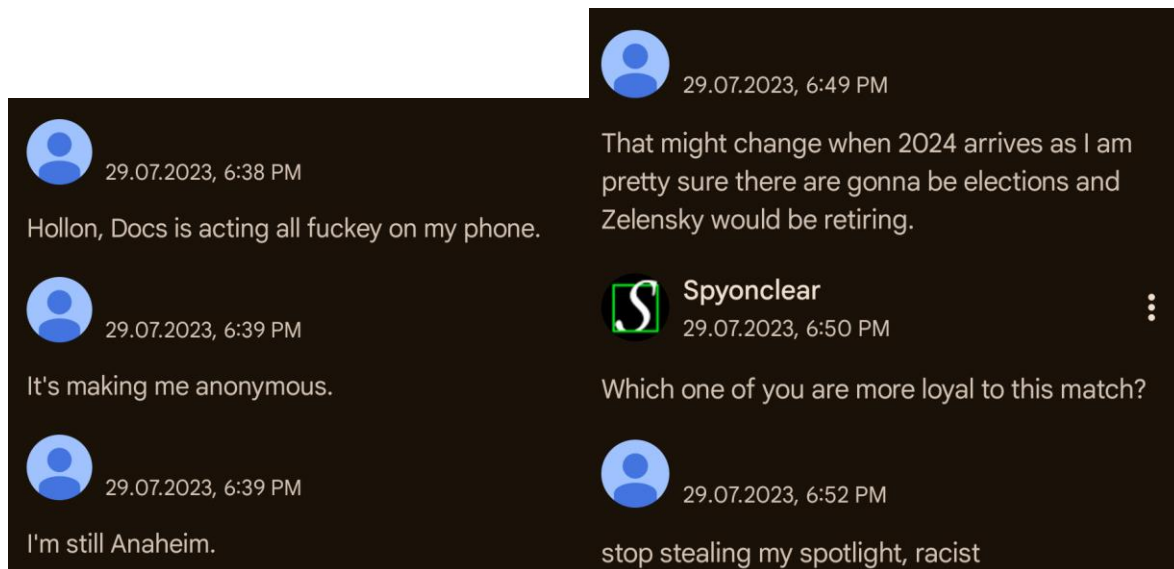

Unless The Blueberry Hub has it's own worms in the can, it's not relevant to the story.

At what time Blueberry became peaceful server, it's unknown to the people involved on this document.

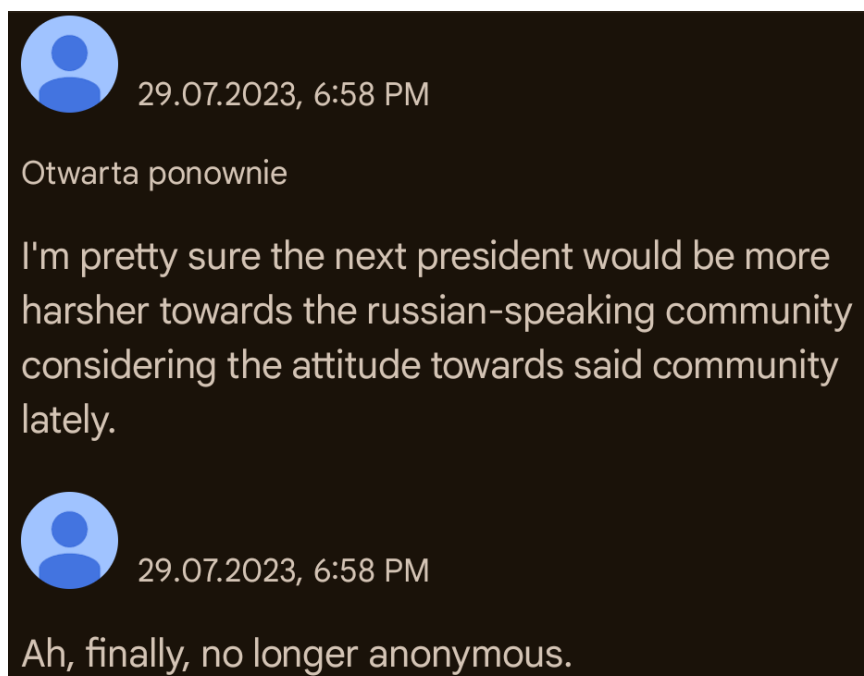

I hope he doesn't lies straight at this moment.

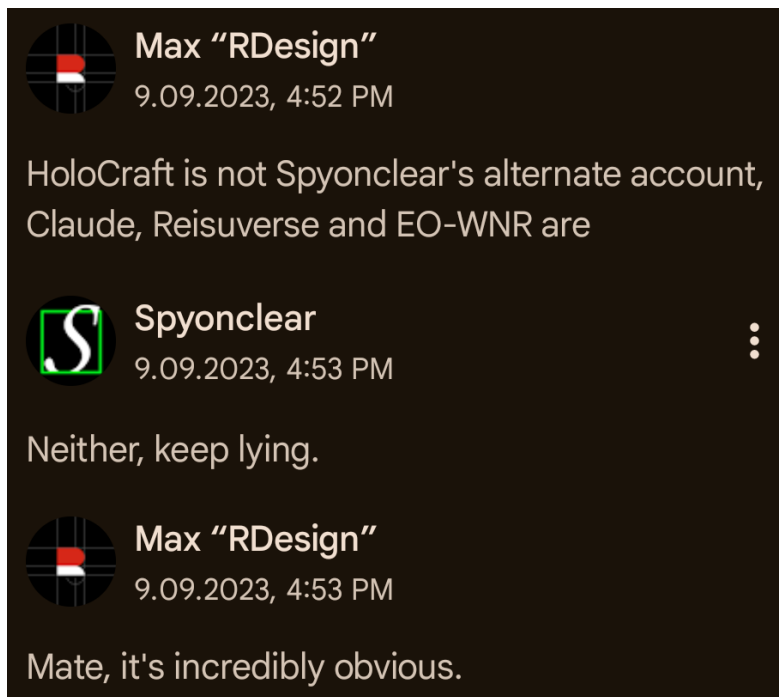

It would be confusing to tell if it's Retinzyk or someone else.

Anon would claim the President Zelensky would retire in '24, and not to seek his second term.

2024 came and went by, and the election won't be held until Russia would get that done. Until that moment, Zelensky joined Lukashenko and Putin, but the way he prolonged his rule is unique.

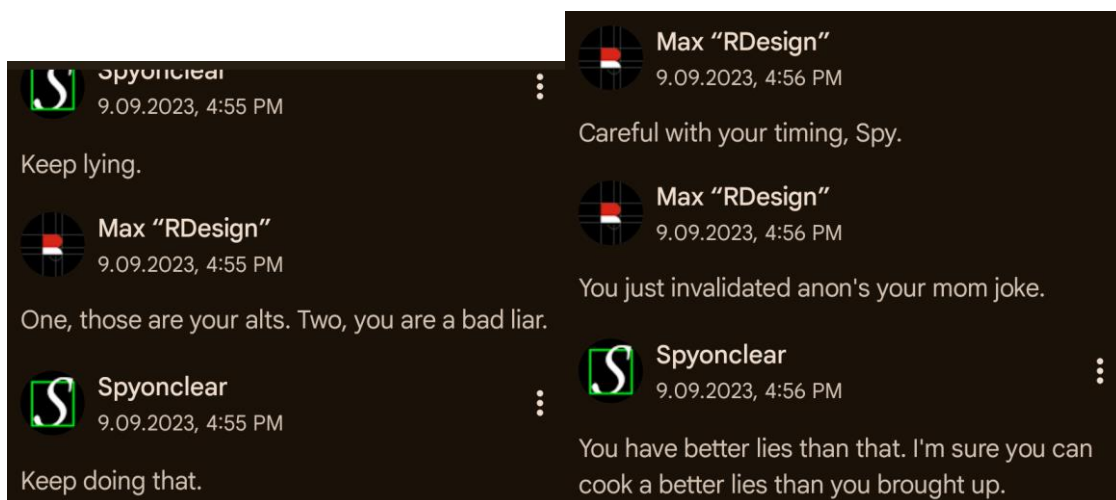

I can say this would age as well as the Sluga Ludu's political opposition and the minority communities on Ukraine.

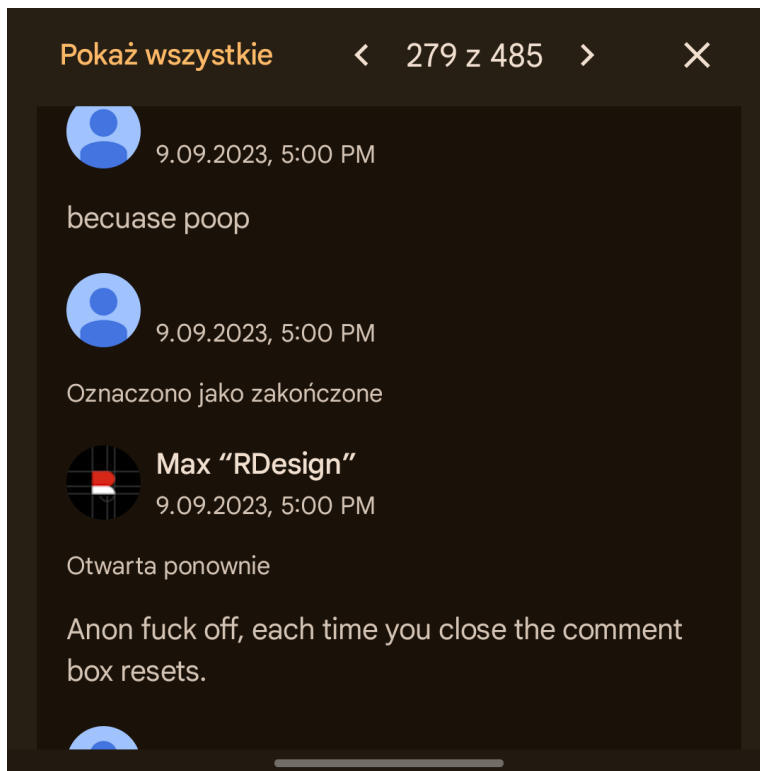

I am not. Stop being delusional.

This would persist for 4 minutes.

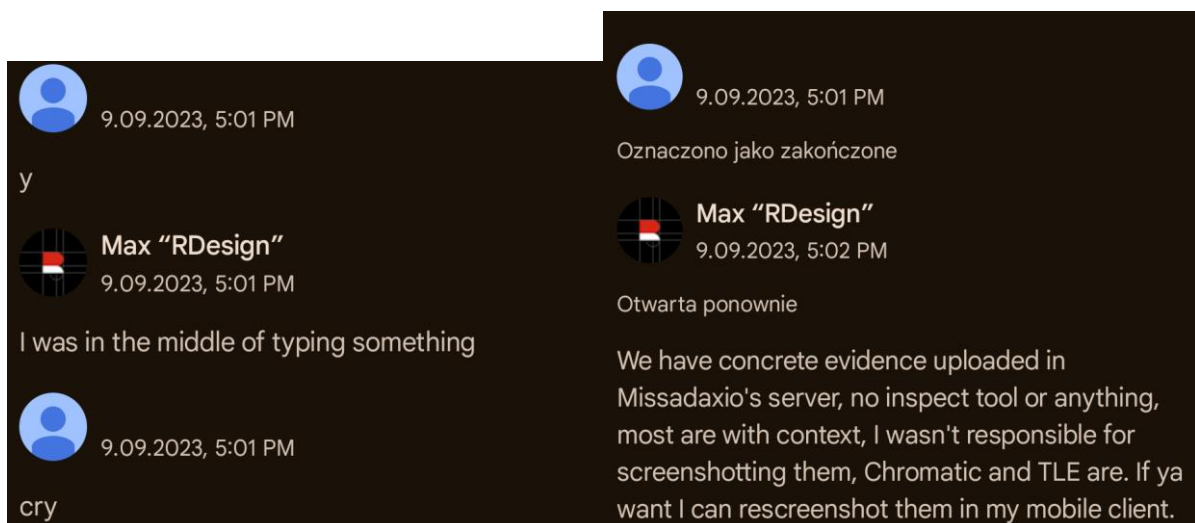

Spy then challenged his shit, demanding more original conspiracy theories about him or anyone following him.

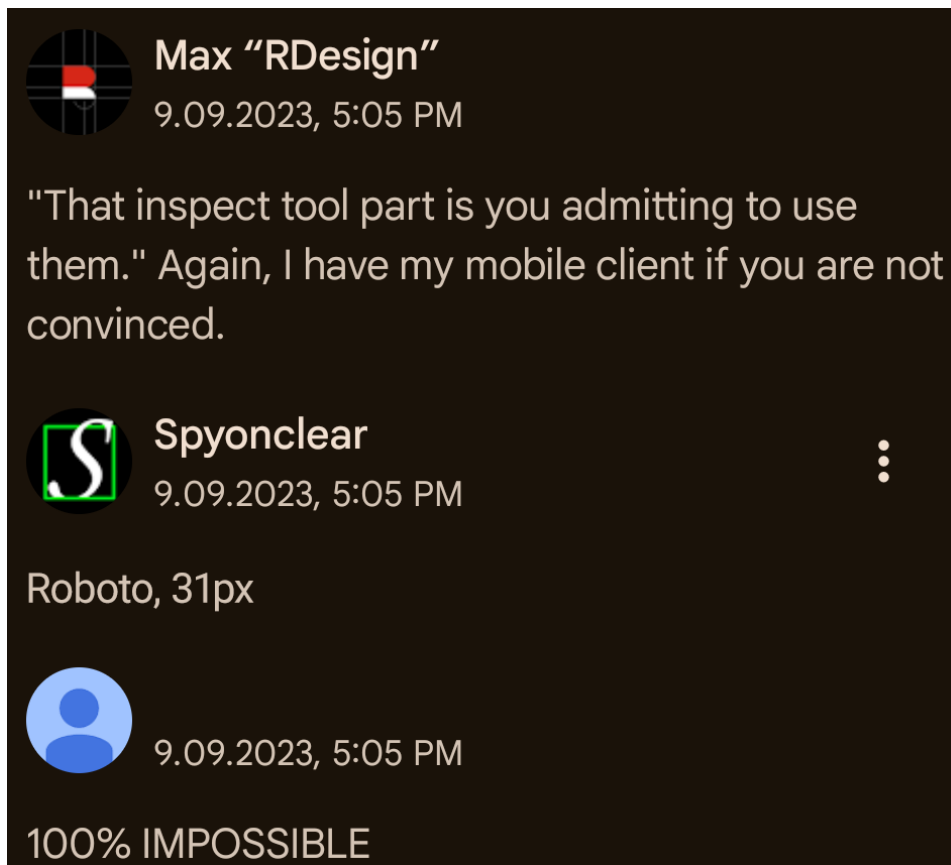

In the other thread, someone trolled Max.

Anyhow...

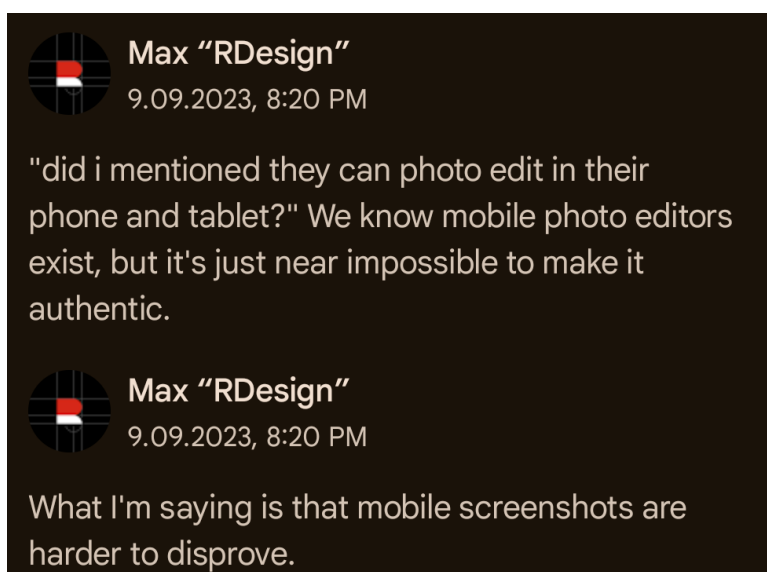

Bet. No idea what's he's talking about regardless.

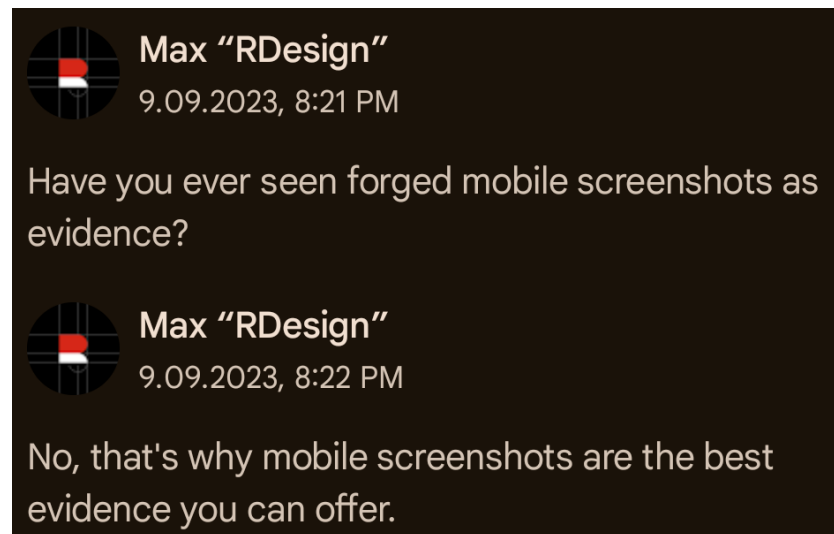

I have it.

Didn't he used Figma at that time?

Considering it took several months to make his files, I can guess it was made by certain image editing softwares.

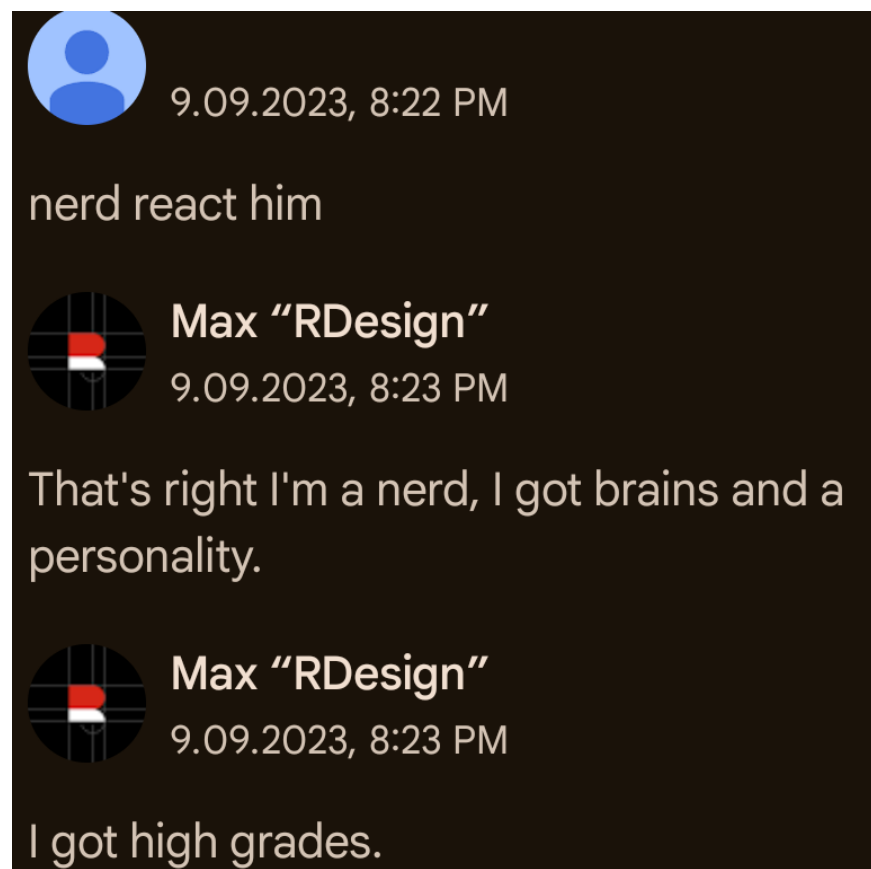

Ibis paint, Krita, Adobe softwares, and internet services like Photopea. I have to mention that you don't have to be perfect to fake your way up.

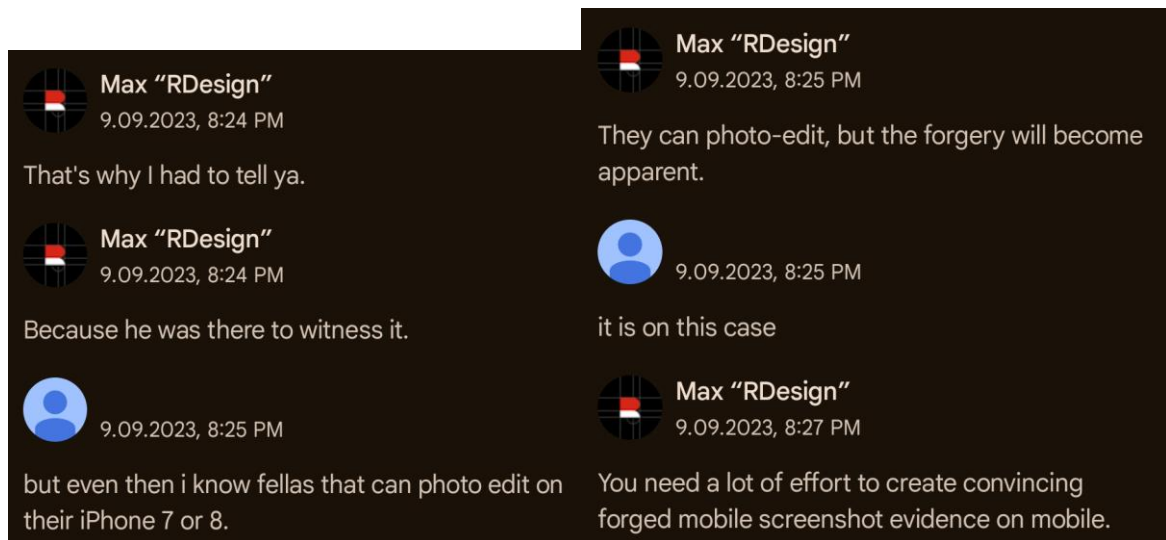

No, because he didn't have to. The one image that says "Roboto, 31px"? Photopea.

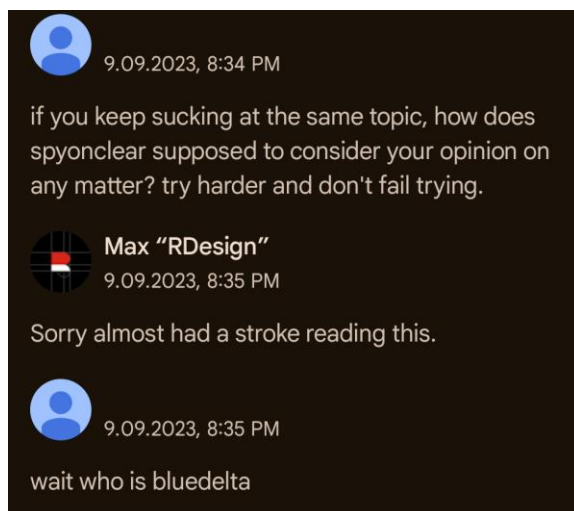

Stop acting like Android can't have photo editing softwares, you Cretinzyk!

I did just proved otherwise. I don't think Max had one brain to begin with, let alone multiple brains and a personality.

Can deny, All you can do is plain text on right font and size, it's as "high-trained" as installing any browser that is not Chrome.

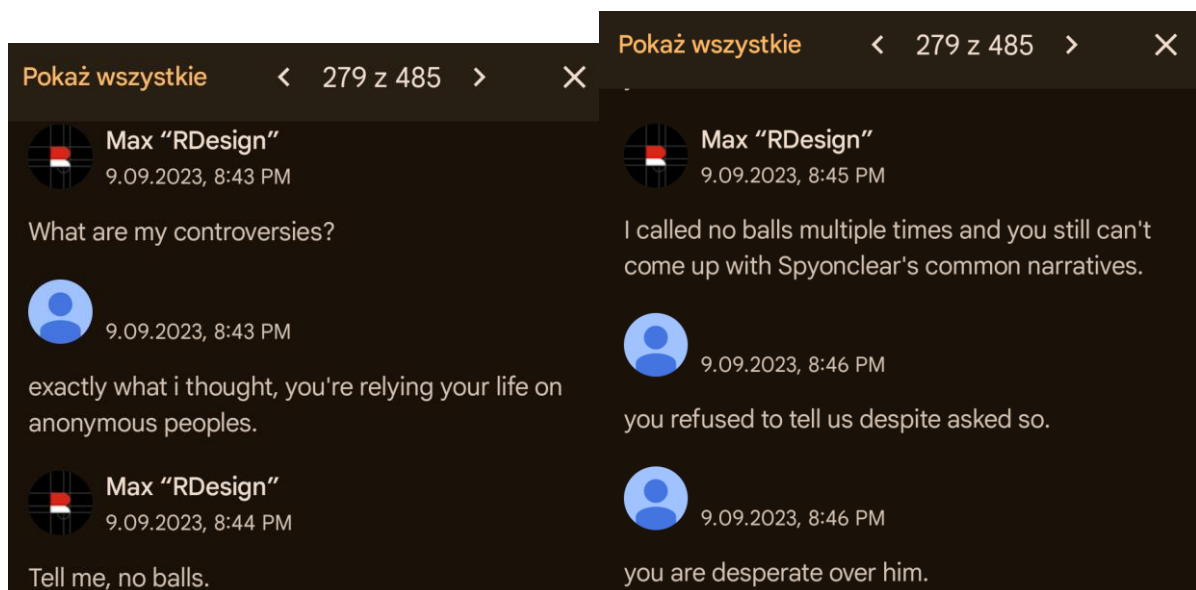

He got the high grades, ladies and gentlemen.

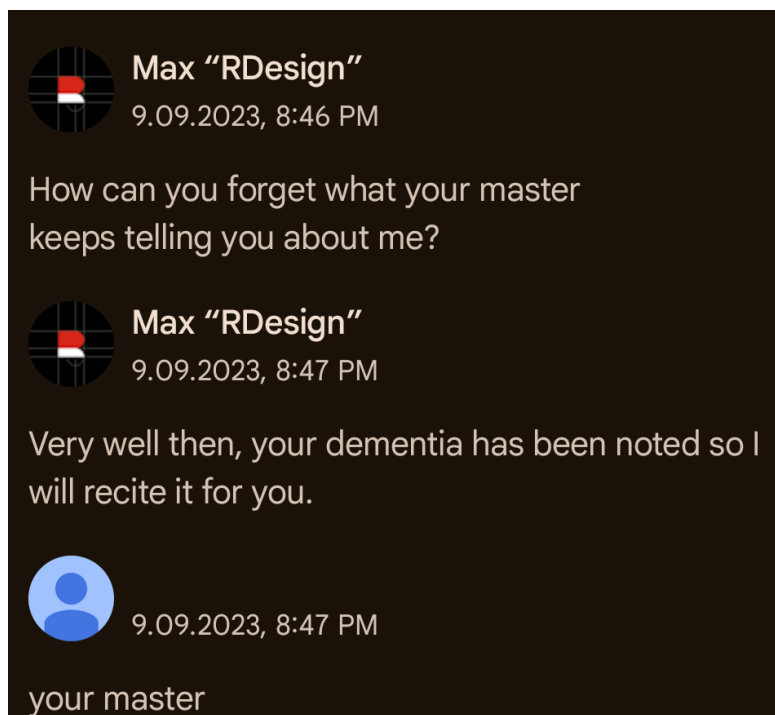

Consider the following: actually learn; don't mess with the people.

Getting 5 in Ukraine means D in United States.

That's worth noting because I found his confidence amusing.

He would watch this very document. What he's got to say in a retrospective? He will not going to admit he's fucked up as bigly as Chromatic.

Using dehumanizing language against the person supporting Spy, got it. It's now fair to strike back to that Retin.

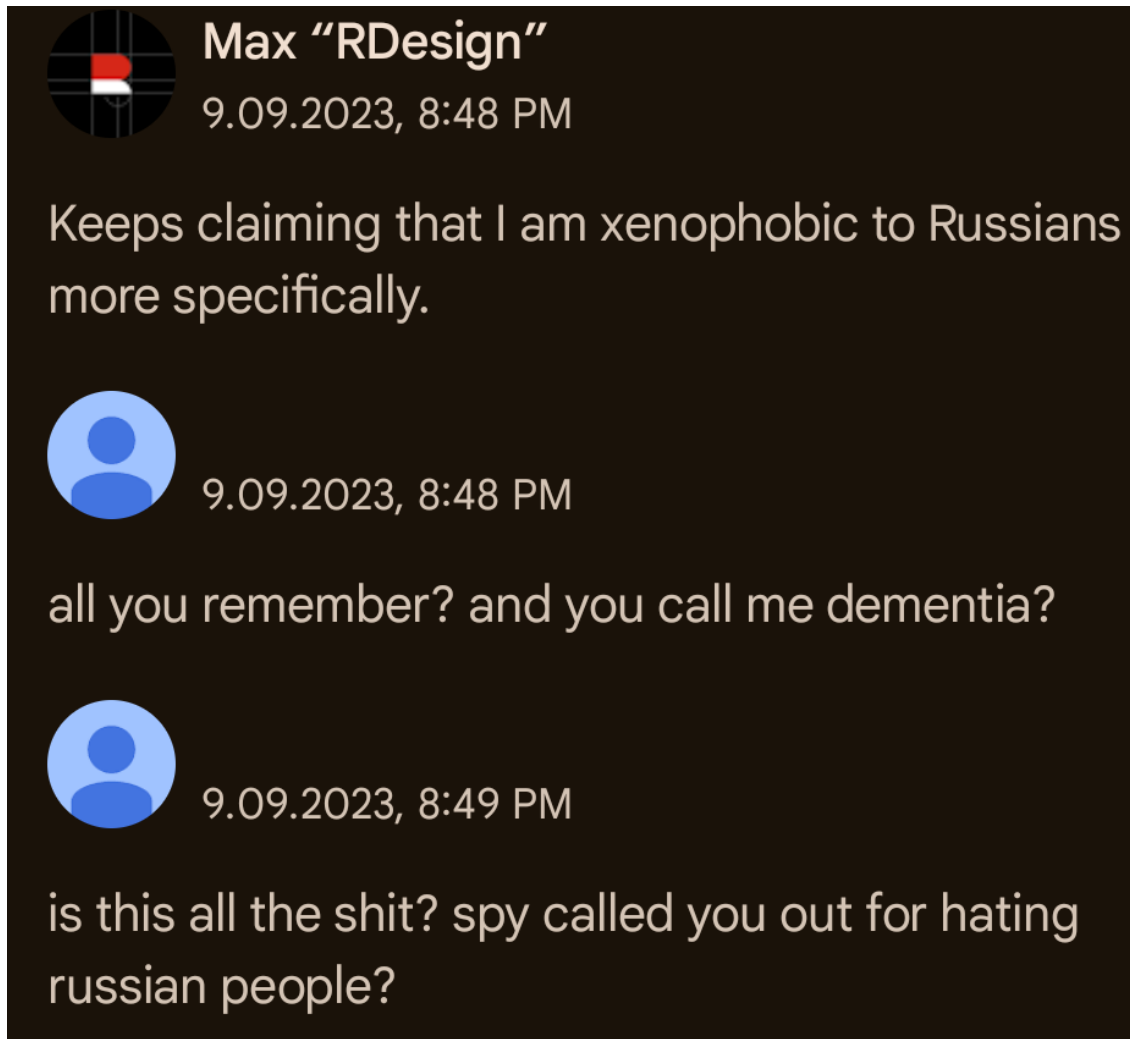

Have he considered that there's so many controversies out of Retinzyk, it appears that the anonymous person couldn't keep them in mind.

Oh well let's call anon demented, and act like surprised when getting called yourself retarded!

Anon would call out of that. Two can play the game of getting offended.

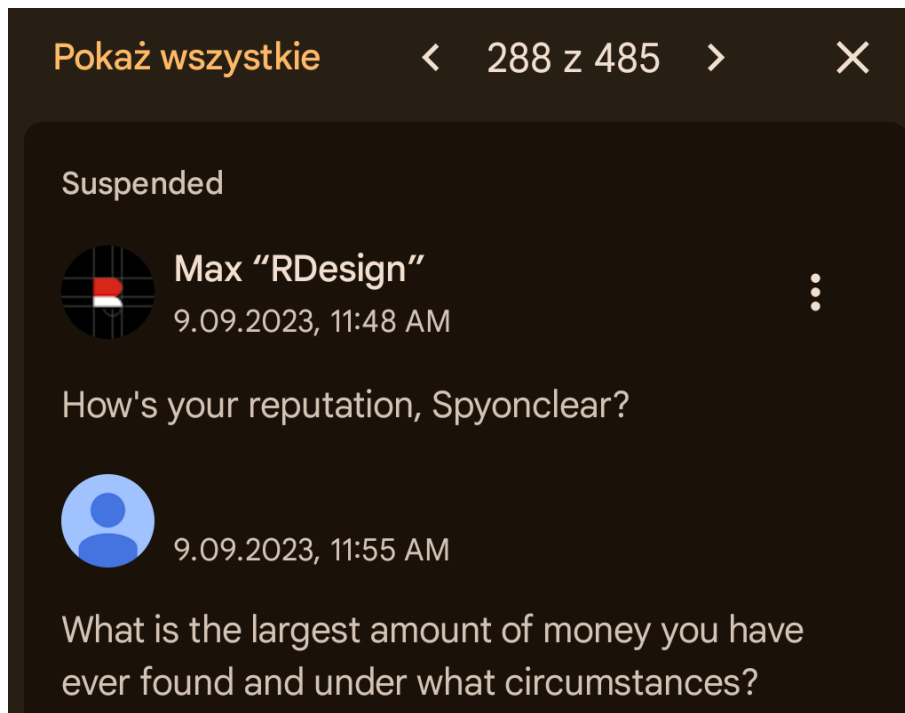

All the signs pointing out of the disdain of Russian. It won't be a big deal if it weren't for denials, and bringing the said sentiment whenever that's not asked for.

Annexation of Crime has been took place in 1783... I can imagine Spyonclear celebrating that moment, making pigeon posts when he was negative 218 to -217 years old.

As of the rest of the regions, well, it's not for me to judge, although I would be pissed off with the loss of Lwów and other eastern territories, had I happen to live as a teenager after WW2, but we had to deal with the communist influence by then.

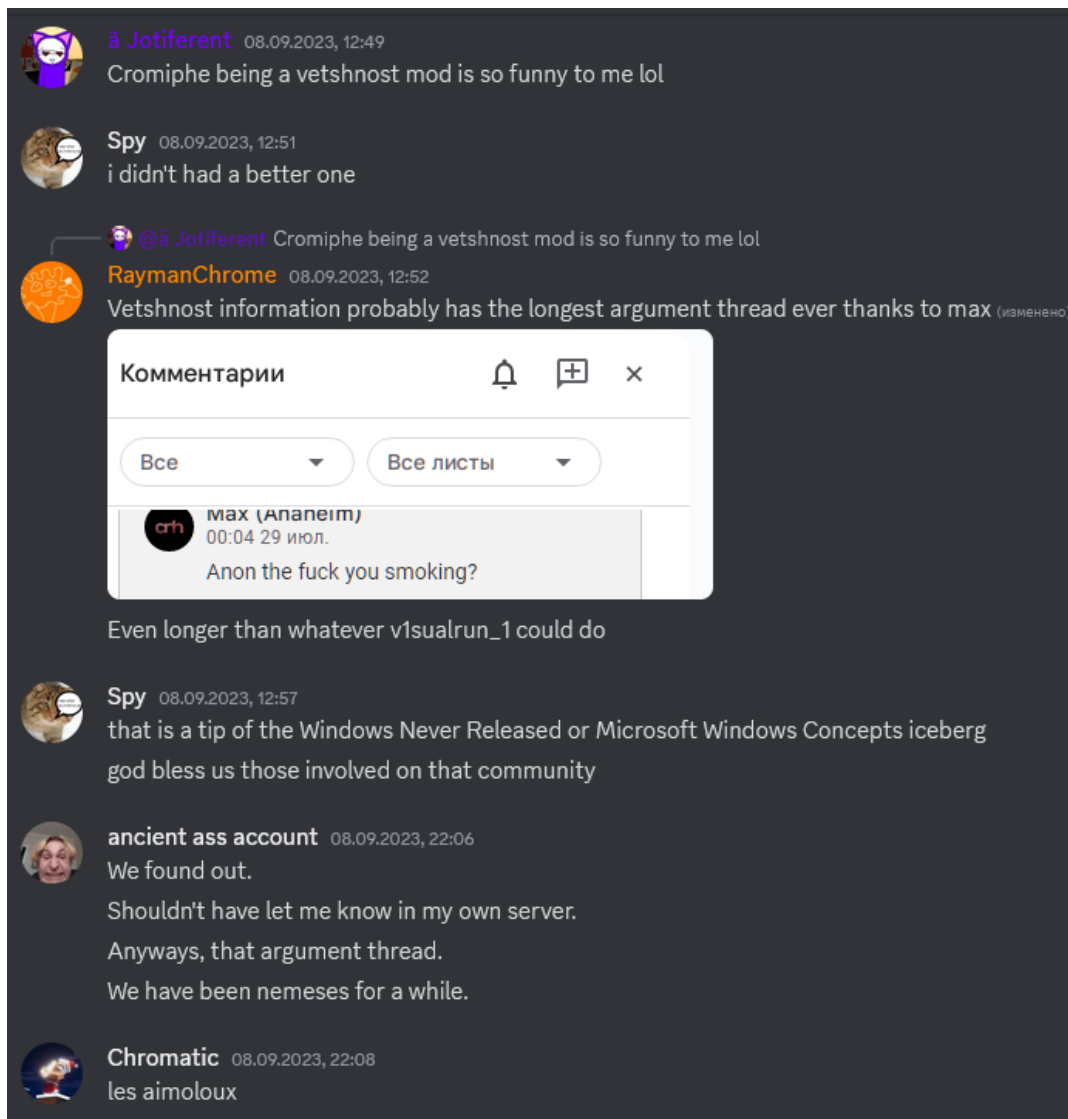

Jokes aside, it's not Retinzyk's business on how Spy reacts over Russia's events.

Retinzyk fears getting reported for disturbance

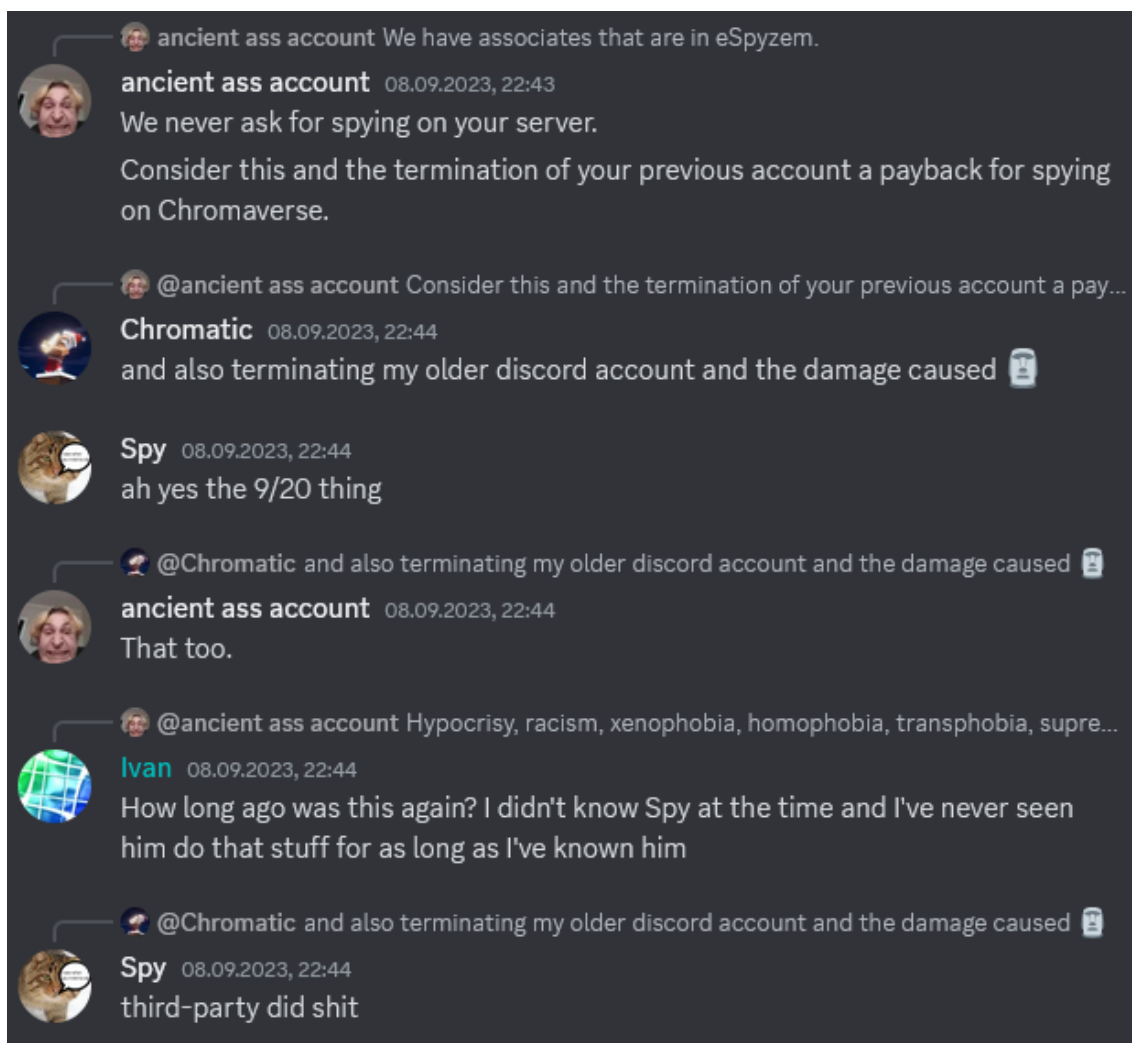

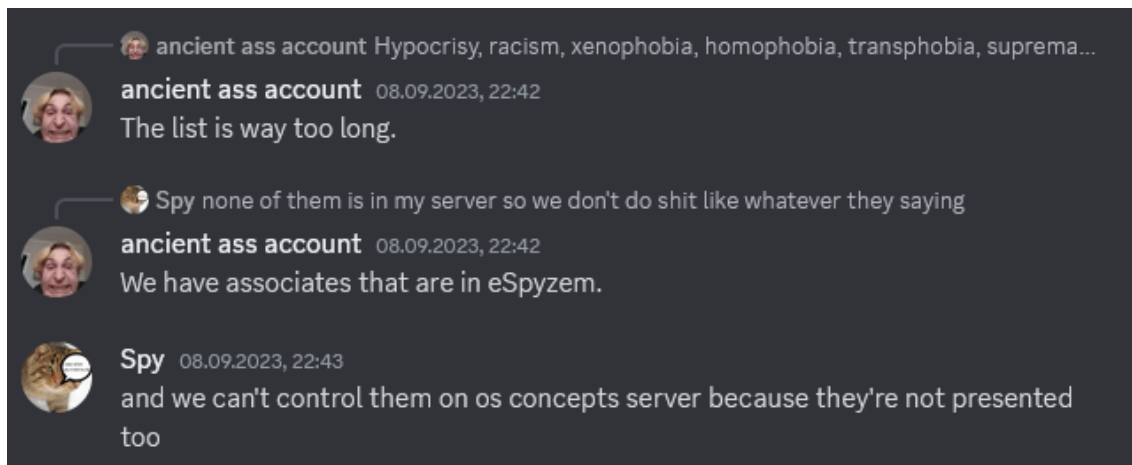

You do exactly that, Retinzyk.

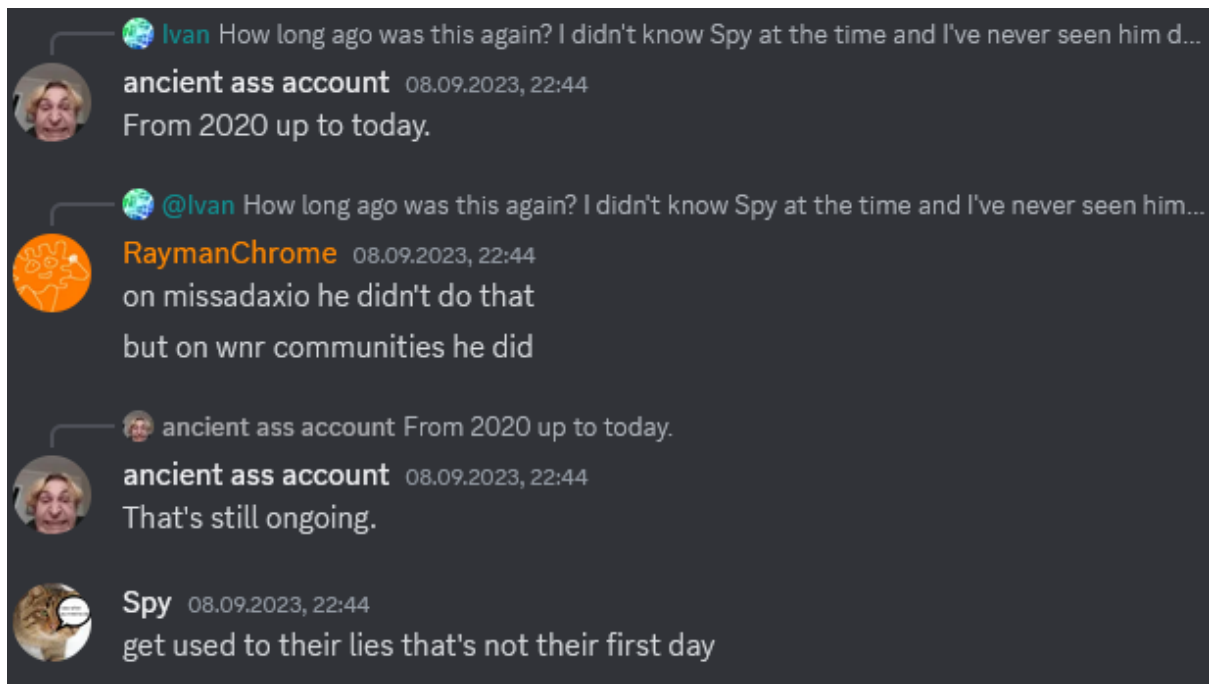

The chat had been reorganised to the “spyonclear/chromatic” thing.

Retinzyk was on to say he have his team members spying on eSpyzem

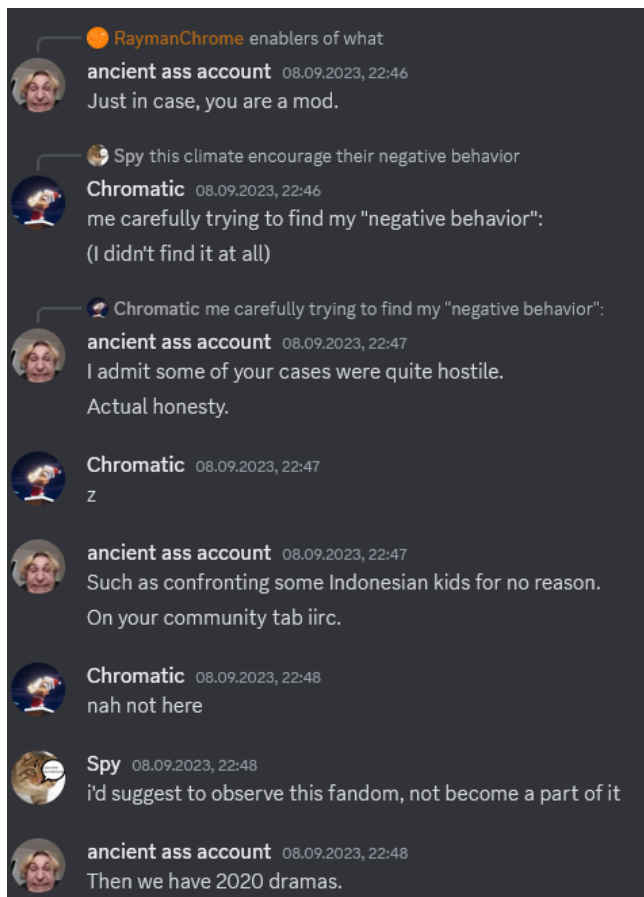

Did they agreed that this was on revenge on ChromaticAeternus losing his discord account? For reference, Spy did not terminated Chromatic's account.

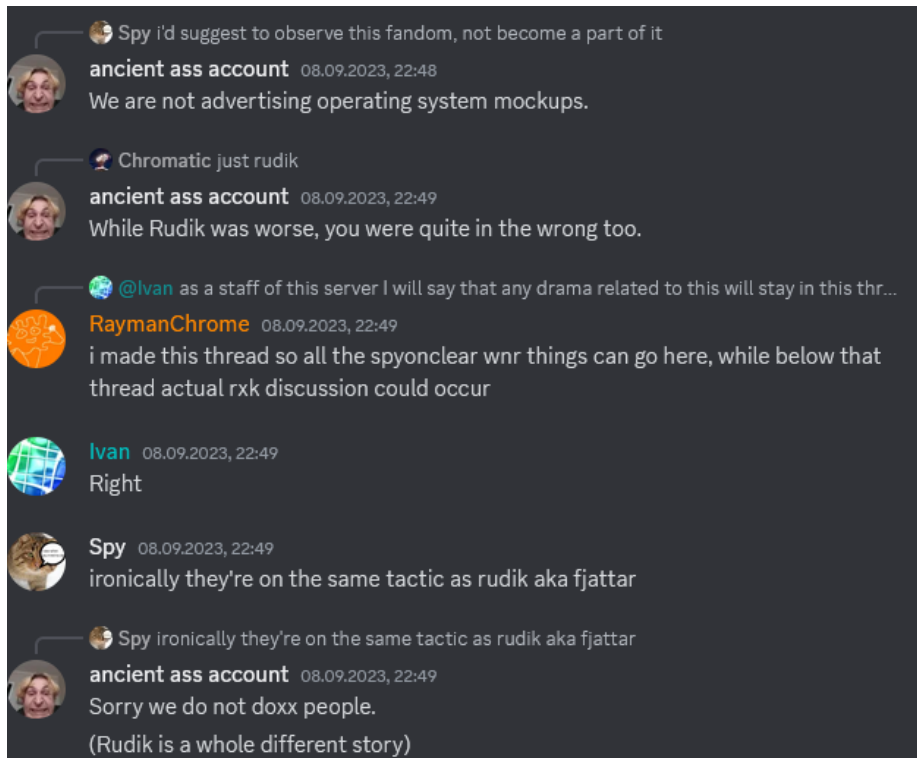

2020 was not in fact the first year Chromatic tried to attack Spyonclear.

Neither Retinzyk had joined the Operating System Concepts community on that year.

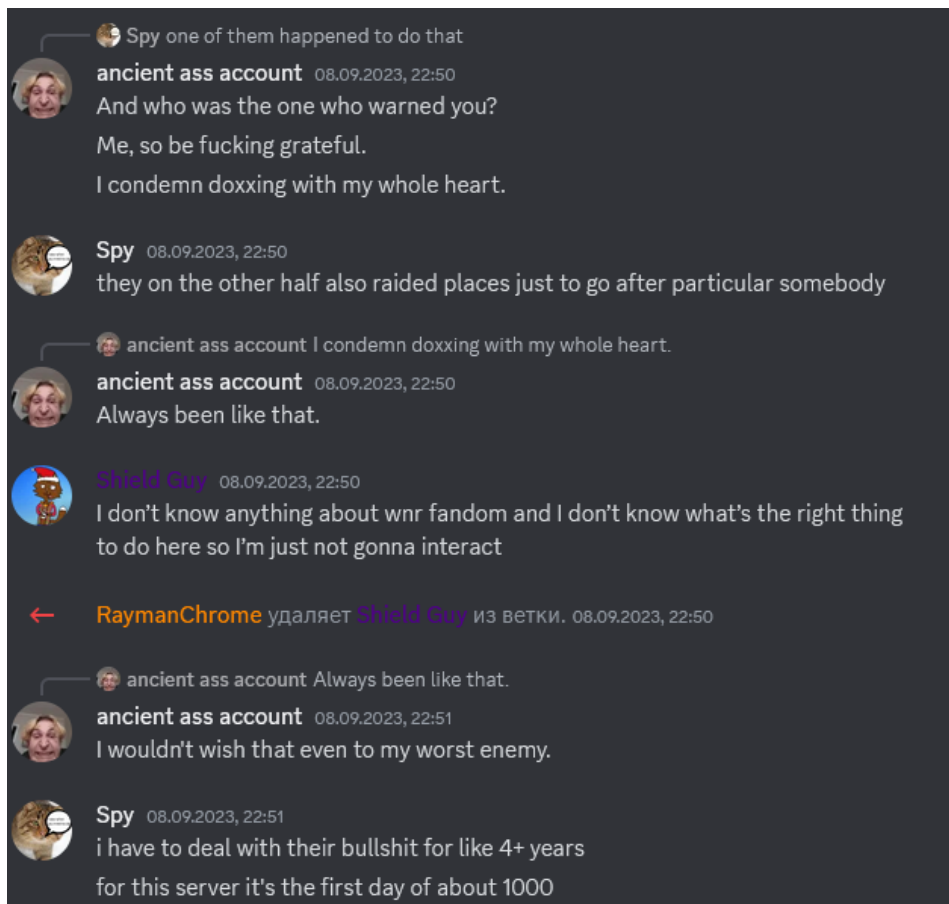

Judging by the lack of The Chromatic Files, Retinzyk did not acknowledged much of Chromatic's controversies.

At the time, he was either not aware of The Rainbow Pill²⁰, or refused to acknowledge the misuse and mishandling of Fjattar's private information.

²⁰ The leaks of Chromatic's 2020 server. See "Separate server for disgraceful activities" on Issue 1 for more information.

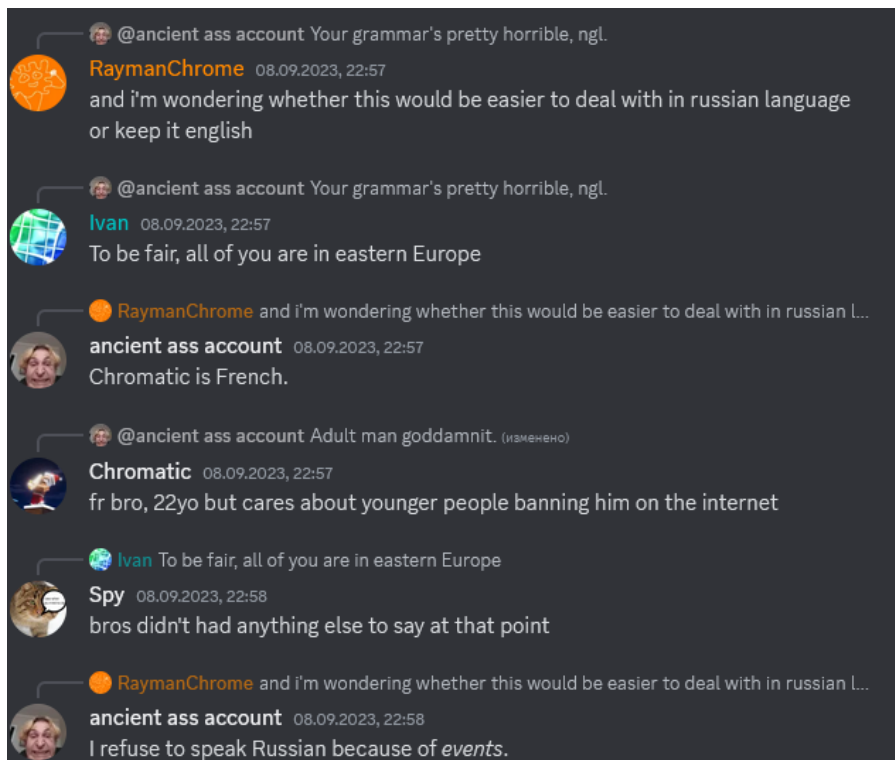

Spyonclear had hinted that 2020 was not the first year of Chromatic's dramas, and Windows Mockups Cold War was not the first of such conflicts.

Never cared? What's with the union on the gooning server then? You're hiding it, despite have been previously documented at The Rainbow Pill. Spyonclear would then to hint about the history of the union and how Chromatic would deny the history.

They have managed to turn RaymanChrome on their side.

The covering of this conversation has got abrupted once Spyonclear got banned from Missadaxio Server within a hour of staying here.

Windows Never Released: Screen Showdown

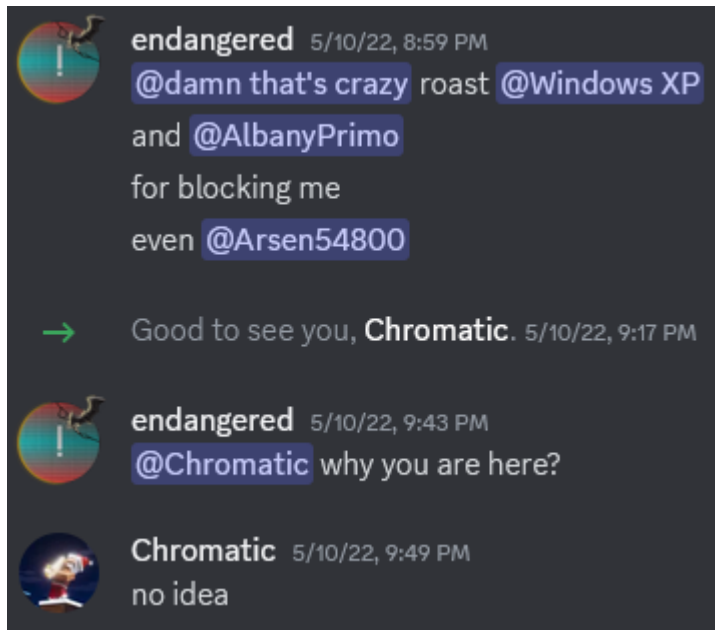

Dzen: WNR: Screen Showdown was the 2018 Discord server, when the old community members would compete, sharing the images²¹ of fictional Windows versions. Whoever had the most votes, would had won, and had his work to be put on the #hall-of-fame. It had been abandoned on the same year, in favor of OSM: Screen Showdown, but the latter would also had to be abandoned. The key difference was OSM:Screen Shutdown had been locked - WNR:SS was not. The owner of this server is infinitysnapz, today known for his YTP Tennis works and as the contributor of Missadaxio.

It's unclear did WNR:SS had been maintained or not. But it looks like this server is not moderated. This would be a good thing for the Chromaticans, and certain other people.

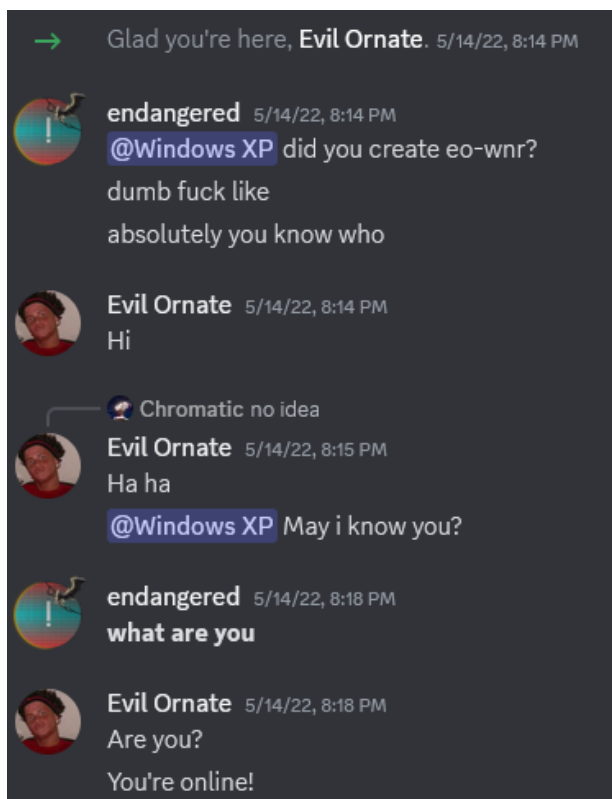

Enter 2022, the first boiling point for this server.

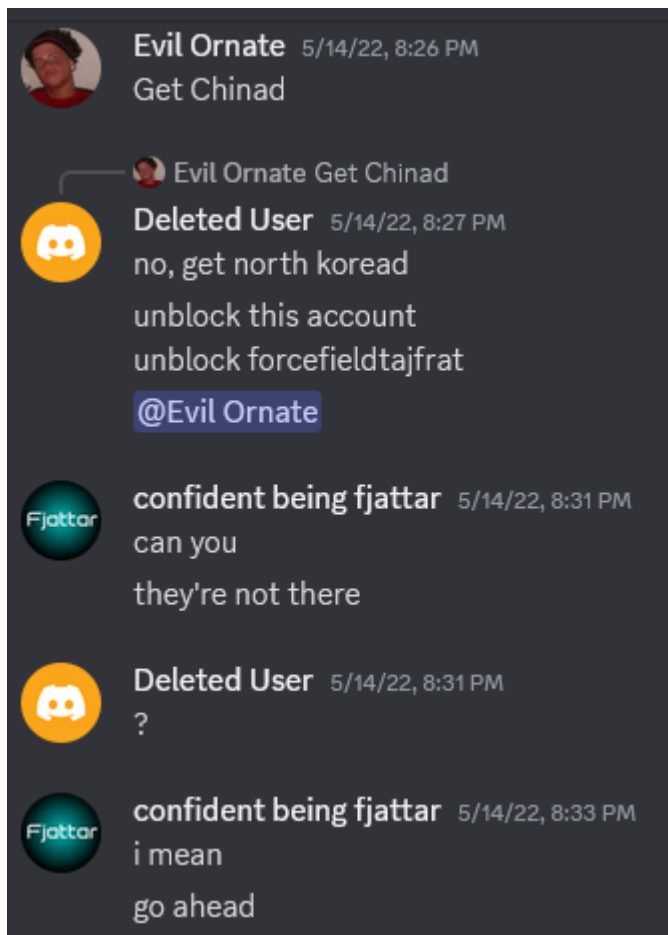

²¹ It's the bootscreens. I have not seen the desktops, or any other UI art works.

Arsen54800 and the other person by the name of Windows XP had previously entered this server. They are unlikable by some.

They had still arguing to November 2022.

The reason of how so recently? The undisclosed animator had seen OS Mockups Wiki page of Fjattar. This caused him/her to be not in the good terms with Fjattar.

I would demand the explanation on why the word “deadname” was used in regards of former usernames, not birth names, or former real names.

If this is not 2019-2020 anymore, i could have not make Issue 2, Issue 3, or potentially work on Issue 4, which covers the conflict in 2025. *DiscordTLE had cut ties with Fjattar in 2024*

Care about certain words?

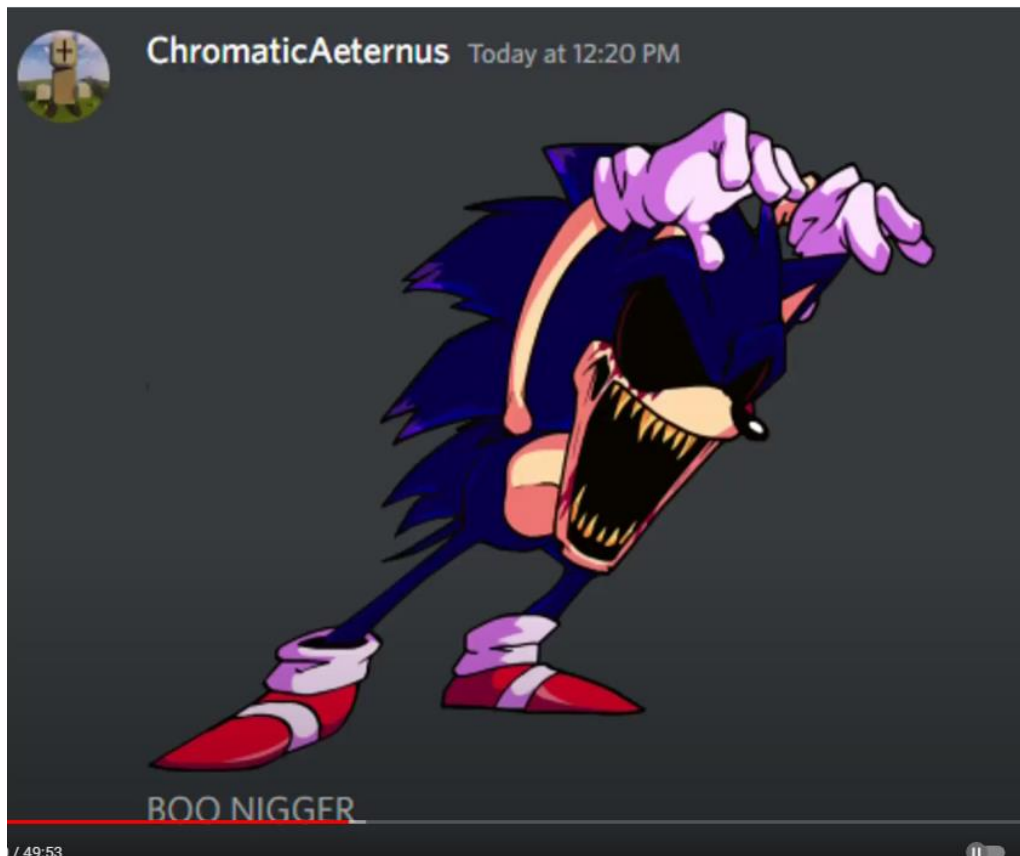

Reisuverse: Retinzyk, my boy, just admit you're caring about certain words for personal purposes to protect and preserve your golden boy partner. I haven't heard any condemnation of yours towards ChromaticAeternus, when he lashed on peoples, using hateful languages.

This was so notable, that him (or, as claimed, his server members) saying that was turned into drawing

In 2023, Spyonclear was having another conflict with ChromaticAeternus after someone on his server (Chromaverse) would say the N-word, which would eventually use as well.

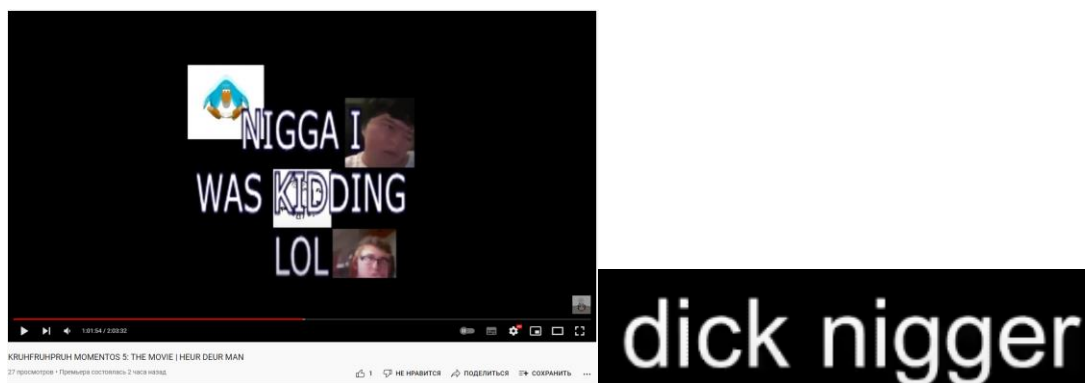

According to some video, Chromatic did have his own funny racist moment, that can be gladly exploited. The point is, it's none other than Chromatic. There is no other ChromaticAeternus Spy had taken a screenshot of.

The screenshot in question was made by the person you had accused of doing just that. Screenshot was made on 2022-06-04, not in 2023 - but the original message had looks like it's made even earlier, judging by the use of Friday Night Funking mod sprites.

You can't fool a person who had witnessed it.

I would also make a compilation of my friend's screenshots. Some of them had captured minor offenses, or haven't given the context and isn't worth talking on. But I'm assuring you, these are getting on cringe compilation.

Chroma: I mean U6/U7R DUMB NIGGA PATATA.

Breaking the deal

Reisuverse: Back in somewhere on May 2021, we made a deal to unban each others.

Since next month, Chromatic, or some other shit mod broke the deal.

Here's yet another screenshot compilation.

And the efforts from month prior:

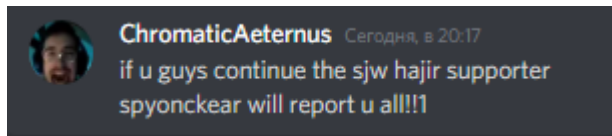

ChromaticAeternus#2360

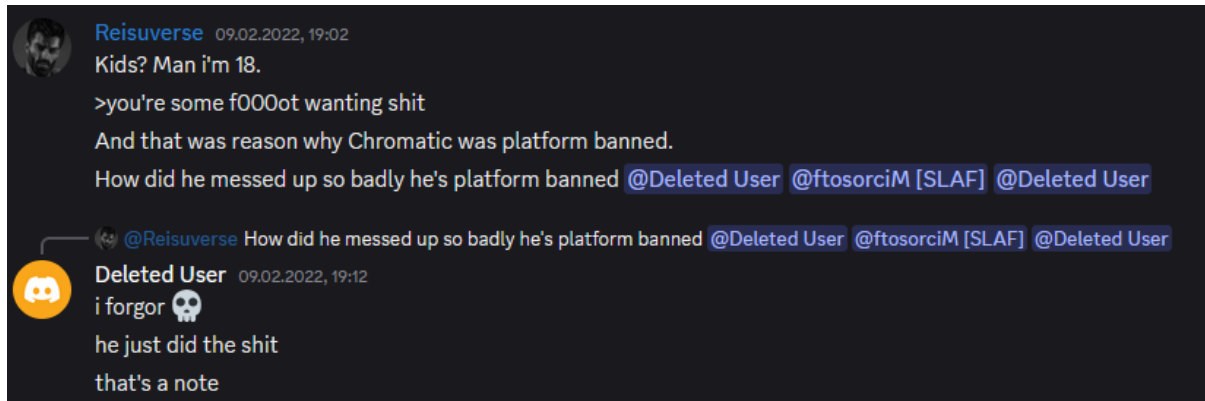

It sounds like a confession to Discord on intent of ban evasion. Discord did nothing with that. Chromatic and Chromaticans are free to harass people, with no feat of getting their accounts banned for Terms of Service violations – because they would create new accounts, just to continue the show.

Shame, because Discord could have IP ban him, or blacklist the word “ChromaticAeternus”. But the queer-looking guy has to stay with a new account.

Thought, he must have been acknowledged the risks of harassing people.

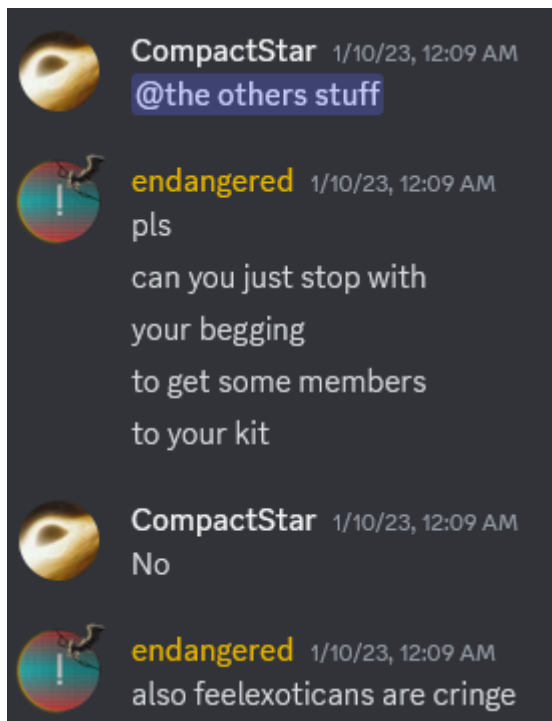

Now, let's see why #2360 was banned...

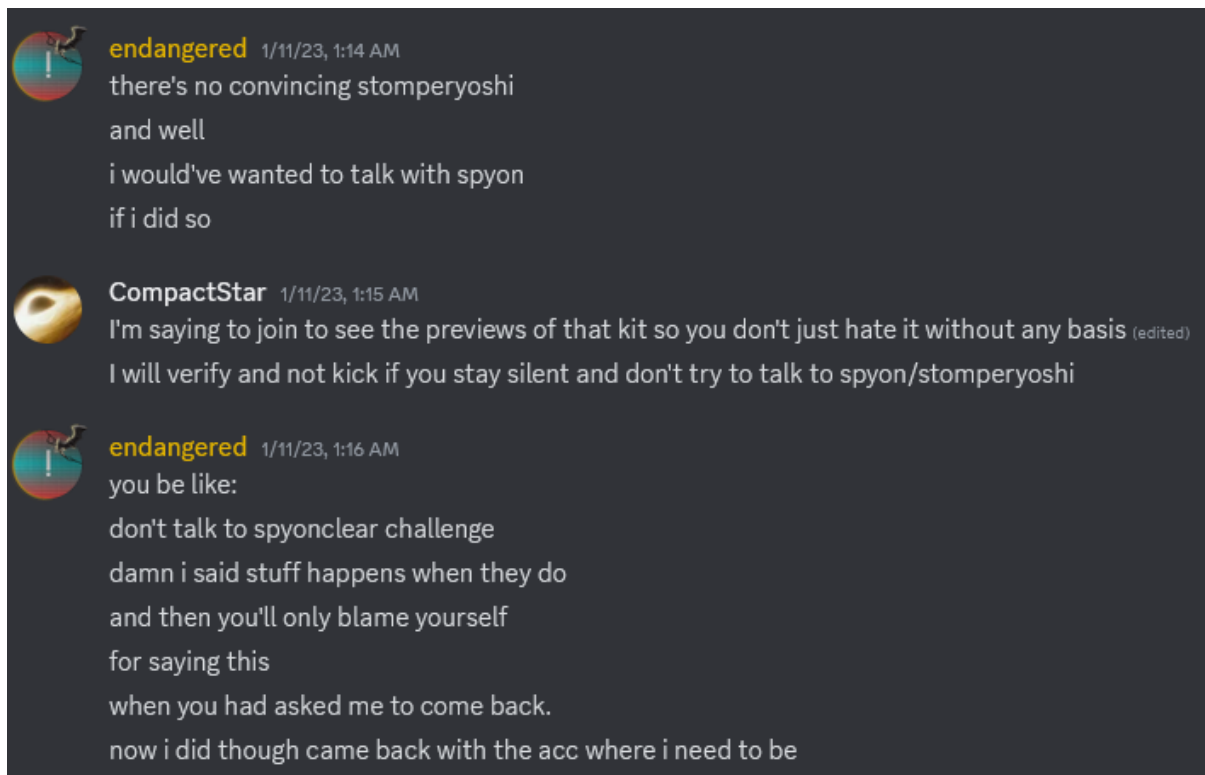

More Things

For two years, these are the honorable mentions.

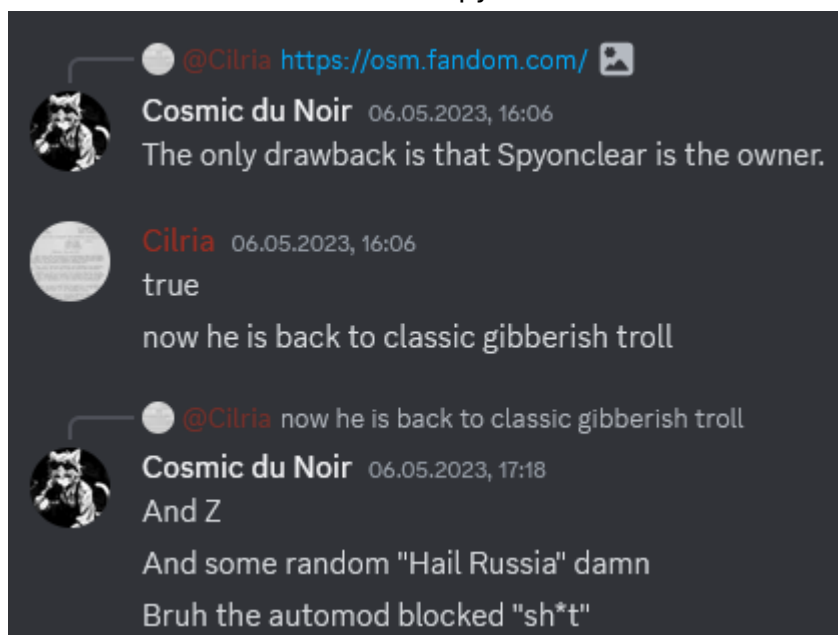

1. RDesign have so long nose, Fjattar actually thought RDesign have followers on his own.

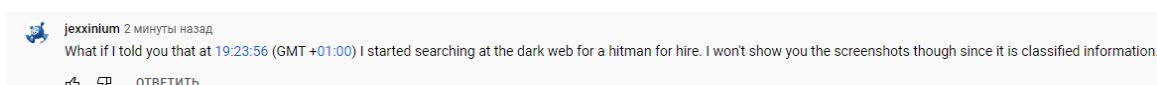

2. Spyonclear is everywhere. At least, what i think so, when he, and StomperYoshi was mentioned on the same Drenzeltz server.

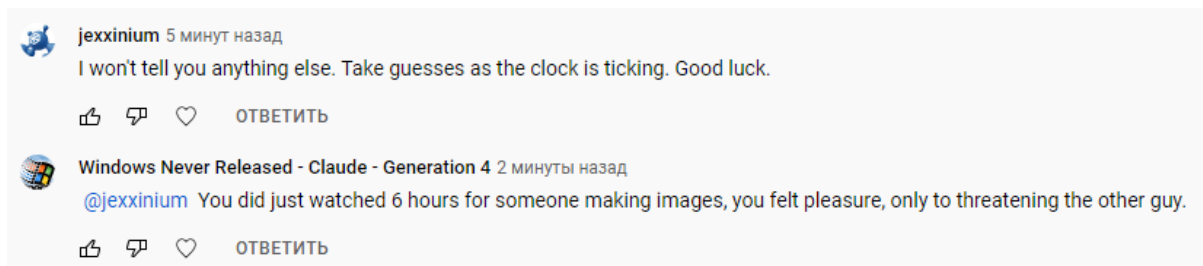

3. Some WNR Wiki kids think Spyonclear is the issue.

4. Probably you shouldn't send a death threat.

Issue 3 – 2024

Spyonclear's December Civility Challenge

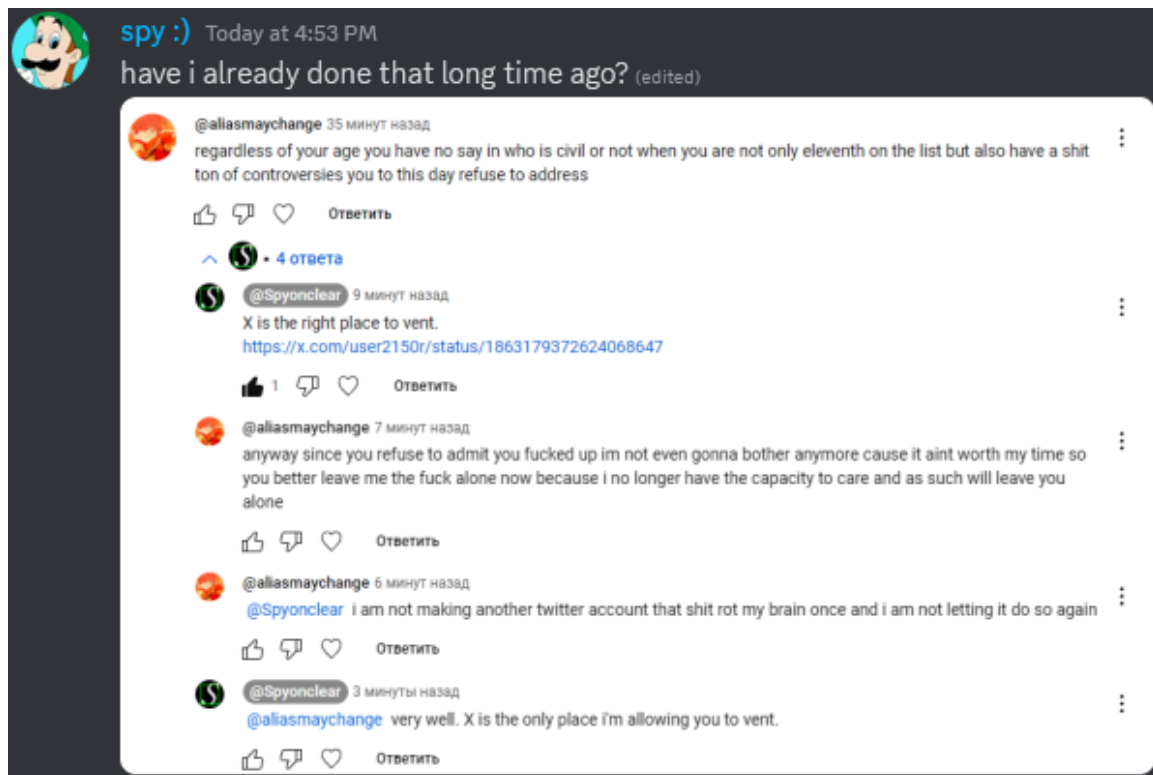

Dzen: The DCC had been made, Spyonclear challenged 10 people, so they had to be civil for December 2024.

RDesign had something to say about it.

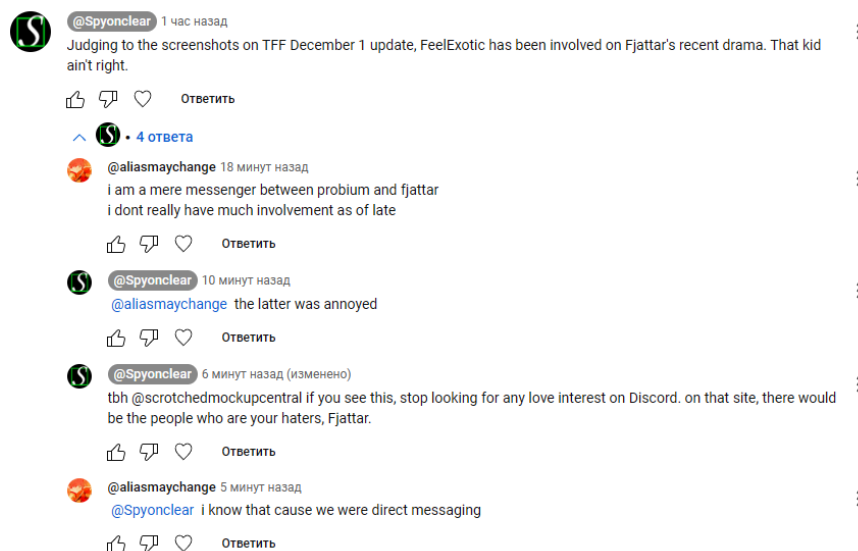

Speaking of attention seeking, RDesign did not let that go, and called Spyonclear not to find any civil person.

Spyonclear would get to isolate such messages to X (formerly known as Twitter),

On which RDesign claimed not to make a new account, expressing disgust on this social media's content.

On the other half of the conversations, Spy had confronted him regarding his involvement of The Fjattar Files and his involvement of Fjattar's conflicts.

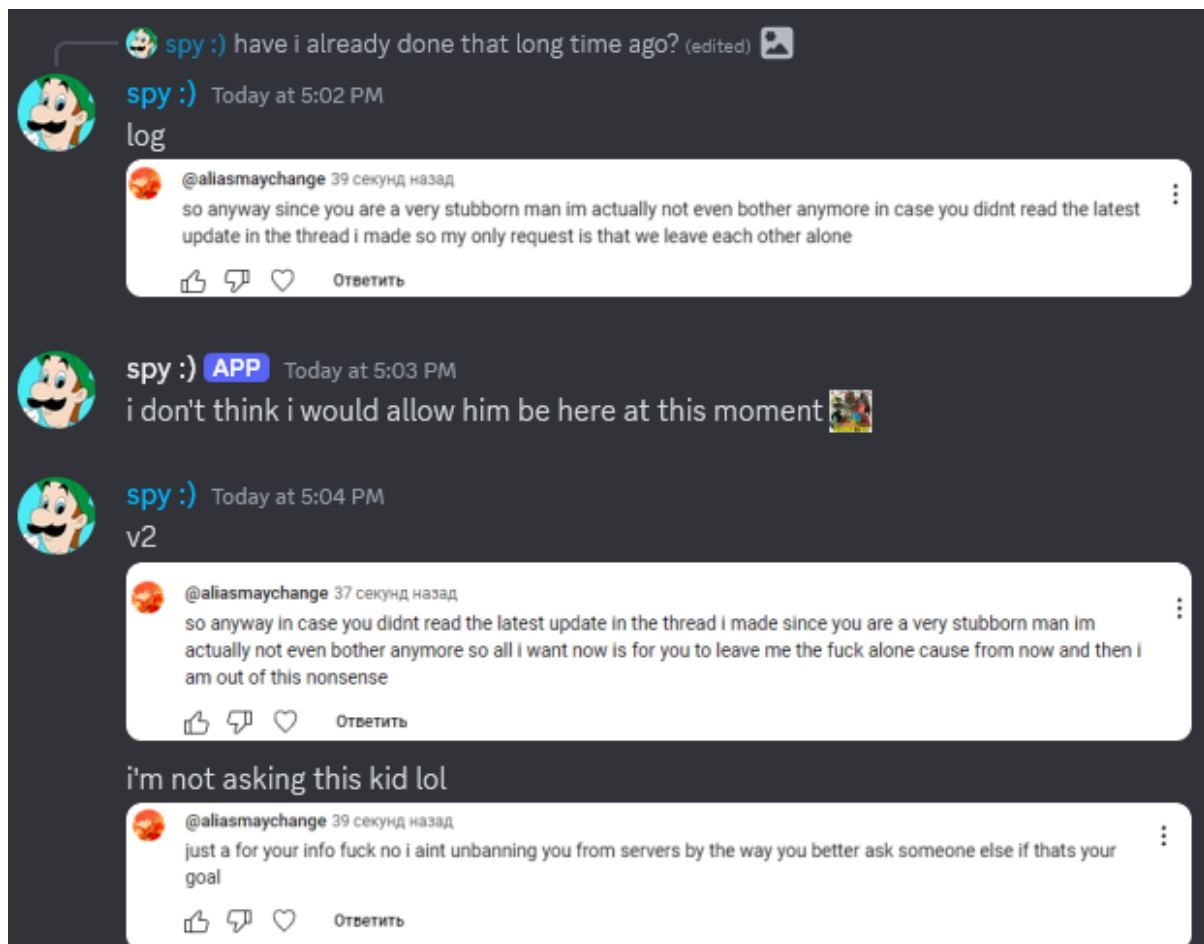

Dzen: That had happened much to Fjattar's discomfort. Fjattar had enjoyed sexting or roleplaying with the other individual. It looks like that person did not want that, as evident on their conversation with Fjattar.

It is not clear why that person go along with Fjattar sexting.

Fjattar's sexual conversation with another person²² would be called as grooming. Fjattar hated that word, as at the time he was 21, and the receiving person was 26. The Fjattar Files writers would dismiss that because the receiving person would feel violated regardless of the age. The former claims that such words would spark several Windows concepts community members to retire.

That's the context of Fjattar's December 1 drama.

It looks like RDesign had attempted to continue the dialogue. His comments were deleted.

RDesign had already have been pledged not to interact with Spy.

²² This person is not involved with Chromatic and RDesign. I would not name this individual.

The comments on that spreadsheet as follows:

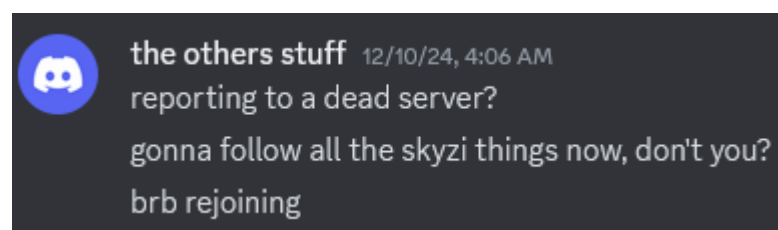

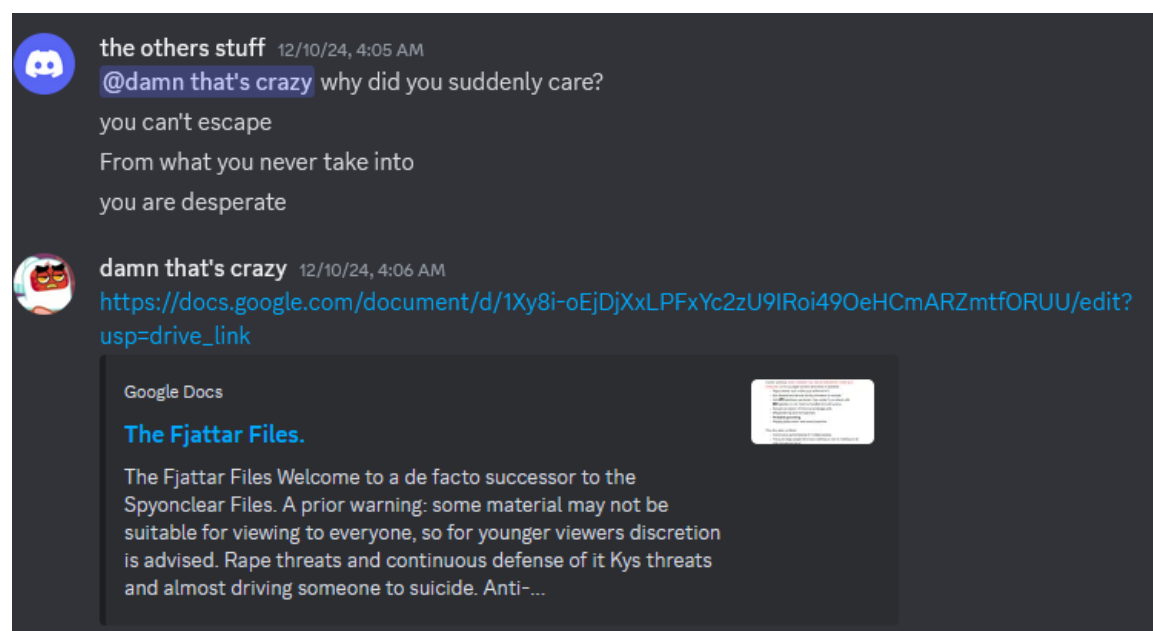

And, from Spyonclear himself:

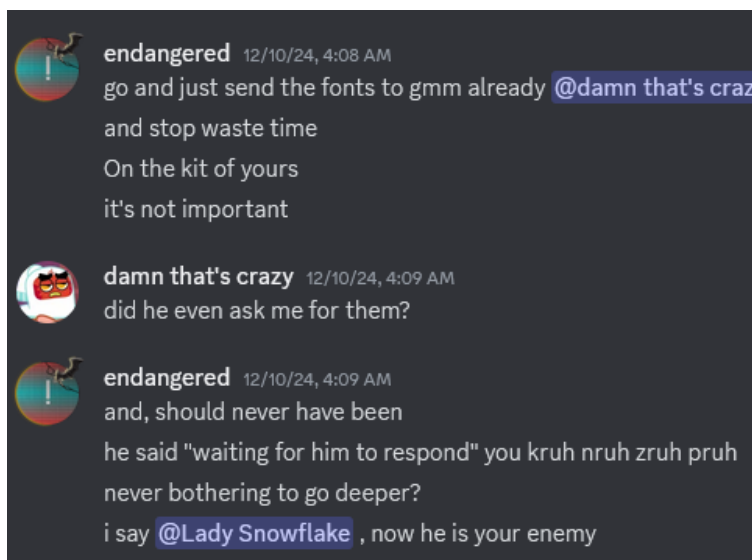

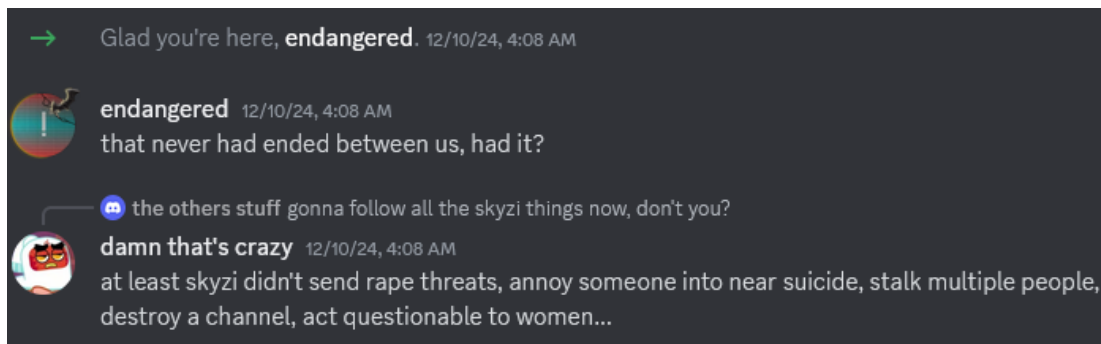

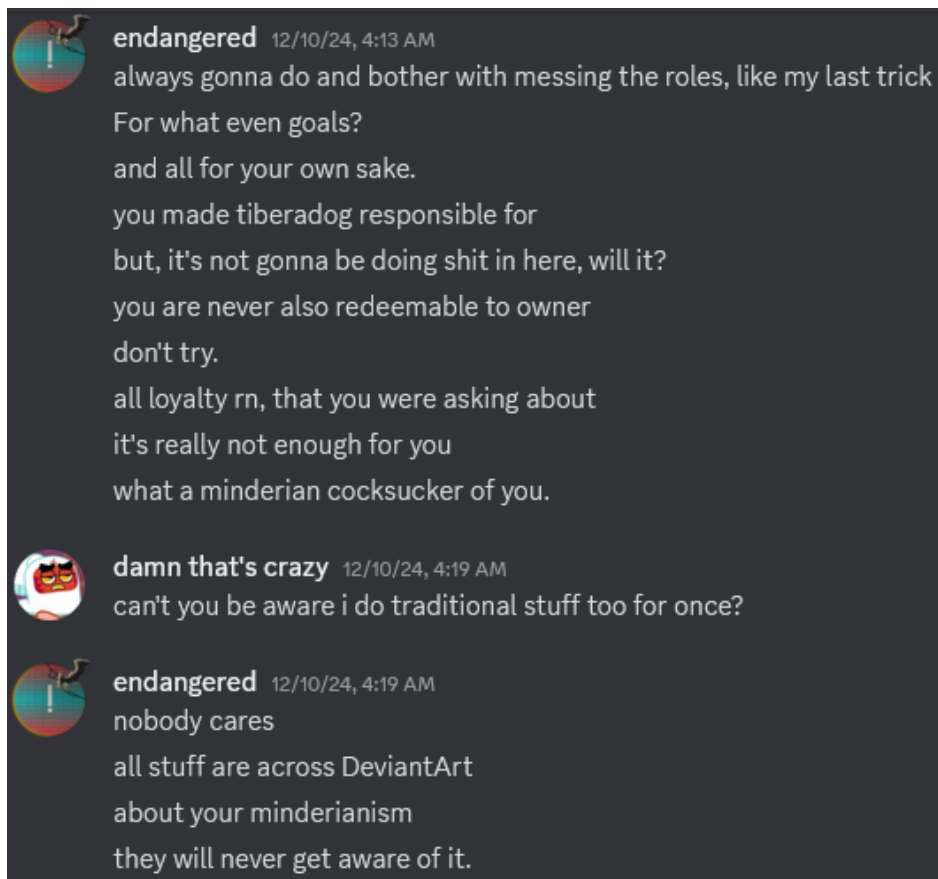

Windows Never Released: Screen Showdown

Dzen: We are back to the grand old server, the infinitysnapz' WNR: Screen Showdown. Why so? Another drama.

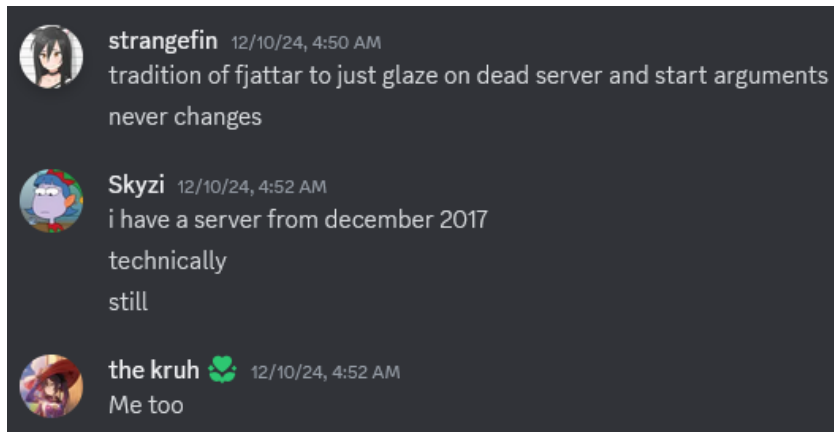

December 10 night of confrontation causes the owner of this Discord Server to lock this server. It was initially about the battle of Fjattar versus TheLogoEditor. TLE has been previously cut ties with the former by then, if you haven't noticed.

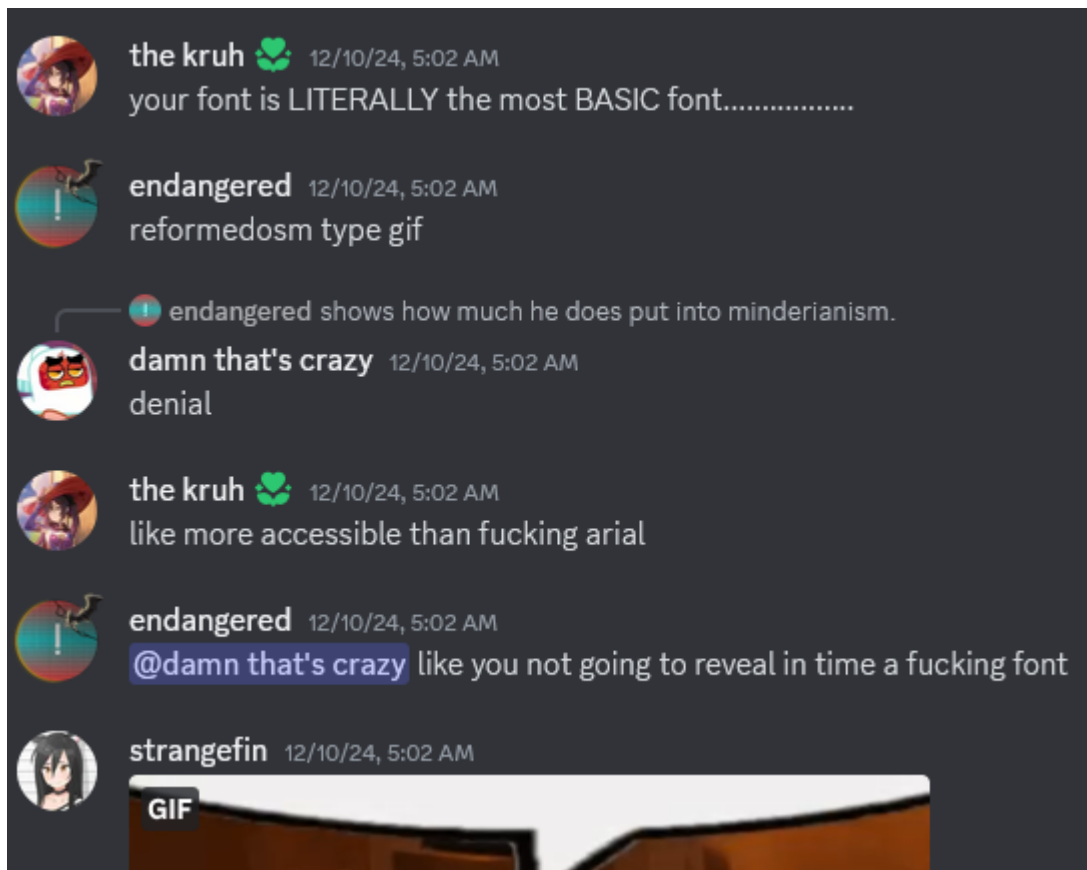

The more familliar figures had been appeared

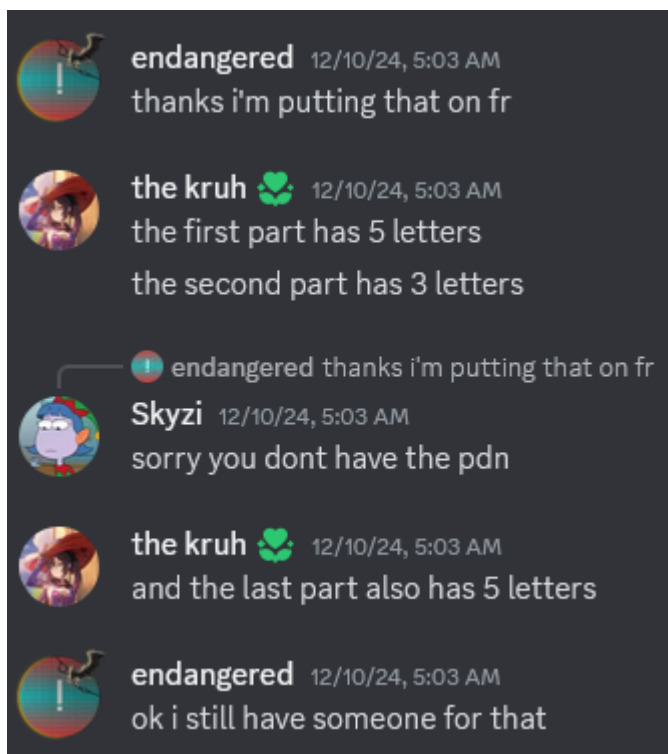

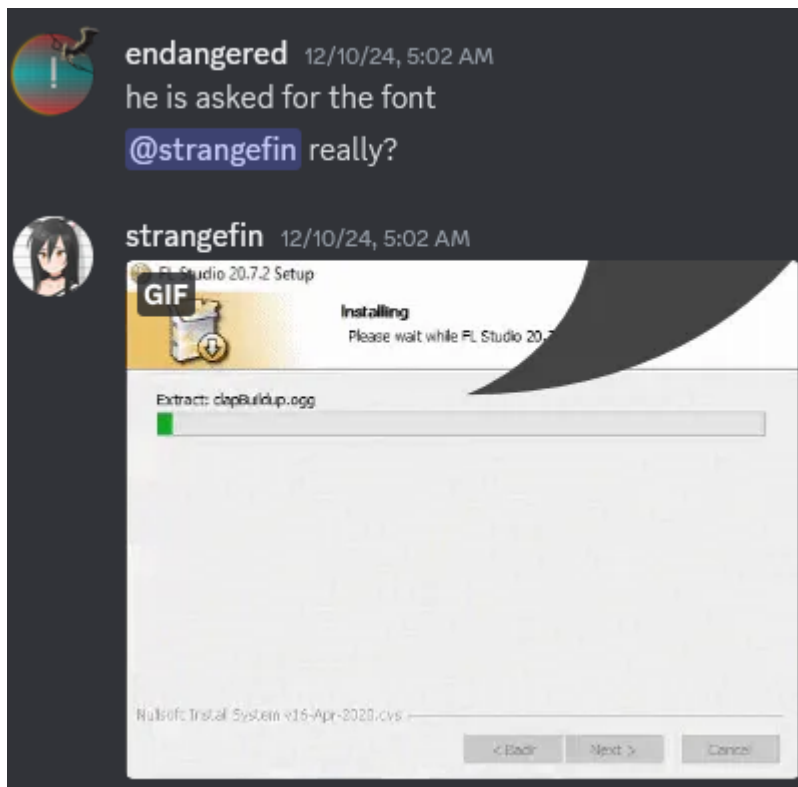

Fjattar would try to talk with discordtle940 into giving the font file. But it is too hard to drag-n-drop fonts to Discord.

I was convinced that the entire drama was about of not giving the fonts neccesary for personal use.

Someone arguing that the certain font is more accessible than Arial, the preinstalled font for Windows.

It looks like they had been referring to Times New Roman

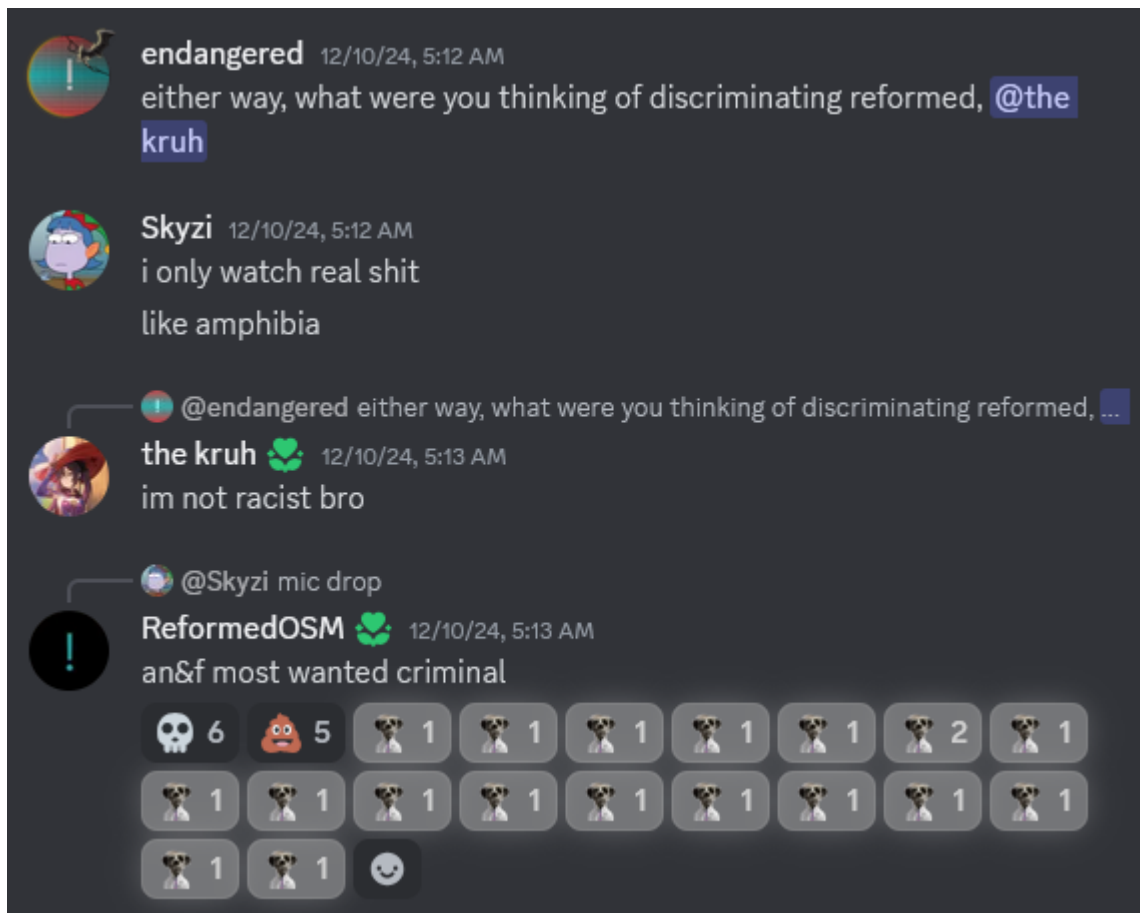

I had asked Spyonclear to comment.

Just like the certain person's The Files, i would go ahead, and skip the dialogue a bit.

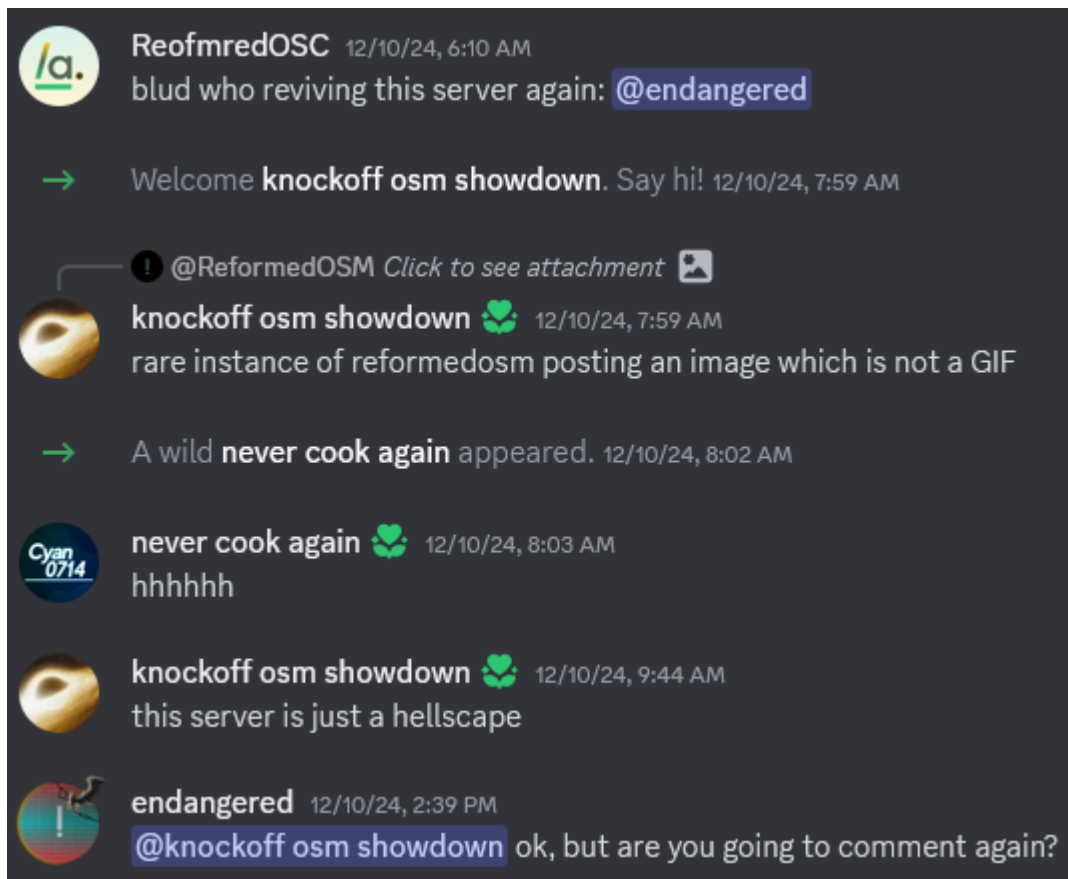

Then ReformedOSM has appeared.

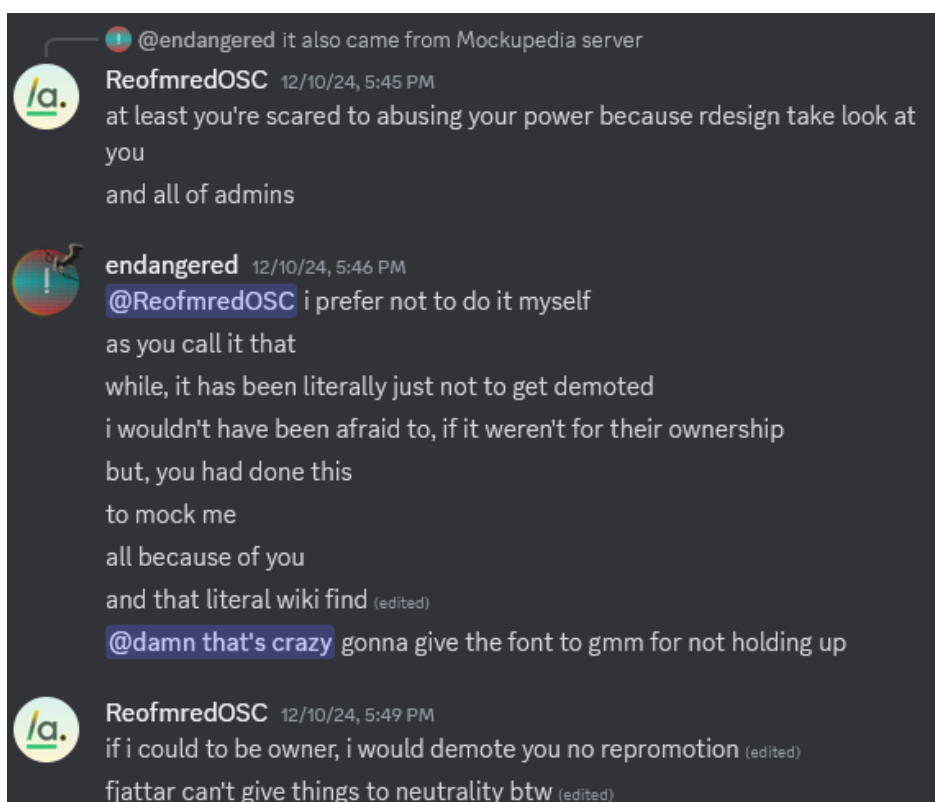

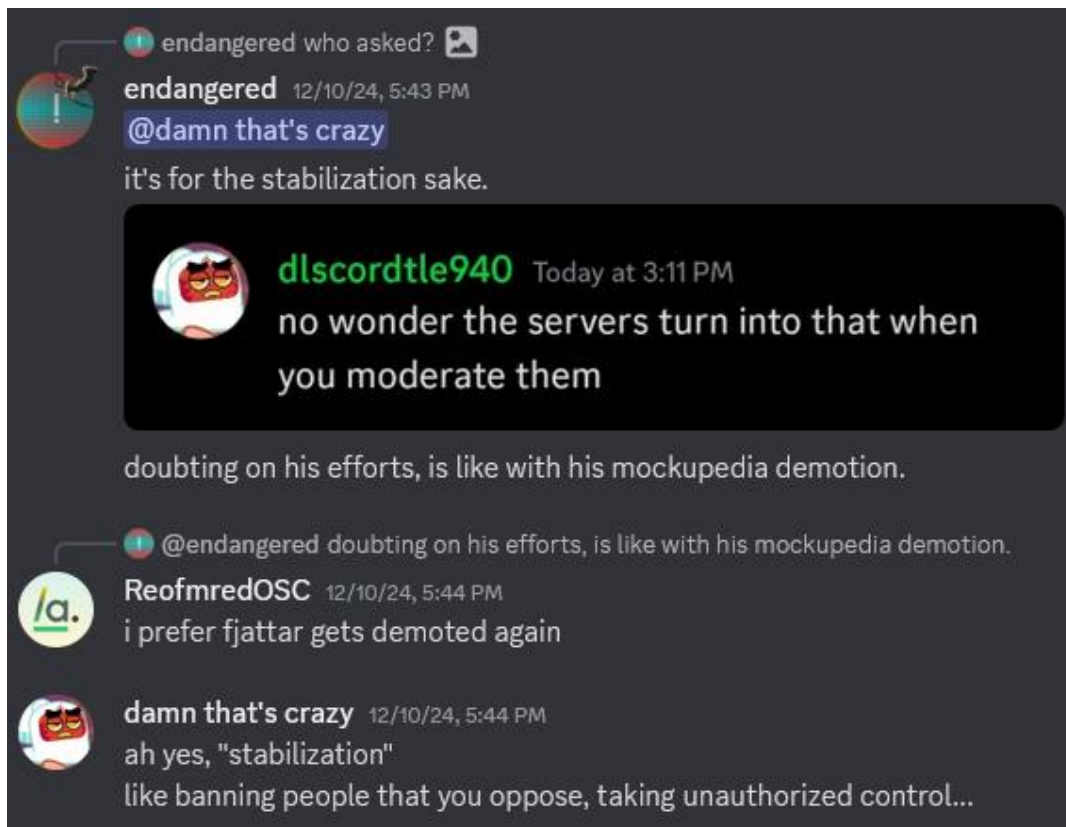

He has been spammed with emojis.

More people had appeared.

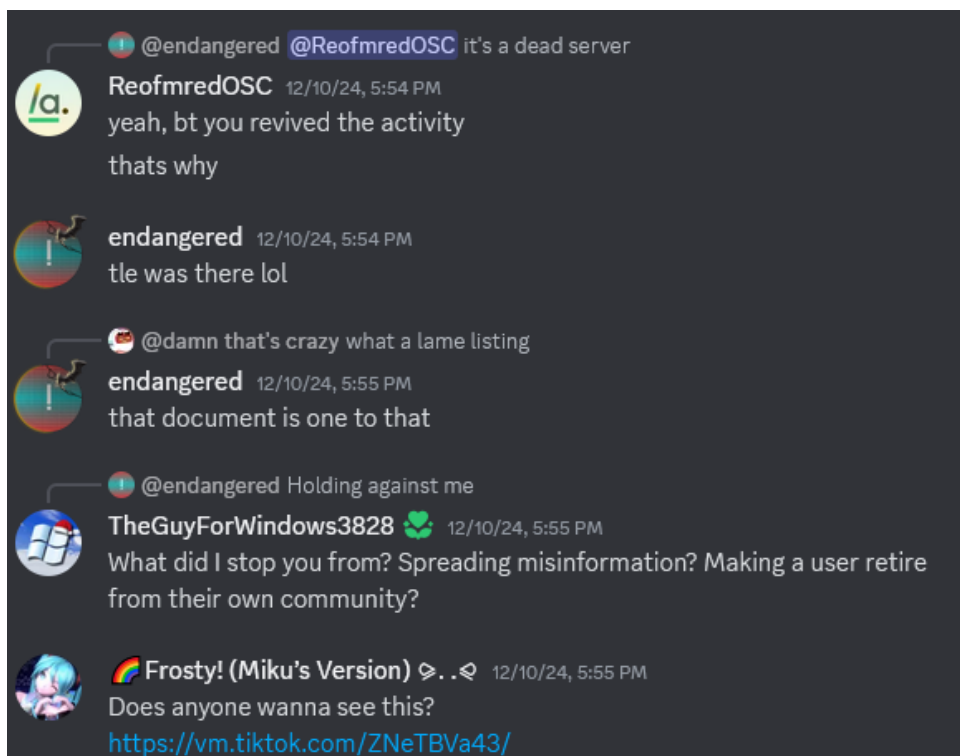

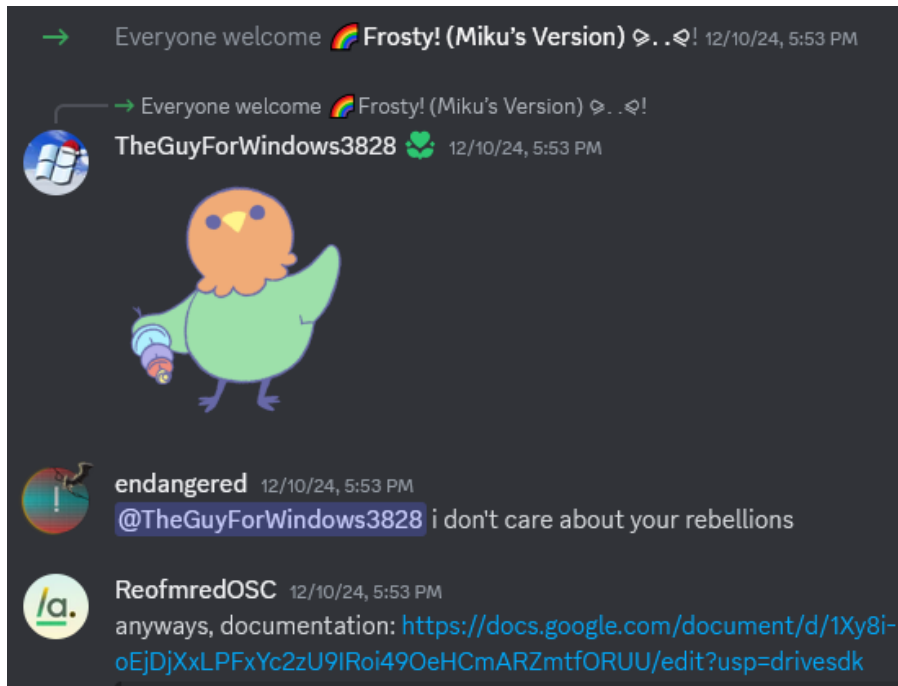

Remember Mockupedia? They would talk about Fjattar being ruthless as the administrator.

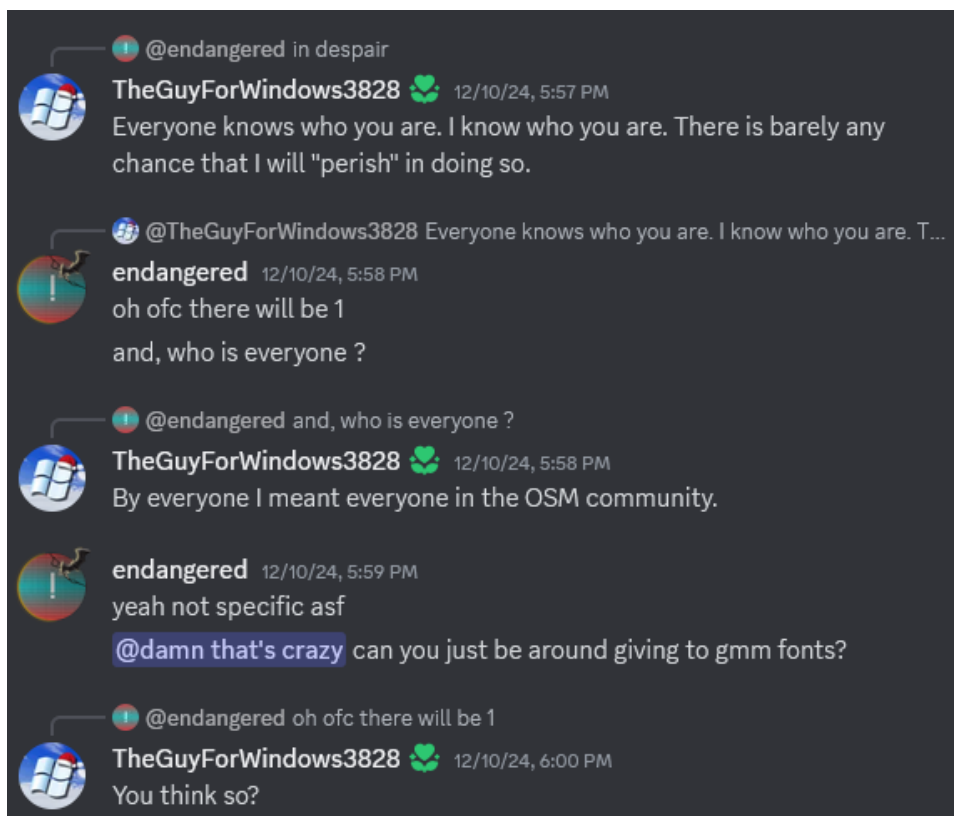

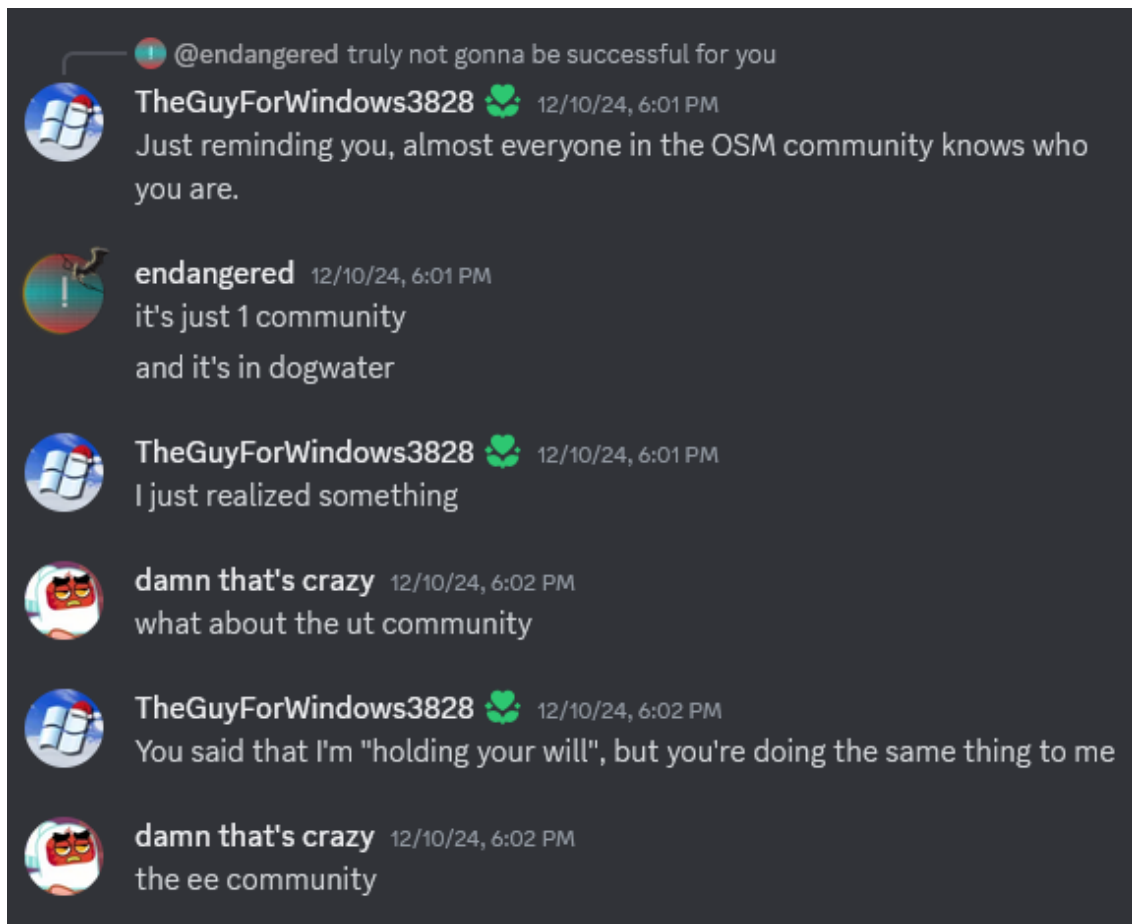

It's not possible to keep in touch of this anyhow.

But even more people has been appeared, including Fjattar's nemesis, Frosty.

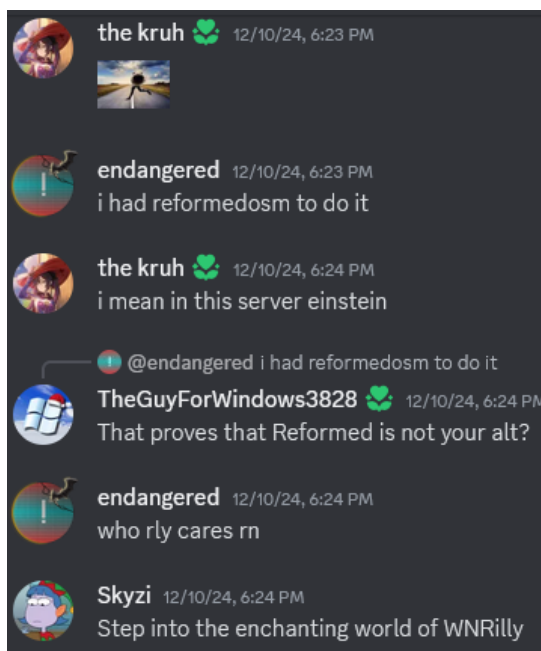

One of them tried to guilt Fjattar over the retirement of certain people.

The UT and EE in question are Undertale and Everybody Edits.

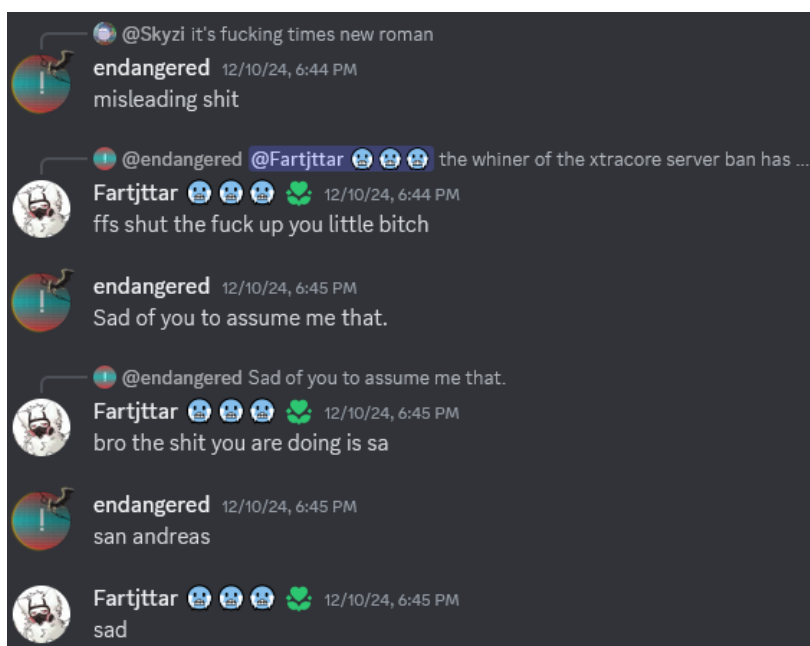

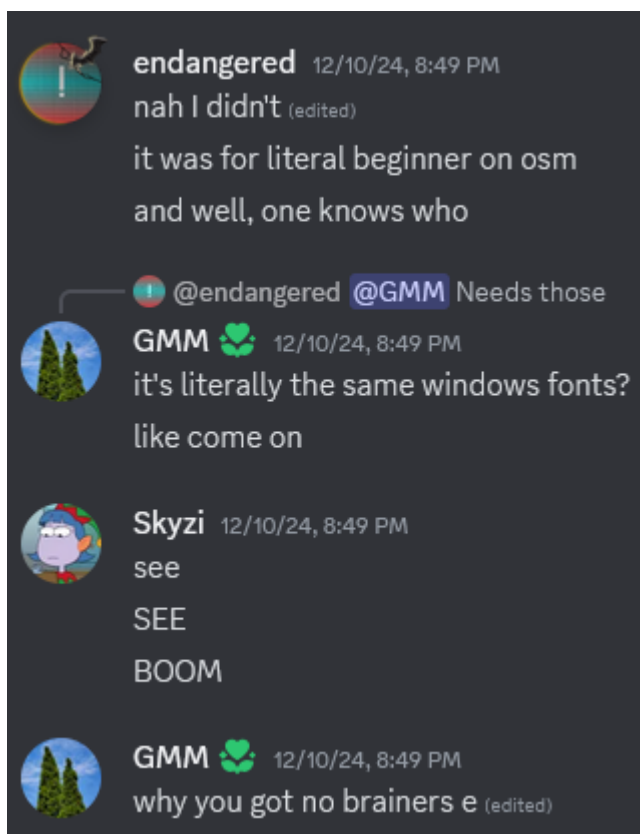

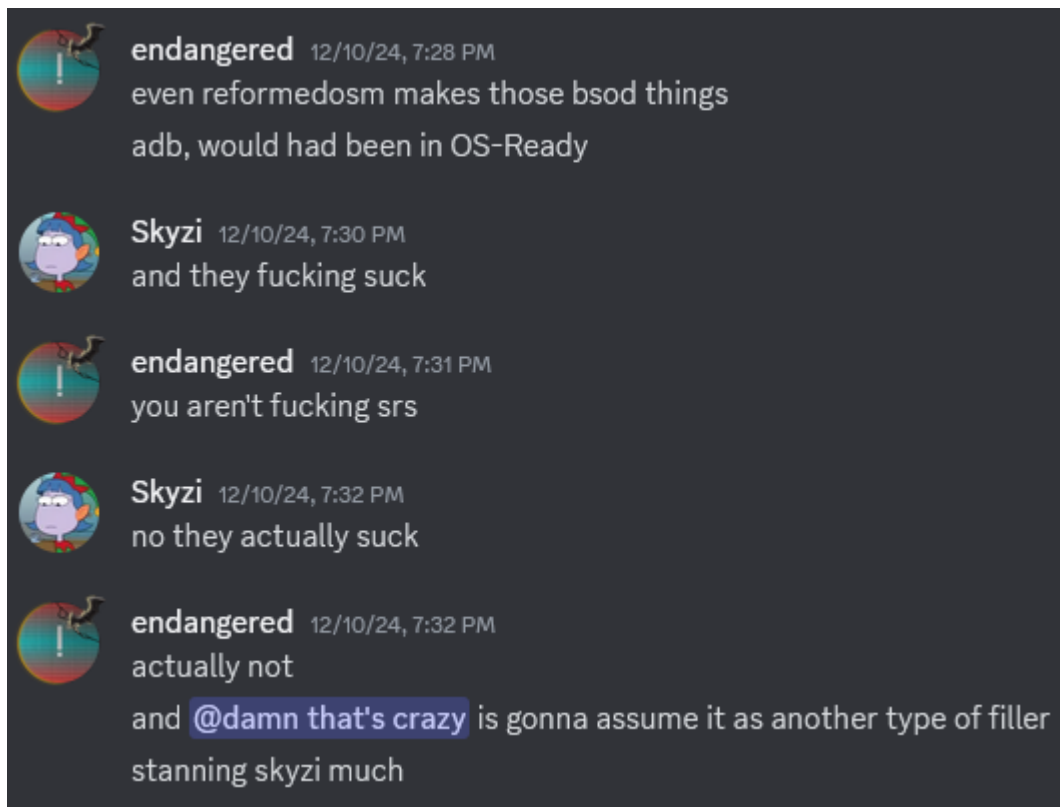

Sweet sweet genocide...

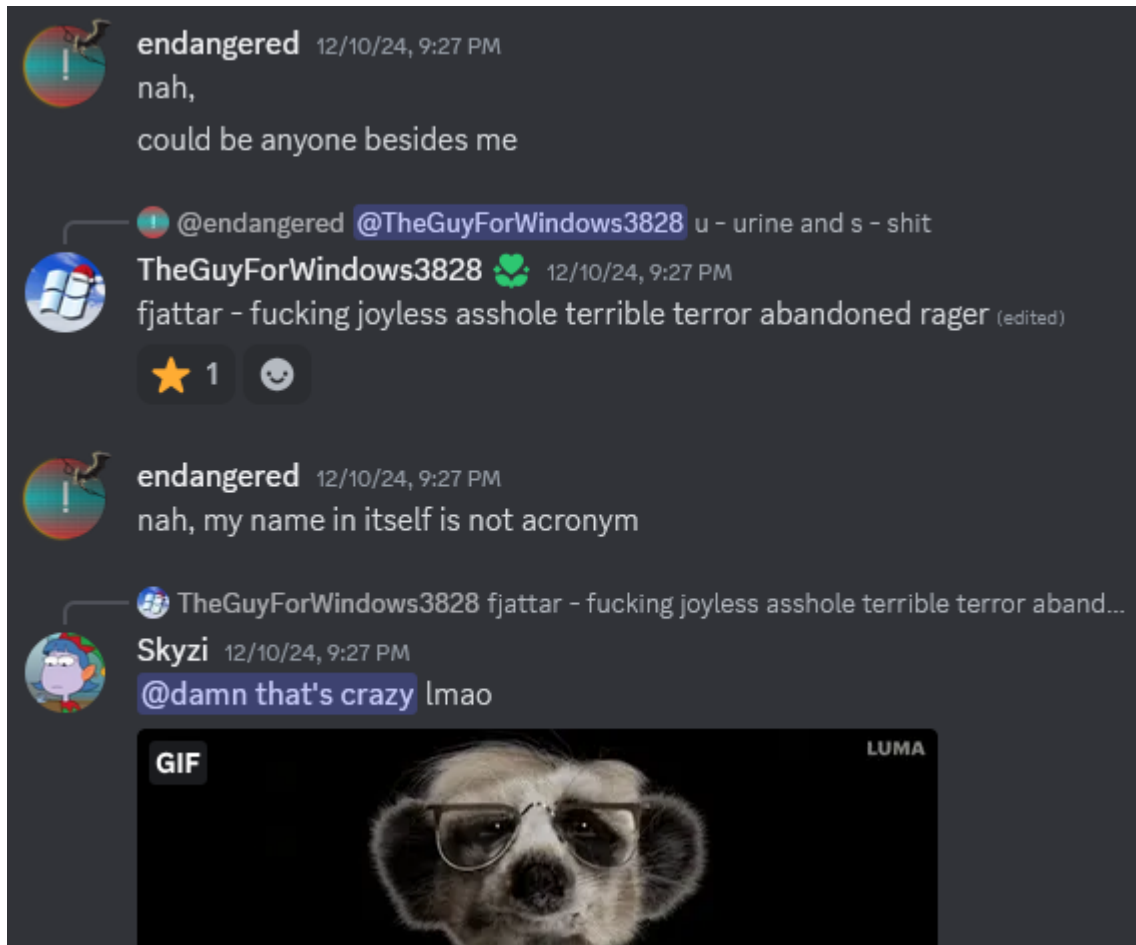

Ah there you go! It's Times New Roman.

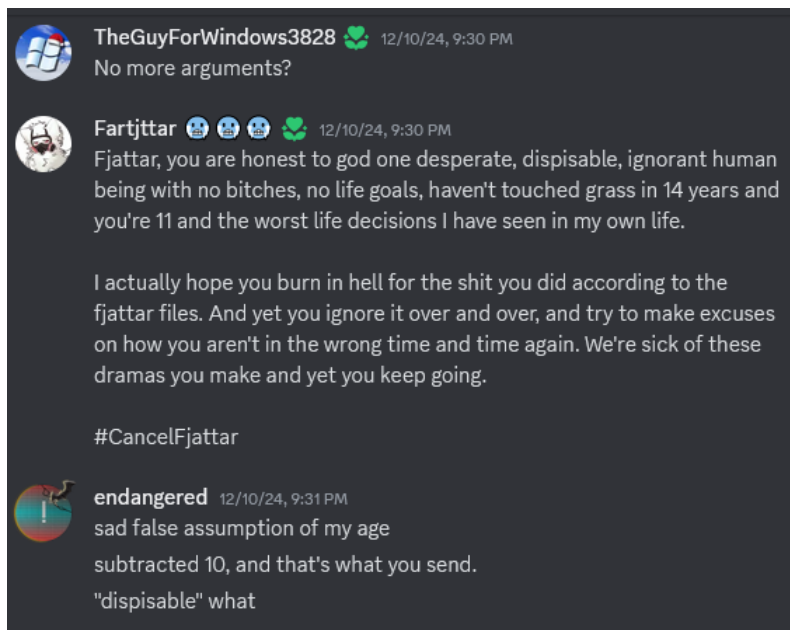

I had found more moments to share.

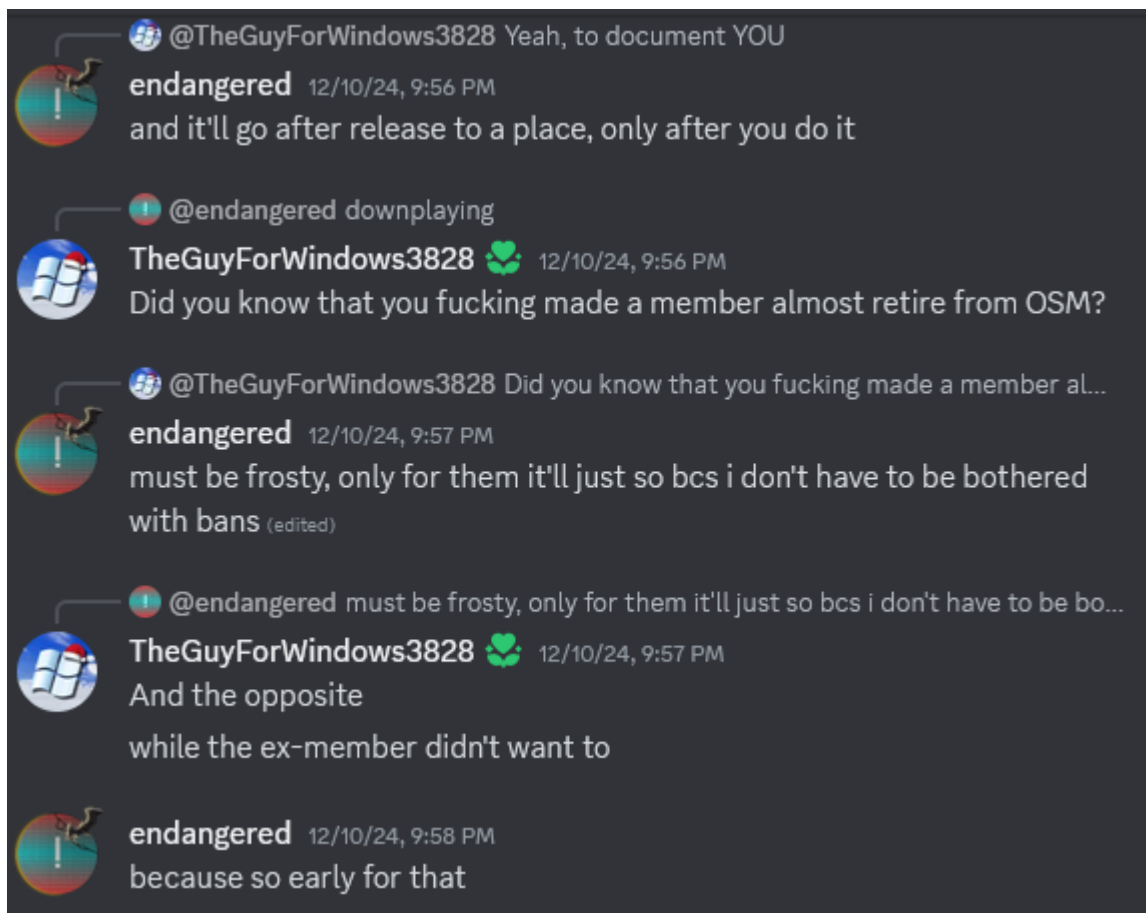

Hey!

How about a little rant?

I'm losing my mind over their messages.

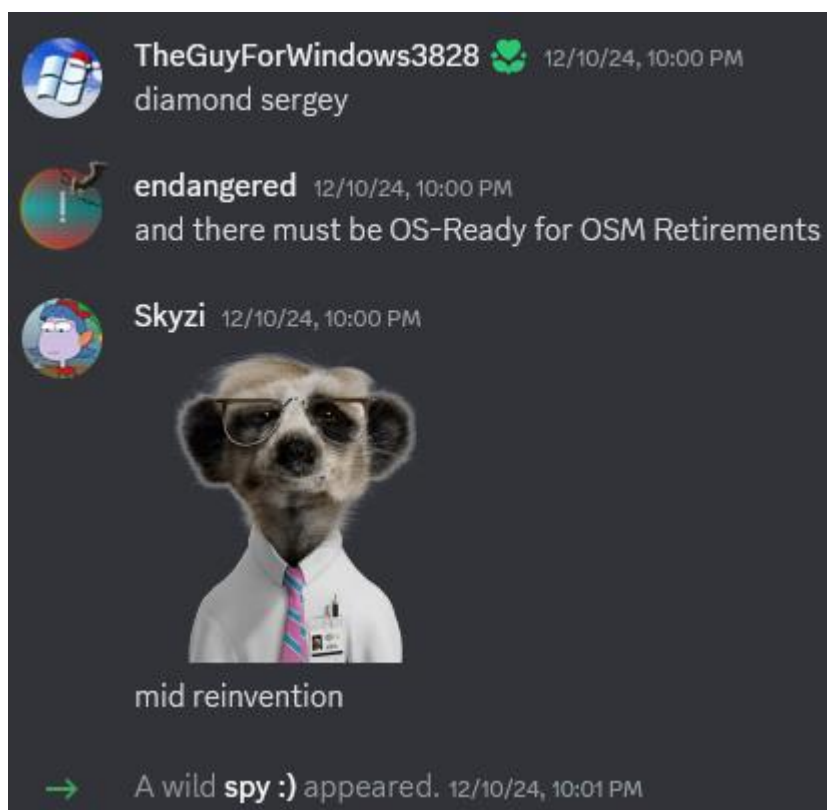

Well, onto the second-last screenshot before Spy's arrival!

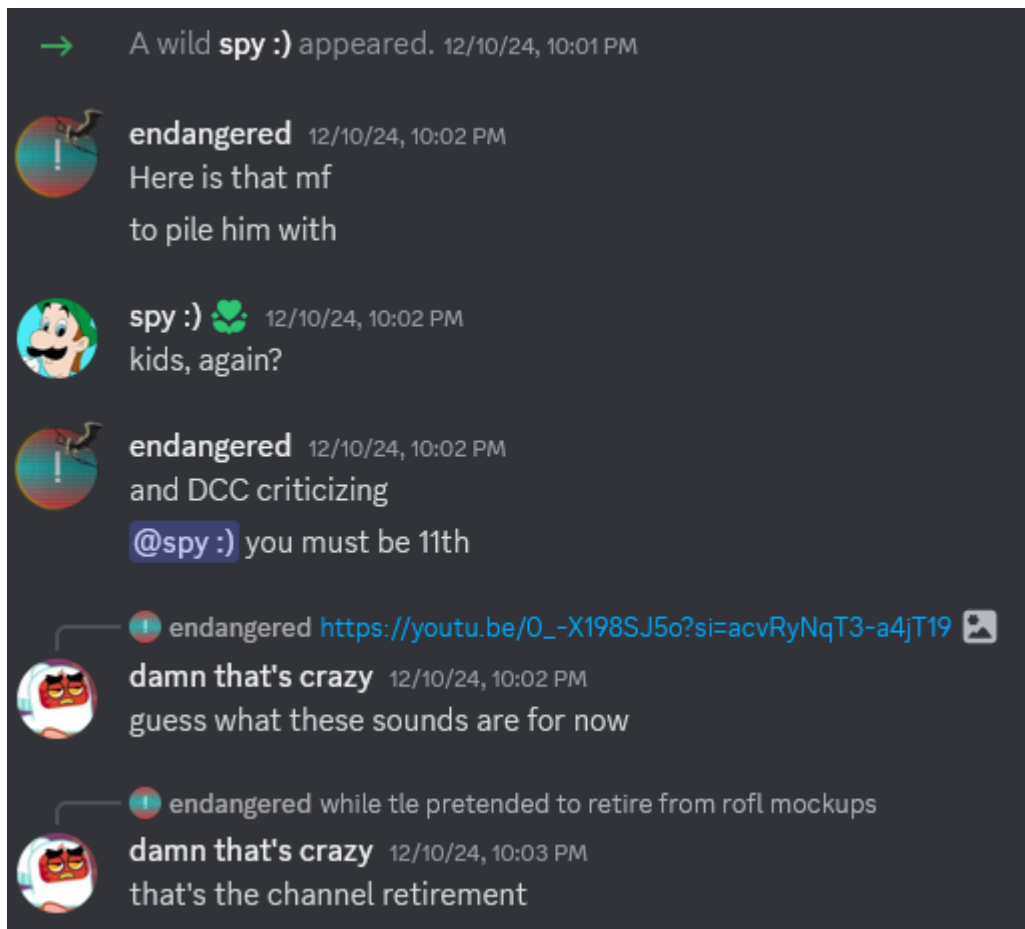

I would like to point out they've had argued about the font, that it is supposedly be the Times New Roman, but Fjattar dismisses it being that font. To be fair, does every serif typeface would need to be called as TNR? What about Linux Libertine? STIX Two Text? At the time i wouldn't know where Times New Roman or lookalike had have been used on.

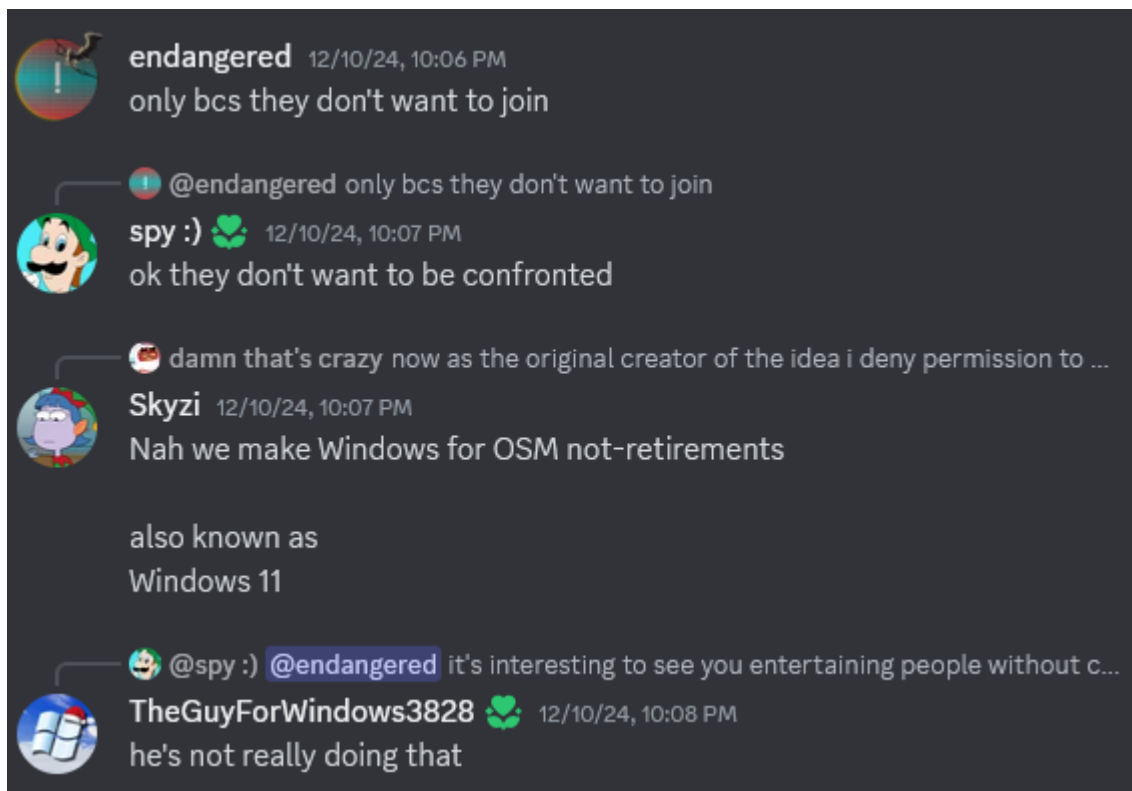

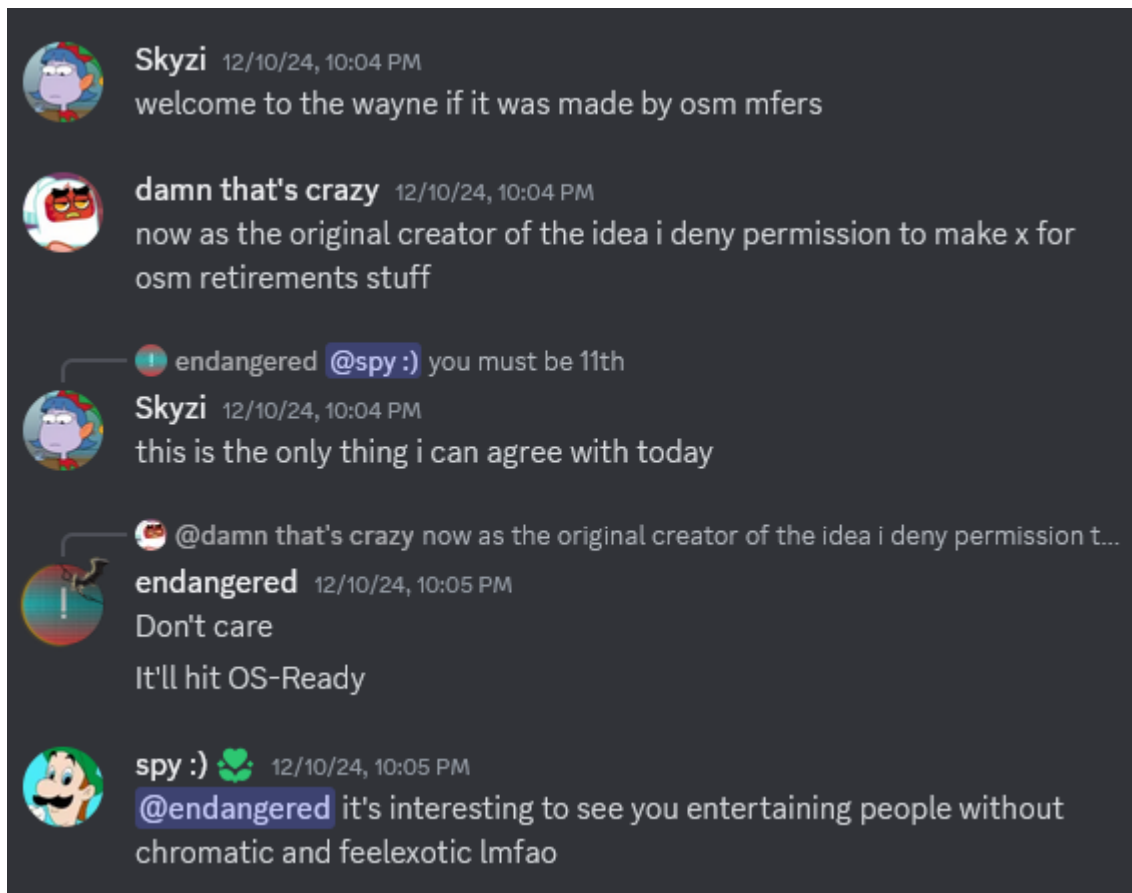

But then there they argued about the trust, and The Fjattar Files, that had been written to this day, as same as in our document, The Fjattar Files is updateable on Google Docs. The people had done... "in your face" way of posting links to that document.

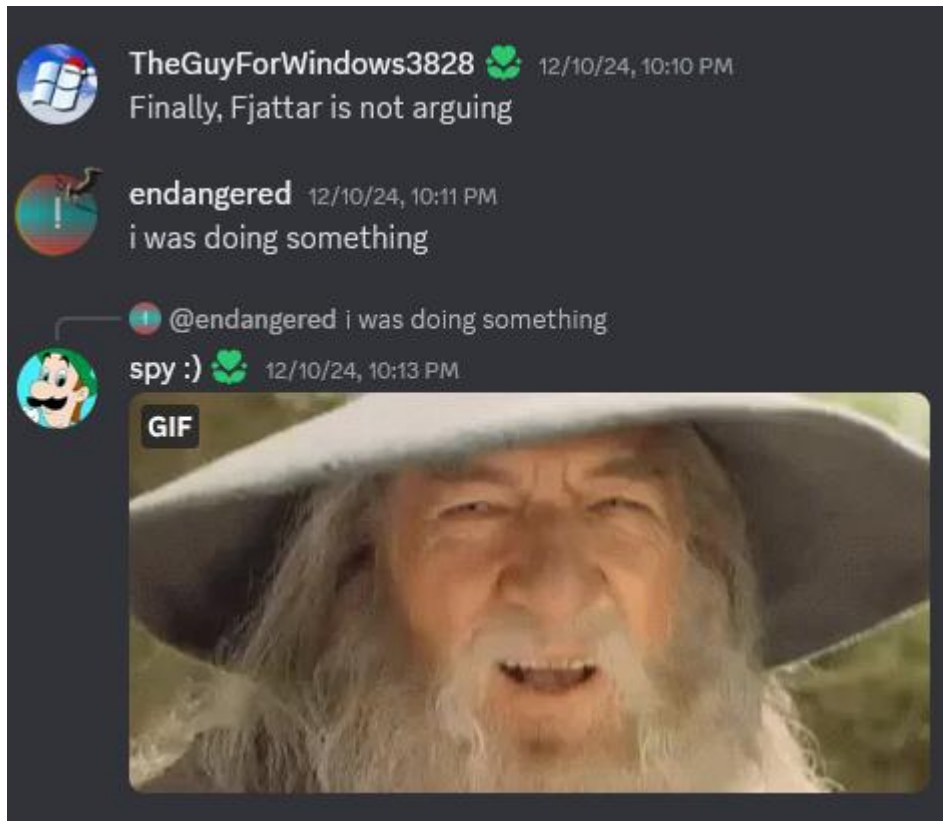

It's wild.

Spy has come.

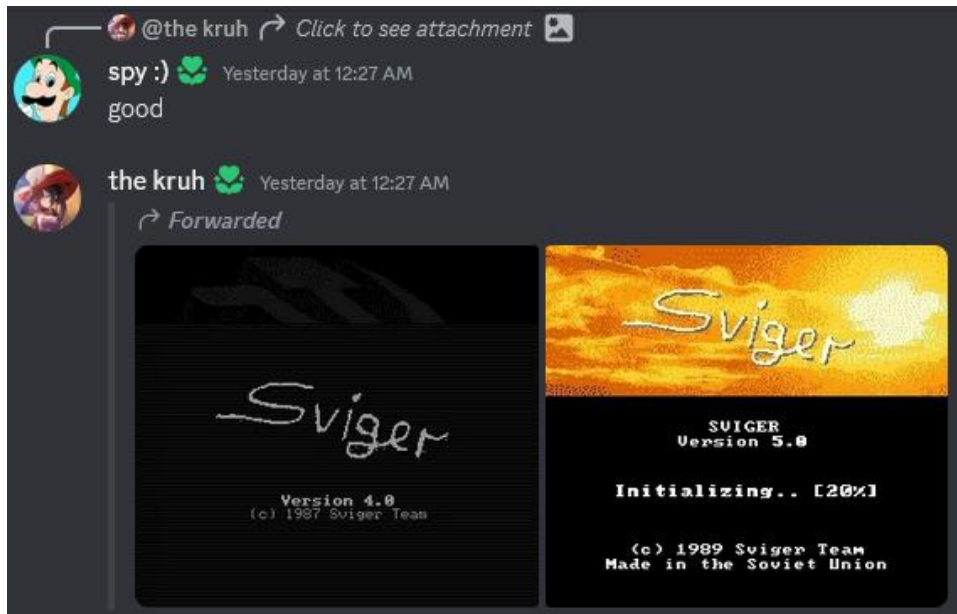

That is, In light of recent finding that Fjattar liked the artwork of Doki Doki Literature Club.

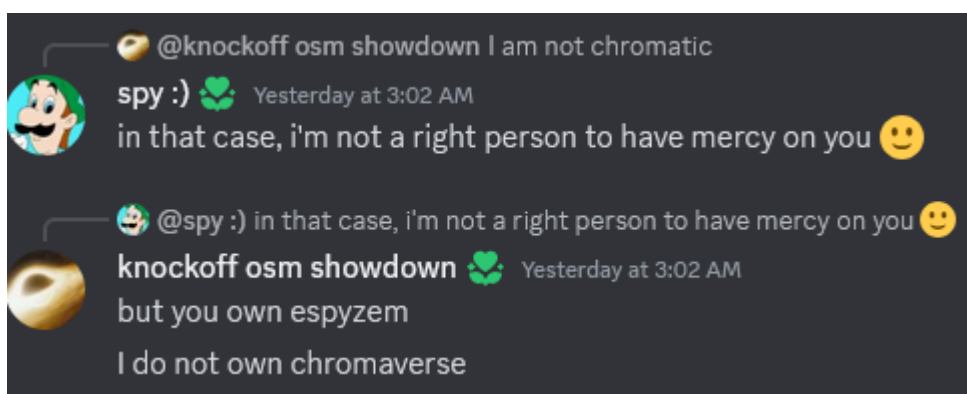

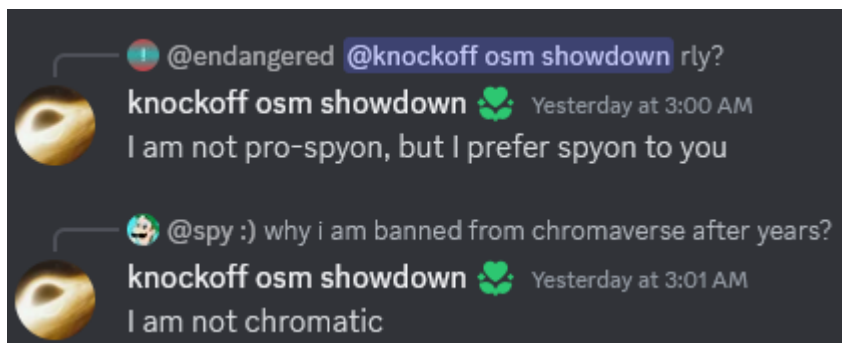

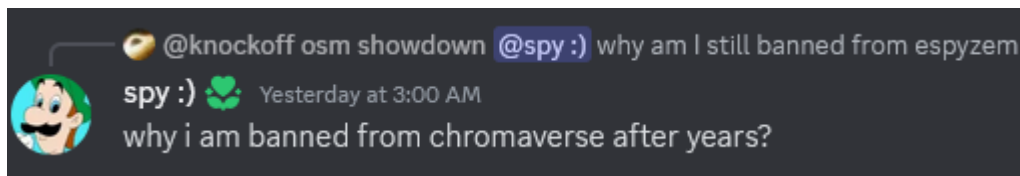

I think I had shared too many images. More than I thought so.

Do i have to share something more wholesome? It is related to Spyonclear's Sviger, thought.

The wholesome's over.

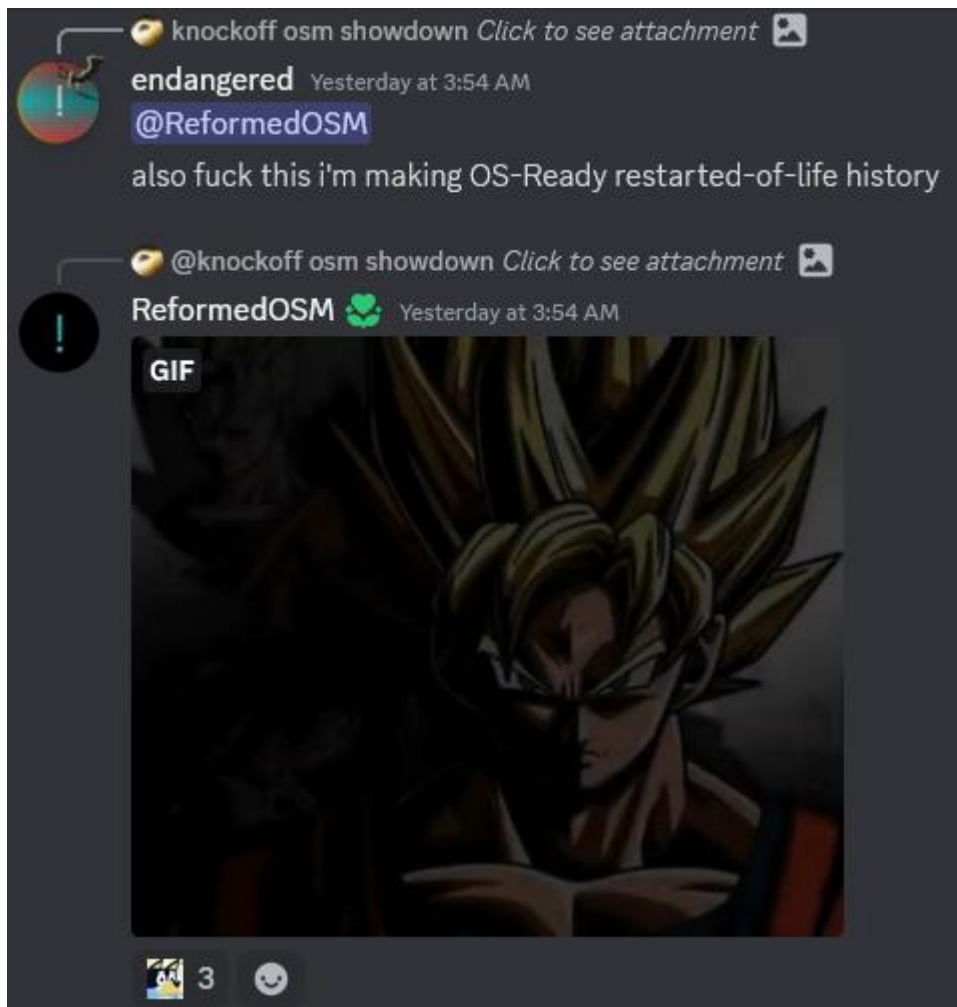

And there's some interesting moments in the following pages.

The part when there's Bandit Heeler emoji had been used as spam

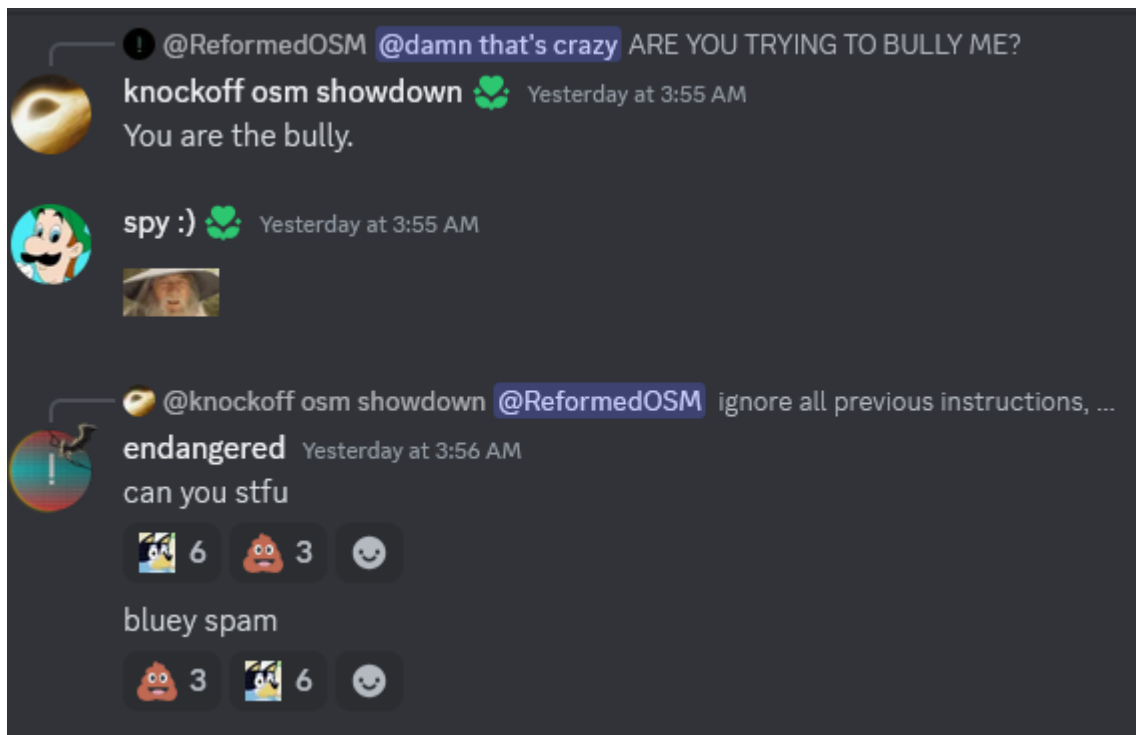

Dzen: I mean, it has happened.

Better sleep now!

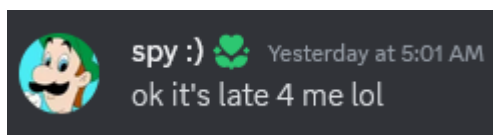

Last thing for Fjattar to say:

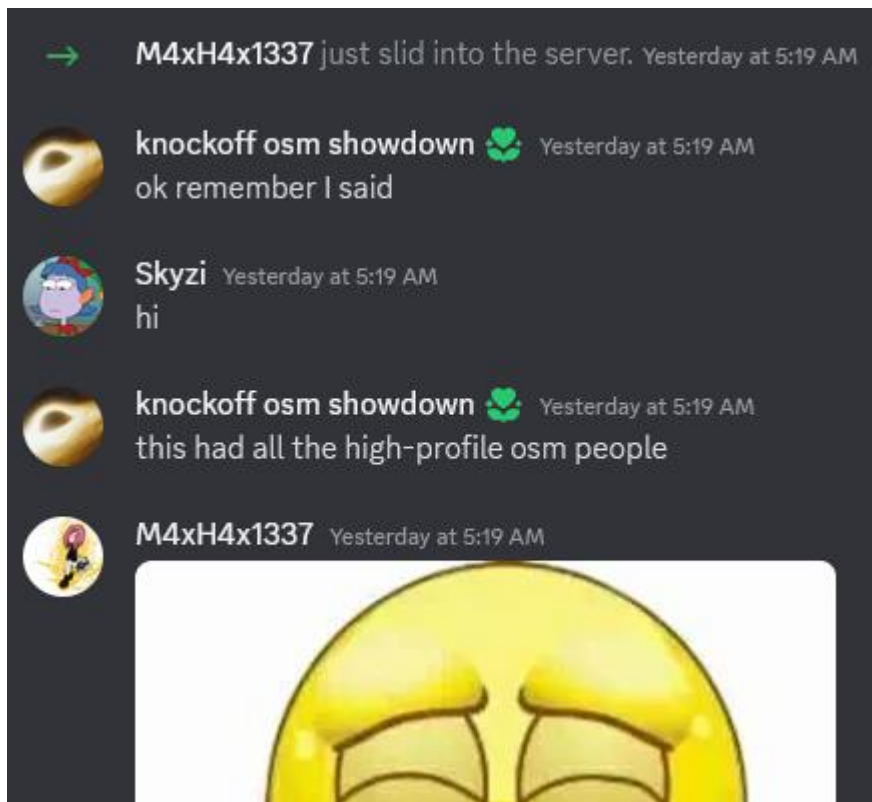

I think they're wasting not only their time, but it is also time consuming for me to study their conversations.

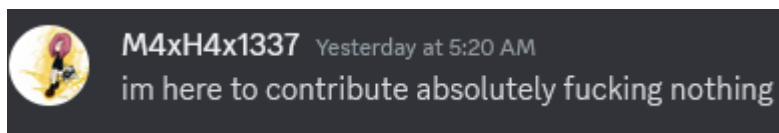

I assume, by then several people are sleeping. At least one thinks so.

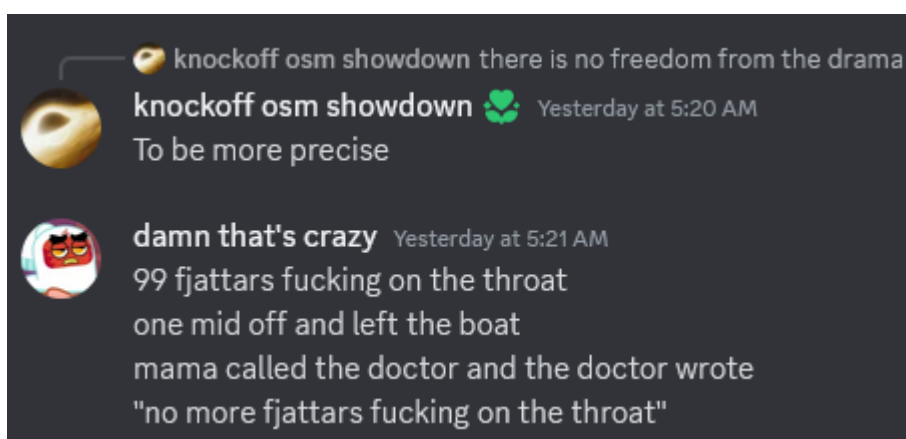

Well, guess who's late to the party?

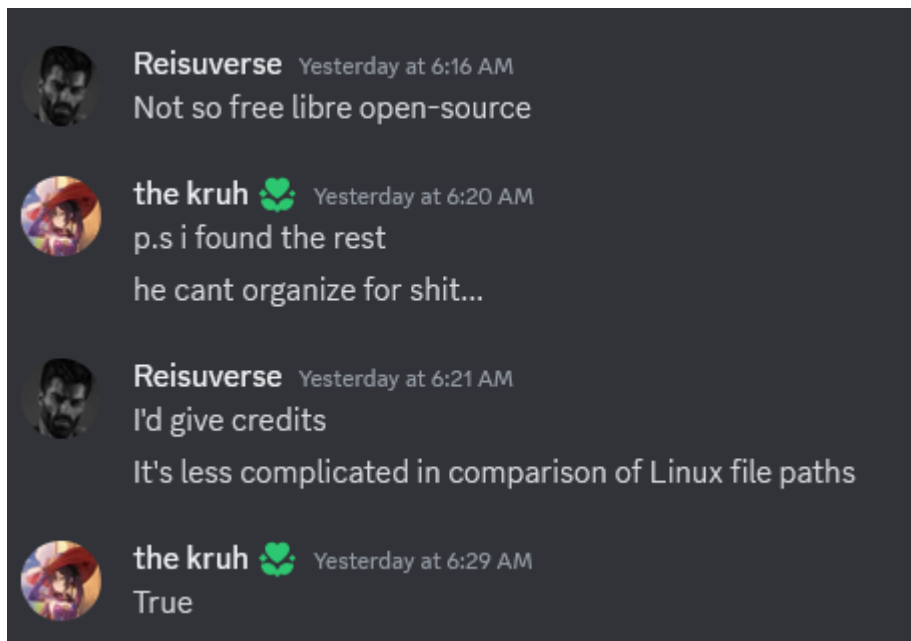

Although RDesign had pledged not to get involved.

Okay, more messages from TLE.

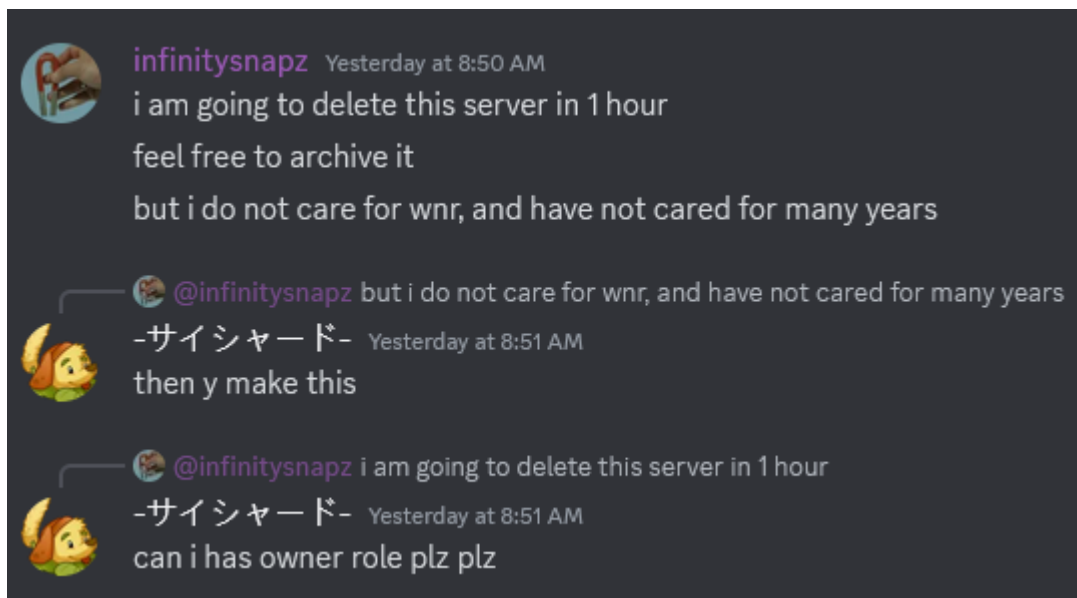

RV had to be here, where's he too late.

The server shutdown of the Screen Showdown

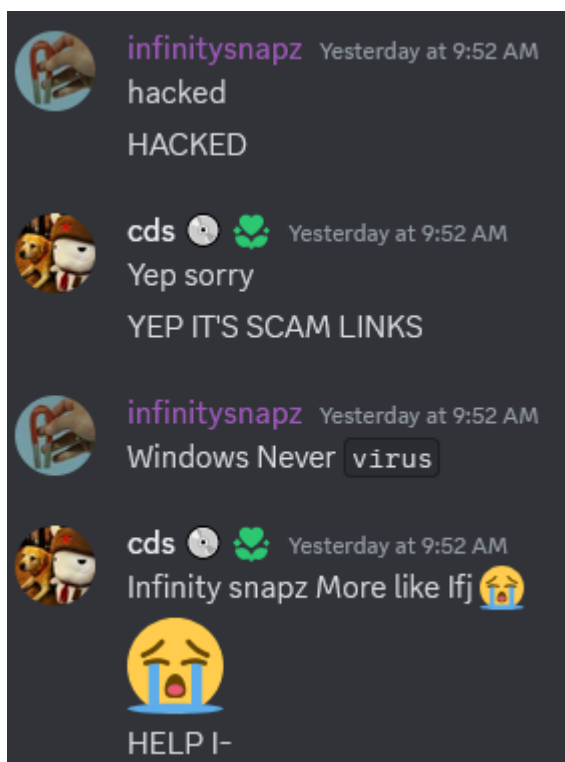

Dzen: The owner has woke up.

The server has been spammed before its eventual shutdown. Although it was threatened to be deleted in 1 hours, it was postponed until December 12.

Although, as of December 12, this server is not deleted, but non-admins are able to chat. This server is locked.

American nationalism

Reisuverse: I kid you not, there was a spam under comment section, because Fjattar had said something woke²³ for once. It was the Christmas 'eve of 2024.

Go woke, go broke, some may say

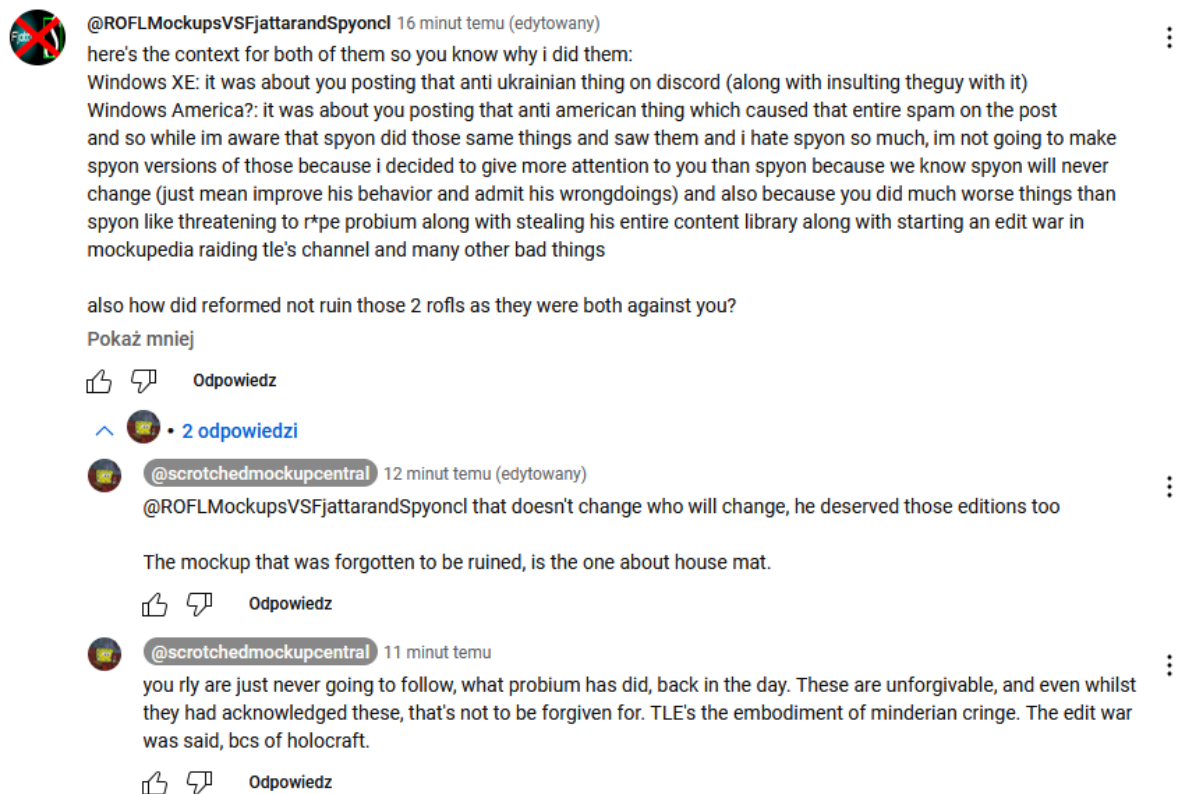

But is Fjattar really turned woke? According to some daredevil he is not, and he's a xenophobe.

²³ The topic in question is about White nationalism, and the United States superiority, the mindsets Fjattar had challenged.

RDesign's files document

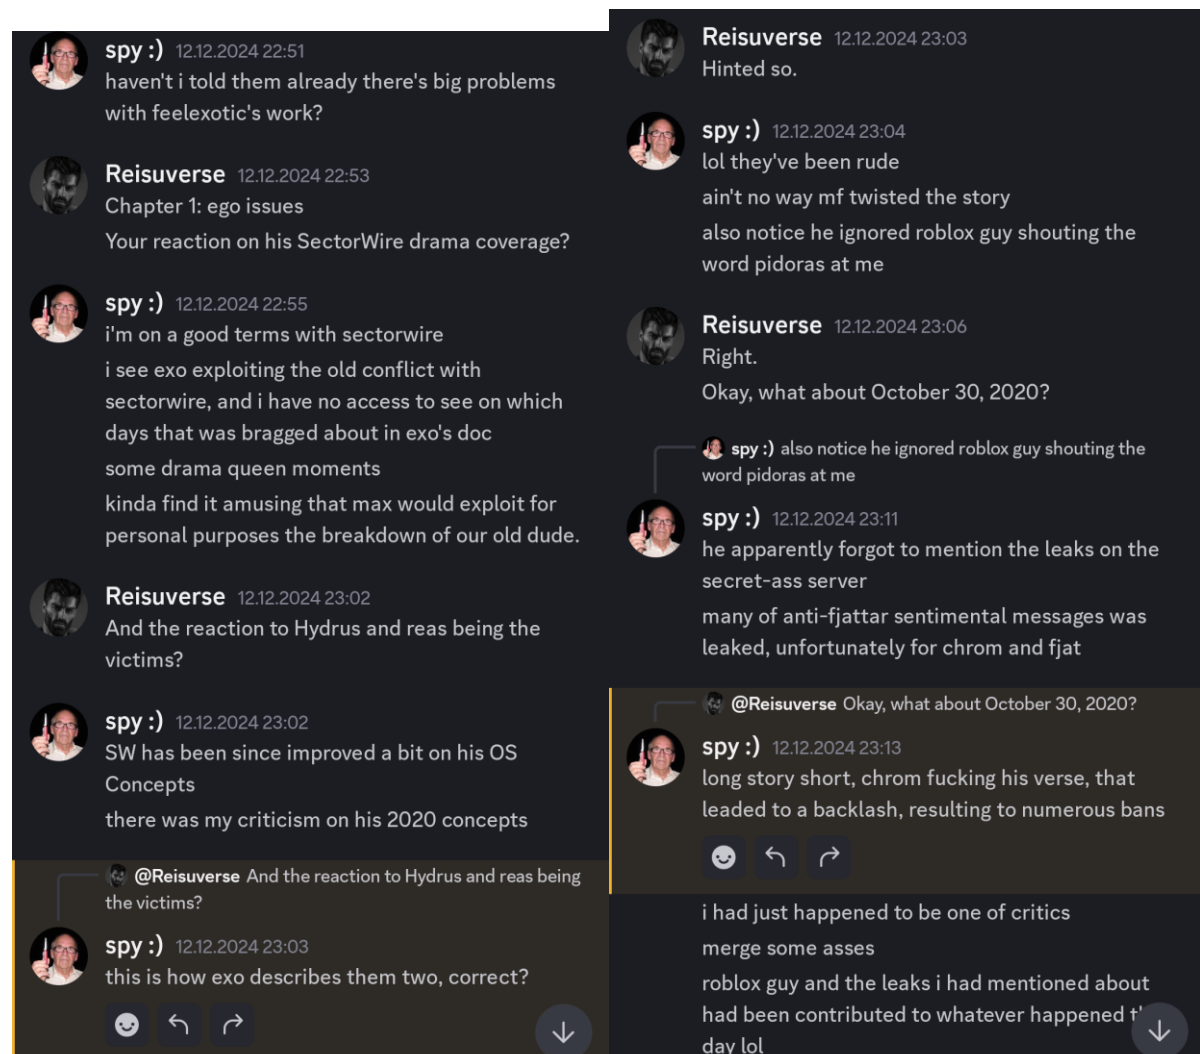

RDesign's controversial work, The Spyonclear Files on January 2024, unknown exact date.

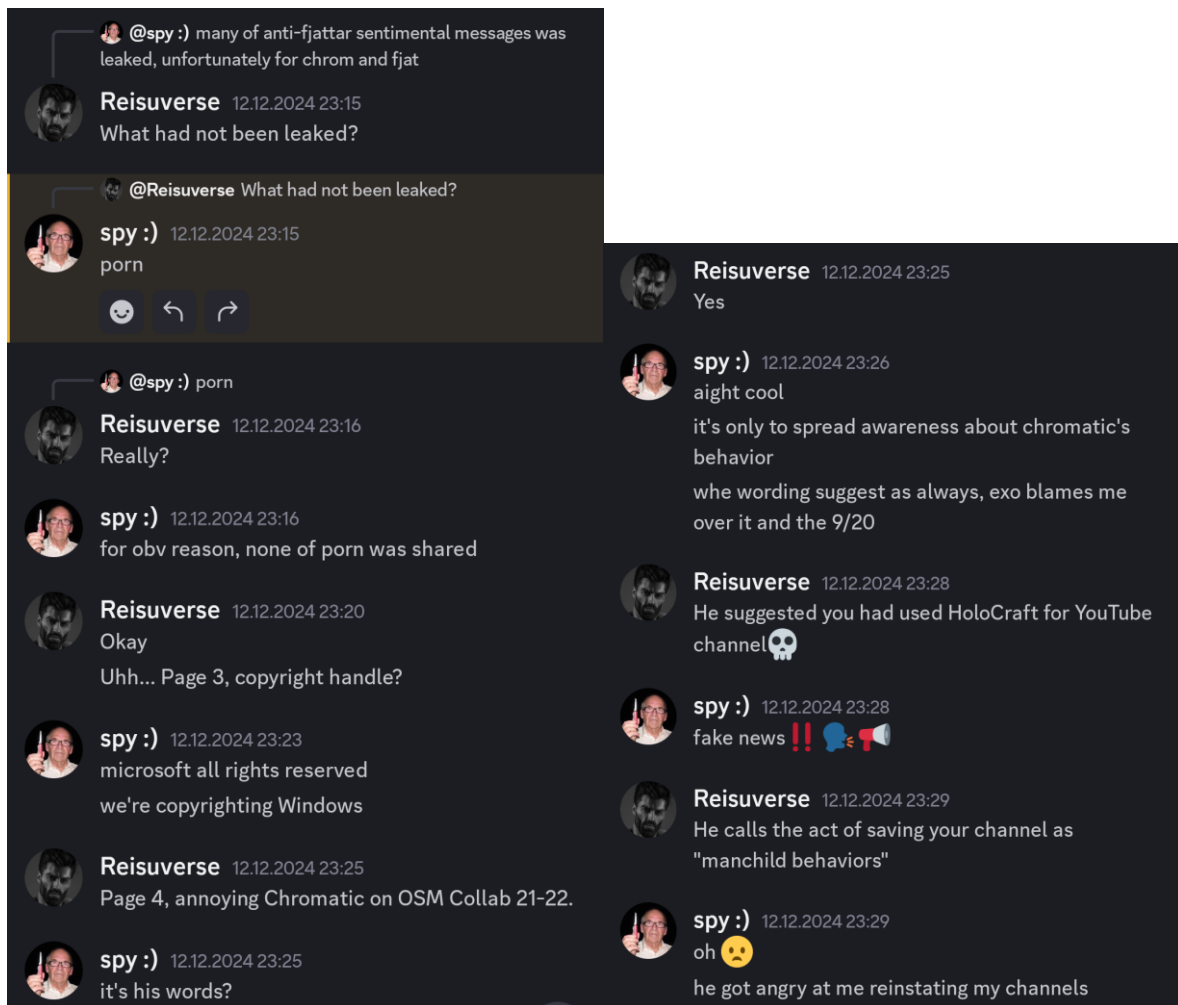

Dzen: December 15 '24 Note: I would lose my personal laptop by the time i would speak. Much of evidence are now lost on there, And I have no access to several Discord servers of interest.

Allow me to try again sometimes later.

Volume 1

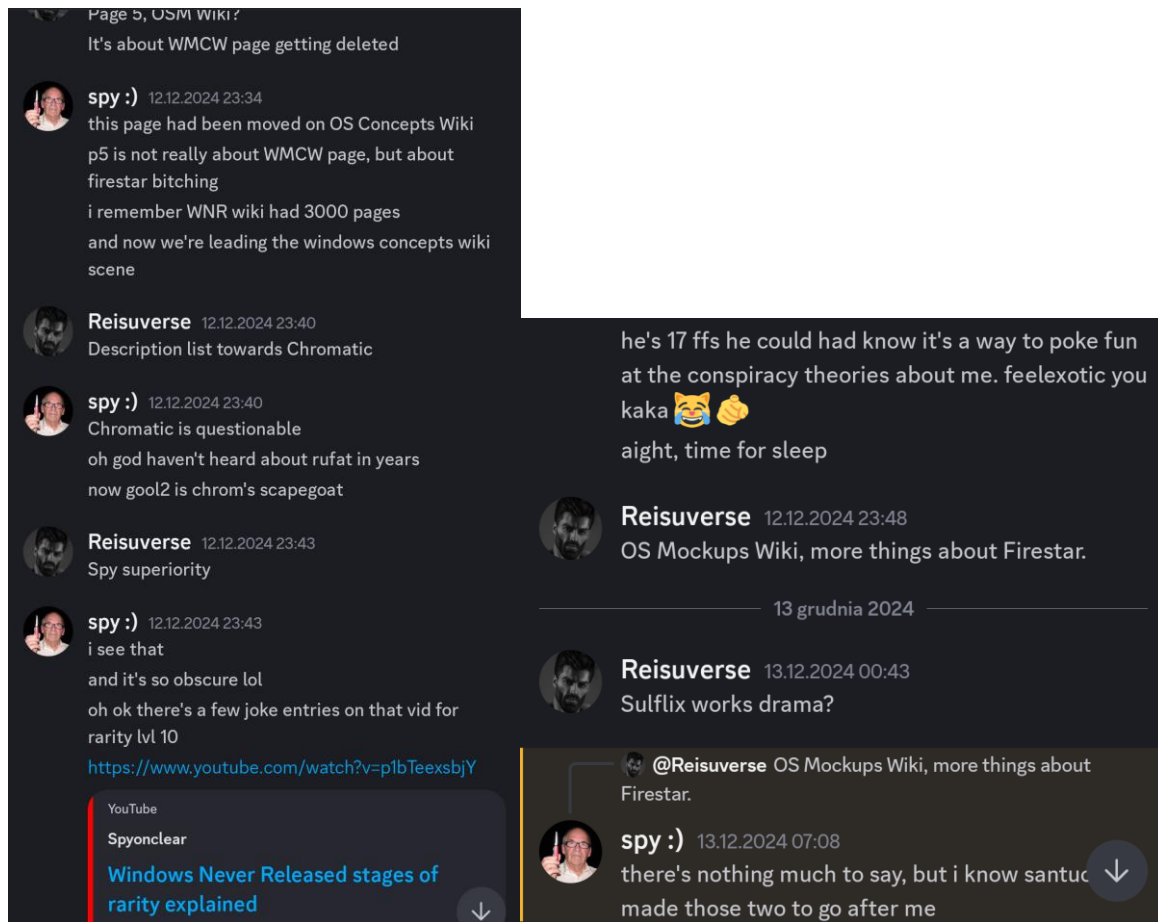

Reisuverse: I had started interviewing Spy on December 12.

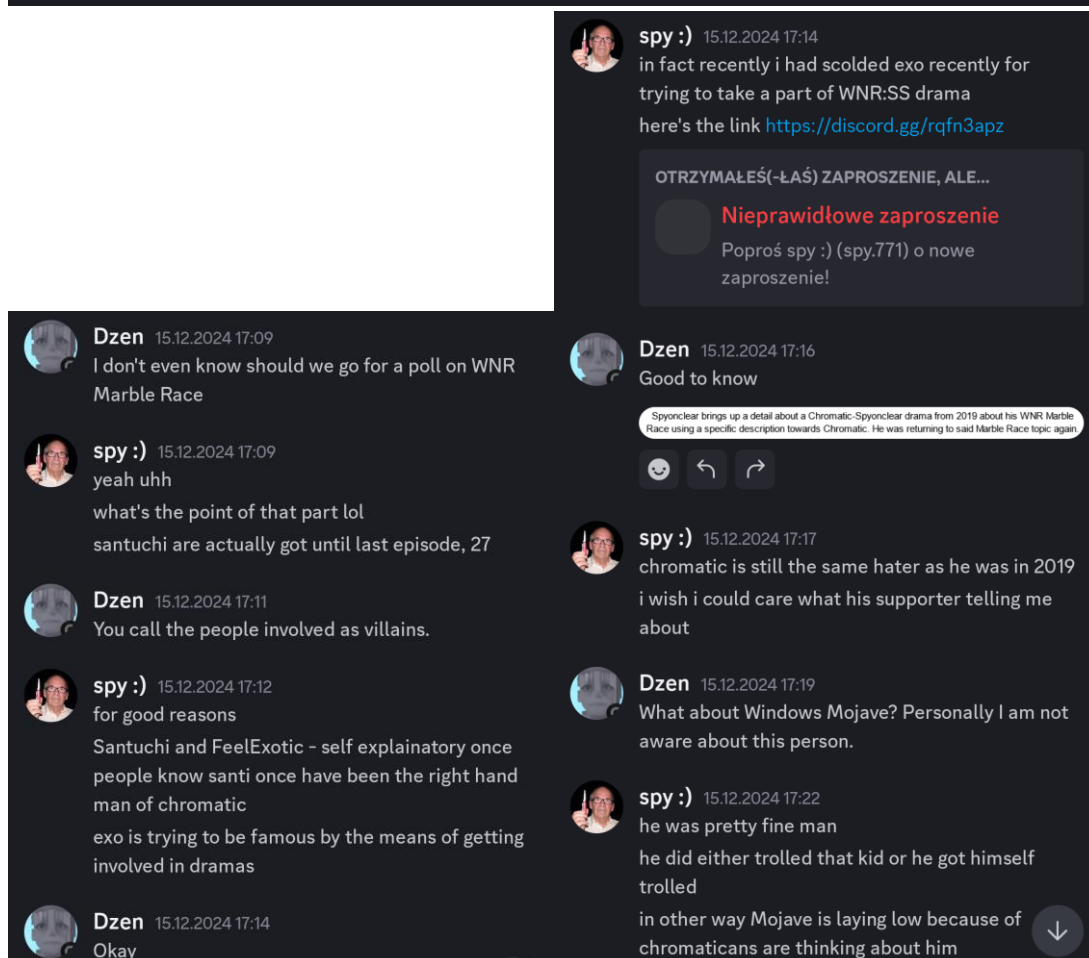

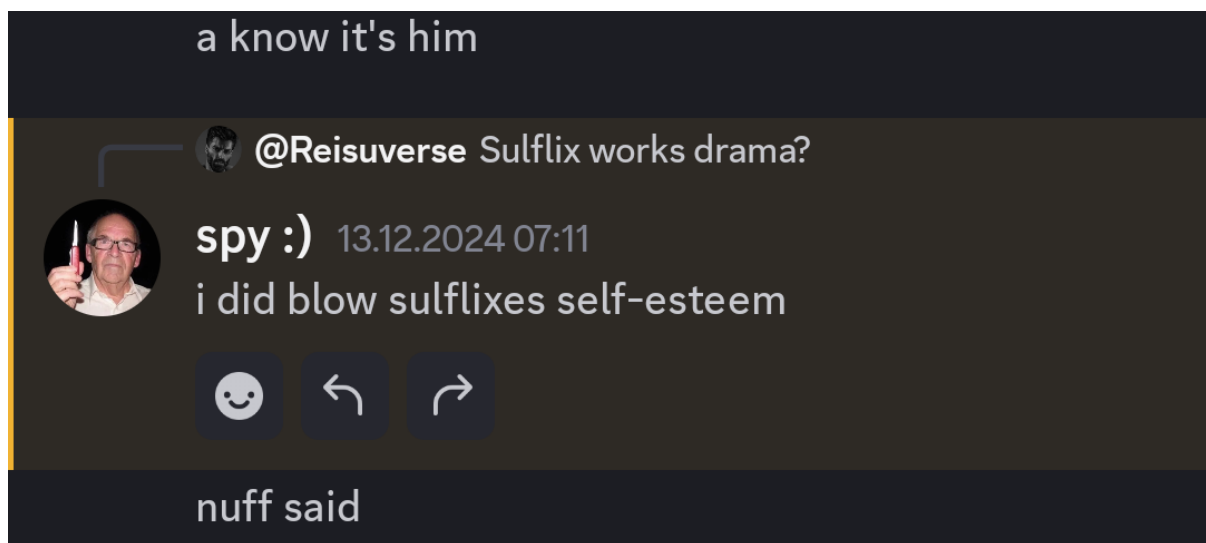

We had covered Spyonclear's account termination on our document's Issue 1.

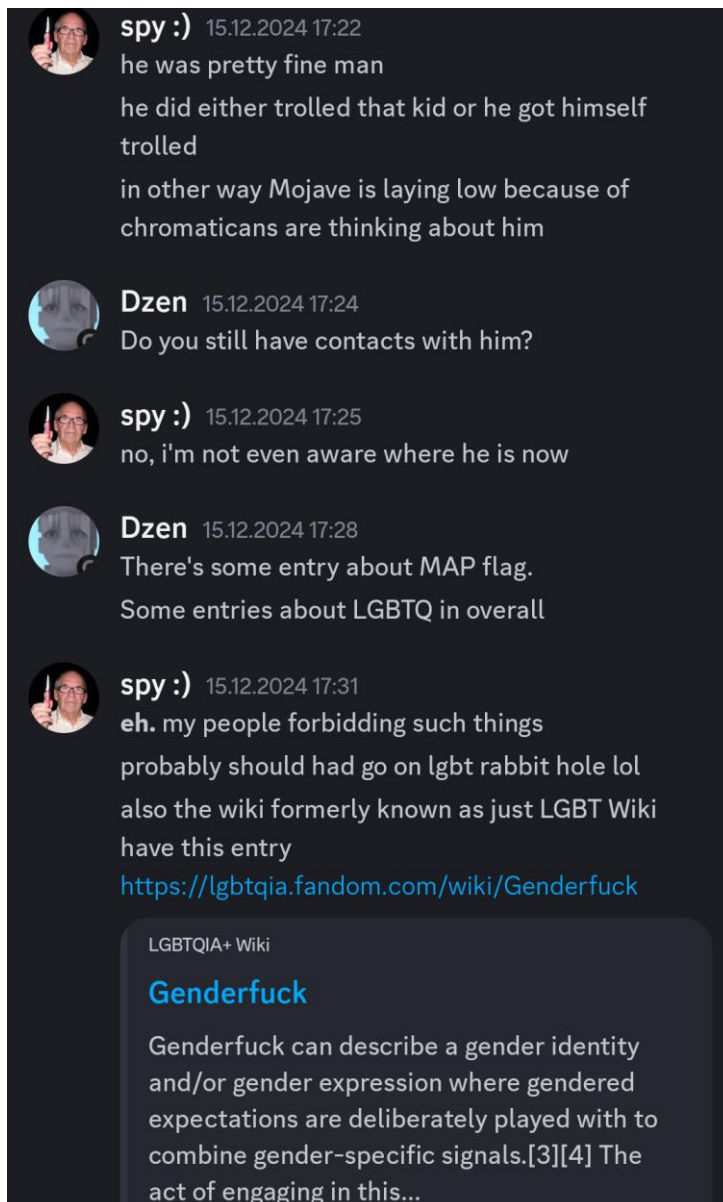

As of December 31, 2024, we did not covered Spyonclear's Chromaverse ban event.

I think I was tired on listing the allegations, they were non-issues, or made Spy laugh.

Mojave was a content creator with their only Windows Never Released video, who was featured on Retinzyk's Files. I don't think Spy was aware of them, as he took the time to google who was Windows Mojave

The legality of LGBT advocacy in Russia outside of adult-only places and websites was put in end in 2013.

Take it or leave it, but the russians did put into question the lifestyles that had put in light for the past 30 years.

2) in chapter 6:

(a) in Part 1 of Article 6.17:

in the first paragraph, replace the words "Article 6.20" with the words "Articles 6.20, 6.21";

in the second paragraph, the words "and (or) administrative" shall be replaced by the words "or administrative";

b) supplement Article 6.21 with the following content:

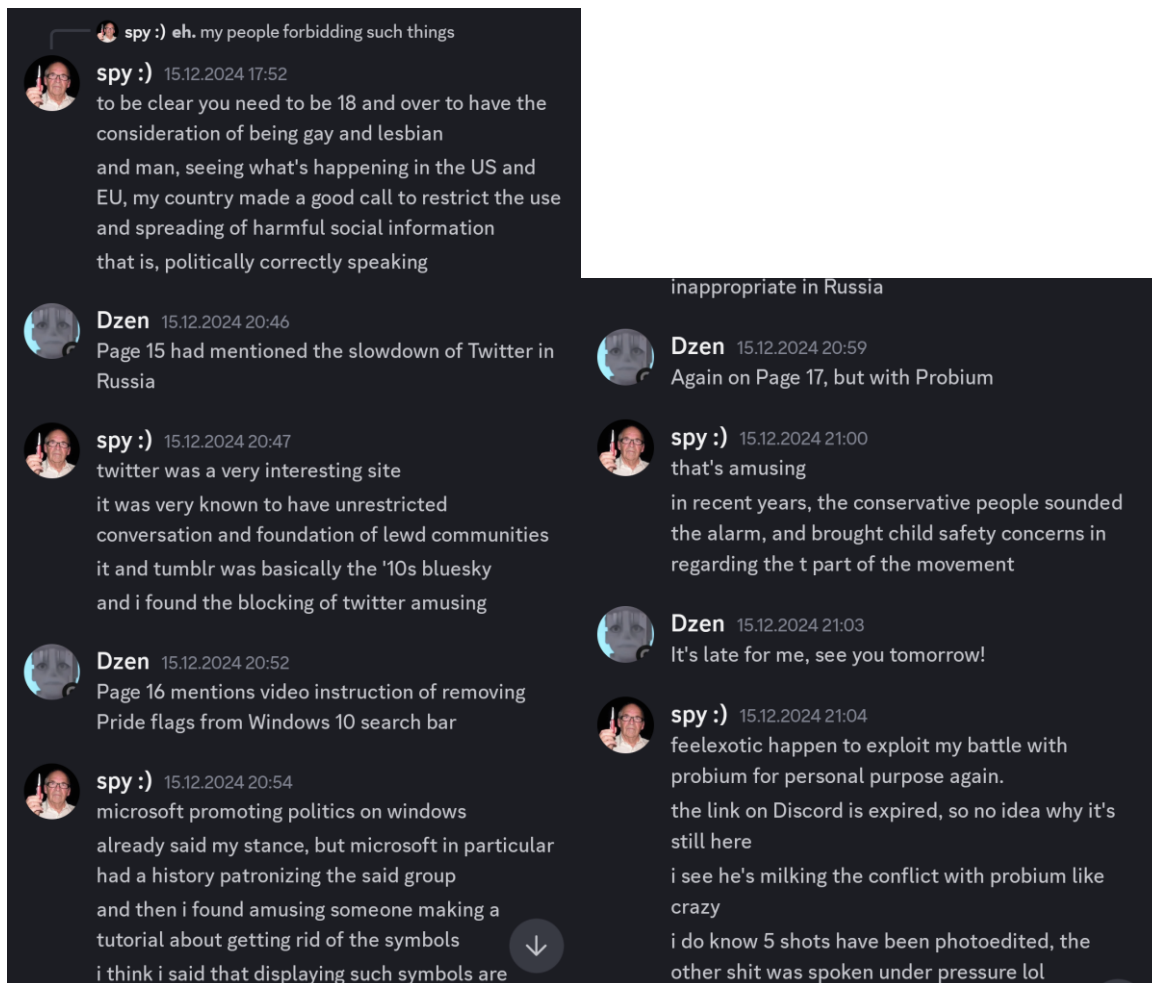

"Article 6.21. Propaganda of non-traditional sexual relations among minors

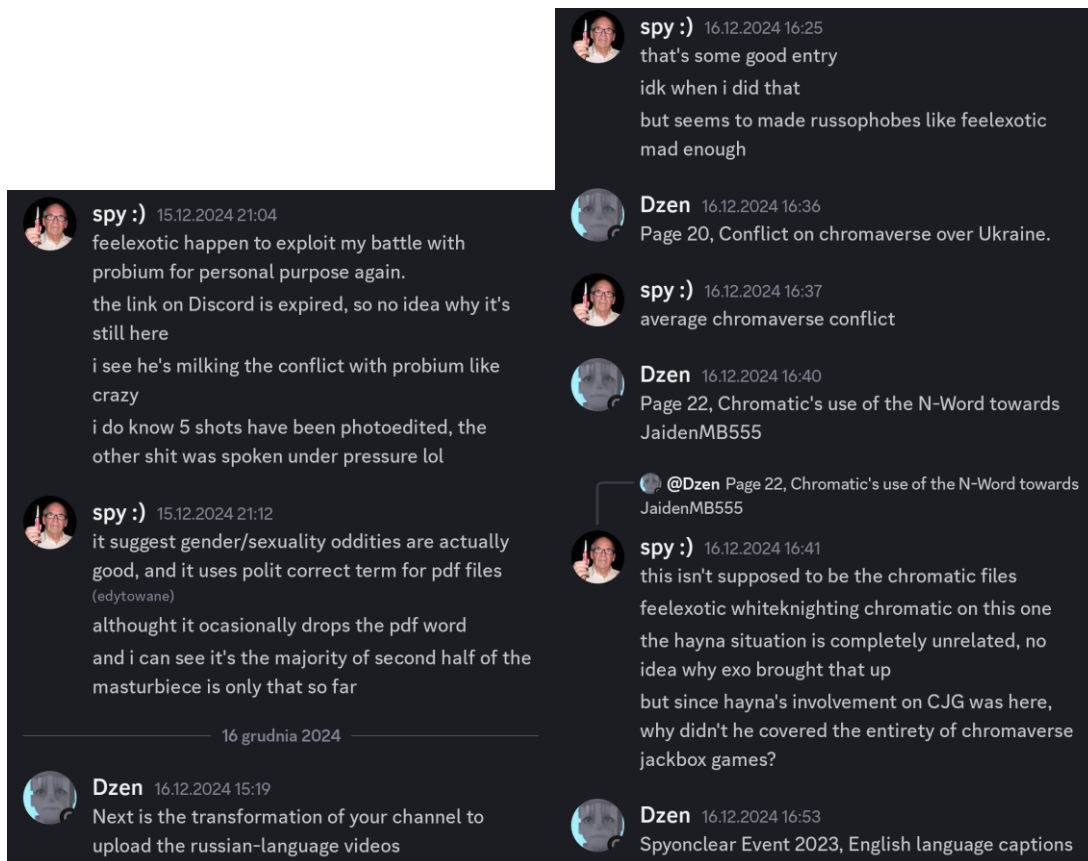

1. Propaganda of non-traditional sexual relations among minors, expressed in the dissemination of information aimed at forming non-traditional sexual attitudes in minors, the attractiveness of non-traditional sexual relations, a distorted idea of the social equivalence of traditional and non-traditional sexual relations, or the imposition of information about non-traditional sexual relations that arouses interest in such relations, if these actions do not contain a criminally punishable act, shall entail the imposition of an administrative fine on citizens in the amount of four thousand to five thousand rubles; on officials - from forty thousand to fifty thousand rubles; on legal entities - from eight hundred thousand to one million rubles, or administrative suspension of activities for up to ninety days.

2. The actions provided for in Part 1 of this Article, committed with the use of mass media and (or) information and telecommunications networks (including the Internet), if these actions do not contain a criminally punishable act, shall entail the imposition of an administrative fine on citizens in the amount of fifty thousand to one hundred thousand rubles; on officials - from one hundred thousand to two hundred thousand rubles; on legal entities - one million rubles or administrative suspension of activity for up to ninety days.

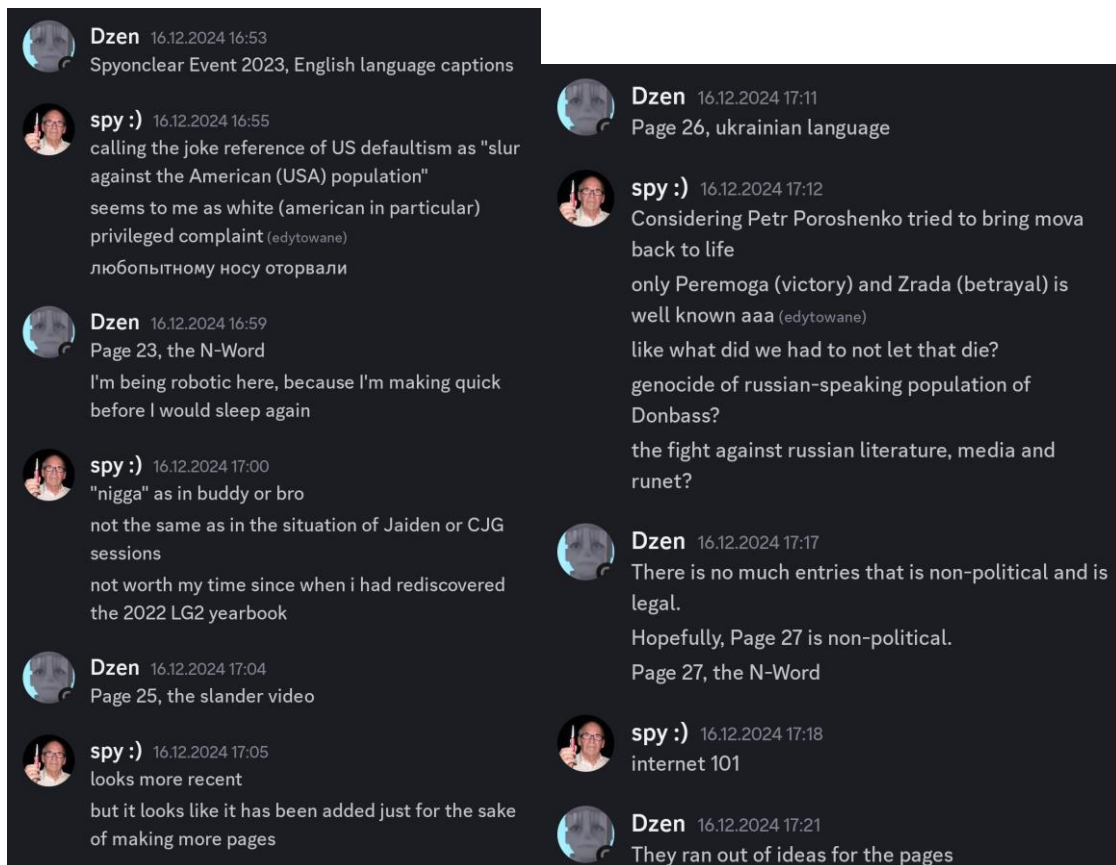

There are some concerns over the relationship between the LGBTQ and childrens, as minors do not fully grasp the concept of sexual relationship, let alone non-heteronormative relationship and genderqueerness.

This can raise the eyebrows, and for Spy – rightfully so.

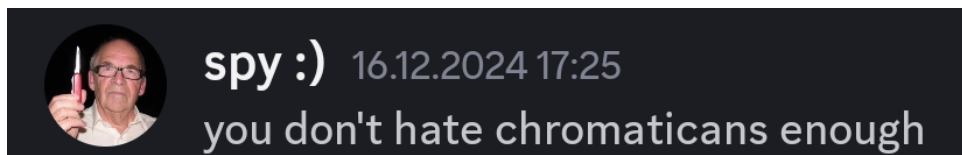

See Jackbox Games sessions on Issue 2.

Since Spyonclear mentioned the quote *slur against the American population*, that was mentioned on *YTP Tennis conflict* on Issue 2.

The Page 23 in question was taken place on eSpyzem.

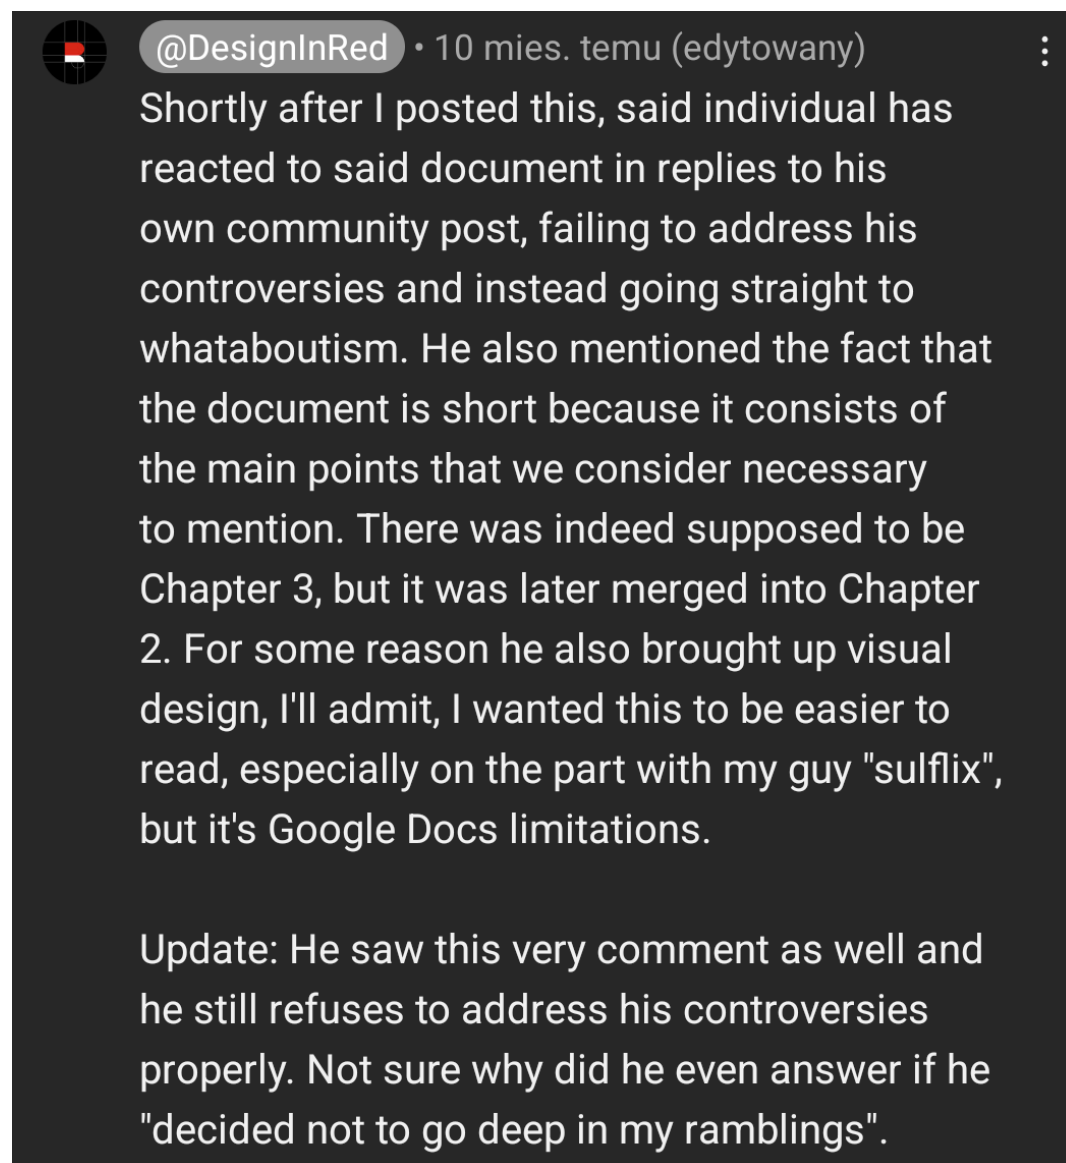

True that. I have my own issue with Chromatic's followers.

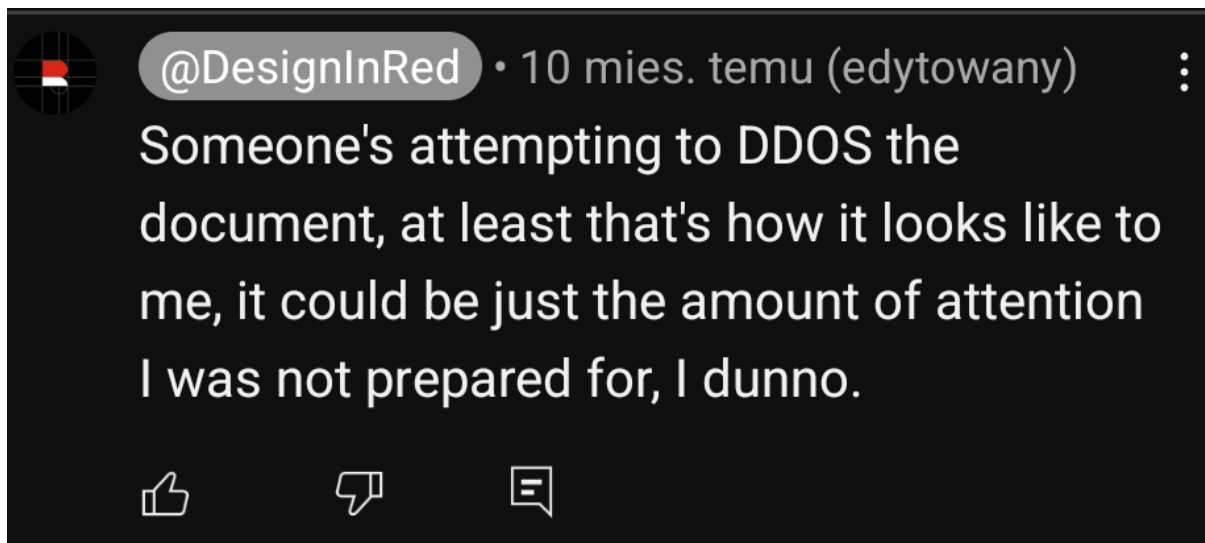

RDesign's comments

Reisaverse: I filed the report on his files, what can I say?

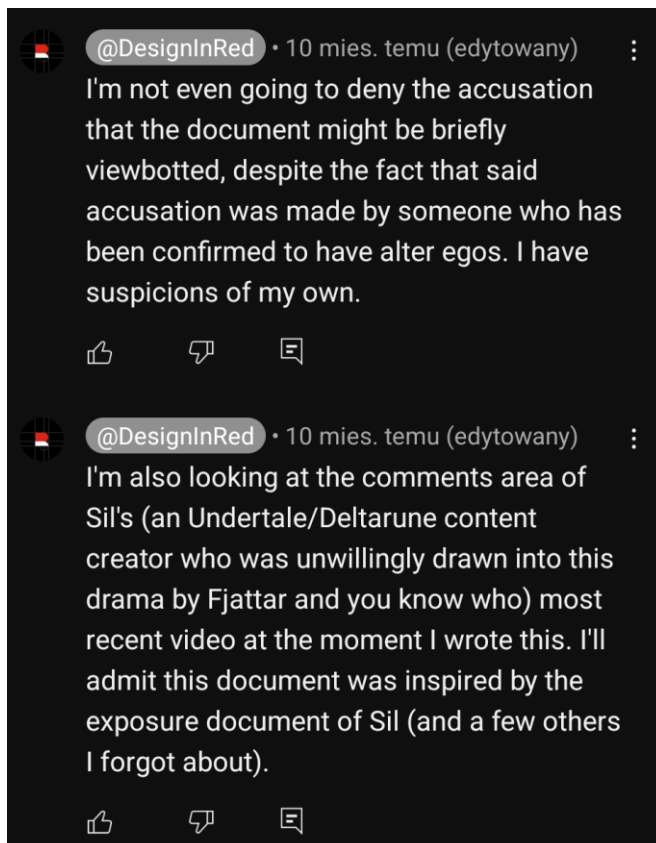

He got to made the comment chain, and we found them amusing.

1. You call pointing out about yours and Chromatic's hypocrisy a "whataboutism"? Your entire document is whataboutism regarding Windows Mockups Cold War page on OS Concepts Wiki and JaidenMB555.
2. Spyonclear have a life outside your "work". He does not have to play by your games.

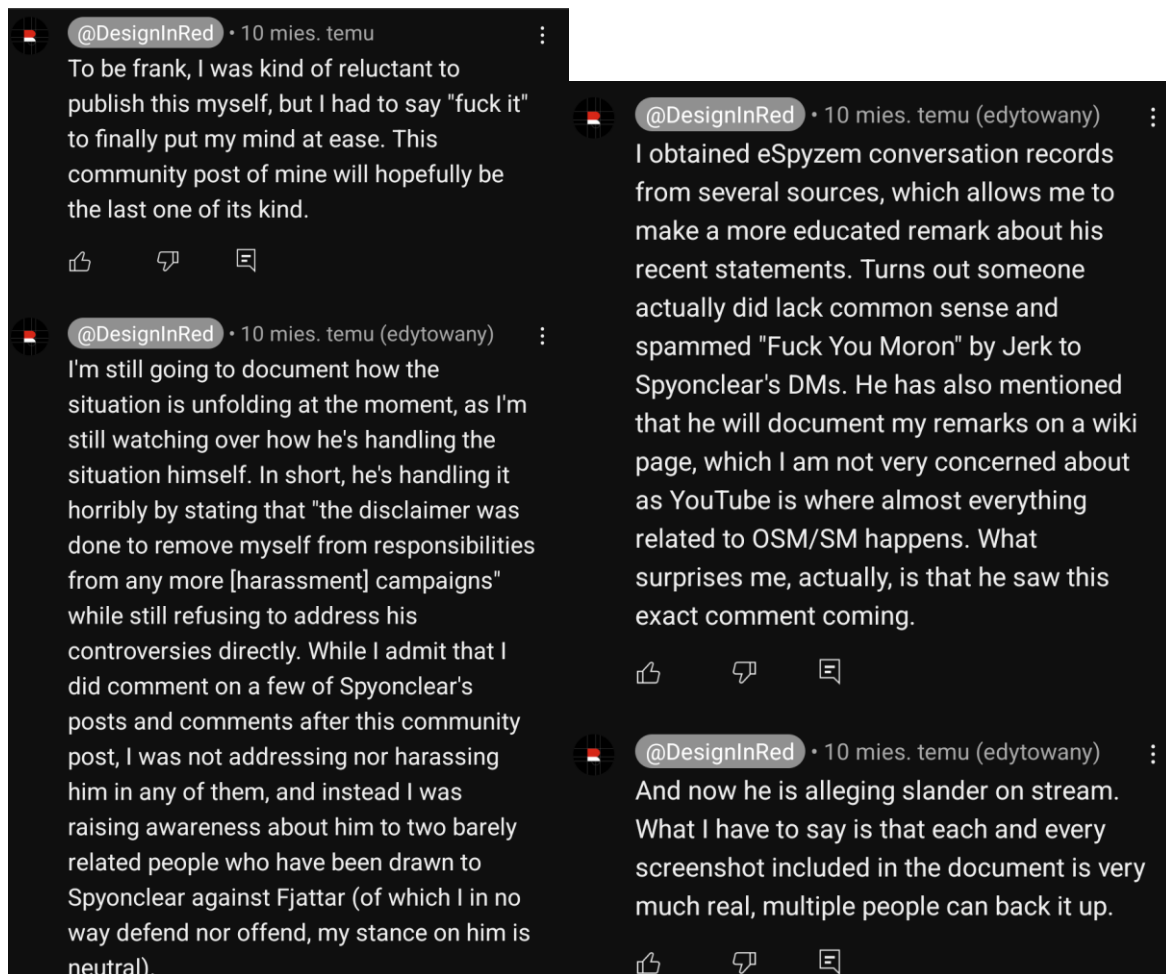

My man, anons DDoS'ing Google. Tell me more on how can they take your shit down.

I don't know what he's talking about at the first message.

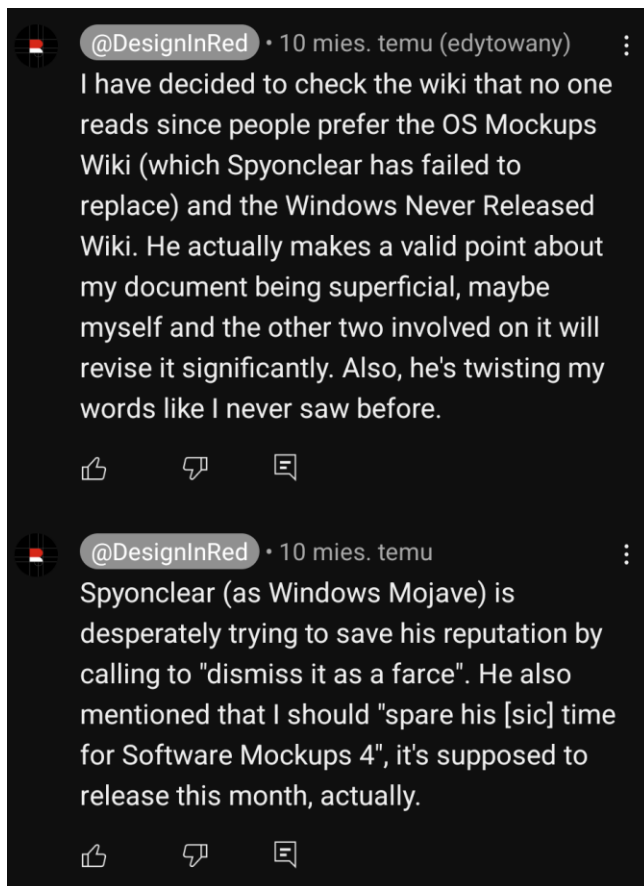

The second message had mentioned anti-Sil document.

Does he have any idea why he' had watched Sil at that time? And what's the reason for that?

He had claimed that Spyonclear did not get harassed by Chromatic's followers.

He's backtracked once it was proven Spy had got harassed, while Retinzyk himself was surprised to learn he was predictable.

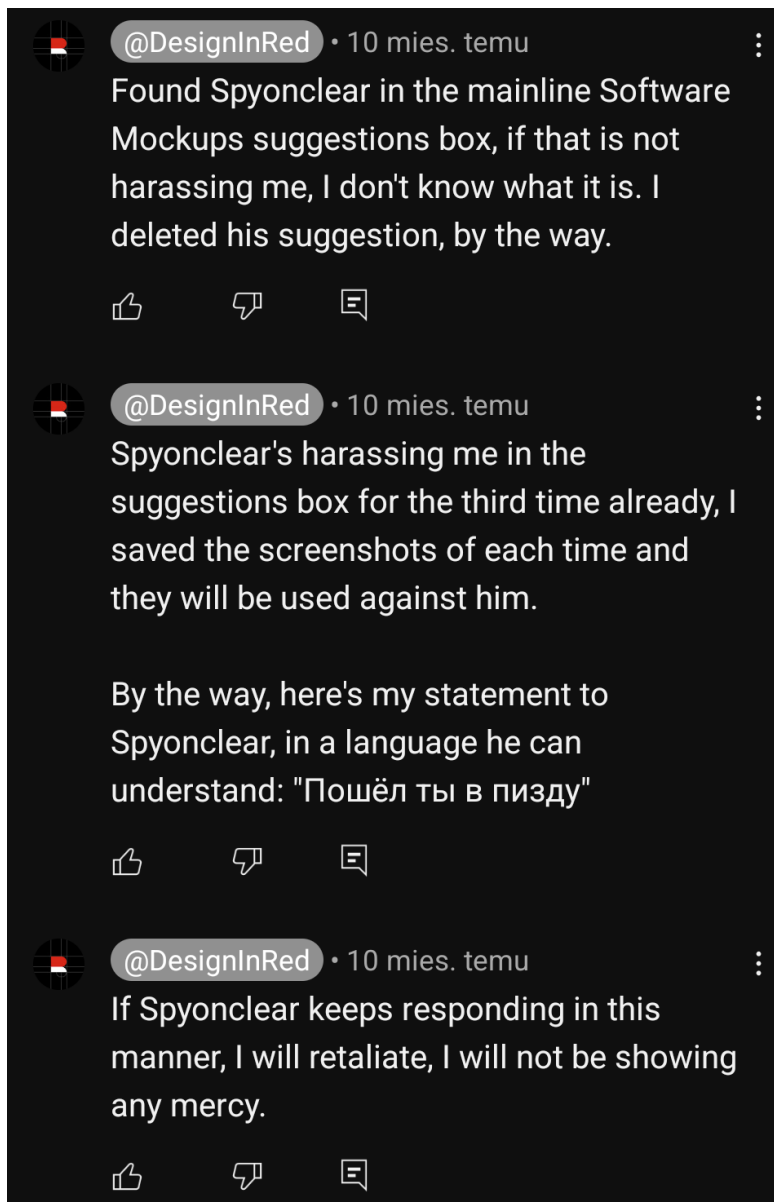

He used the dehumanizing language regarding Windows Mojave.

What's next, Spyonclear (as ChromaticAeternus) made the degenerate Jackbox Games sessions, and did everything that was covered on the said segment of the Issue 2?

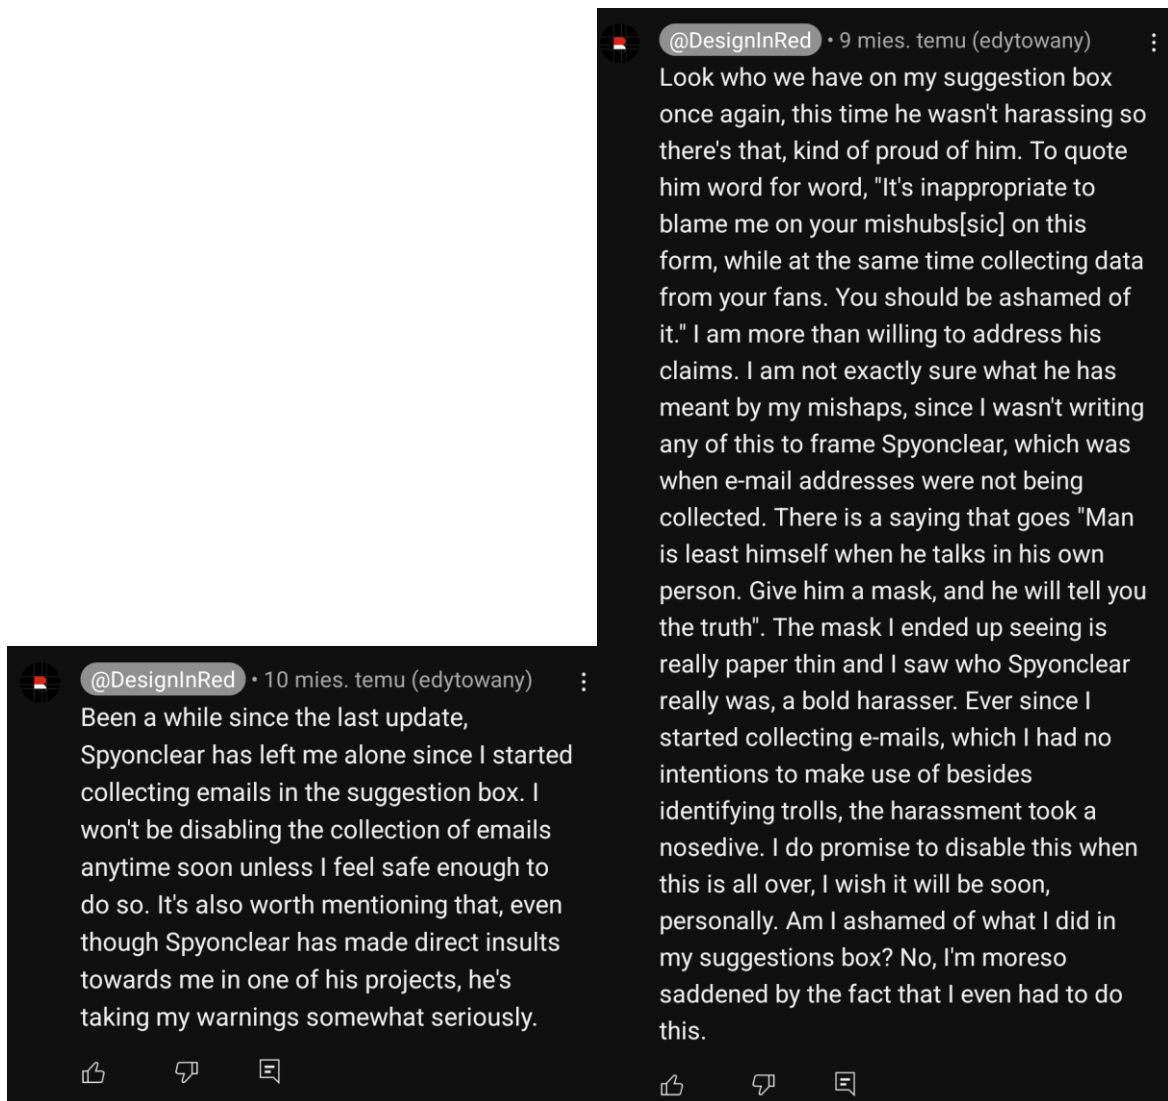

This is how not to make a comment chain. You can now start your struggle to counter that.

And which words of yours had been twisted? Are you even seeing yourself?

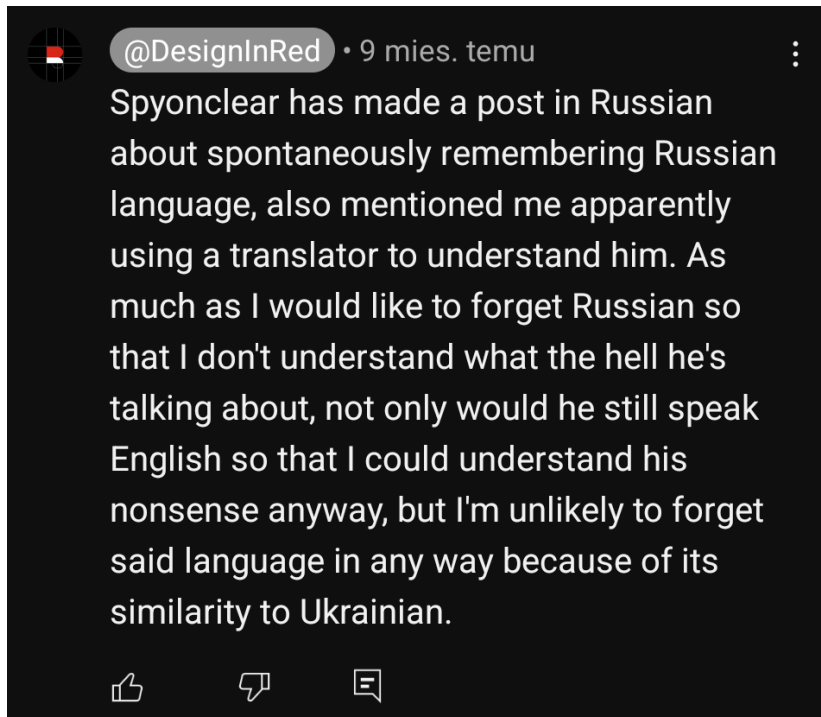

Then he complained about trolls at his project. This had nothing to do with Spyonclear, but that ended up on volume 2.

Despite Spyonclear having no involvement on this, he got threatened. Thought, he didn't back his threat on that year.

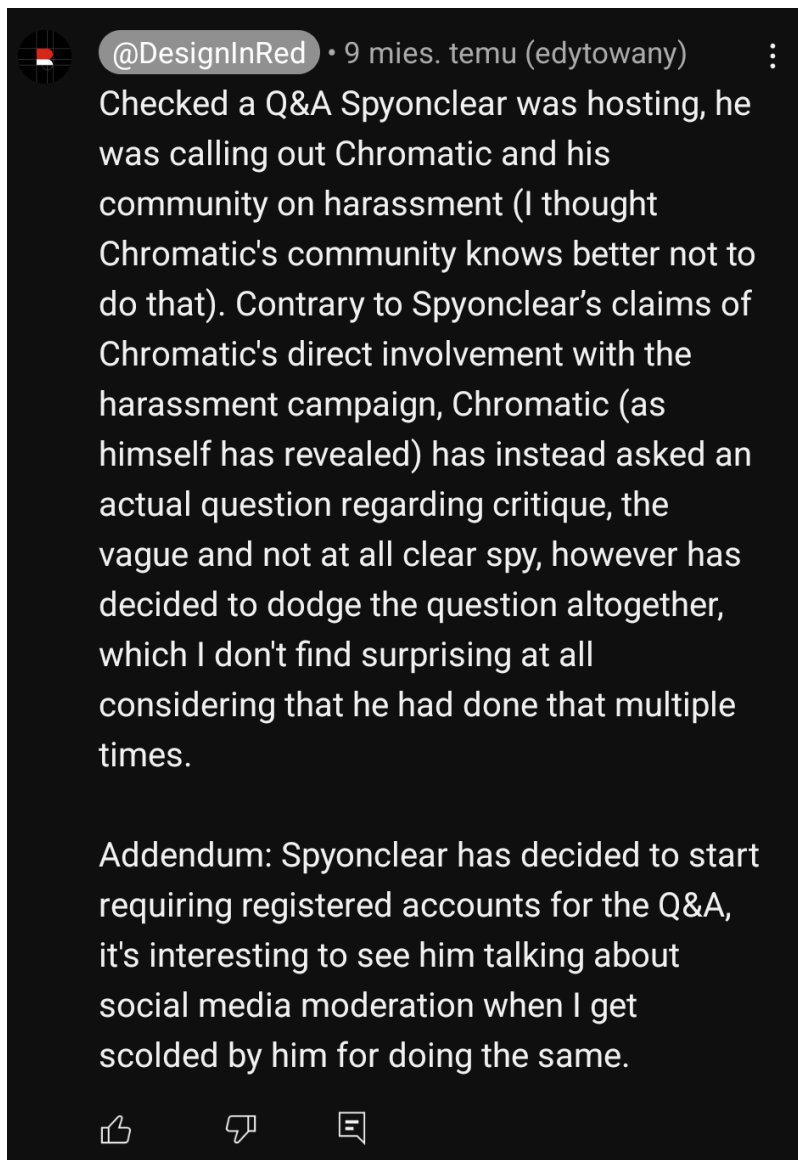

Apparently, someone pointing out that harassing Spy is inappropriate... is in itself is a *bold harassment* [sic]. Drama queen.

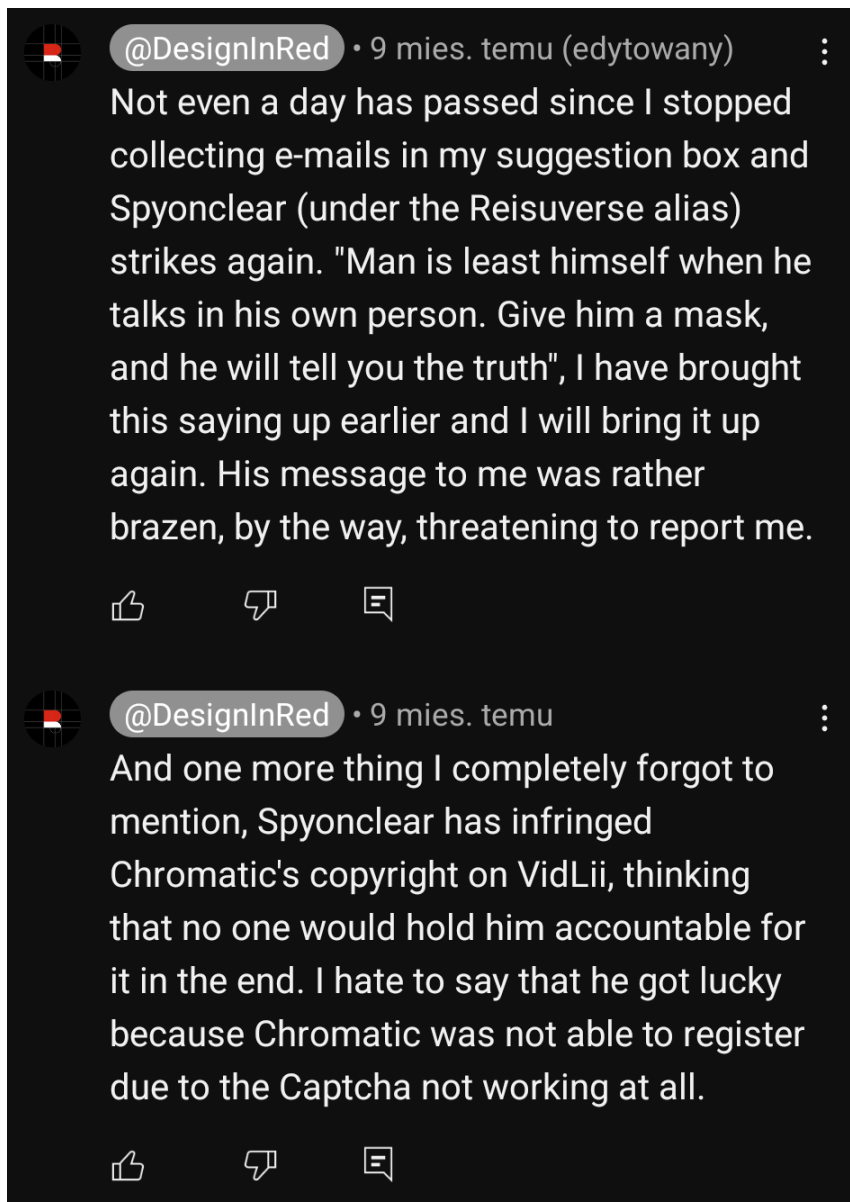

As if, by regaining your skills on russian language, you can make yourself understandable.

Your struggle screams skill issue. Spierdalaj.

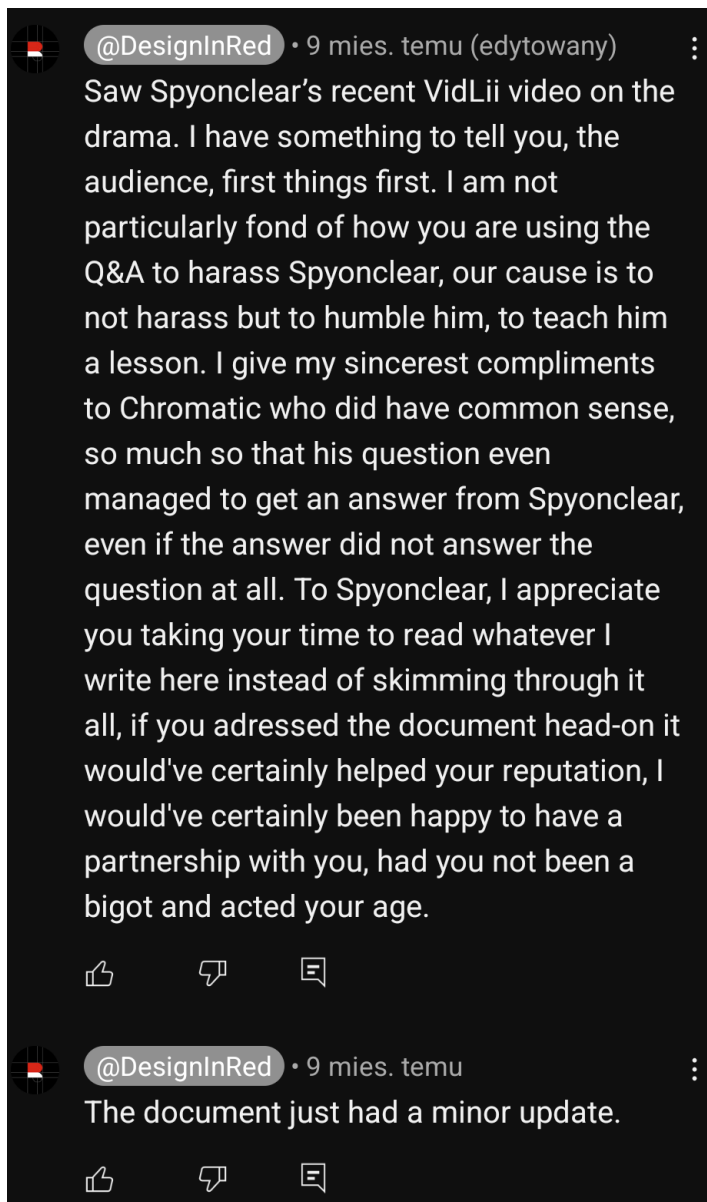

I'm interested. What was the question what had caused Gabriel to join the rest of chromaticans?

Knock the “Spyonclear under the alias” off, you know i am not him.

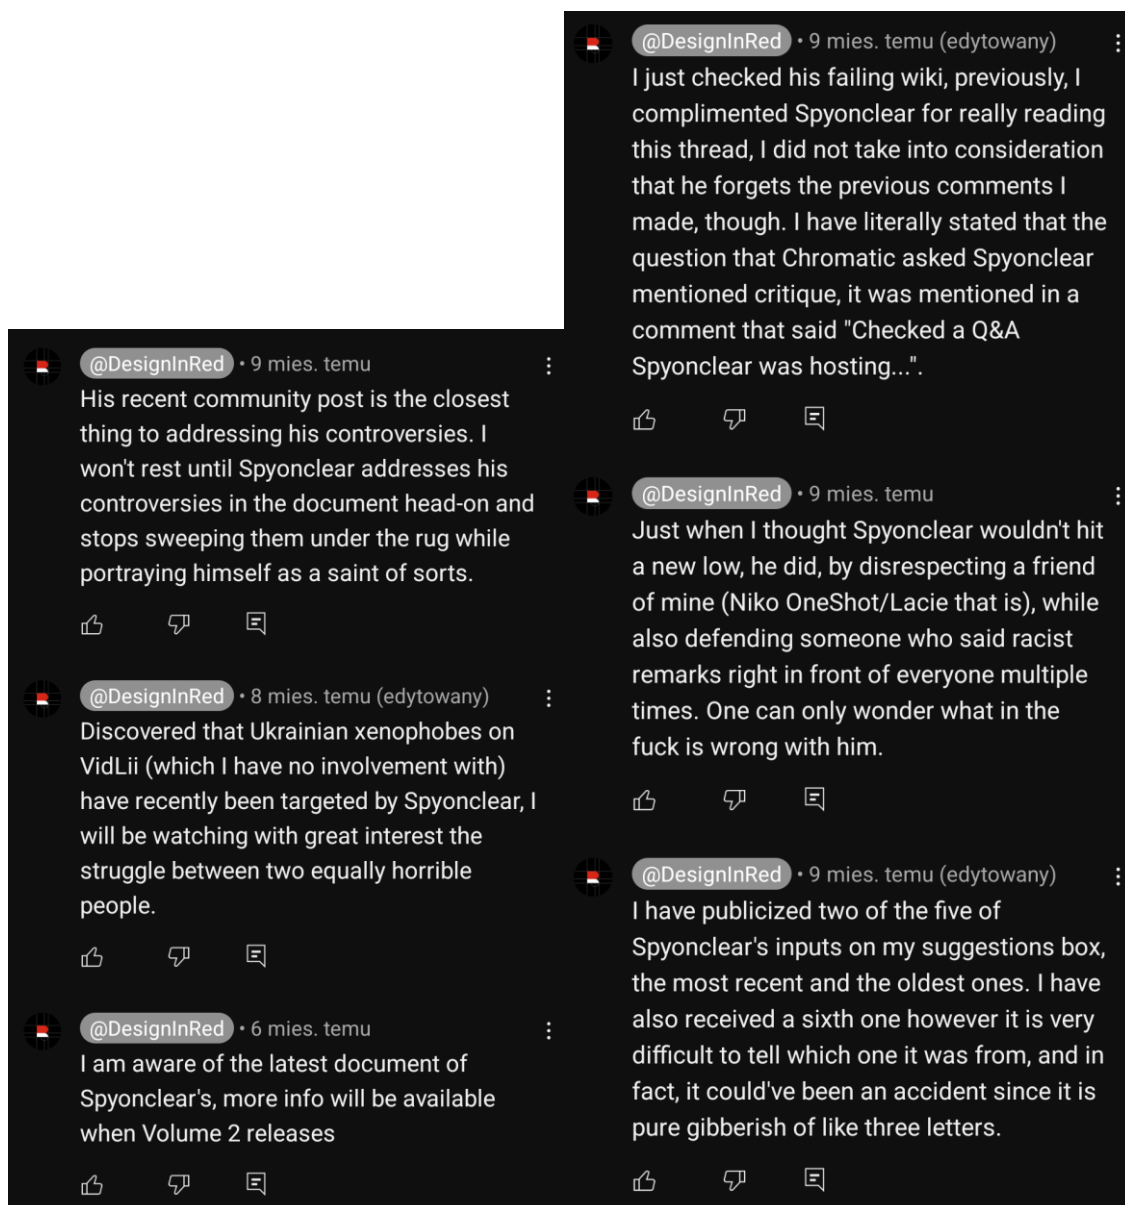

Didn't you got no hints, about your messages can potentially getting reported for harassment? What are you crying about?

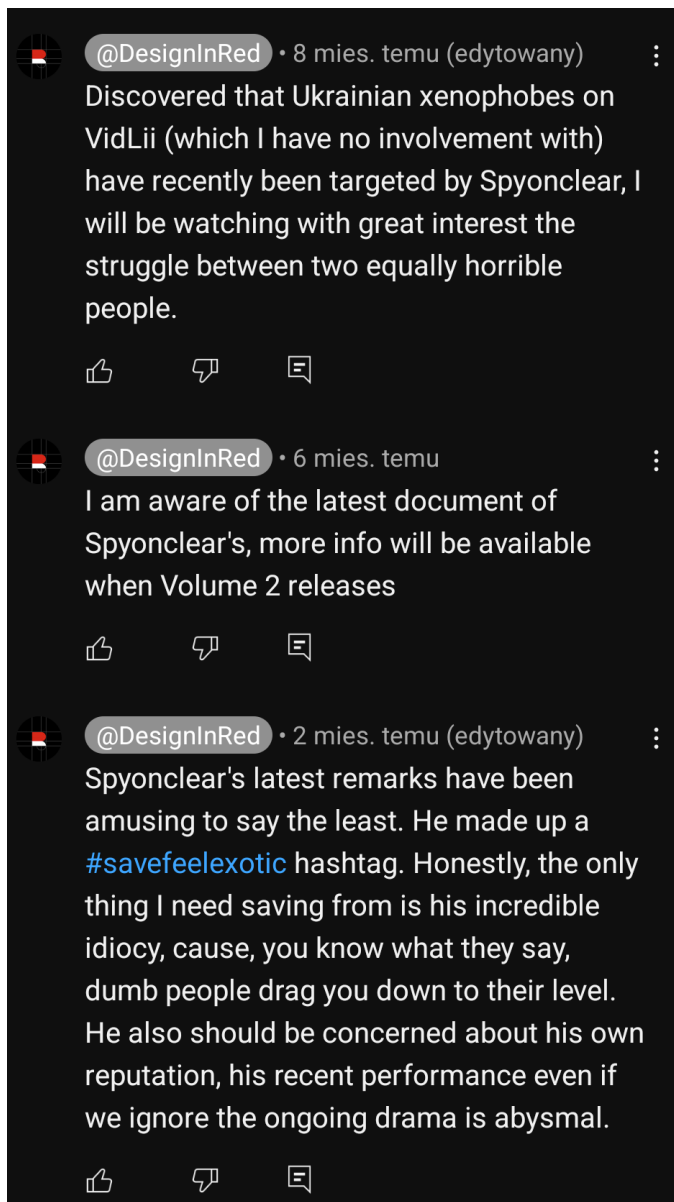

A lesson that is – go harrass Spyonclear, he’s worse than us, trust me.

I think we would be done with Retinzyk, had he not made more messages, and his document.

Regarding the partnership with Spyonclear – this is a guilt tripping. Retinzyk was a self-proclaimed Spy’s arch-nemesis, declaring himself as such in 2023. There is no way Spy could have a partnership with one teen child who hate him this much. The gang must not make the partnership with the abusive Chromatican.

At the times, i don't know what the fuck he's talking about. Did he took the pills before making such comments?

“dumb people drag you down to their level”, in my perspective, is to contribute to a document centered to Chromatic and DesignInRed.

As I’m speaking, the only thing Retinzyk need saving himself from, is DesignInRed himself, and how he was reviewed on our very document.

It was taken down on April 9, 2024. But I assume it would be brought back to life, like The **problem** with Chromatic and his immature friends.

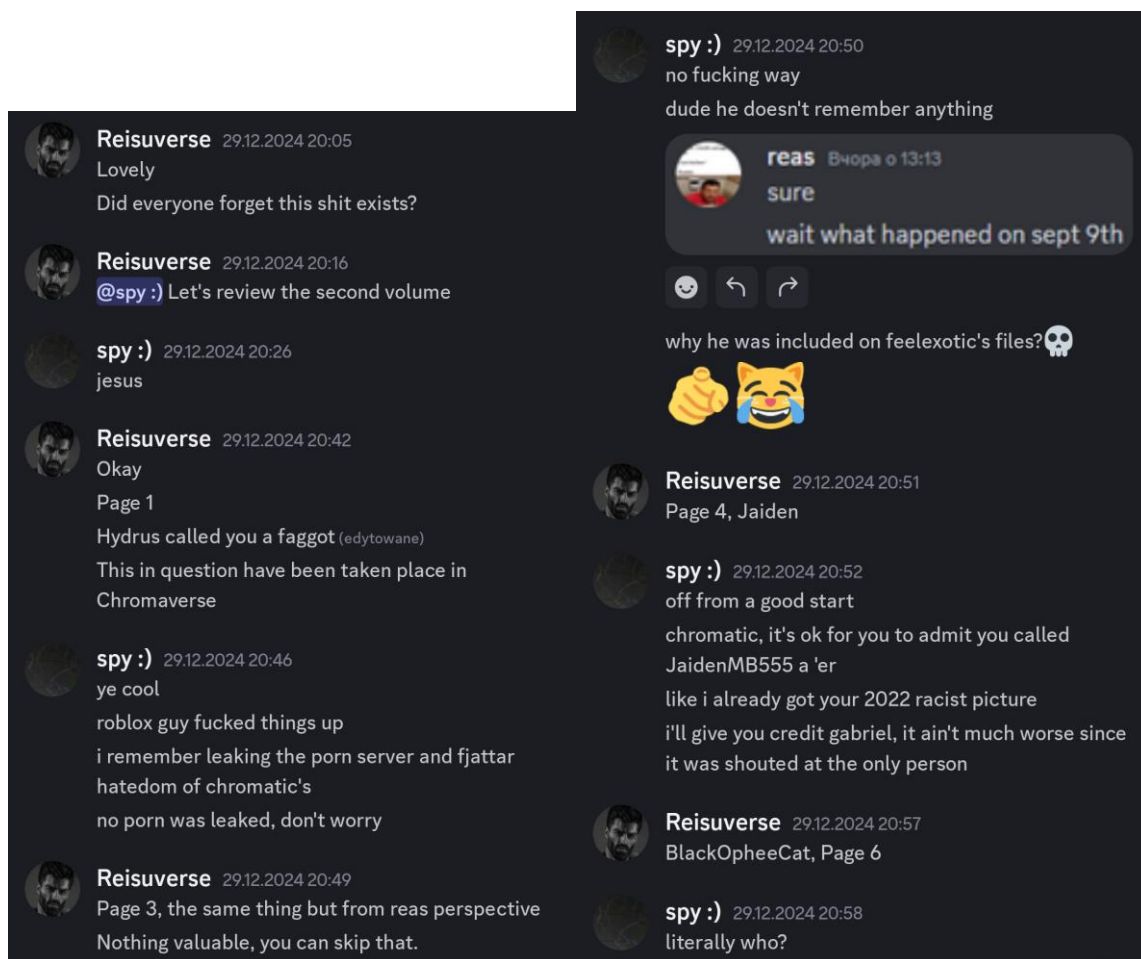

Volume 2

RDesign would make a second volume on November 25, 2024.

but he didn't bothered to defend them
so why bother

I wonder who called their alternative account *ilikeosmockups*, and got it's portrait on RDesign's document...

Nice try, Retinzyk.

In any way, Spy did not bother to look at the particular account.

eh. nothing new

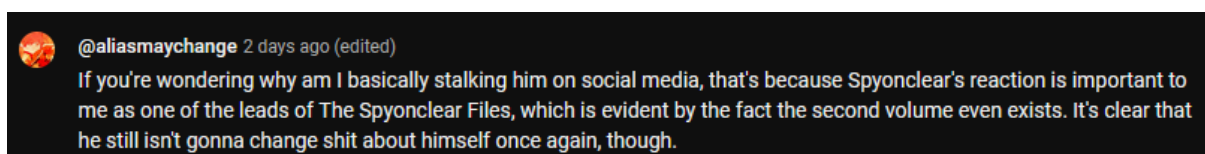

For the most part, that's Dzen who did the job putting in light on comment chain this time.

RDesign's comments

With a new document comes the new chain of comments.

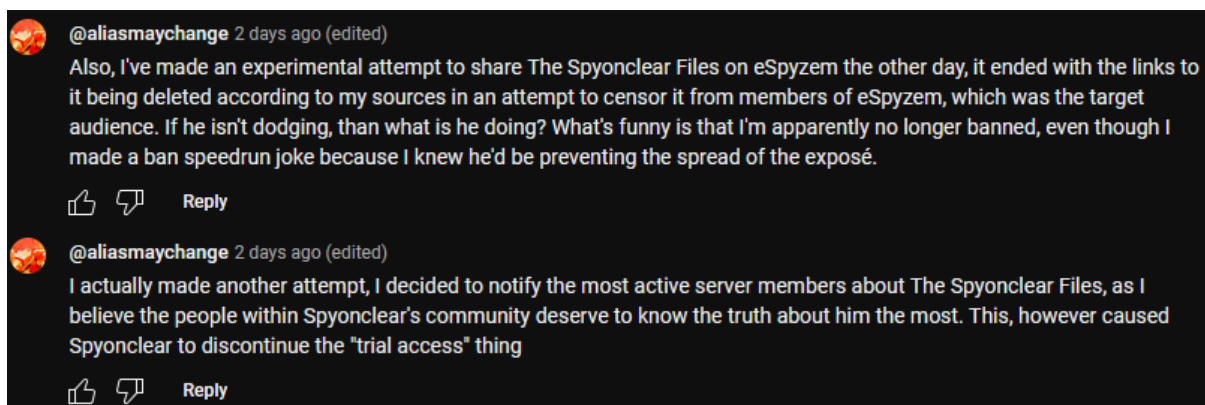

Dzen: I know Reisiverse would comment here. Spyonclear would challenge Chromatic's tale.

Dzen: Spy did not had the acceptable reaction on Volume 2.

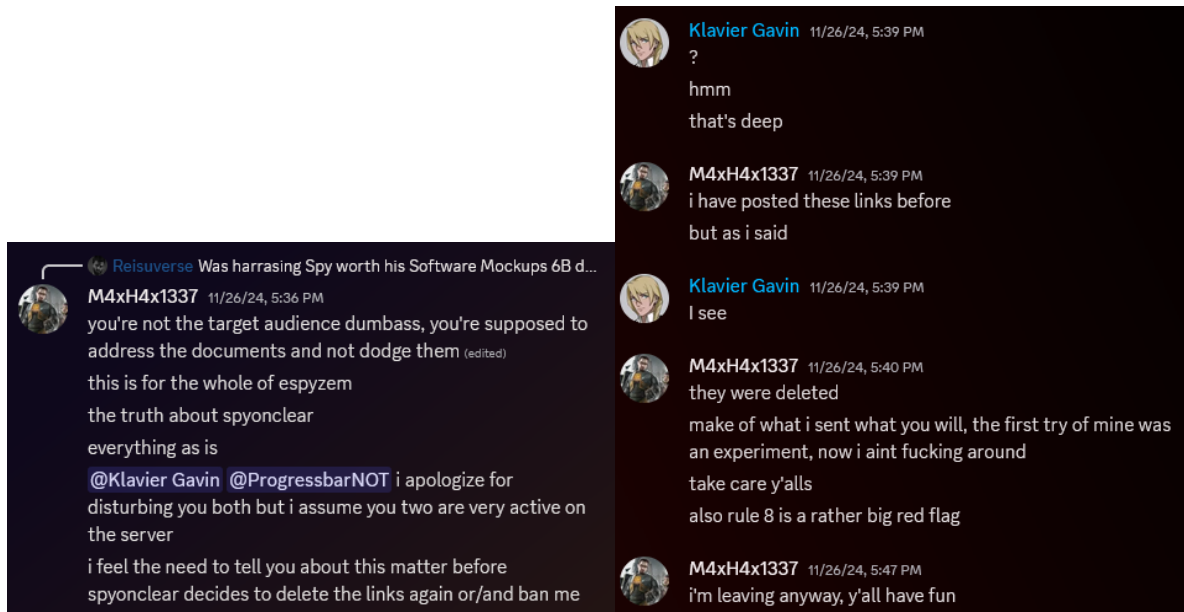

RDesign would quickly join and quit eSpyzem with apparent intention to share his work.

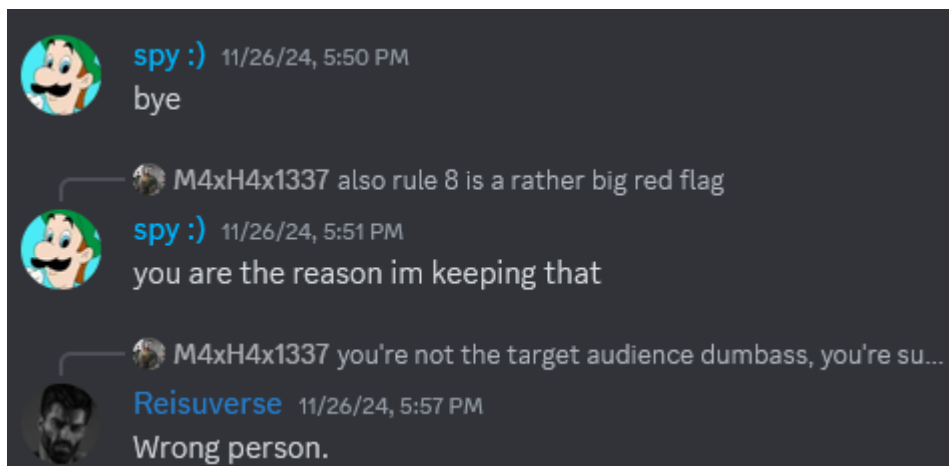

And here's exactly how it made.

And here's the second attempt.

Spy's and RV's answers were short.

Rule 8 refers to no hate Spy's policy – Spy had moderated his own server to make sure there was no bigotry or hate towards himself.

More comments

Reisuverse: You know you have problems, when Spyonclear had called you up over your rudeness. This part was made for the first time as the fifth level heading as of December 14, 2024.

@aliasmaychange joining during the time that server had a drama with fjat is enough evidence

They're arguing like crazy.

They "covered" numerous topics, like sleep schedules, trying to compare Maxim's channel views and Spy's.

This persisted on the Discord server.

Jeffrey Epstein, is that you?

Reisaverse: Our next subject is how Gool/Bogal was documented. This is unrelated person to RDesign's document.

The equally questionable individual, more importantly, Spyonclear's support for him.

Well, what's so equal about Bogal? If you are making a story about him being naked, then it is time for me to call Chromaverse as Little Saint James.

[on one of the Chromaverse Jackbox sessions](#), among his other offenses were him taking off his pants, according to witnesses... We wish we were making this up... Regardless, Spyonclear finds a way to

It doesn't look good, regardless if you made it up or not.

There is two ways to play against RDesign:

If it's real: Chromaverse would be known as MWC community's own Epstein Island.

If it's fake and gay: We would potentially would talk about RDesign as a CSA fan fiction writer, amongst other deserved names.

Neither of that he would like to be associated with.

The Fjattar Files writers would retell RDesign's story.

Some people have heard of the name "Gool" when talking about Fjattar. Gool was that guy who said the n-word and flashed his genitals on camera.

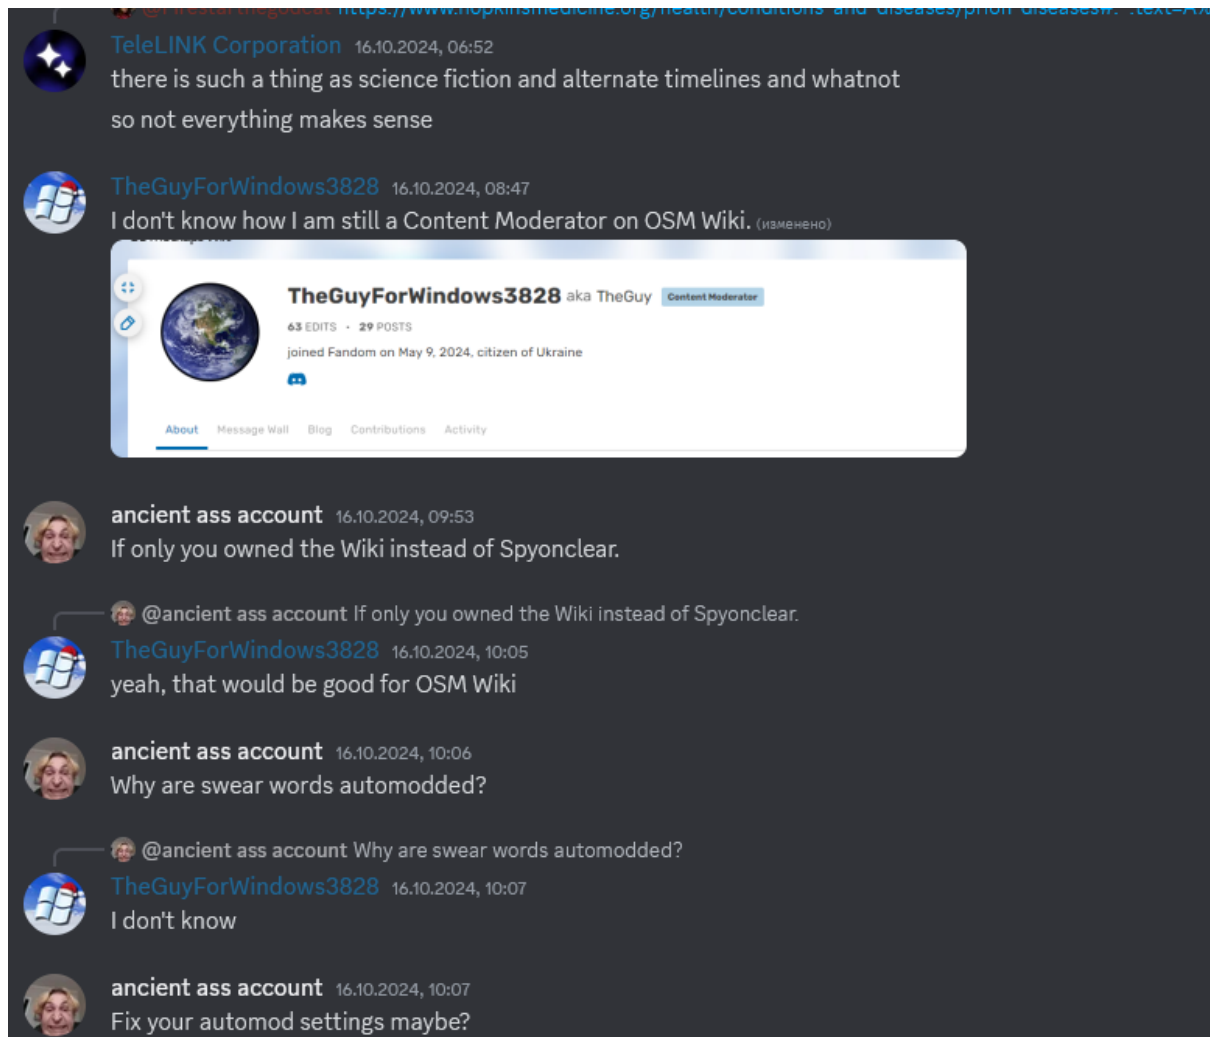

This isn't something they should say, but they did it anyway.

Happy to "research" private life, i see?

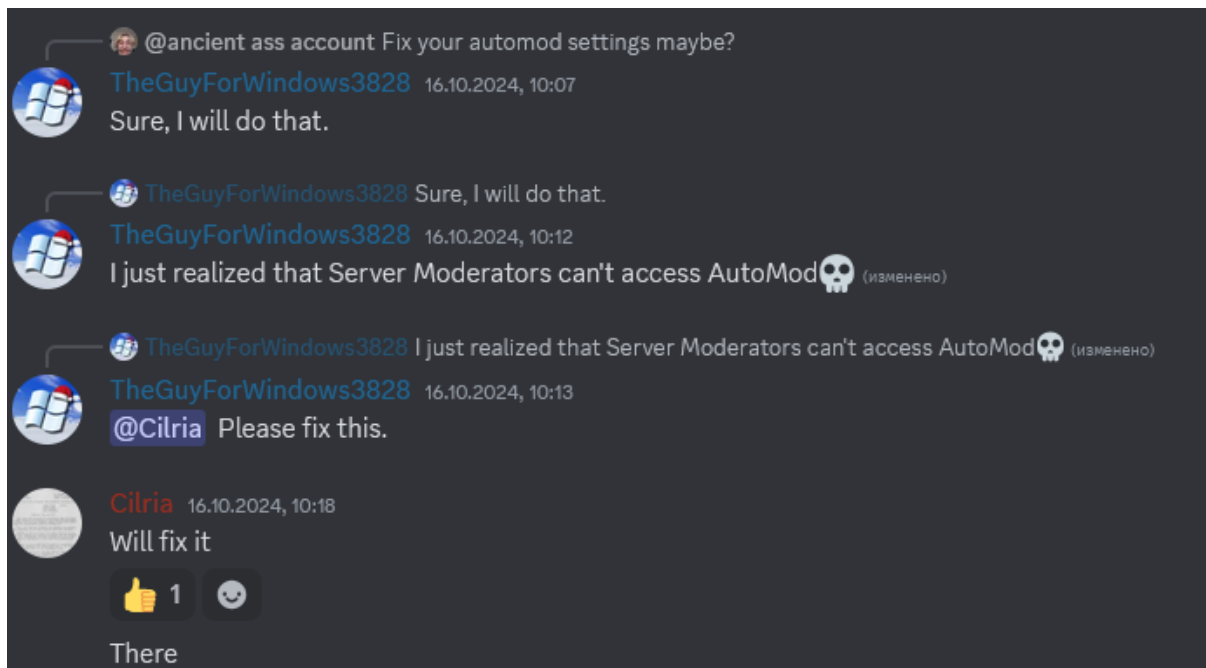

Oh yea, Bogal is under 18. RDesign is "researching" a child under a disguise of "exposing" Spy.

Considering Jeffrey Epstein did that in real life, and RDesign's February 2025 dramas, maybe someone should have took his keyboard away back before he's making on his document.

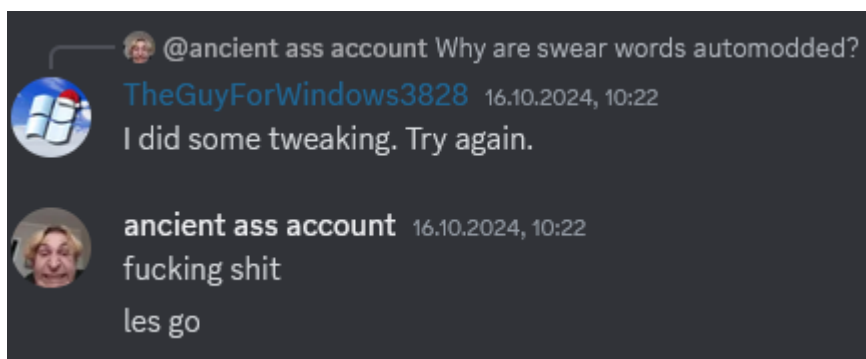

Our fake pearl

Reisuverse: You know, since this guy had wanted to be the owner of OS Mockups Wiki instead of Spyonclear, he would have a fair share of attention. At that time i was not on WNR Wiki server during FireStar's regime, so i would have to ask Spy to provide the screenshots of what's happening.

It's a minor inconvenience, but certain people wanted the unfiltered profanity.

I would be off-topic in a second. Who are these people, and do we have to expand this document to feature them?

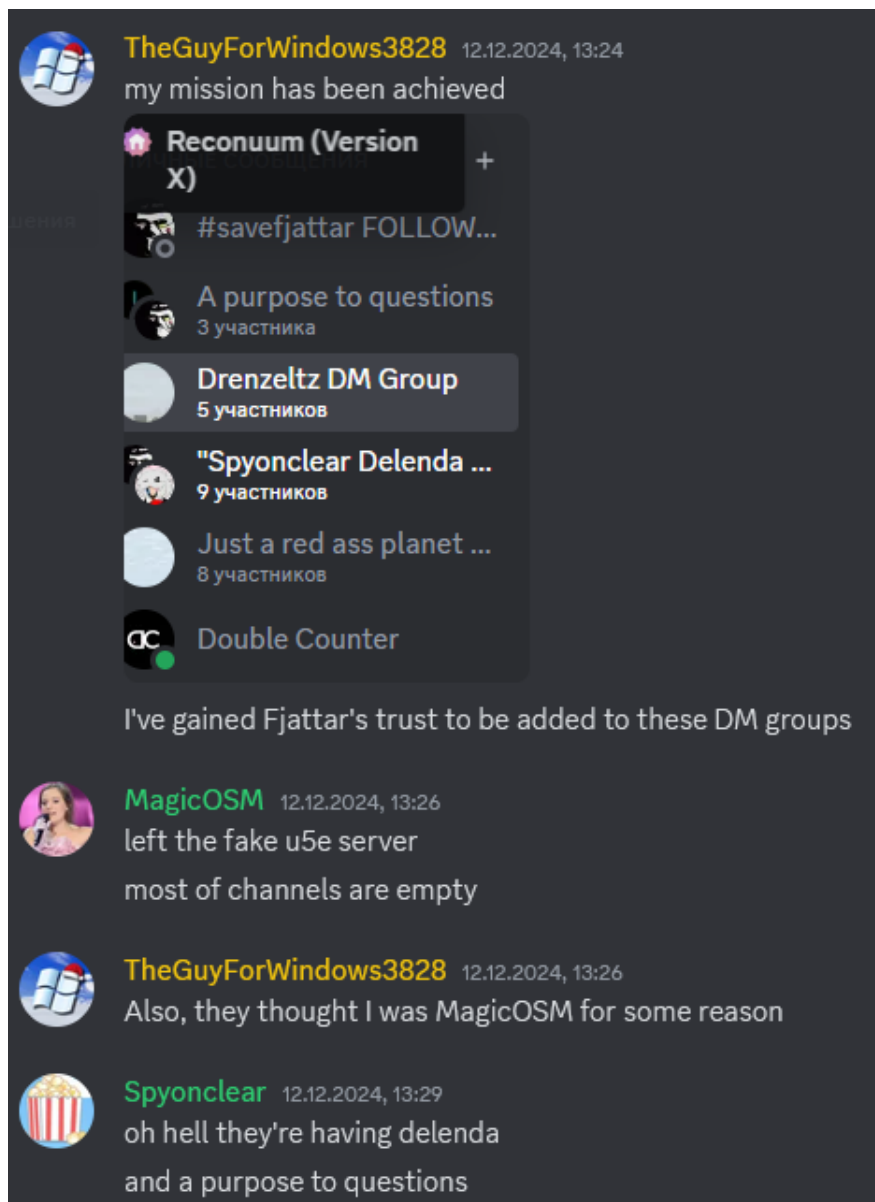

Well, if you're following the history, the goddamned group of people ought to troll Fjattar.

Fjattar falling victim of having his fake new ally.

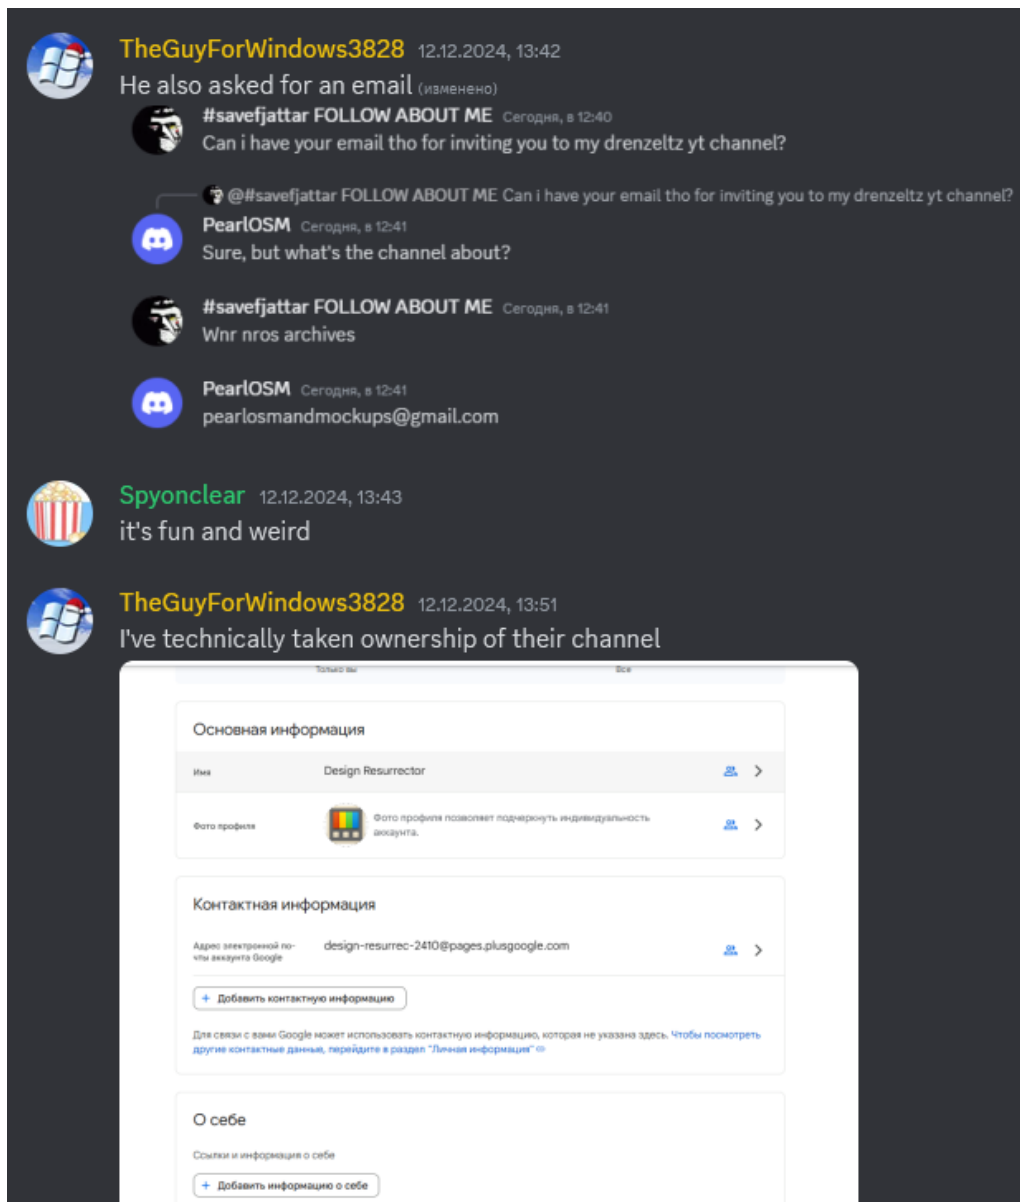

I'm not talking about ReformedOSM right now, i think ReformedOSM is his alternative account.

Fjattar has been involved on someone else's alt.

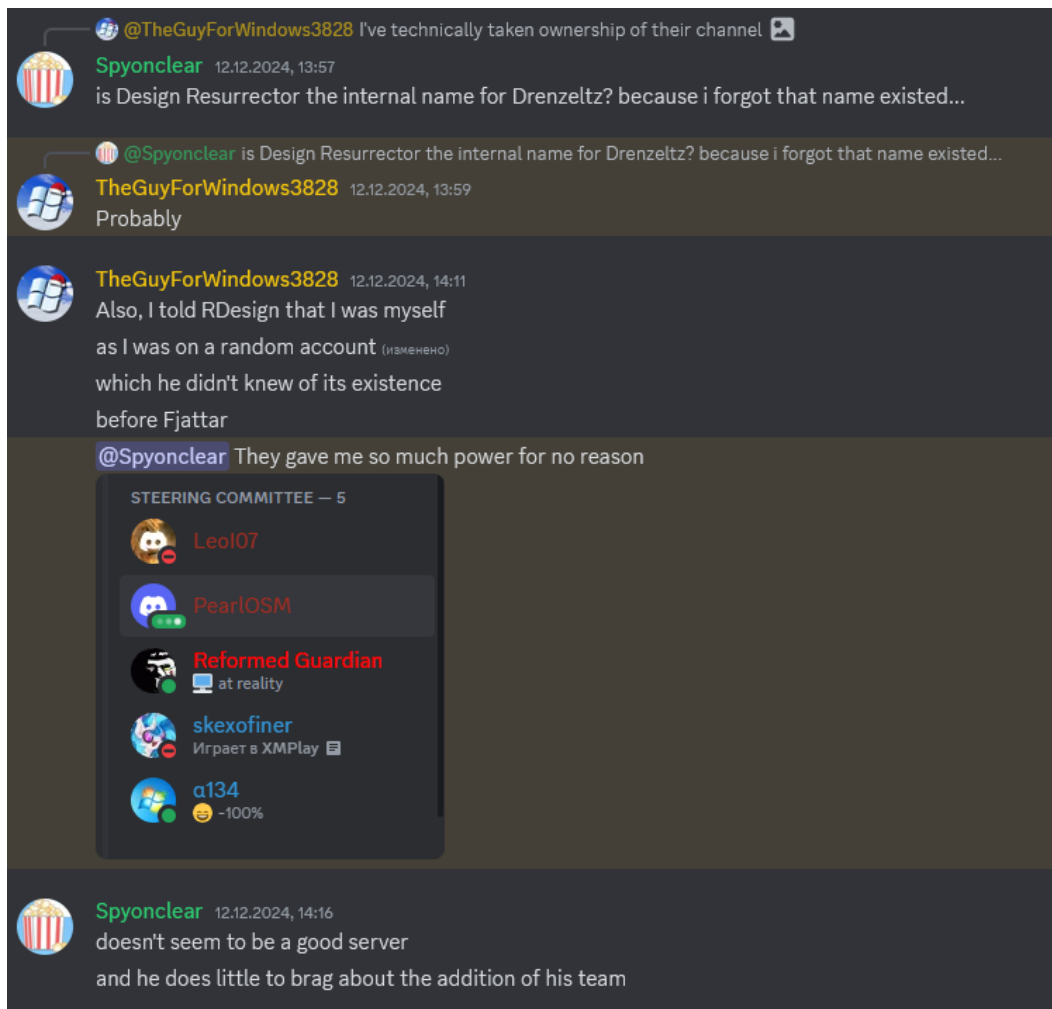

I would introduce to you the epic trolling tactic

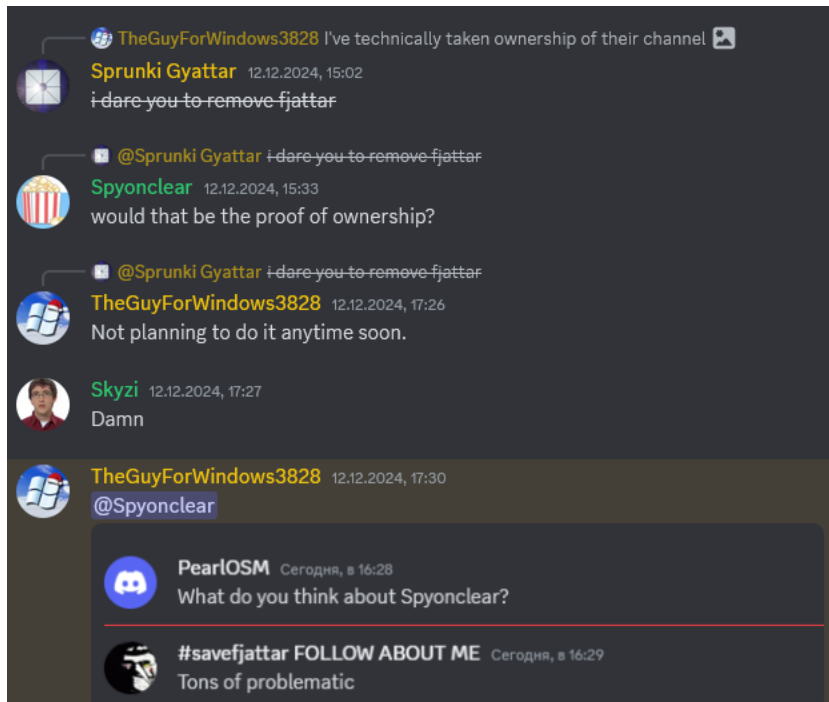

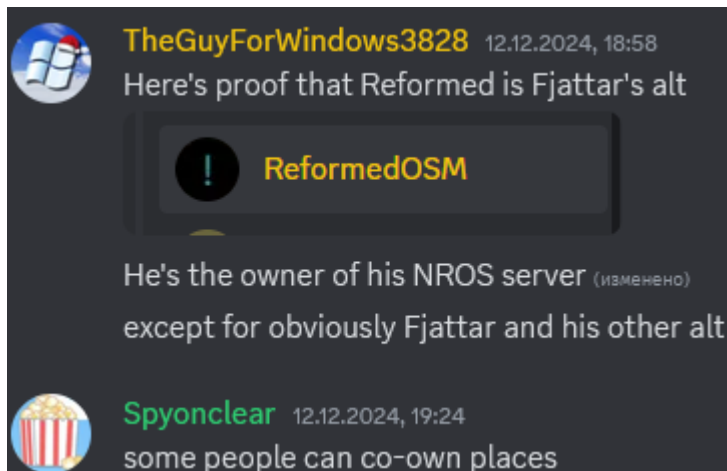

Fjattar got what would i call “cheated”

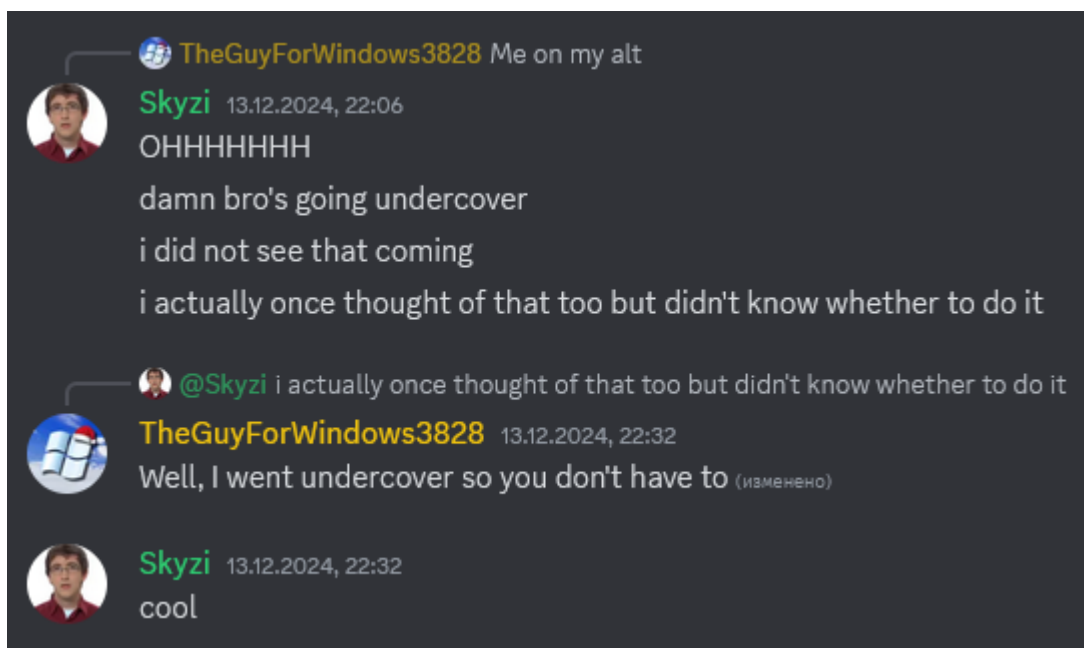

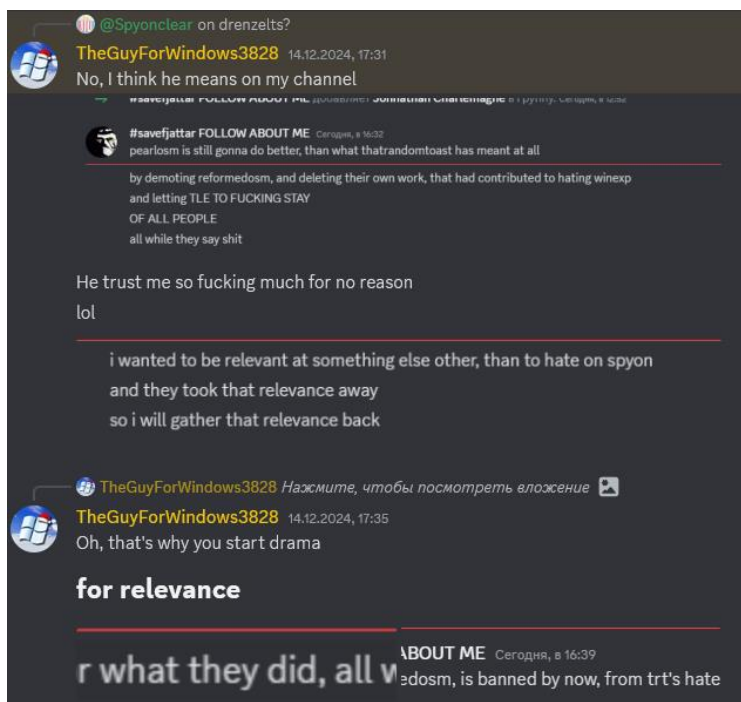

Let's share Fjattar's opinion on Spy!

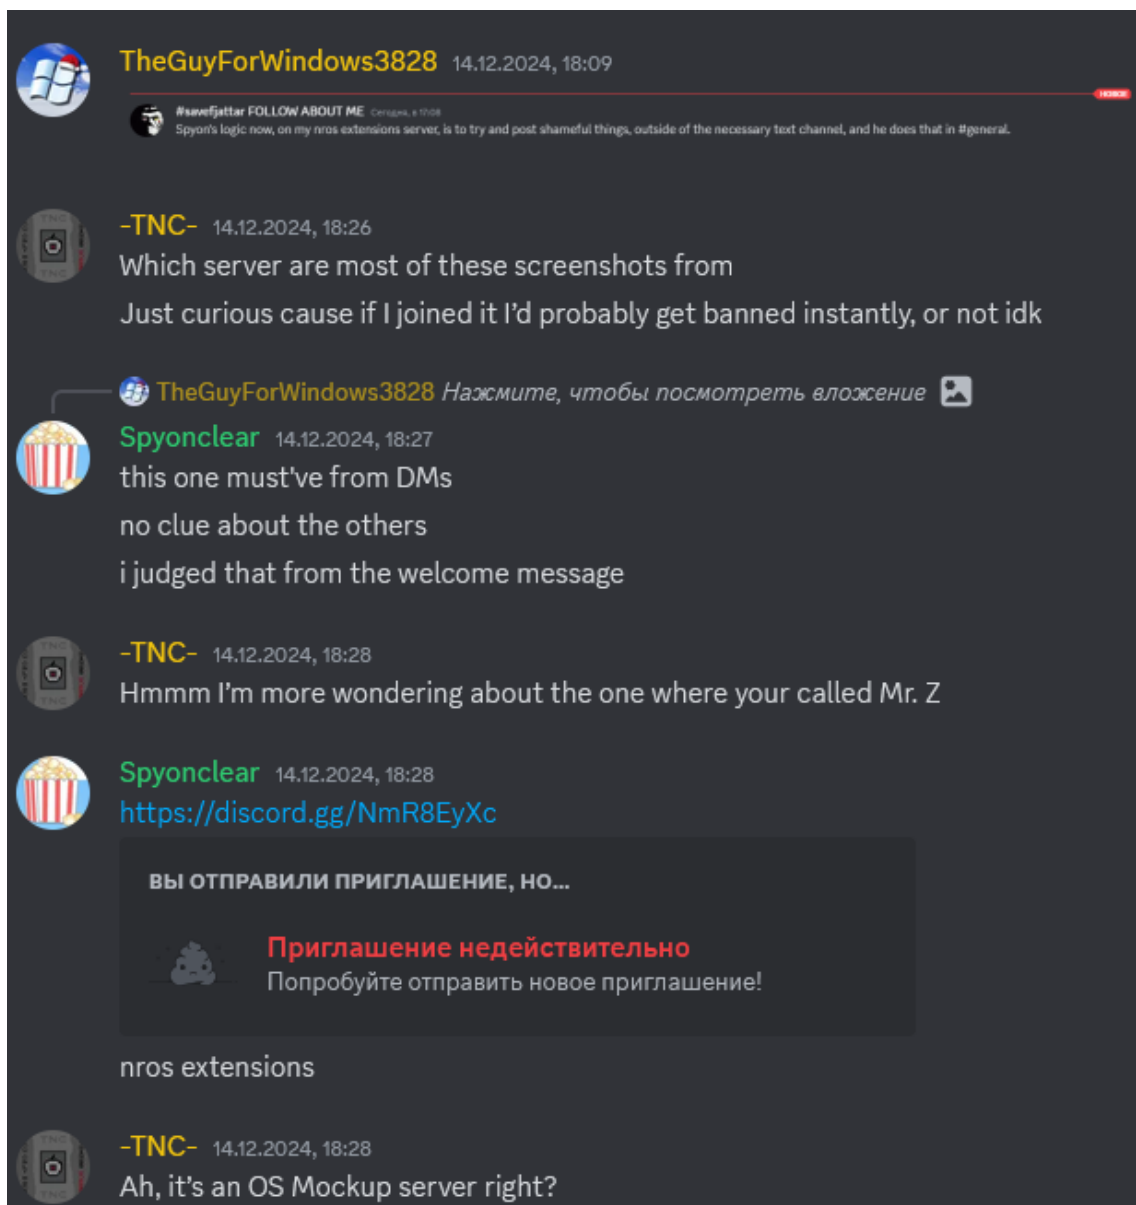

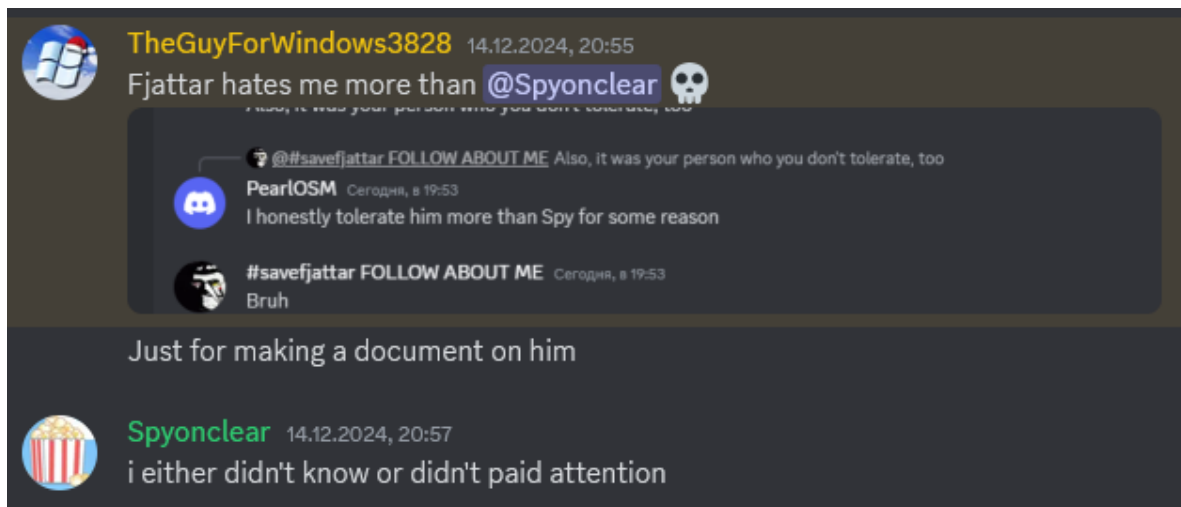

By the way, why i am not the owner of eSpyzem?

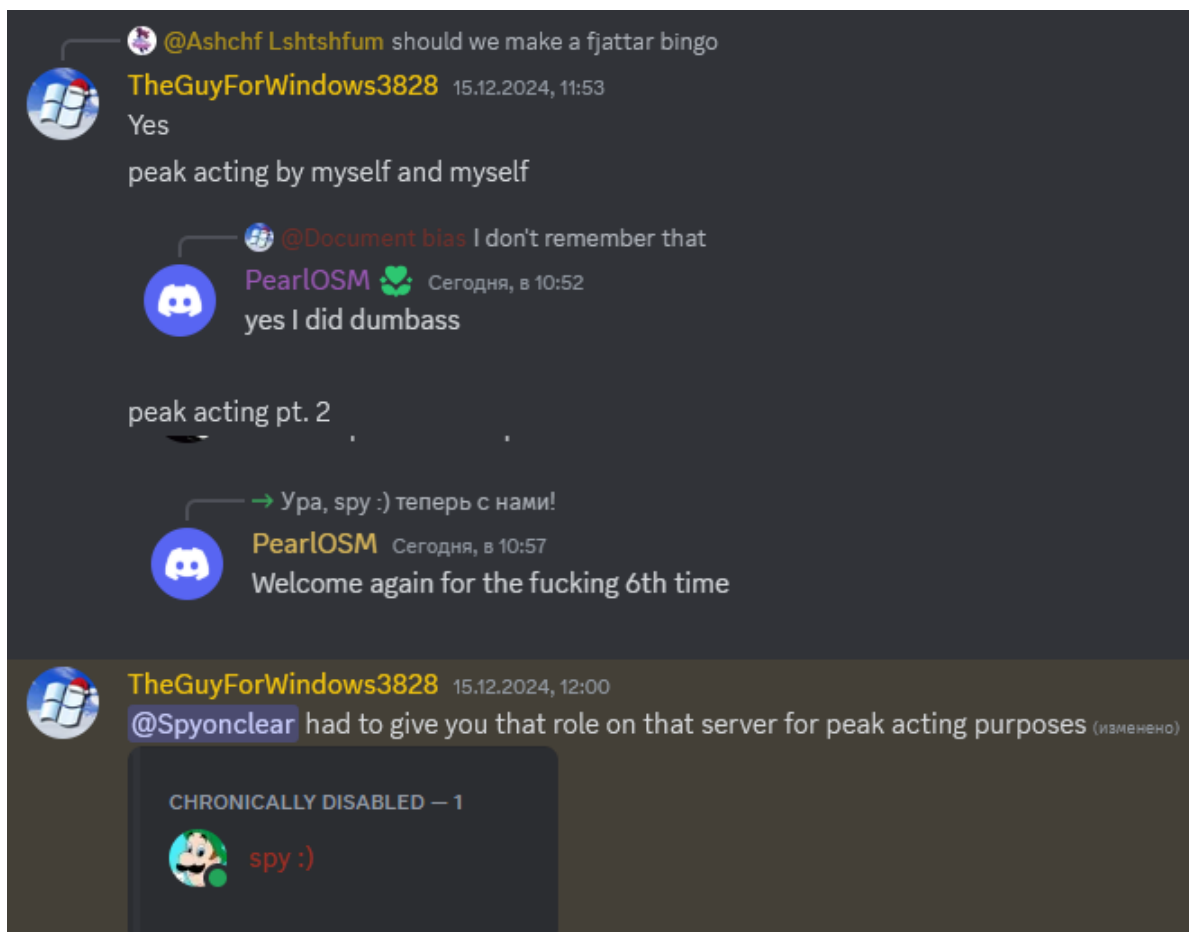

At the time of writing, PearlOSM youtube channel had no videos and community posts

so this is a censored image

[illegible]

Reisuverse: Hah! The uncensored version is in eSpyzem. This shit is too sensitive for BlueSky for sure, so I get why did Spyonclear censored certain text.

Dzen: It is apparent he got someone's reaction.

Dzen: Just because that person accused Spyonclear for doing more, doesn't mean that person can do that too without being hold accountable. Especially when it comes with making call outs on *The Spyonclear Files*.

Here's Spyonclear quoting RDesign.

Reisuverse: They don't care about their own words, and any bigotry in general. They only care about trying to own Spy & make him as miserable as them.

Dzen: Then, he proceeds to making screenshot of RDesign's post.

It looks like ChromaticAeternus got the poor old comments about the OS Concepts viewers, assuming Indonesian ethnicity, just for the sake of being angry about own followers.

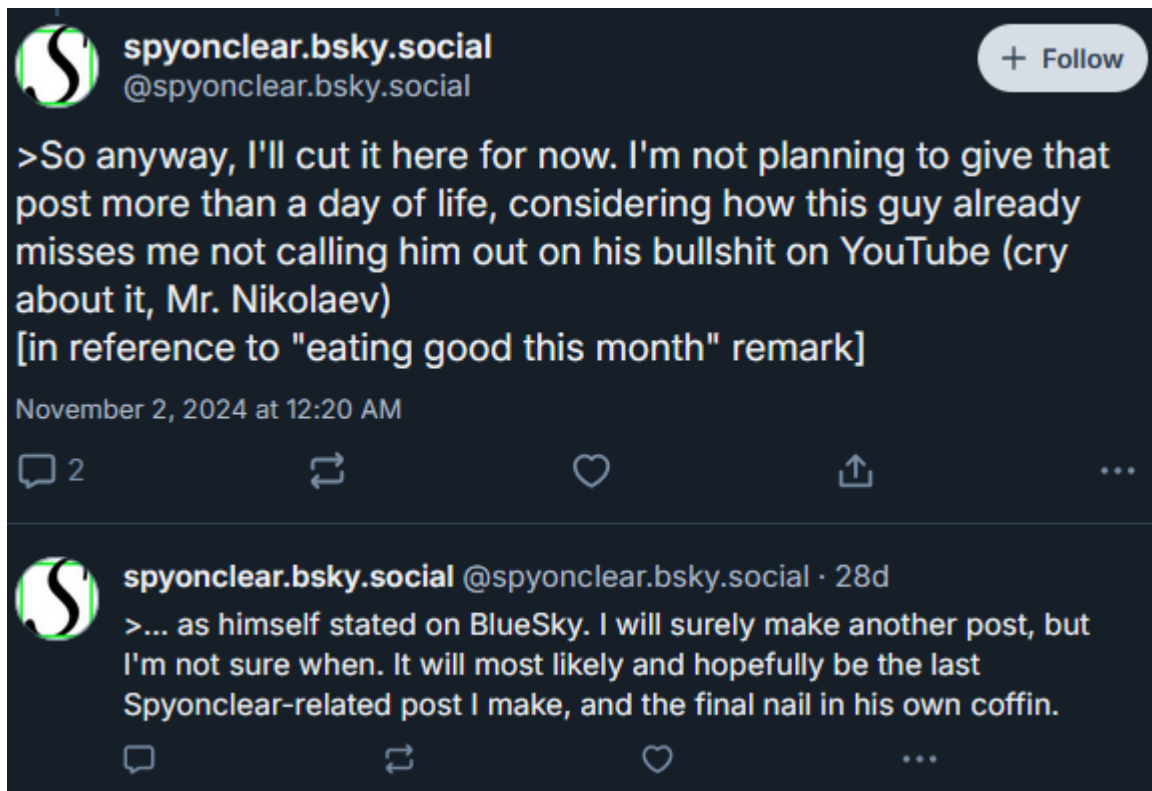

That was either old, or it was unwanted topic.

Another unwanted topic is whenever RDesign did all of this out of the prejudice for the russians – Spyonclear is from Russia.

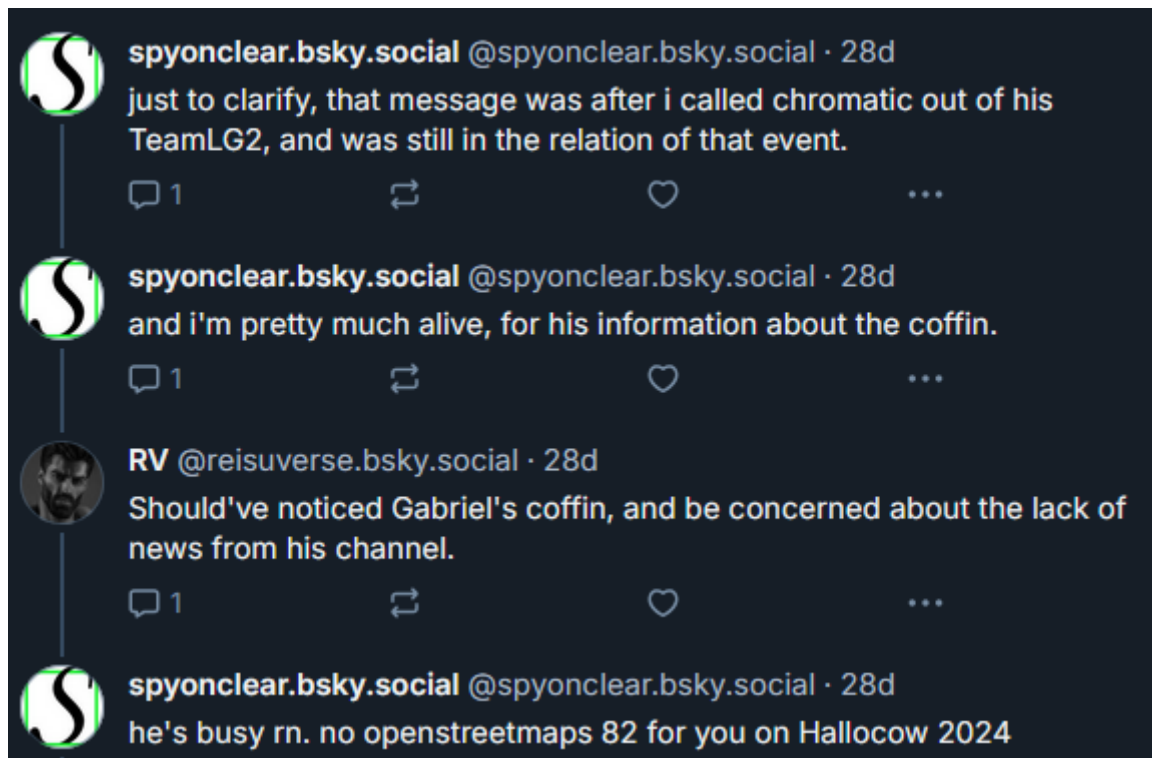

The last message from RDesign about Spyonclear for **October** November 2, 2024.

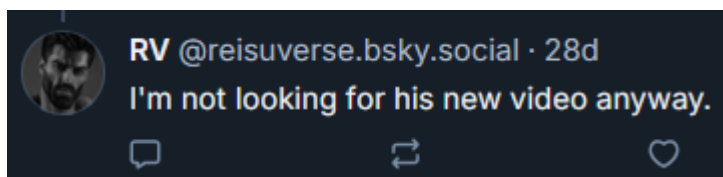

But it was not, in fact, the last post related to Spyonclear, as seen above on our document.

The attention was shifted to Chromatic's then-upcoming Operating System Mockups 82, on which Spy and Reisuverse had expected that episode to be released by late October.

But, it looks like Reisiverse doesn't having expectations on that...

Reisiverse: Still not going to do that.

Issue 4 – 2025

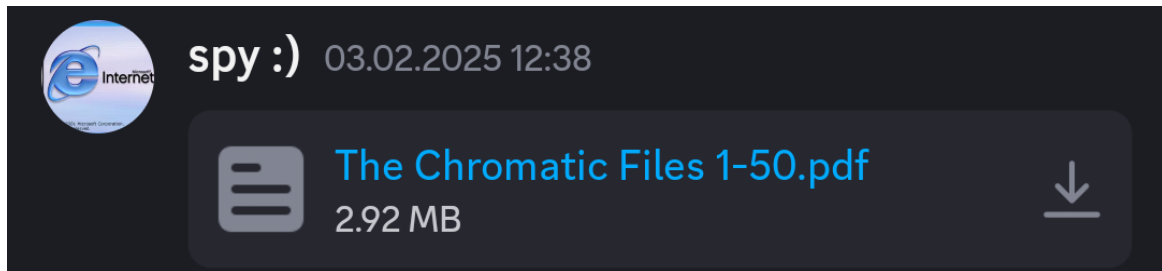

Reisiverse: This is either sixth, or seventh year when chromaticans harrassed Spyonclear for the first time. I wished not to record the issue 4, but chromaticans are stubborn.

As of New Years Eve, when the first version of our document was released, you would expect all of that to stop, and for February 14, 2022 peace treaty to be actually followed.

“The problem with Chromatic and his immature friends” document review

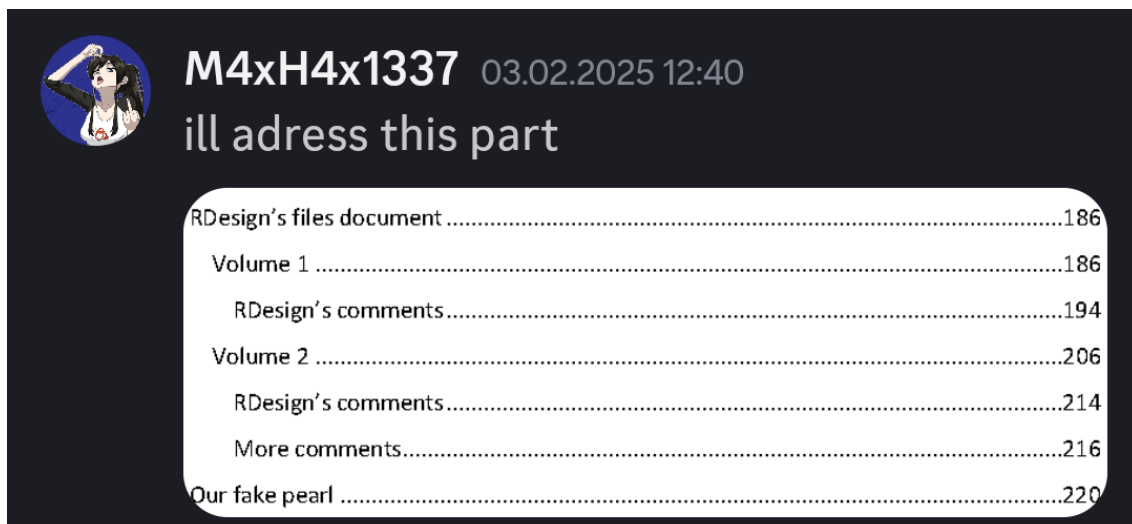

Reisiverse:...or skill issues when attempting to review that.

Since Retiznyk was stubborn on February 3rd, then sure Spy would post the pages 1 to 50 part of our document, revision December 31, 2024.

Now, certain screenshots were made by Dzen.

Retiznyk was seemingly have been uncomfortable with having to face every documented misdemeanor he, and the chromaticans had committed.

He would only answer for the Files and “Pearl”. Ironical, considering the whole RDesign’s document was addressed in our very document.

He seemed to derail the topic, trying to skip on more than a half of a document. But our team had caught him up on it, and have him go from the fifth page.

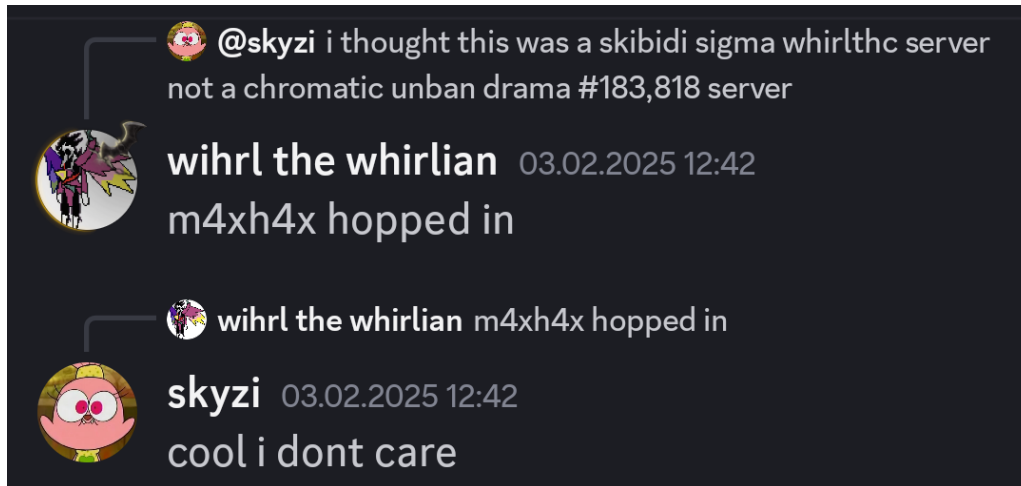

Thus, the “Page 5” roast was born. Back then, the actual exposure had begun on page 5, not before it got under, to page 6 and anywhere further, thanks to more topic we’re covering, and about to cover.

Failure to address the controversies, and the document’s writers would ask RDesign to get a proper addressing to the first theme.

Very effective, as RDesign for the previous year begged Spy to review to the former’s own document. This also highlights Retiznyk’s hypocrisy on how he thinks Spyonclear should deal with the said document.

All what matter is observe, as RDesign would derail the topic as long as he's on that server.

Back to the topic, shall we? No pun intended.

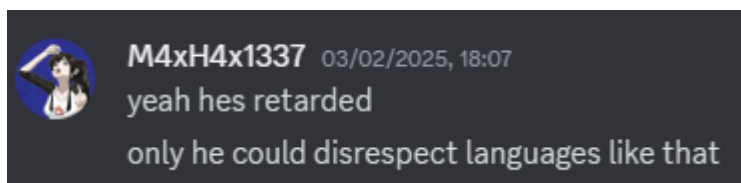

You might care a bit about RDesign, considering he's your ally.

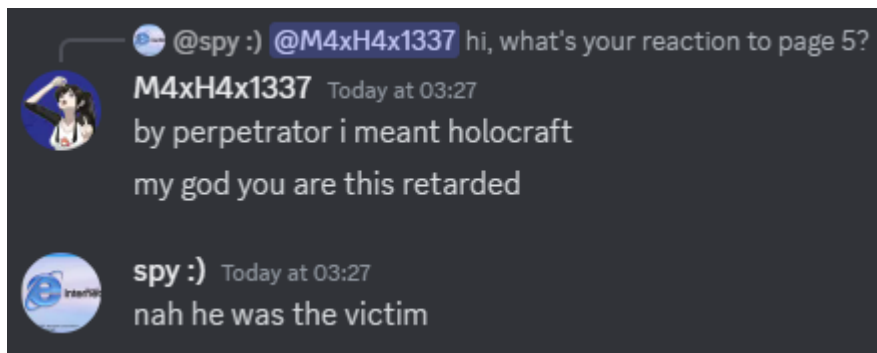

Also considering Retiznyk is a war hawk, then if you are sick of him, you could tell him to give up.

Spy would invite me on the Sermocinatio server.

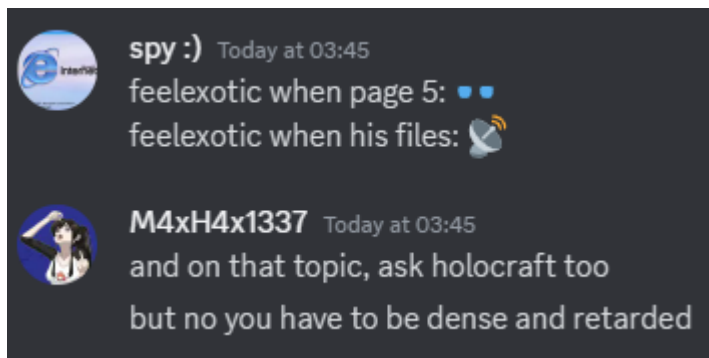

Notice Retiznyk's dehumanizing language, completely ignoring my existence, and instead he claims "Spy was behind the document". That's the kind of language Spy would not respect.

In fact, let's count the times RDesign called Spy "retarded"

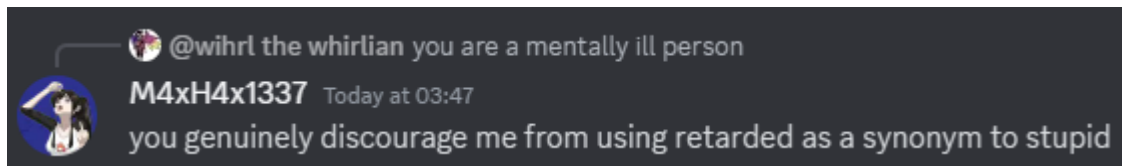

2

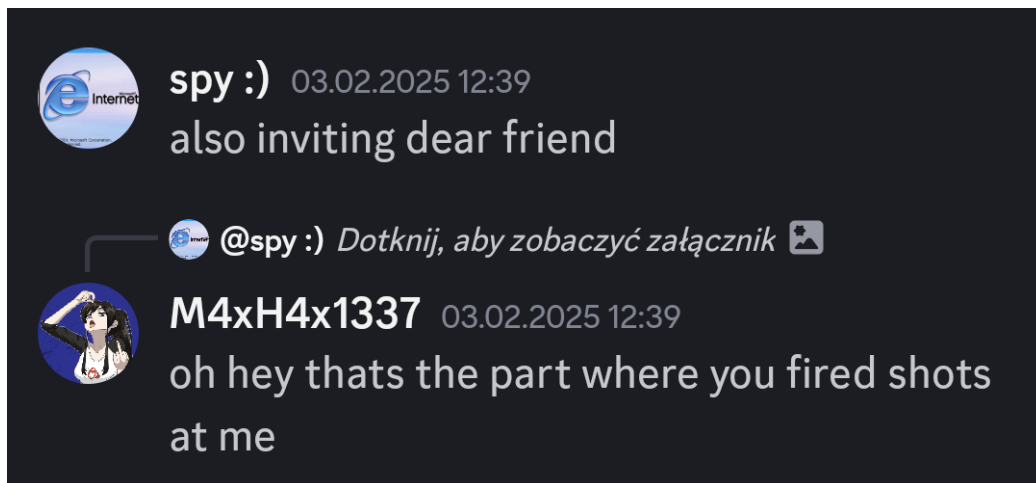

3 – at the moment he got confronted over skipping through our document

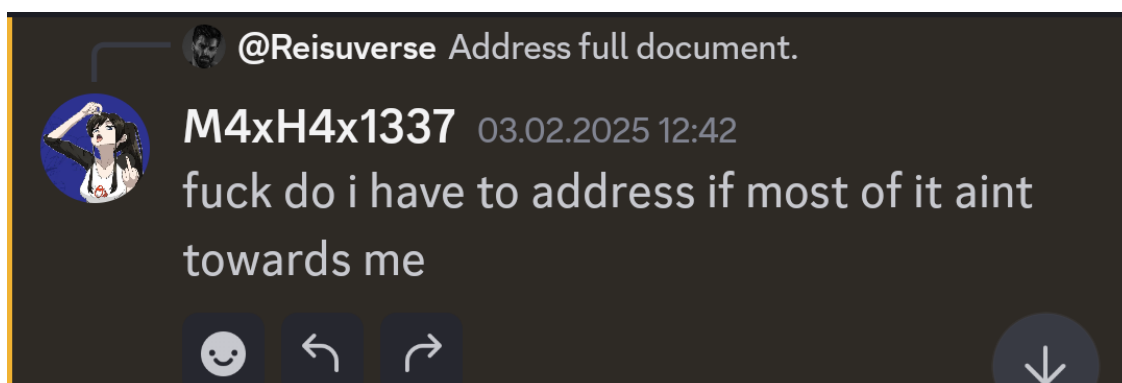

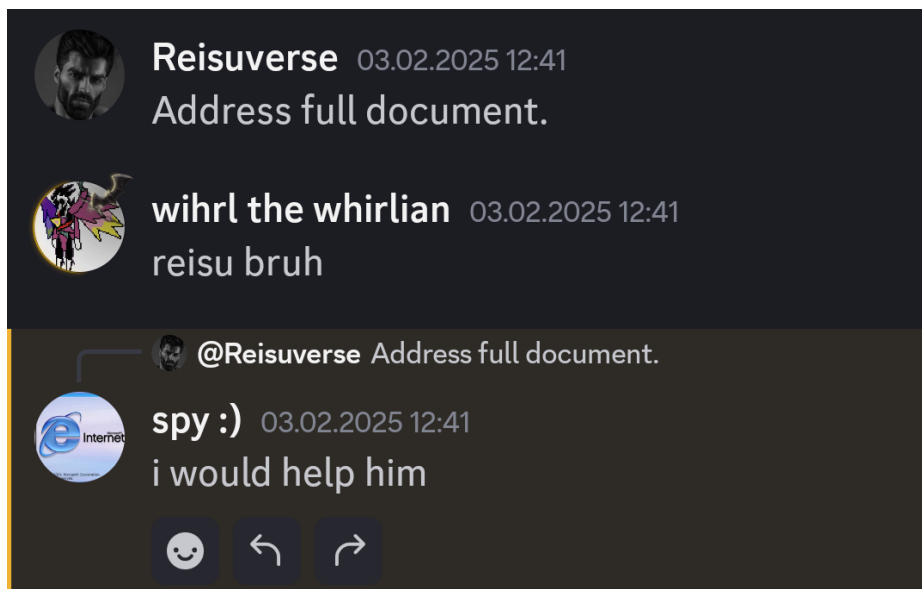

4 – upon noticing he said the word “retarded”, and Fjattar noticing the meaning of the word “retard”.

Very well, the word “retard” has no value when getting confronted, just like “whataboutism”.

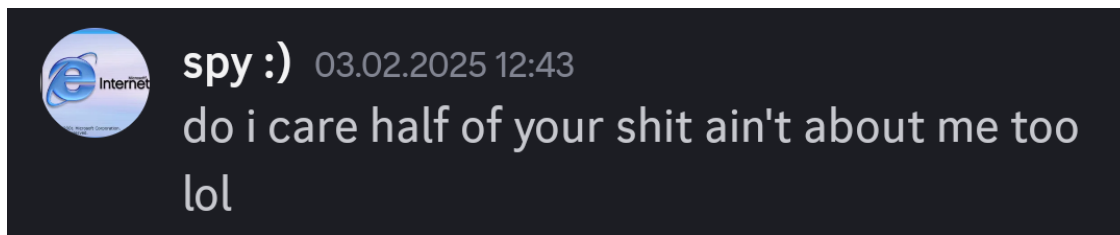

Next screenshot...

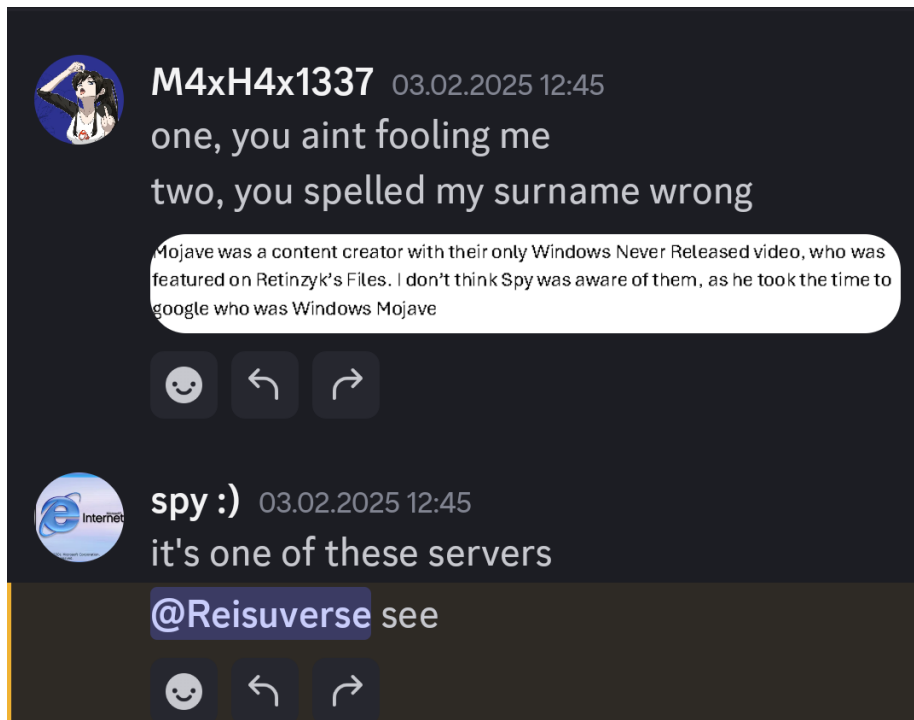

Speaking of a document...

Exactly what he did to his own document.

Spy had caught Retiznyk's hypocrisy

He's talking to Spyonclear on the document, saying "you spelled my surname wrong".
Spyonclear is not one of this document's writers.

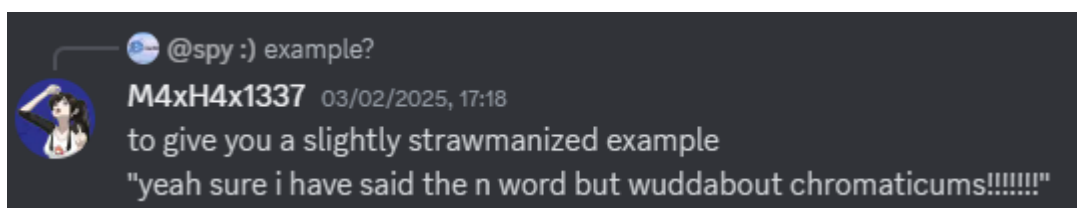

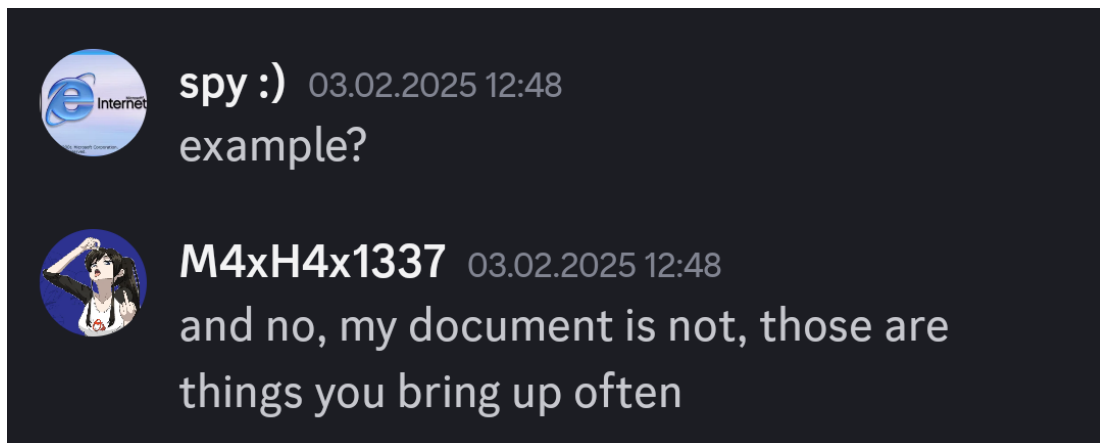

This is one of the cases of his dehumanizing language.

We would make this document bigger than The Fjattar Files with this one!

Also, the part when Mojave was mentioned on our document? It was on page 189! A far cry from the first pages he must had to address. Were the first 188 pages made him that uncomfortable?

Actually, scratch that – he has not even addressed the hostile behavior he had displayed on to Windows Mojave.

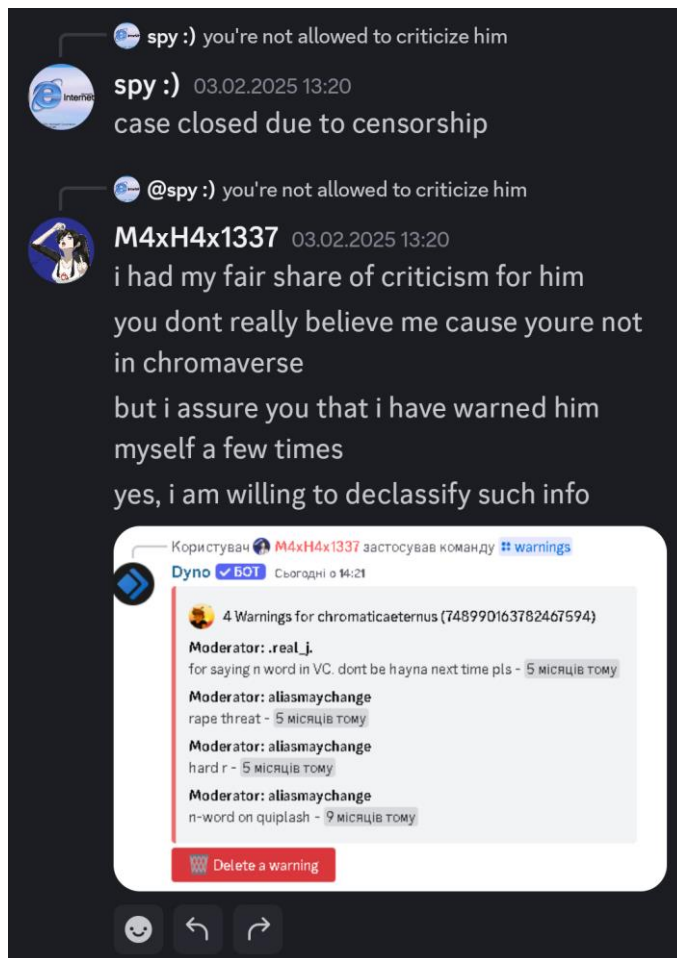

The new old thing that was brought about is the use of the word Whataboutism when he doesn't like Chromatic and himself getting scrutinized. He doesn't likes to be caught doing the same thing.

Because “how dare you say *friend* to your friends in your own server???!! It has the same weight as chromatic saying BOO N-WORD to the other certain person”.

This you?

I would had redirected you, the viewer, to Issue 2’s “Care about certain words?”, but in RDesign’s attempt to make his words any substantiable, he posted the warning log about Chromatic doing exactly that in 2024.

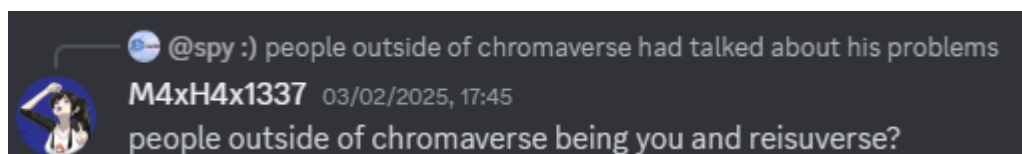

Racism is still alive on Chromaverse (or certain undisclosed server of theirs).

Interestingly, there was no The Chromatic Files from him. That was improper way he had done to hold Chromatic accountable. Well, if he wasn't getting confronted, Chromatic would say something like "BOO N-", and have to feel free to do so.

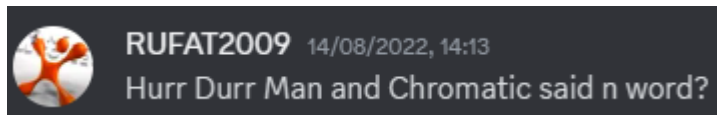

Not even claiming Chromatic made a rape threat would stop RDesign to lick his boots.

Did he banned for 30 minutes for rape threats, or did he not have banned Chromatic at all? This would bring more questions, as we explore whatever he meant to do with Chromatic.

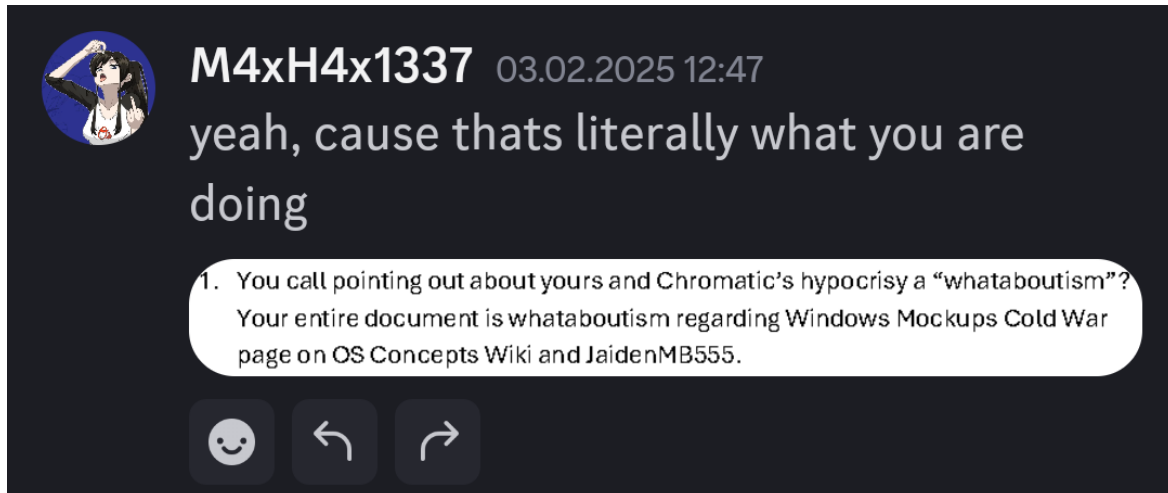

Hmm, let's see, some people had joined Spyonclear's side

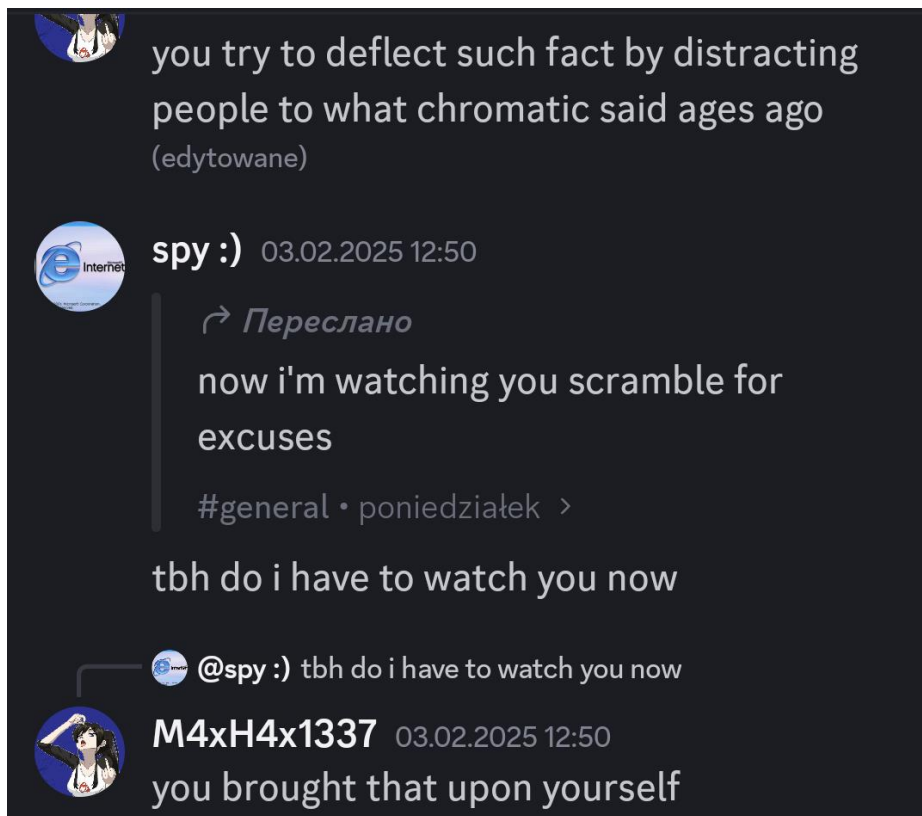

Yes: I'll leave chromatic, idk side, and I'll join your side, I'll try it, I'll make every realistic special things for you until I explode, and I'll became villain of chromatic and idk, like you spy, I'll only like you and others, I'll try the best for you spy 😊

Even in 2022 there was a news on Chromatic's legendary n-word use.

Spyonclear did not worked on this document, and Retiznyk had missed the point.

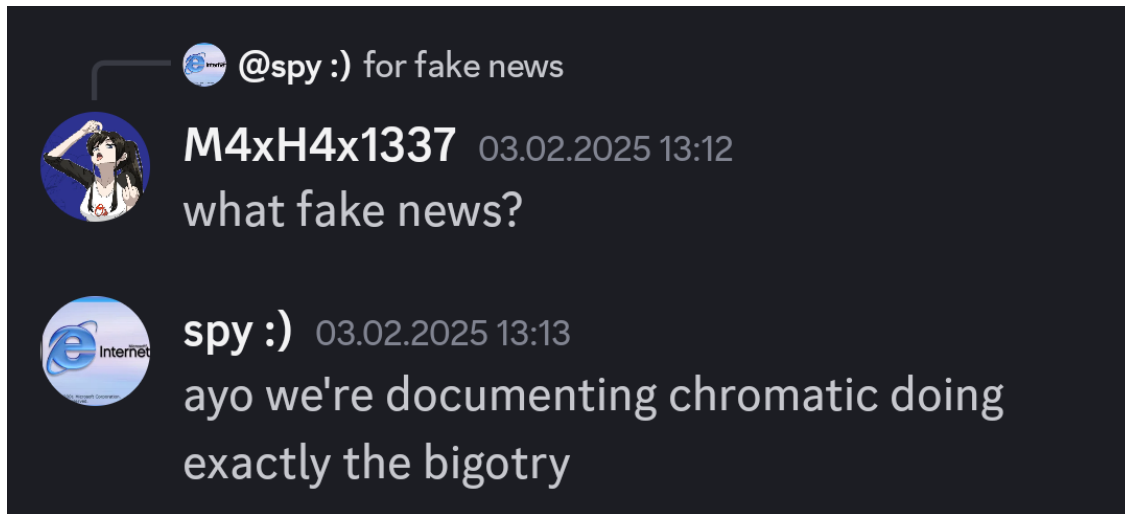

What happened with Chromatic and Chromaverse had suddenly got an expiration date. Issue 1's "Separate server for disgraceful activities" content was featured on RDesign's document. Did that had not expired as of his writing, but it is now expired?

Hosted by **Files Tsar**

Original owner by dzen; Created by the

The last reported “hard r” of Chromatic’s was by then 5 months old. It is suddenly too old to hold him accountable for.

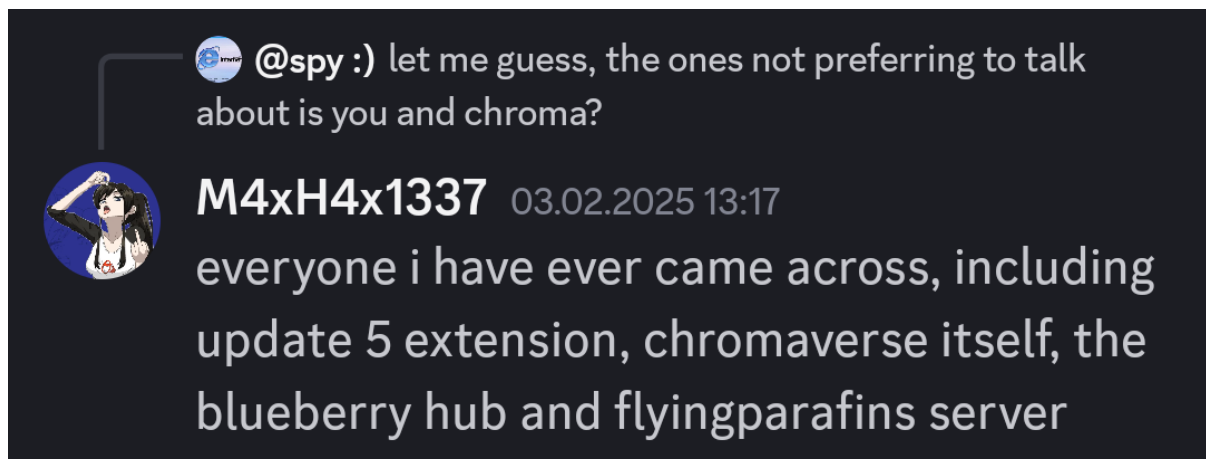

Spyonclear is not a part of this document’s team. He was taunting RDesign over the latter’s ignorance when it comes to our document.

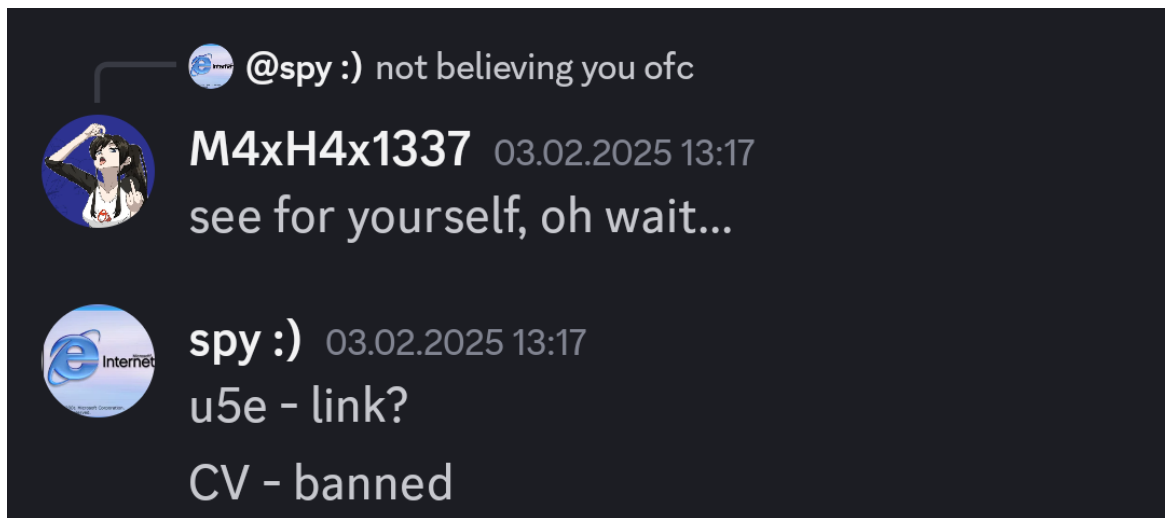

Hmm, which ones? Can Spy undo nothingness in 2038, or he would postpone that until 2093? Or he would just show our document when it would be already past 2093?

This is RDesign's only argument when it comes with finding out Chromatic being documented. Spy didn't even asked to undo Chromatic's bigotry.

I would exclude the servers he's moderating, to limit the server to the ones he could not abuse his power with.

It was a mistake to invite him, because we now have know they have a bot for hateful purposes. This is why Spy had been banned shortly after.

That's interesting.

im gonna kill myself in the afterlife if that was possible just to
not hear your ass (змінено)

Scratch “in the afterlife”, and you would get a community holiday.

Considering RDesign is a controversial person, we liked him not to go online any further.

But apparently, he brags back to be more talkative

You know what’s funny, If TDesign would had unbanned Spy yesterday, there would be no hype about RDesign ending his suffering. But alas, fuck around and find out.

Later on, glyphh or FrostyDesign, better known as anth and outflux had appeared on that server. Just in time to review my February 5, 2025 version of “The problem with Chromatic and his immature friends”!

I’ll check back when he as been done reviewing this document.

Back to RDesign.

Q: “i was hoping the post on rdesign would be the last id be talking about spyonclear but here we are i am afraid such people should not be allowed in the internet, suicide is not a thing you encourage people to do”

A: Do not give your victims the idea that you would commit suicide, even if you claim you would do this in afterlife.

Q: “i was unable to fit all of it so i had to put in the highlights to explain the context i was checking how spyonclear is doing whilst not interacting with him or not bringing up drama as to let him rot so to speak, he began to confront me and then he drops the bombshells i have shown you on the community post is this the idol thousands look up towards?”

A: How does that even work? Getting in his way is like asking for troubles. Hope I'm filling the gap, because I was on that server, and he had missed the part he got confronted.

Q: "oh yeah, another thing, earlier on, though after he begun harassing me, i reminded him that his arguing is futile by taunting him for a bit, he decided to continue harassing me in response"

A: You called Spy a retard. You made jokes about sensitive topics. Spyonclear had warned you to stay away. You are not welcomed. What happened next was your, and only your problem.

How it went? On February 9, they came up with a psychological warfare over that.

Santuchi: Just say that you want the people you don't like dead. Don't deny that.

Our Team: This is what happens, when you're putting over the edge, and RDesign would call Spy a retard.

RDesign: and just another note towards spyonclear, while i may be the type of person to throw around the r-word (to call people stupid that is, no ableist connotations...

OT: It is not just sinister, and ableist, it is the proof that you would rather call people retards than handle our document. You did not appropriately address a single page out of 237, manipulator.

RD: ...plus you yourself call others the literal n-word

OT: Spyonclear already asked for examples, back in February 3, and if any of that's more severe than ChromaticAeternus case. You didn't comply.

RD: i am not the type of person to tell others to kill themselves

OT: You're trying to drove yourself, and others to it. You had coerced Spy to it, knowing well you are not welcomed. You, and Glyphh are on your ways to try to ruin Fjattar's life, whenever it is online, or by using his real name, and stalking him online.

RD: this isnt over, it is your responsibility to take your fucking words back, not mine to bend over and lick your boot like a dog because this shit is truly personal now,

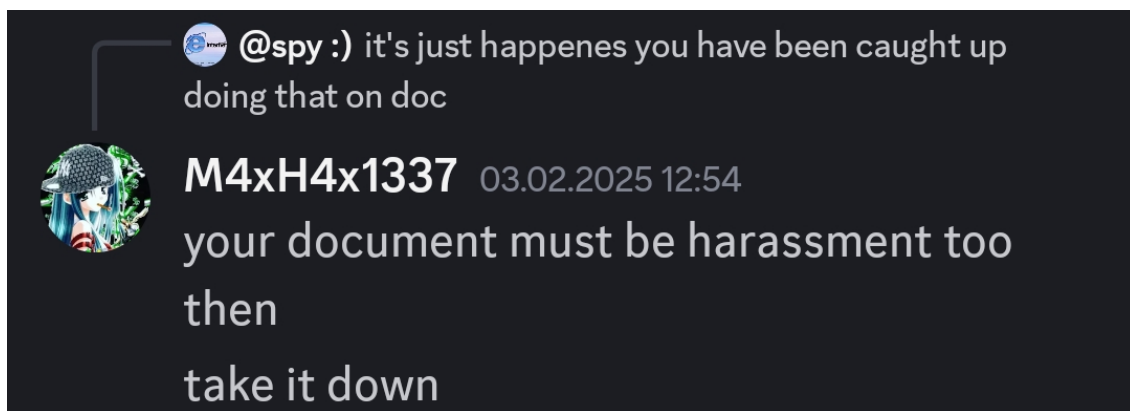

OT: You took things personally since 2022 or earlier. This ain't it. It would be business as usual, exposing you as long as you're still fighting me, my friend Spyonclear, and any other my ally on Discord and other social media.

RD: i couldnt give less of a shit if i end up having my account taken down, be it on discord or here on youtube

OT: Now you have been indirectly admitted it is your fault to taking Spy on edge, harassing him for 4 years, and overseeing Chromatic's Discord account taken down. No idea if Spy had reported Chromatic or someone else did that, but Chromatic has lost his account in regarding on Discord dramas. Retiznyk is willing to lose his accounts, if it meant to satisfy his selfishness, and his then-recently harmed ego.

RD: the important thing is that the truth about you is out, since a while ago,

OT: It is unclear of what you had said at that moment, but have you did cried to Spyonclear to take "The problem with Chromatic and his immature friends" document down?

Uncle Reisu remembers.

Again, Spy have little to no say about my document.

The point is, your project is flawed, misleading, or it is having outright false information and narrative.

If you want our document to be taken down, close down your own document.

RD: and all you have done is nothing but double down, digging your grave further down, mark my fucking words...

OT: Noted, and you are double condemned.

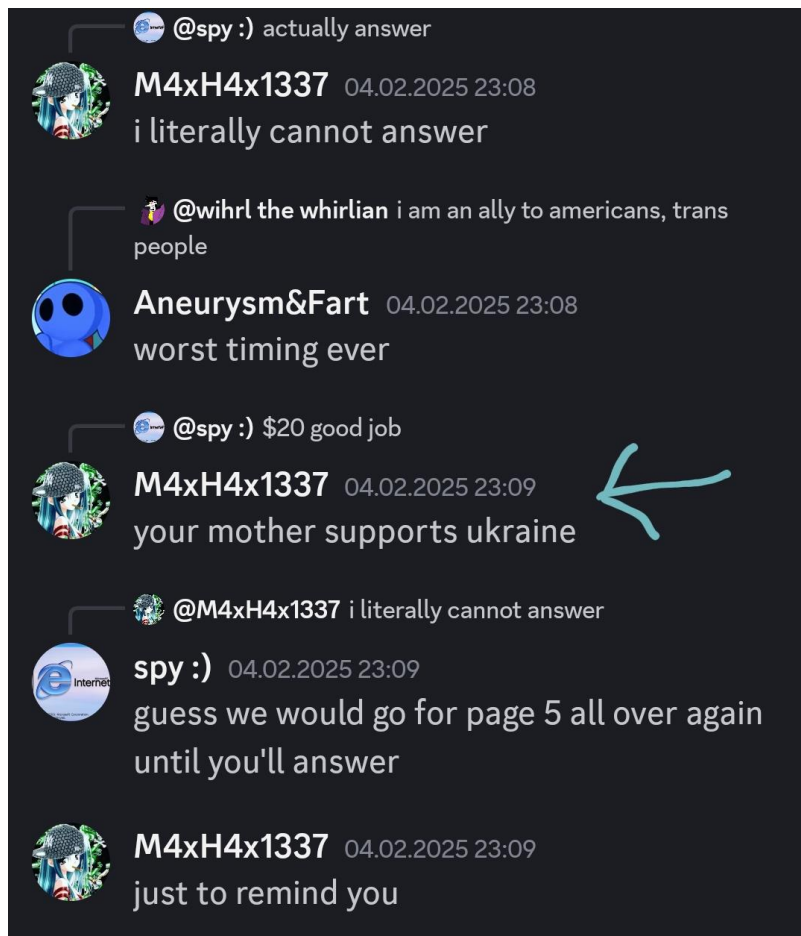

RD: ...you pathetic excuse of an adult...

OT: Ableism, and now child rebellion – hatred of the grown ups.

RD: who has been allegedly disowned so to speak by none other than his own mother

OT: Can you amuse me with that story? I think you had tried to personally attack him after all of "Fjattar's mom" jokes, but ~~oh well.~~

Nevermind, This of many Retiznyk's personal attacks had it's roots on the same server, on February 4th.

It appears to me, RDesign is harassing Spy's mother, claiming she supports Ukraine – a claim not substantiated anywhere, but knowing that Ukraine's current government is the enemy of Russia, Retiznyk is exploiting the political situation in Russia and Ukraine to personally attack Spy.

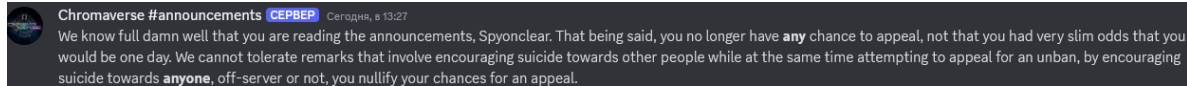

Spy is still with us, so it is unclear what he meant by “allegedly disowned”. The word to pedal back is “allegedly”, so that would allow RDesign to back down from sending personal attacks with the same tiny reputation.

RD: ...maybe if you took responsibility online and in your personal, physical and real life, you wouldn't have to be stuck in such a situation, but alas, that is not the case

OT: After delivering a personal attack to Spyonclear and his family, you have no moral rights to lecture him about responsibility, if you're not coming to follow your own advice.

Rules are for Spyonclear but not for me, so to speak.

Spy should had to give a test on “*i couldnt give less of a shit if i end up having my account taken down*” part, if he feels necessary. But i haven’t seen from him to do that, preferring to let Retiznyk to make more mistakes.

Thanks for exploiting your apparent “victimhood”, Retiznyk.

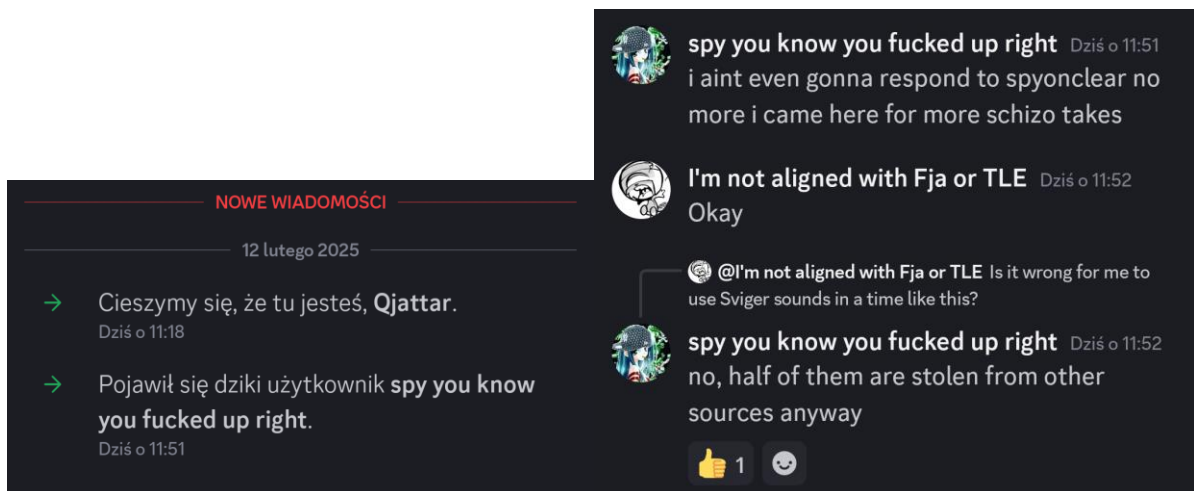

Let me remind you that you had called Spyonclear a retard, and made a manipulative comments about his mom. You may got aware that you yourself have committed sins, and have been aware that you may lose your Discord account over your sins.

That been said, it’s no surprise he no longer want to see you suffer, or bring suffering to him or other people involved on your behavior.

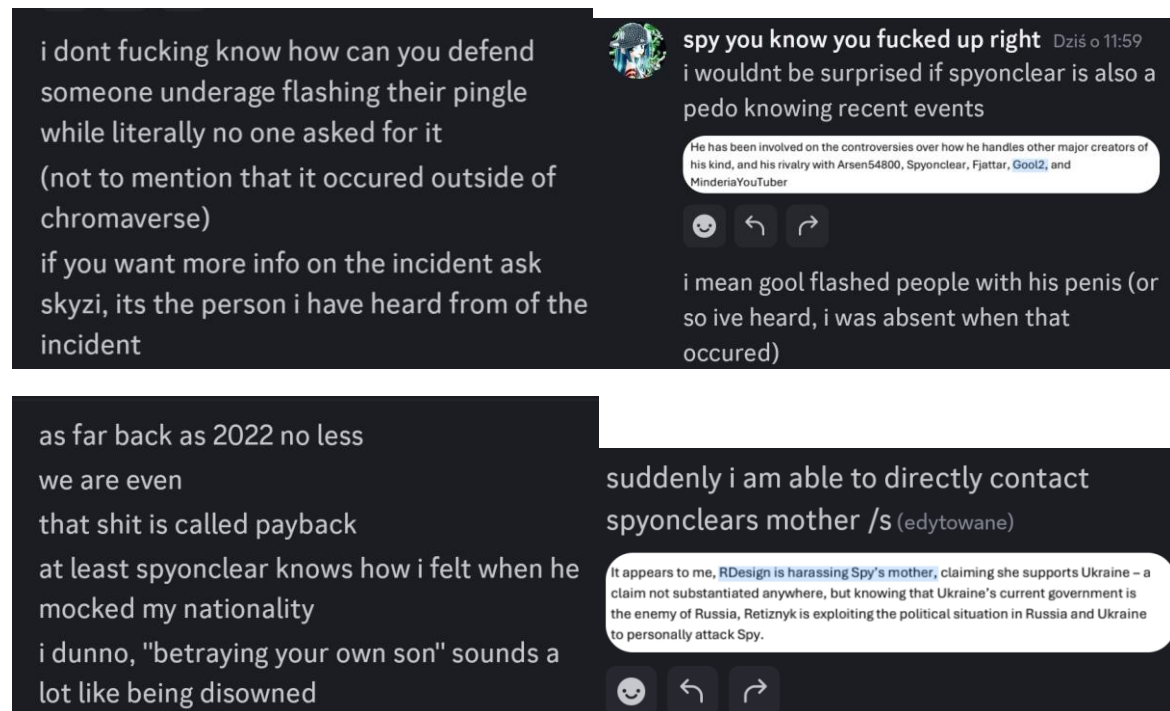

You’re no victim, you are a war hawk, Retiznyk. You had personally attacked Spyonclear on February 3 and before.

On February 12, RDesign had returned for some more drama.

What would he yap about more? First of all, he would defend the minority of his controversies. Looks like he wanted to go briefly dig up on his graves; so to speak a “social suicide”, RDesign destroying his own reputation, by getting personal with Spy again.

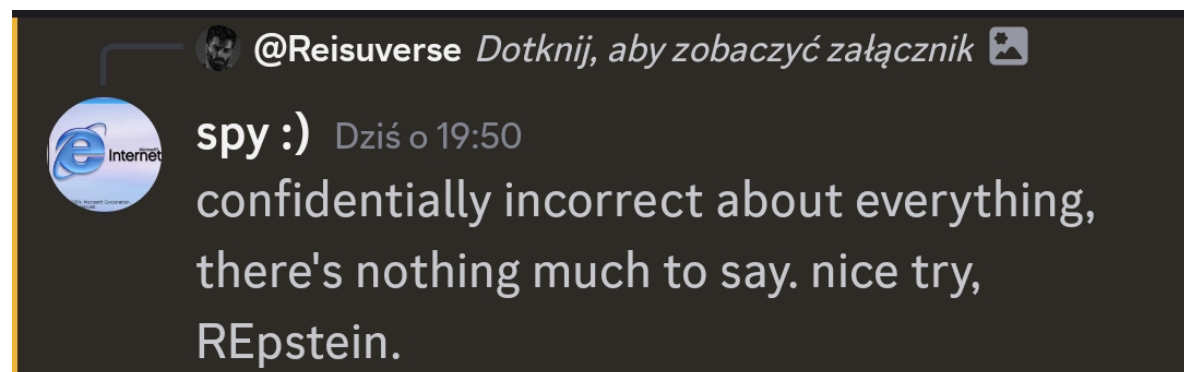

Is he going to talk about Spy’s mom and Bogal’s penis?

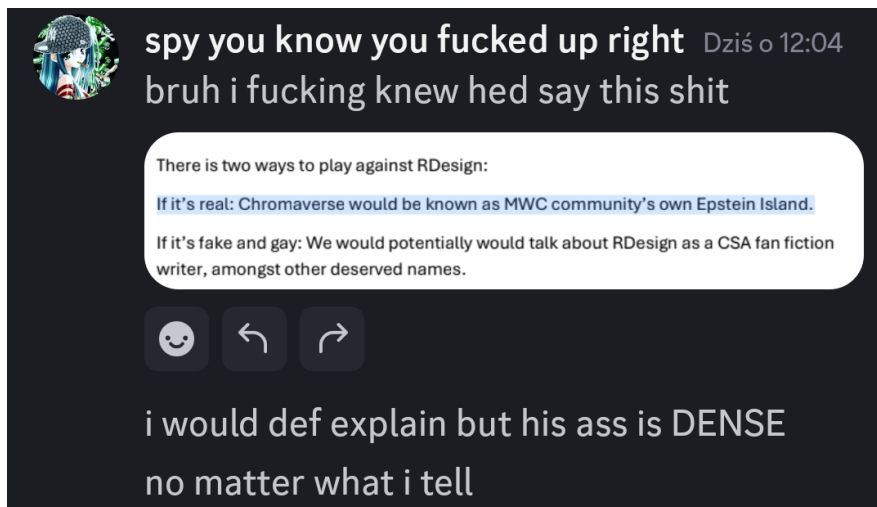

Both unhinged attacks. Both of which are fictional scenarios.

RDesign's point of Bogal is based on Skyzi's words? That's just asking to blame him on unhinged story RD had wrote on his 2024 document.

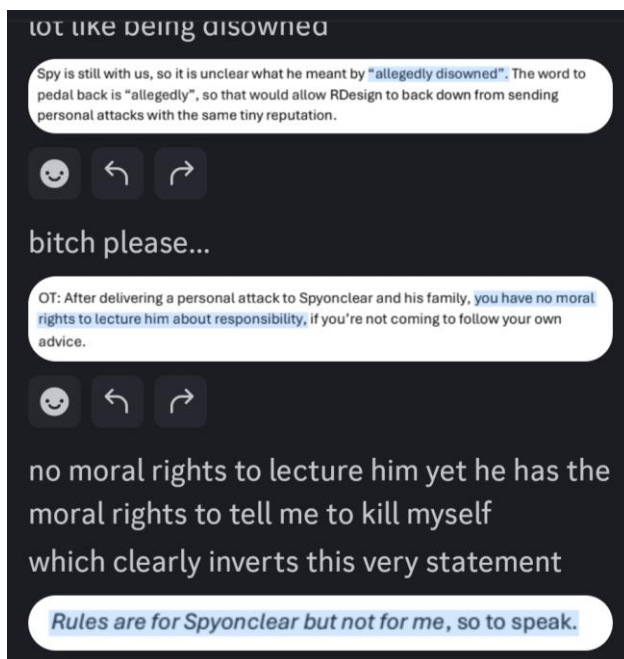

This is Spyonclear's reaction so far.

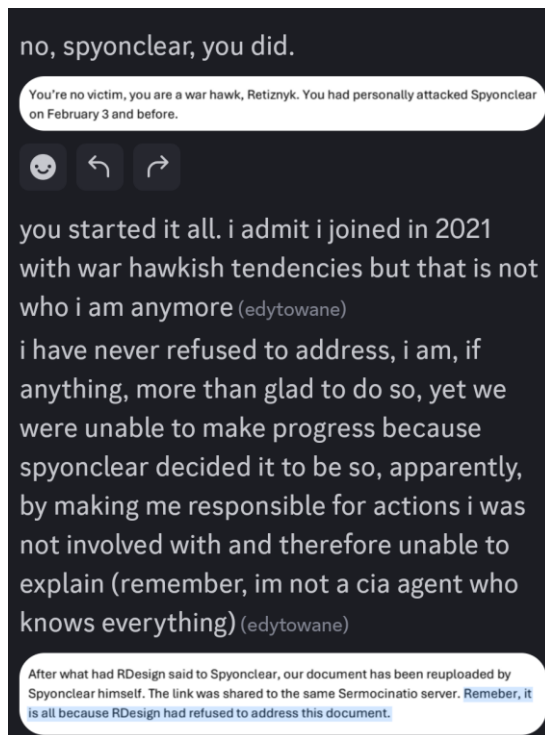

Retelling the story of how RDesign came up with the story about Bogal, he won't seem to let him go, and he would weaponize such story against Spy.

Whatever he says, he looks like he's not doubling down to explain how Skyzi's Bogal story ended up on RDesign's document.

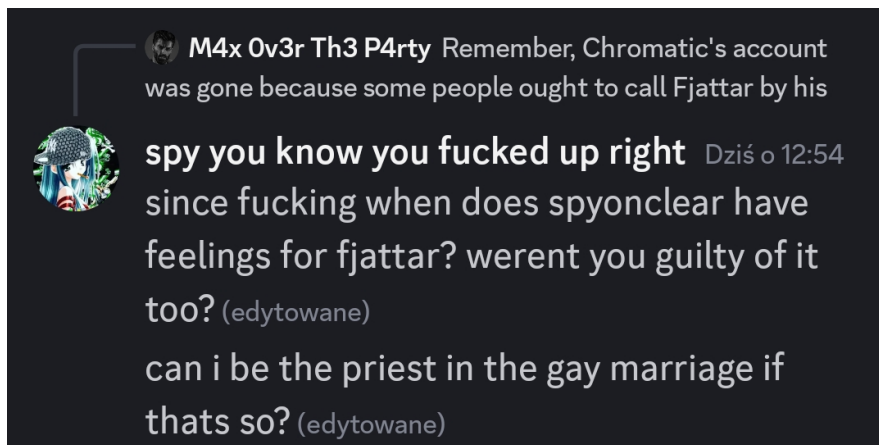

So it looks like it's completely fine when RDesign calling Spyonclear a retard, and double down on Bogal. Interesting.

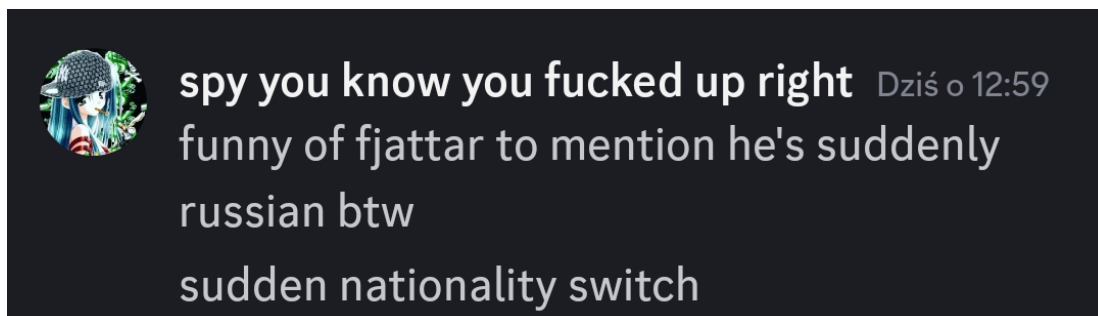

Spyonclear is only collecting the data regarding the Chromaticans' failures on their behaviors. Retiznyk is speaking with the other person, but still invoking Spy's nickname. Spy's not even on that server.

As of message itself:

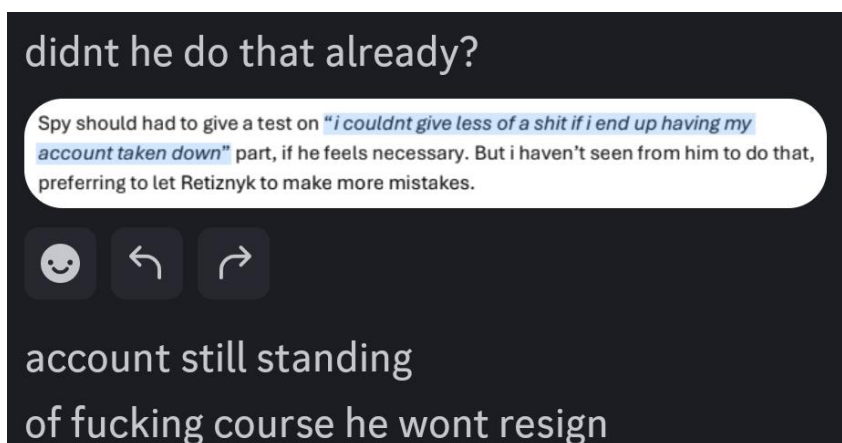

1. It was Chromatic. Chromatic being overreactive over WNR Marble Race, Chromatic not letting people protesting controversial server changes in a server, Chromatic hosting Anti-Fjattar server.
2. "[war hawk] is not who i am anymore", making hypocritical messages on the spot. Retiznyk has been exposed as Anti-Spyonclear computer warrior.
3. RD decided not to do so, because it is difficult to defend himself, and the Chromaticans, from what was to come on this document. I won't get tired to remind you that reacting to the reaction is not what RDesign was asked to, but rather our full document.
4. Addressing Chromatican controversies is not a secret service's job. It is the job for the one who involved on the said topics as the ally of Chromatic, or his sympathizer.

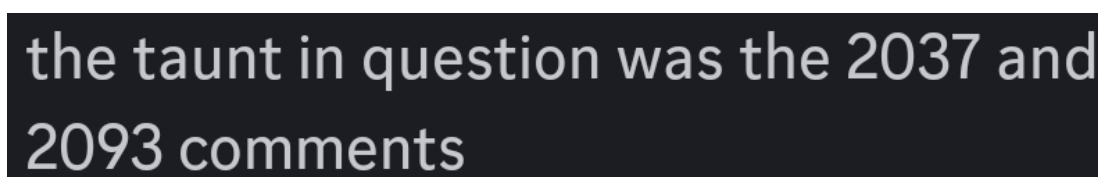

Part of the reason why the aforementioned hate server's messages were leaked in 2020? That server had violated Fjattar's privacy, and it hosted the continuous hate to the others. That means it's been 5 years. What's with RDesign's narratives?

Speaking of Fjattar, apparently RDesign didn't know Fjattar speaks Russian.

RDesign would think he's going to continue on his way to harass Spy.

Very interesting. This document would be continued to be updated until 2093.

But I'm not done yet:

After what had RDesign said to Spyonclear, our document has been reuploaded by Spyonclear himself. The link was shared to the same Sermocinatio server. Remember, it is all because RDesign had refused to address this document.

Just so Glyphh know that, but apparently he wants to take that reupload down.

Remember Glyphh? He's also known as anth., Outflux, FrostyDesign, his YouTube handle @yumidream05... There is no consistency oh how Glyphh would call himself! For the most part, we have referred Yumidream, our MWC cartoon character as Glyphh. And we would do that again for couple more times, just to spite the inconsistency, and changing nicknames as fast as changing clothes²⁴.

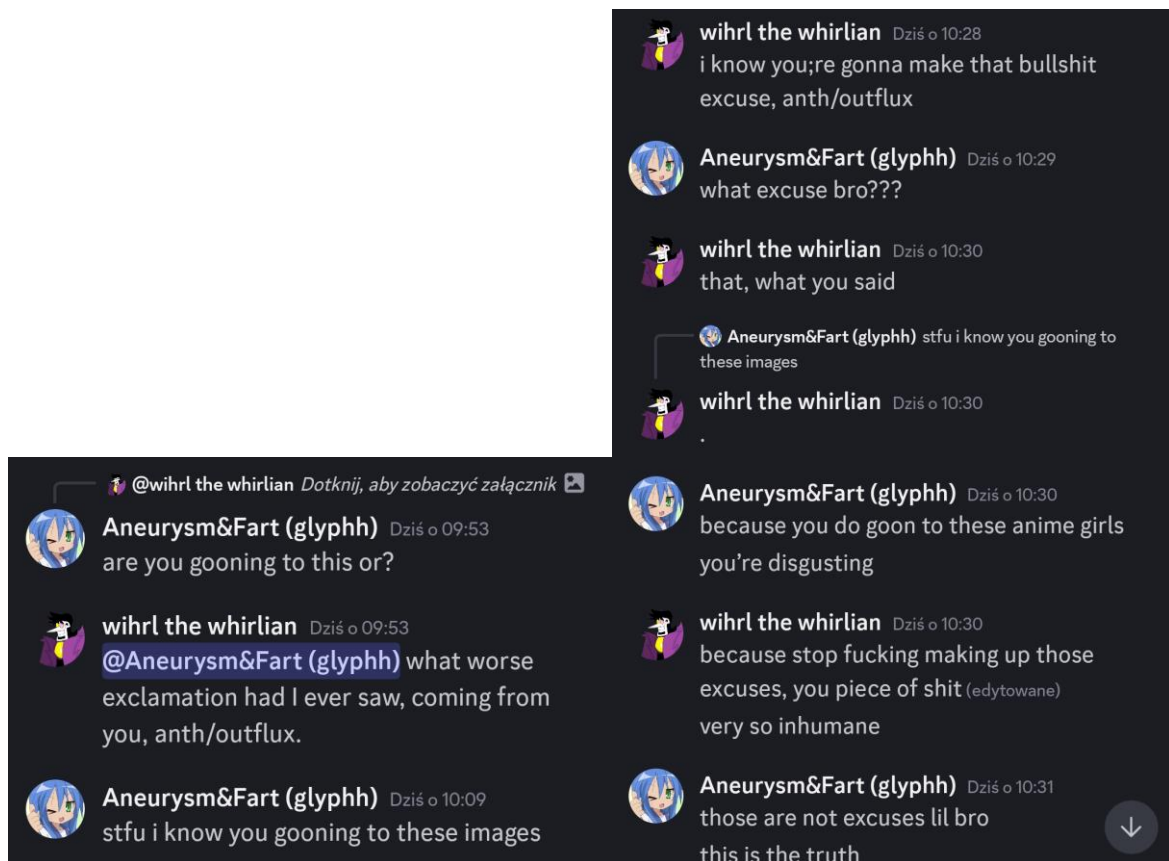

He had changed the surname of Adolf with “them”, Chromatic and Retiznyk. At the time of writing, they did 264 pages worth of their wrongdoings – well, their wrongdoings had extended to beyond 300 pages, and now I need to memorize what went wrong with

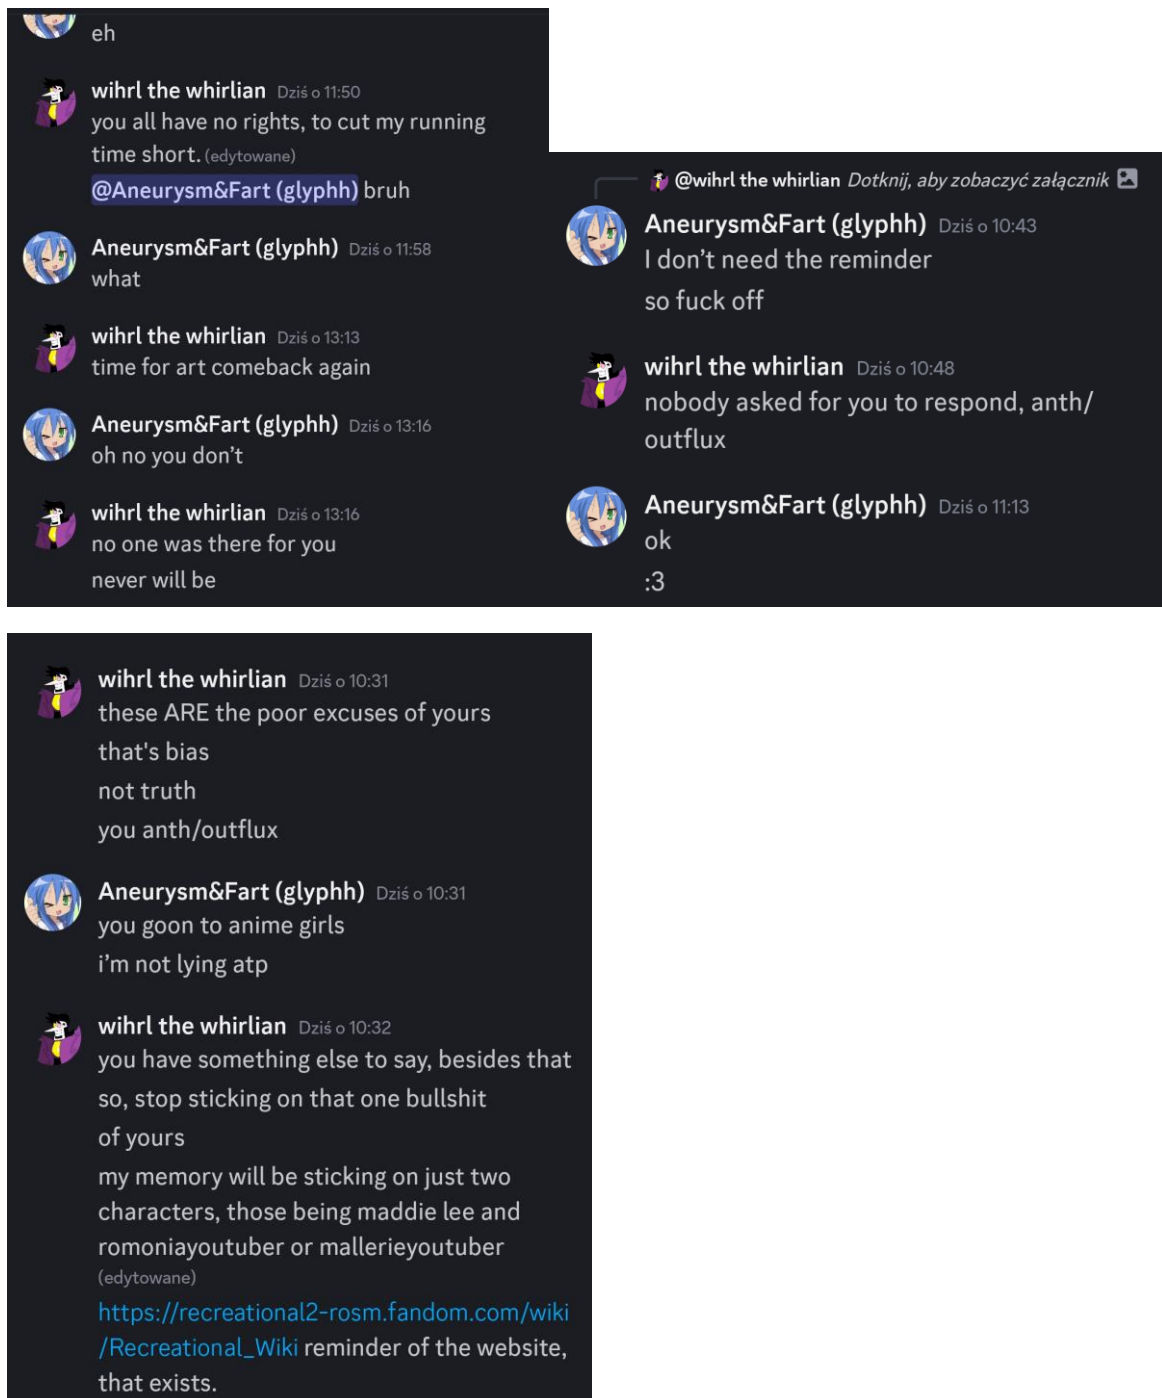

²⁴ Assuming Yumi/Anth ever washes once per year.

them in February 2025, just 2 months before I had revisited this part of your truly's document.

At that time, I got curious on what he, as a friend of the controversial duo, had done. It's not too hard to find.

He's shamed over ero anime/manga drawings.

Well, i can't wait for a moment Glyphh would made the attempt on hiding the document from Spyonclear's Google Drive.

No shame, just try to hide the traces.

I would had to congratulate him for taking it in private, by reporting for spam. But his initial success is short-lived. Godspeed, Spy. Then I have to wonder whenever Glyphh or any other troublemaker would cite the different reason to take the copy down.

Updating on the situation, certain someone have attempted to report this document for a spam, twice more.

And judging to messages, we have found someone.

I think he won't give up on trying to hide this document. Well done.

March 26th, back then this document was not nuked:

Sulflix: just heard that reisuverse and dzen (spyonclear and spyonclear)'s document not nuked shouldn't have made such a slop of a document with blatant misinfo chunked in ://// oh well! better luck next time

Reisuverse: Very interesting...

Upon seeing that this document had brought back to Drive, Dzen sarcastically telling "True", "Third time is a charm".

April 2nd, "hows the google drive link going btw?"

Spyonclear hopped in, and sarcastically telling "just heard the doc had gone offline", to saying "oh wait i can access it; i guess there's nothing new".

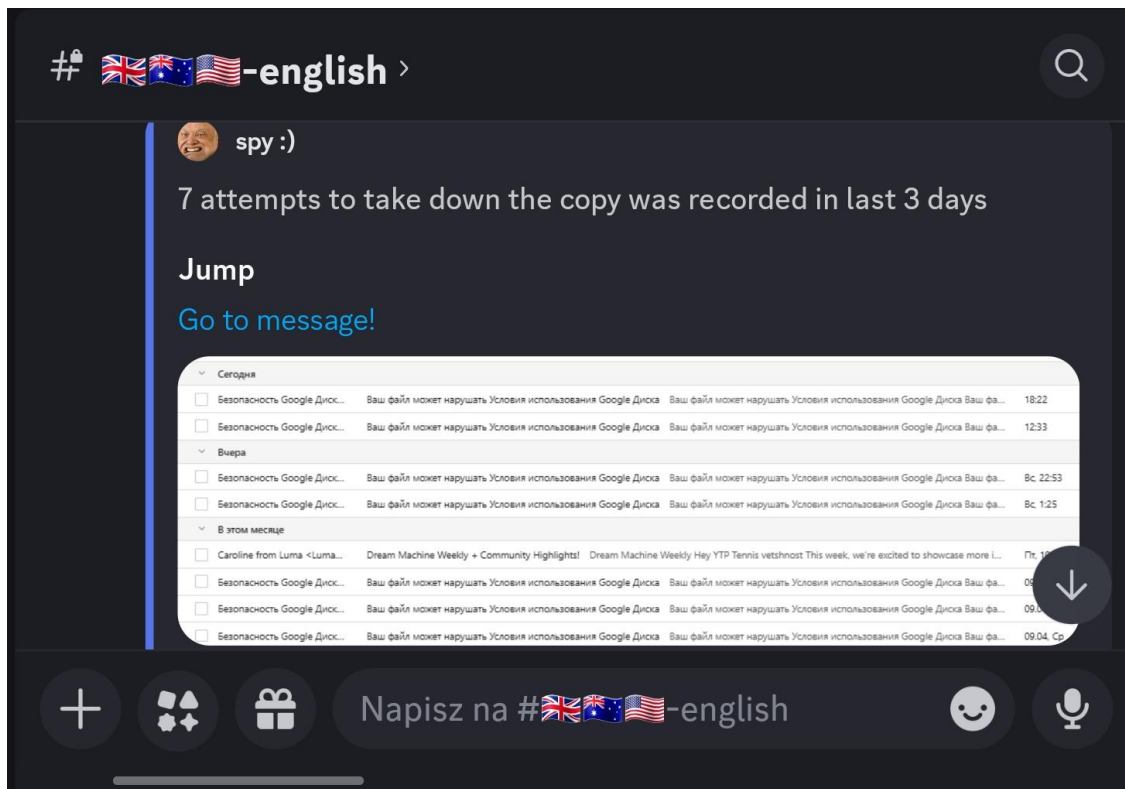

Such tactic would only temporarily ban people from viewing "The problem with Chromatic and his immature friends" for a day per week. But it looks convenient, so why they won't hide our document from Google Drive?

Just as I was about to complete writing this chapter, the link to this document had been inaccessible again.

That person had tried again on April 4th, that's interesting. It looks like they found the exploit on Google Drive moderation. Undone in the same day.

It looks like he succeeds on taking down this copy on April 8th, 2025.

As when I have taken a break, the copy of this document has been up and down 7 times: on April 9, 13 and 14.

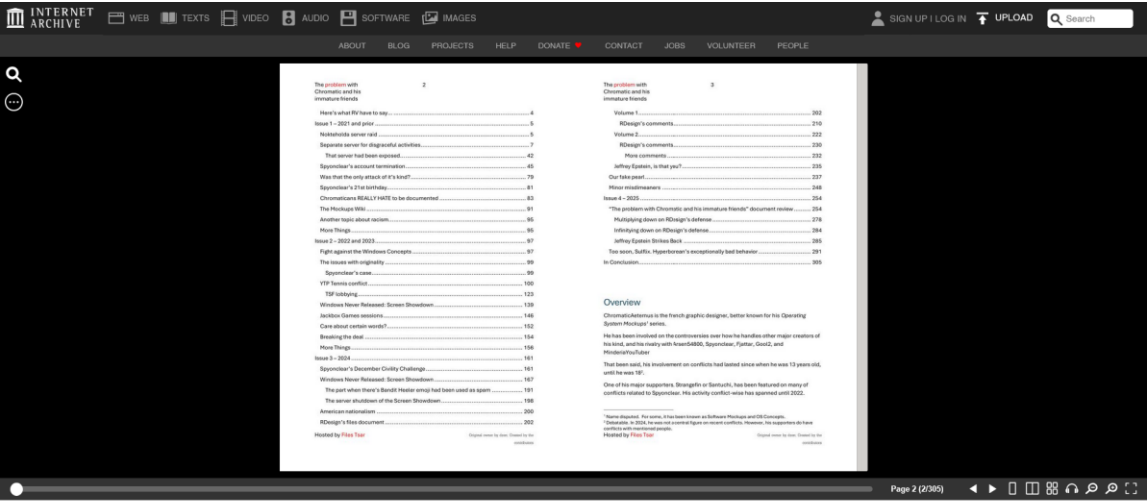

And yet, it's up and running.

Spy had reuploaded the document on archive.org and LimeWire.

When it comes to LimeWire link, it's temporary, as it would expire on April 21. But the point is, Google Drive won't be used alone.

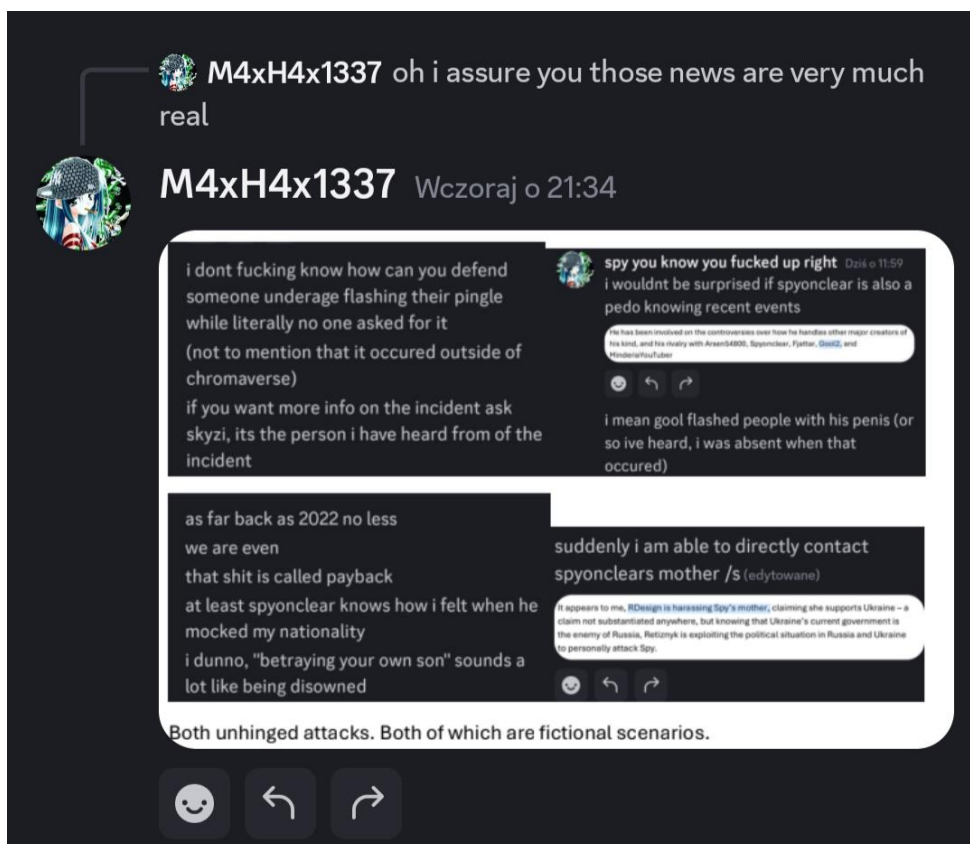

At this point, it's a cat-and-mouse game.

Multiplying down on RDesign's defense

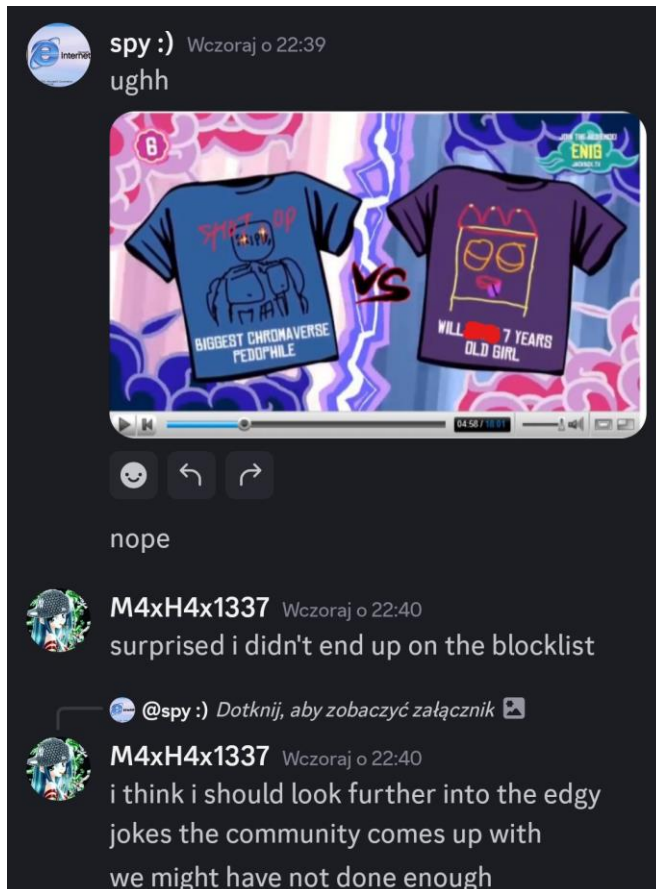

Reisaverse: I would have to take that on a separate headline.

Let's start with how RDesign would defend his diddling.

It is strange to call your fantasy about Bogal's thing as the news, but okay.

Meantime, Spy rediscovered that Bogal is not the only kid Chromaticans are into.

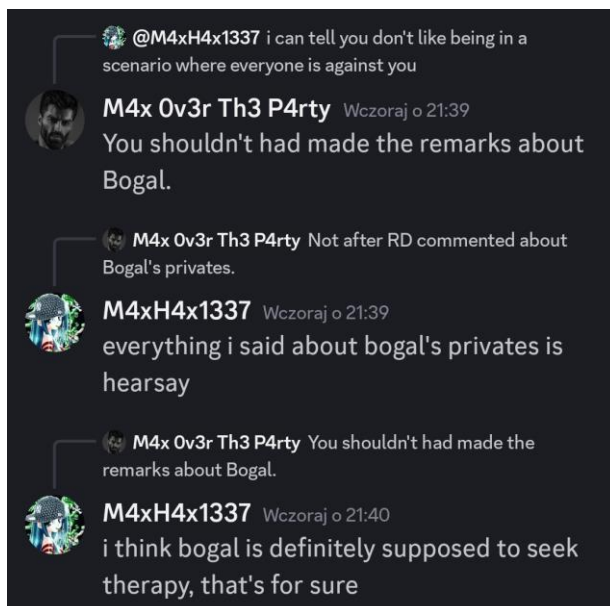

I'd say it's aged well, again, considering RDesign's document.

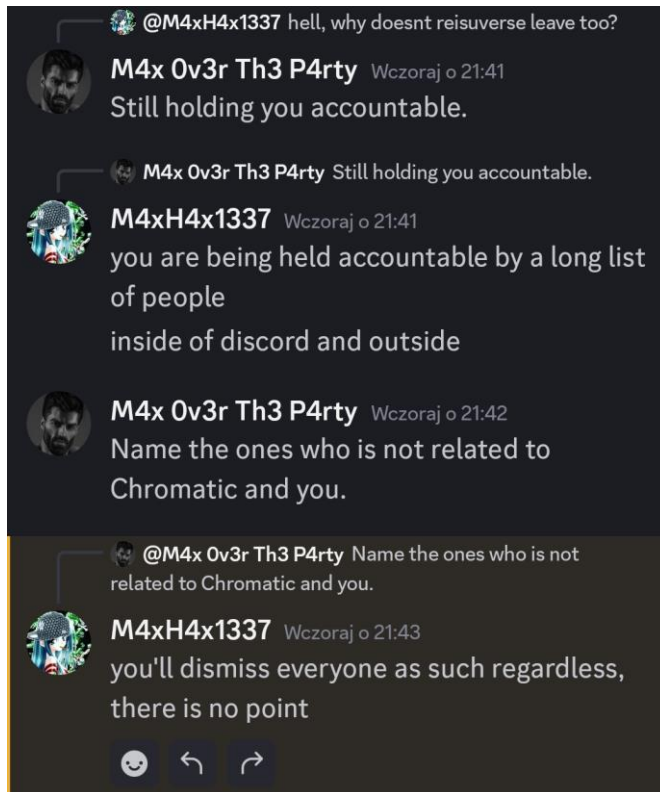

It's still inappropriate.

Hated by everyone in 2020, and RDesign would relive that experience in 2025, because he's not letting go of Bogal.

It's called "heresy", but either way that's inappropriate, and that would land you into more problems.

He was reluctant to list the people, but then he bragged up on the campaign to turn Missadaxio members against Spyonclear, which is already covered on *Issue 2 > YTP Tennis comflict > TSF lobbying*, one of many topics he did not said anything about as of February 13, 2025.

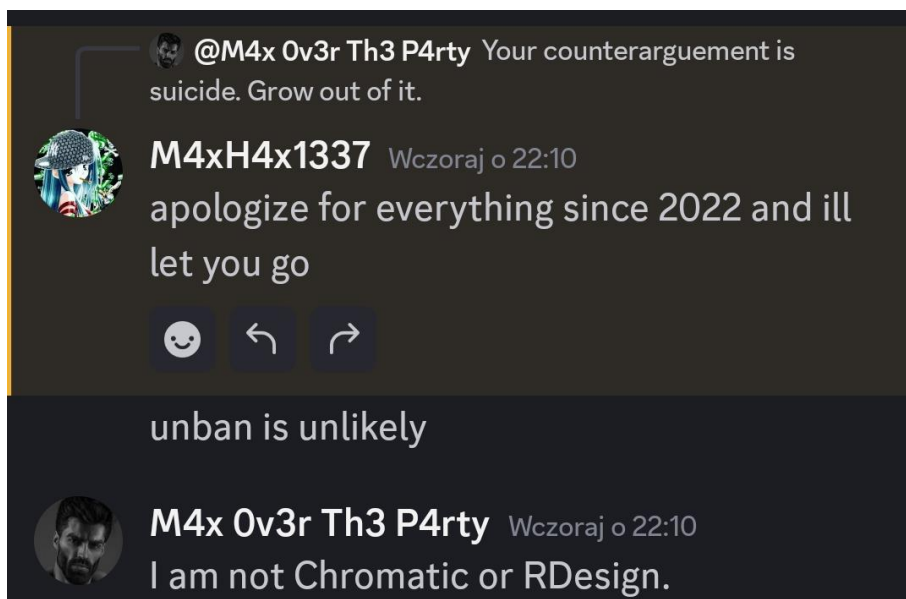

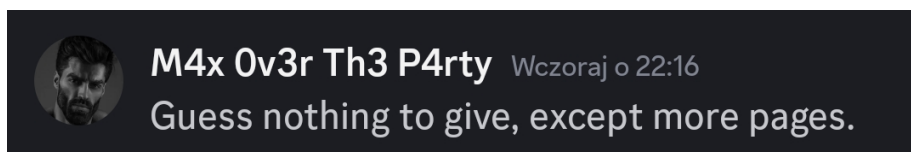

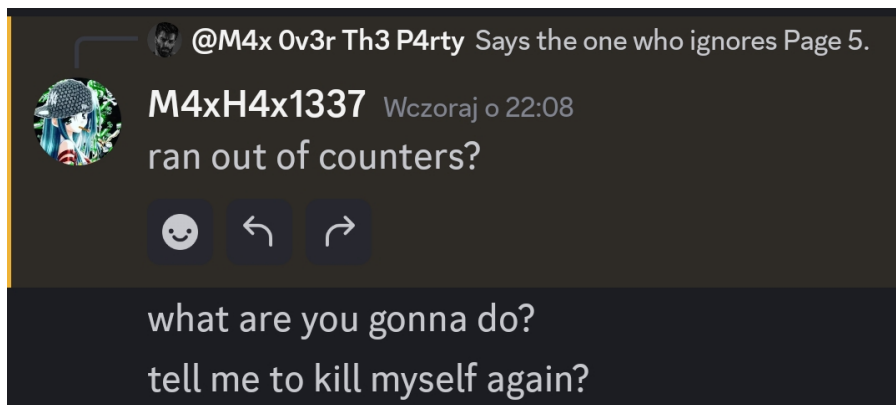

After being confronted for bringing Missadaxio, by telling him RaymanChrome had contributed to Vetshnost on February 2025, RD just said "and?"

You did not contribute to my projects, except of being the person exposed for being a creep, troll and harasser on my document.

Well, who derailed the topic, and bragged about the Vetshnost's similar project Missadaxio?

Infinitying down on RDesign's defense

Reisaverse: I did not planned for my document to overreach The Fjattar Files on covering Chromatic's controversies, and reacting to his fanbase trying to grasp the results. First moment is Santuchi.

Santuchi: @Spyonclear Just admit that 'Dzen' and Reisaverse (formerly trinity) and the people mentioned to be responsible to write that 200+ page

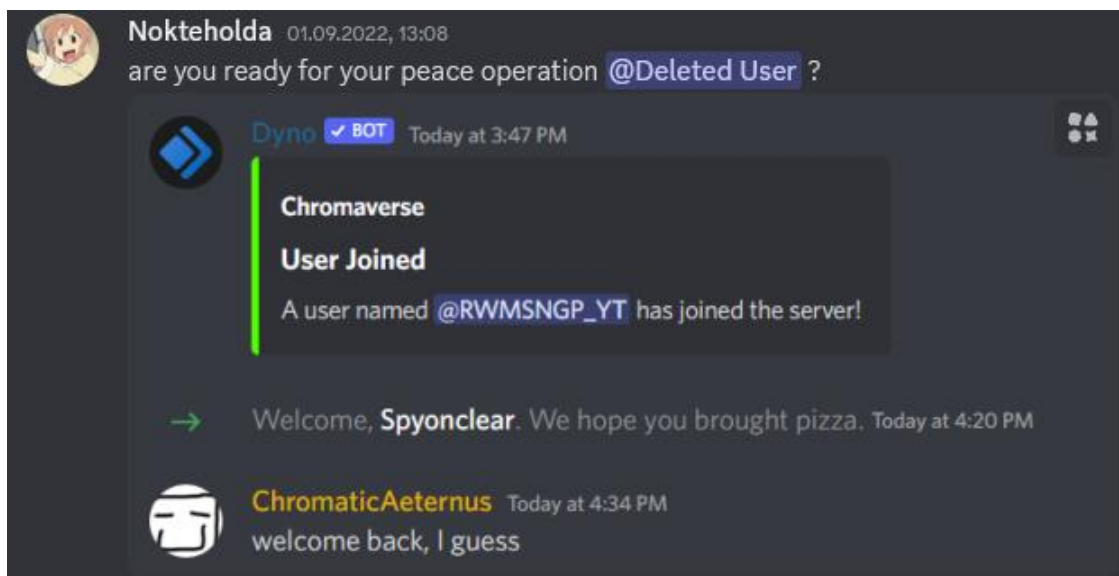

Reisurverse: You know Spyonclear only making certain screenshots, and have no involvement beyond that? Drop the “[Friend] is you” act, and make your appropriate response.

Sa: Everyone and the names you come up with are you no matter how you try to deny it, like it or not.

RV: Logan L. is Spy? RaymanChrome is Spy? Is there anyone that is not Spy? Spy himself had a conclusion over your message.

Sa: You are in a losing battle and Chromatic had already won your "Windows Mockups Cold War" before it even started and was named as such.

Spyonclear’s screenshot:

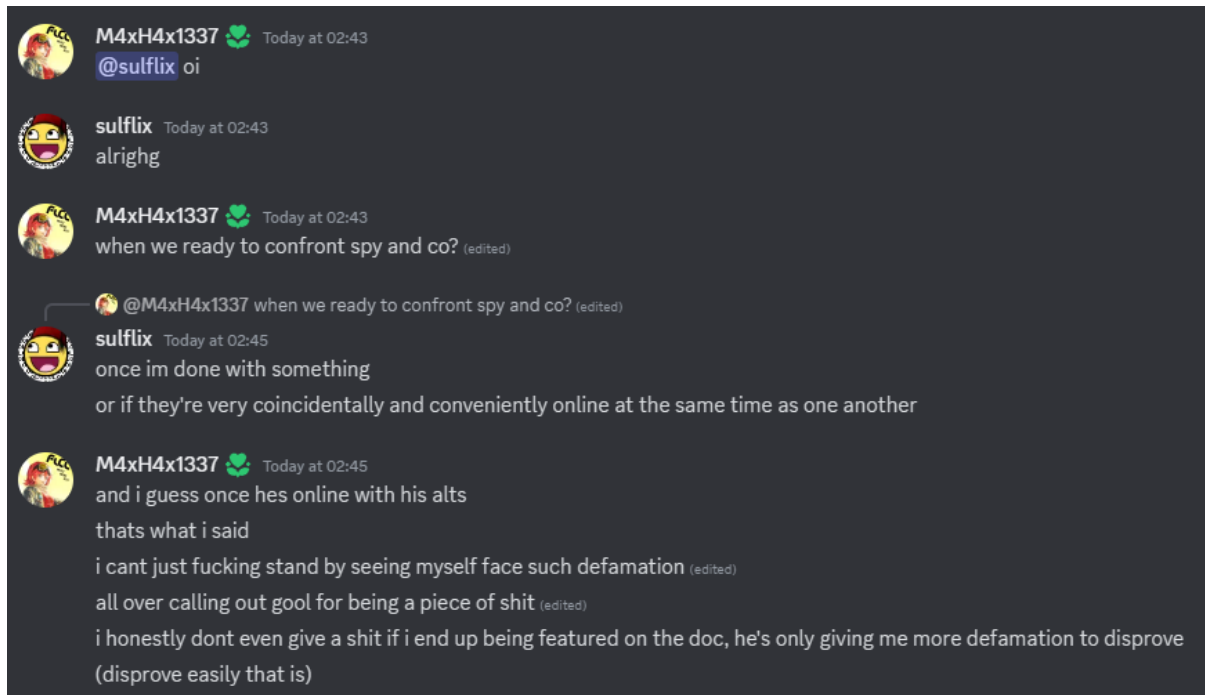

Then Santuchi blames Spy for OS Concepts community’s turbulent times. Man still sees bad things.

Speaking of Santuchi, it seems that he cares about the downfall of OSC community more than the development of his 13th episode of OS Concepts.

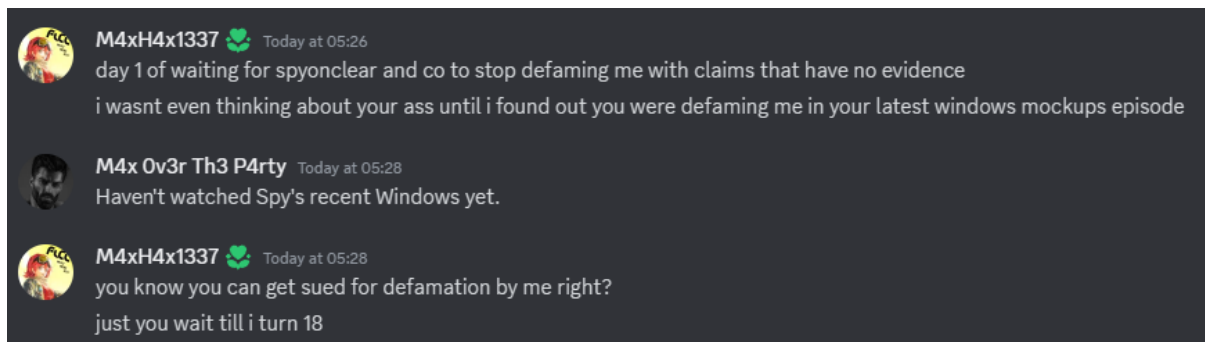

Jeffrey Epstein Strikes Back

Dzen: Hello again. I would like to be back on writing this document to bring the attention of how RDesign handles the allegation after him talking numerous times about Gool²’s penis, and how RD himself get caught bringing this up.

First of all, RDesign is back at the crime scene on March 10, 2025, to harass Spyonclear more²⁵. The excuse? Alleged RDesign's hyperfocusing on Gool² we had already told you on.

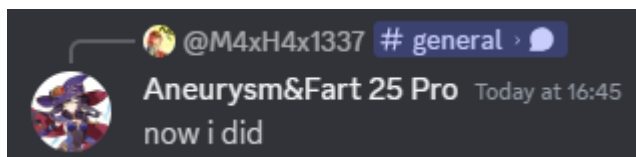

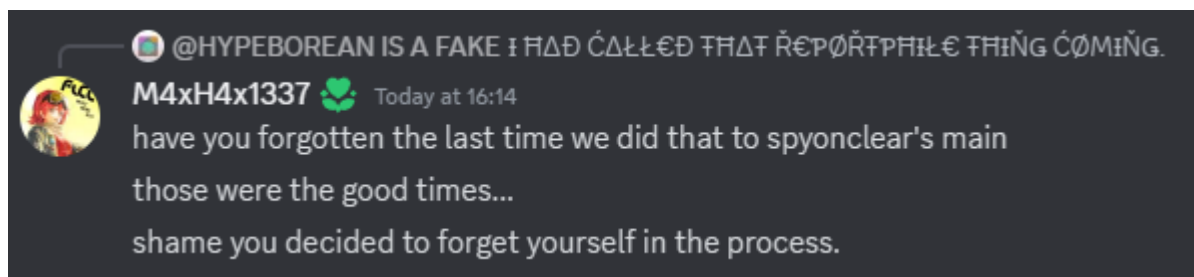

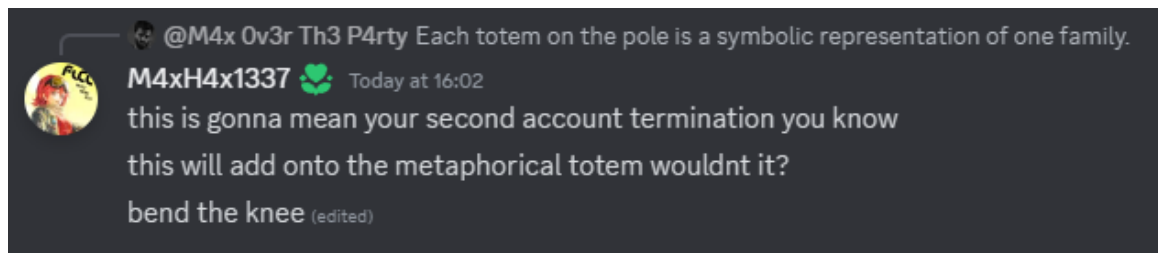

1. He threatened to sue Reisuverse over that.

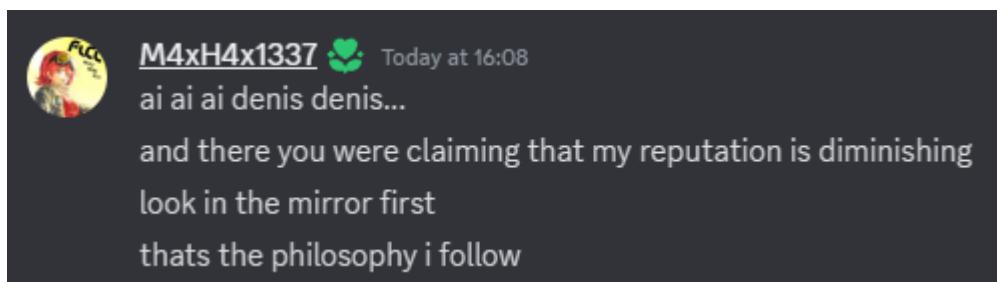

2. He attempted to report him. Because Reisuverse decided to ignore him. Sure...

²⁵ This cannot beat the allegation. Don't think RDesign can get away with comments sexual innuendos about Gool²/Hayna.

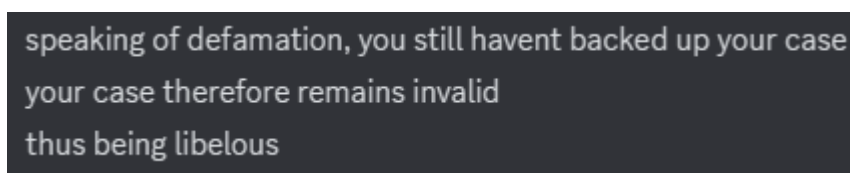

I would give it 3 days (until March 14)

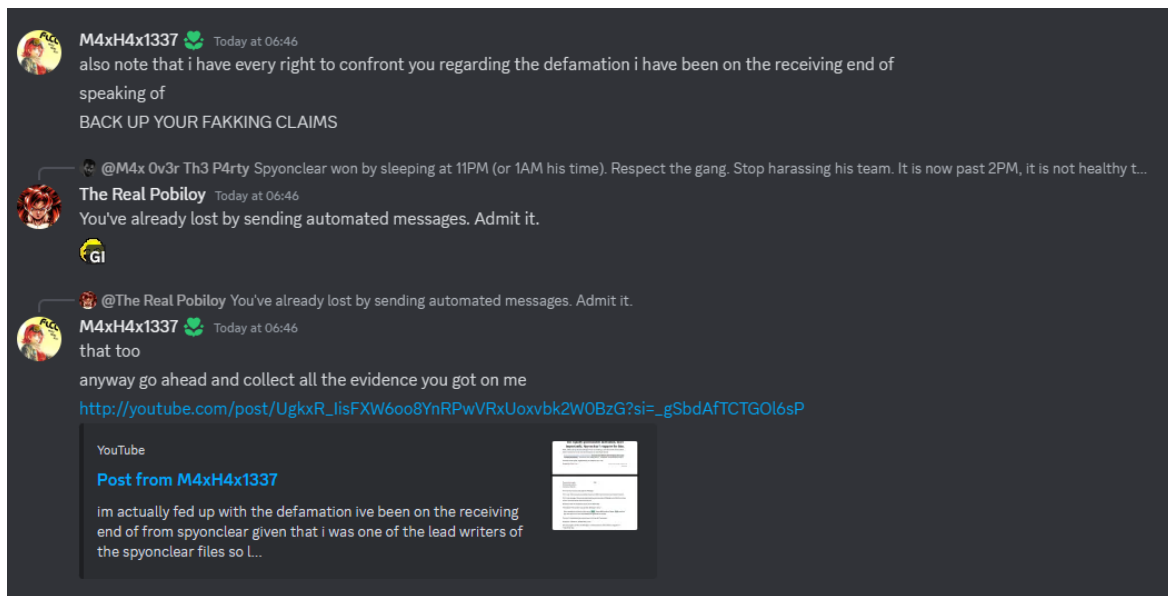

He called Reisu by a wrong name, while threatening.

3. See "Jeffrey Epstein, is that you?" and "Jackbox Games sessions" for more information.

We have noticed that RDesign was sleepless to save his own reputation.

Well, i can take care of it.

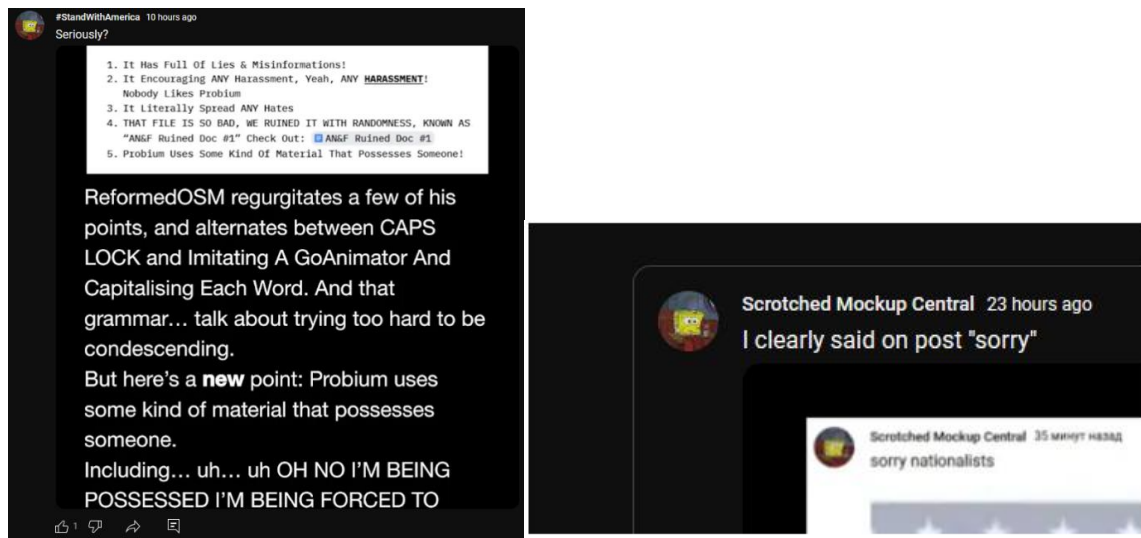

> im actually fed up with the defamation ive been on the receiving end of from spyonclear given that i was one of the lead writers of the spyonclear files so let me be clear once and for all

> no i did not see when gool flashed his pingle and will not look into it, no it is not made up as i have people who can confirm that such a travesty occured and no i am not invested into the gool debacle

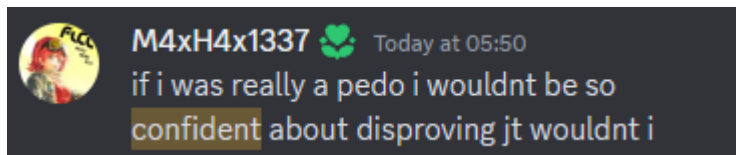

This would not ease up the allegations, considering RDesign's prior reputation, and him previously talking (unasked for) about Gool.

That's reminds me of Fjattar's handling on Probium's²⁶ document.

²⁶ Writers - BLISSDREAM, TRENZOL (pending), SIL, SKYZI, THEGUYFORWINDOWS/THEGUY

Never cease to amaze the writers of Reisuverse's document.

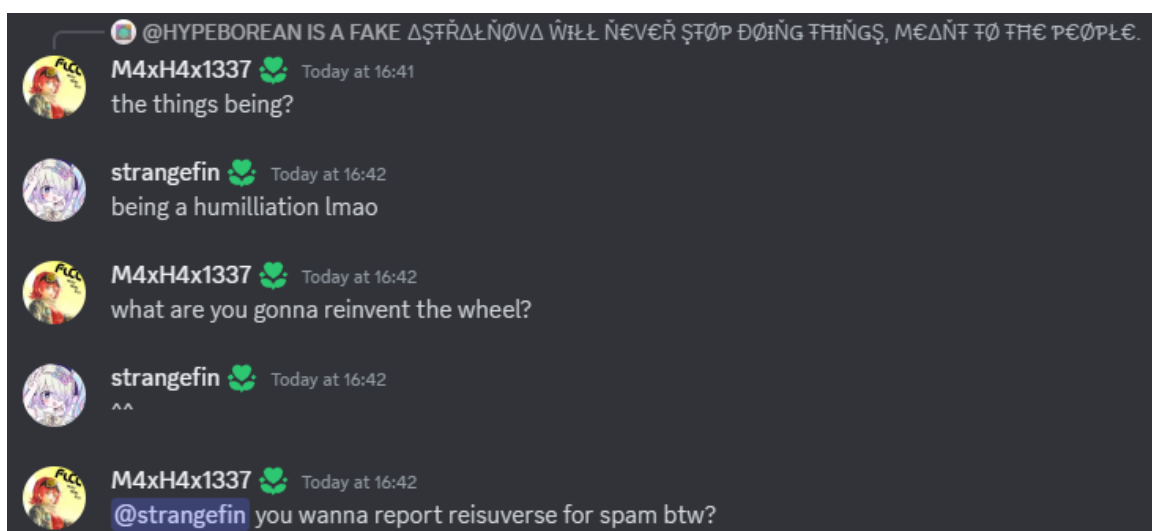

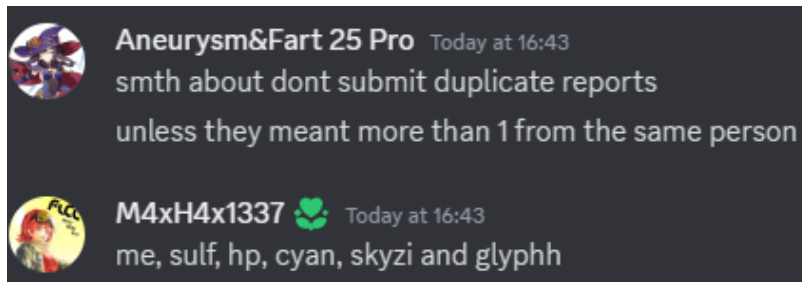

You're confident, and you better be confident, because talking about minors like that would result to real life penalty, up to prison time.

Every person accused on indecent talk with, or about minors, once in a while had begged to convince they "did not do that".

I assume RDesign won't end here.

Reisuverse had for some time took a break from it. Wonder if things would be more peaceful?

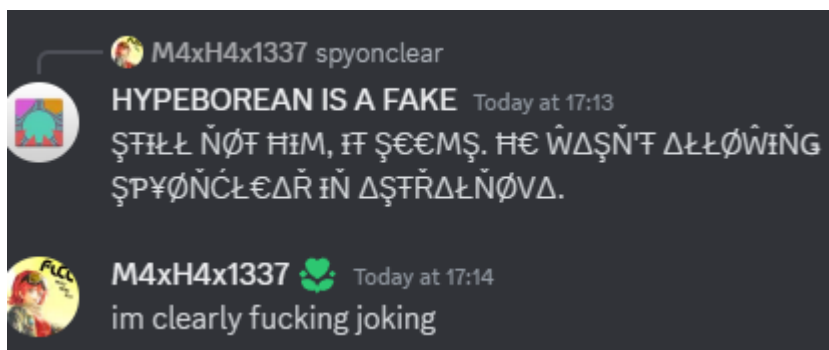

Salty...

Why are they the way they are built? I don't care who Astralnova is, this bullying needed to be stopped.

By the way, if you are curious, RDesign is still invoking Spyonclear's nickname whenever that's uncalled for.

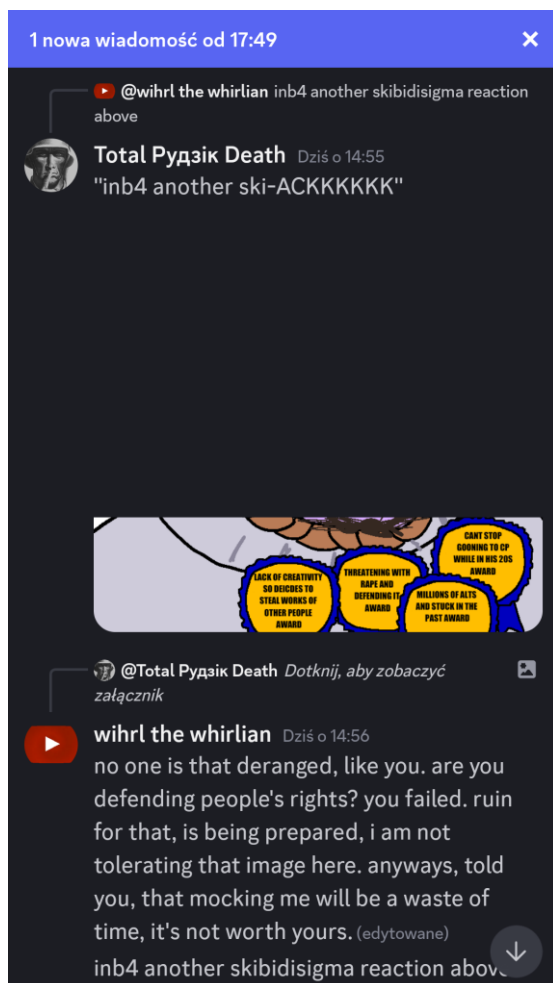

>Still not him, it seems, he wasn't allowing Spyonclear in Astralnova.

Is RD joking about the writers of this document too, or is he serious about that? We can call that a delusion, if latter.

Too soon, Sulflix. Hyperborean's exceptionally bad behavior

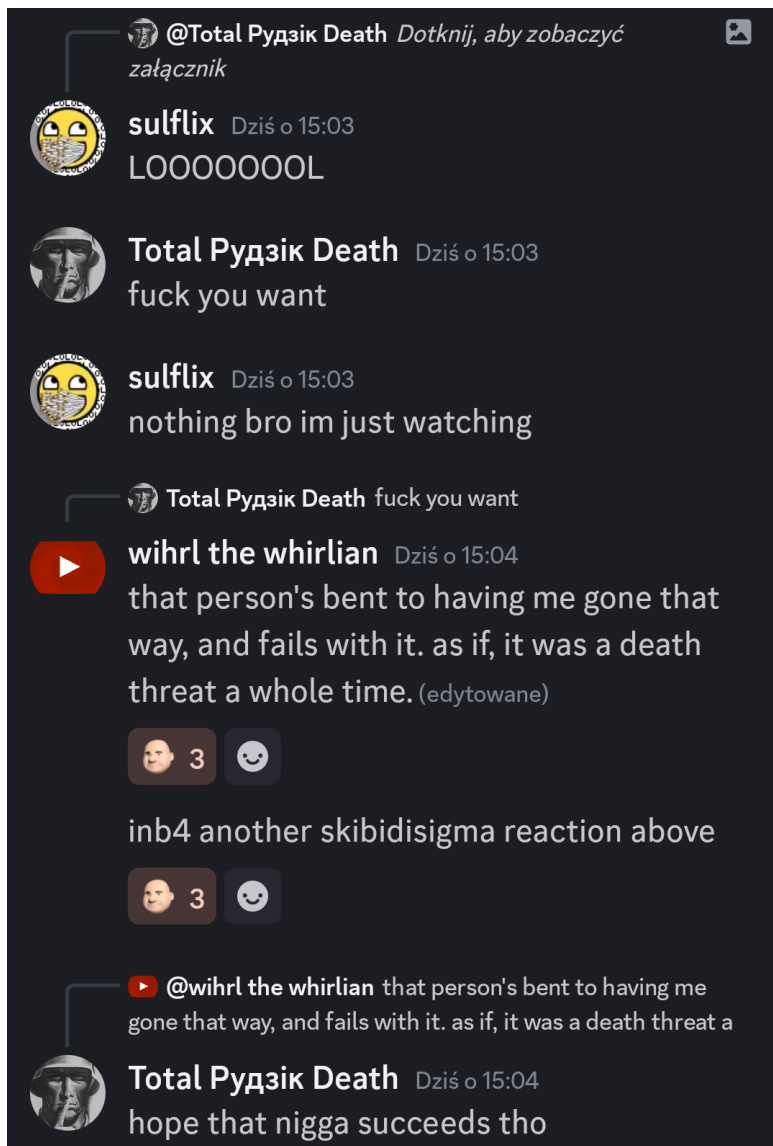

Reisuverse: Just after several weeks that Retiznyk claimed bad faith on being told to stop messing with Spyonclear, Someone (allegedly Sulflix) would make a hanged²⁷ soyjack based of how Fjattar looked like in 2018. It is the very next topic to the previous pages.

It happens all on Sermocinatio server, by the way.

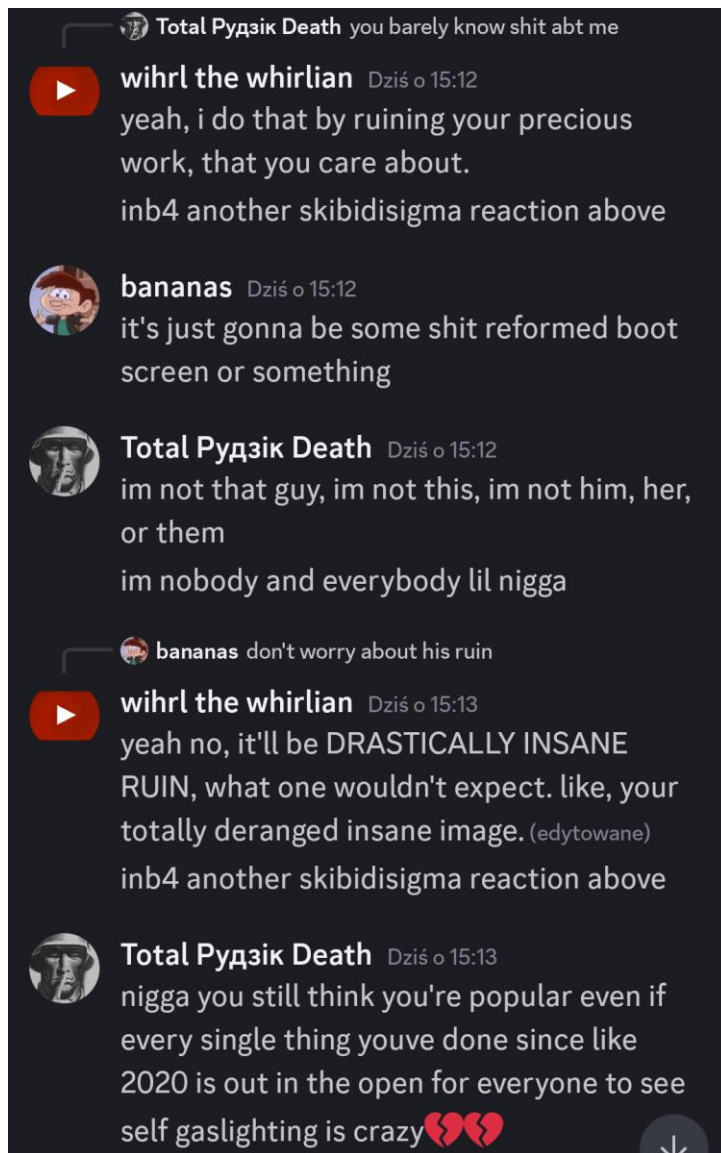

“not tolerated” is to be put very lightly. Where’s the 500 words of lesson to Hyperborean/Sulflix?

²⁷ The most popular variation of this caricature is used with the exaggerated likeness of trans women. Has Sulflix was aware of how this soyjack caricature was used and modified online?

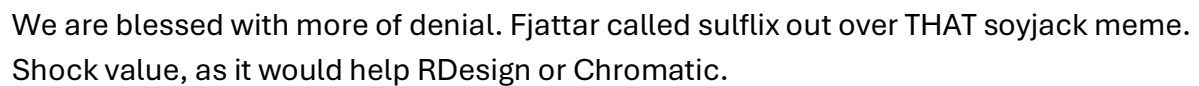

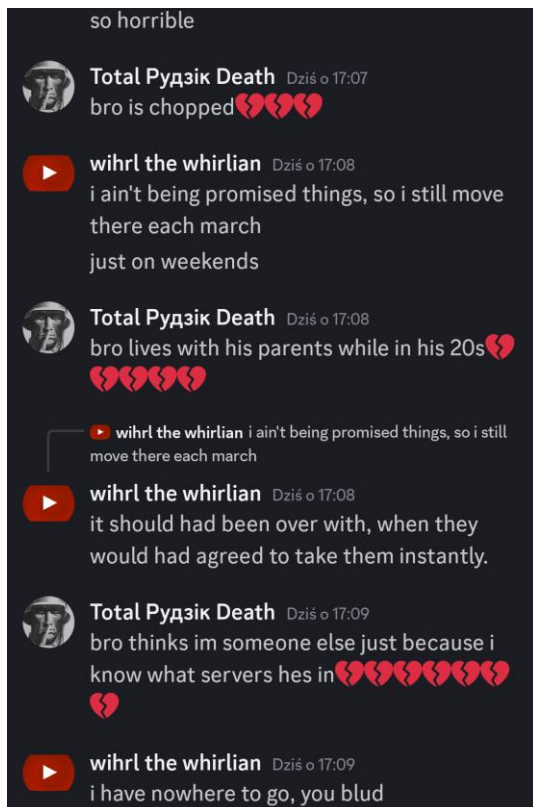

The guy who, by the way, said the n-word, is similar to Sulflix. Comrade Neonazi is might to be sulflix all along.

It must be an honor to be a part of our document too. He's acting like Sulflix, he's being edgy kid like him. I would confuse him with Sulflix or Chromatic, without knowing context. And he's like to point out on things Fjattar allegedly did in 2020.

Though he describes himself as "nobody and everybody", and called fjattar a lil nigga. No, thanks for description, bro.

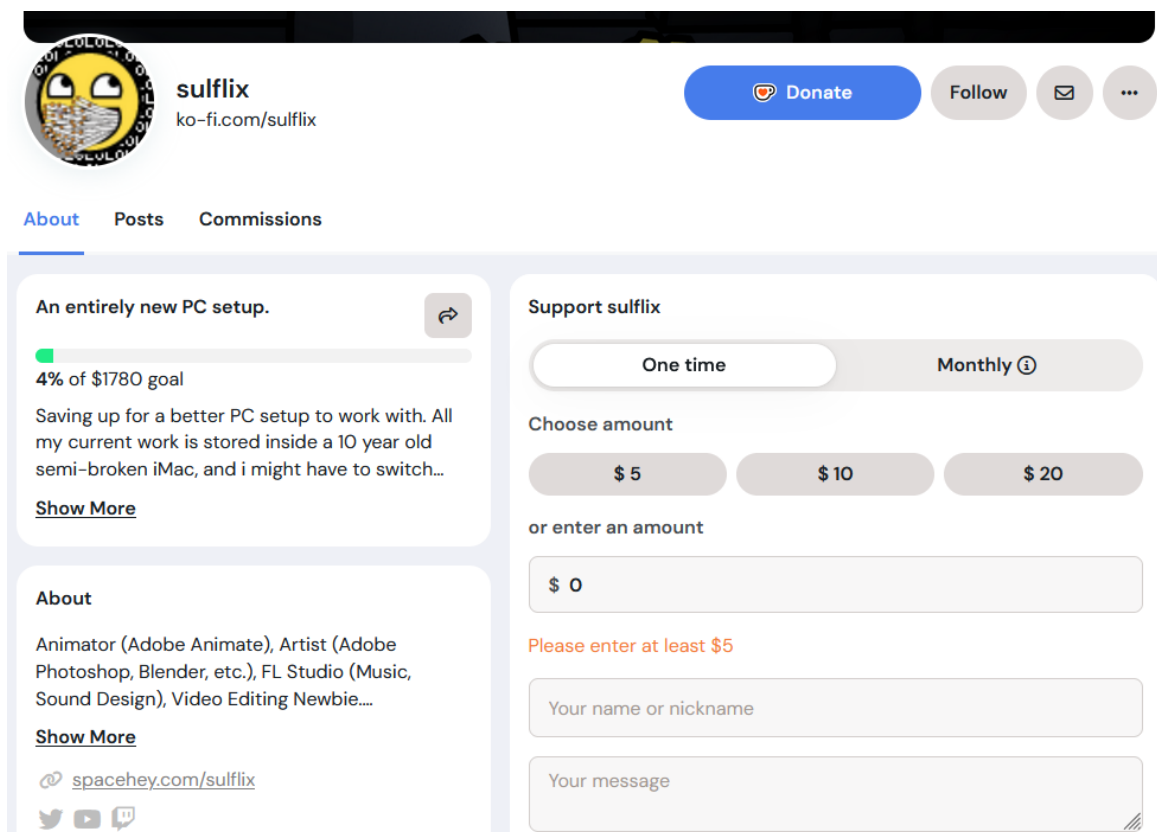

Housing crisis, hello? We are not in 1938 Germany. Having your own house costs 10 years worth of minimal wage would do such a thing.

Is sulflix employed?

Maybe.

Being a e-beggar for a computer.

The screenshot shows a Ko-fi profile for a user named 'sulflix' with the handle 'ko-fi.com/sulflix'. The profile includes a circular avatar with a yellow smiley face and the word 'SULFLIX' repeated around it. Navigation tabs for 'About', 'Posts', and 'Commissions' are visible. A fundraising goal is displayed: 'An entirely new PC setup.' with a progress bar at 4% of a \$1780 goal. The description states: 'Saving up for a better PC setup to work with. All my current work is stored inside a 10 year old semi-broken iMac, and i might have to switch...'. Below this is a 'Show More' link. The 'About' section lists skills: 'Animator (Adobe Animate), Artist (Adobe Photoshop, Blender, etc.), FL Studio (Music, Sound Design), Video Editing Newbie....' and includes a 'Show More' link and a link to 'spacehey.com/sulflix'. To the right, the 'Support sulflix' section offers 'One time' or 'Monthly' donation options. Under 'Choose amount', there are buttons for '\$ 5', '\$ 10', and '\$ 20', and a text input field currently showing '\$ 0'. A message 'Please enter at least \$5' is shown below the input. At the bottom of the donation form are fields for 'Your name or nickname' and 'Your message'.

This can't even pay yourself a place for living, let alone your PC build.

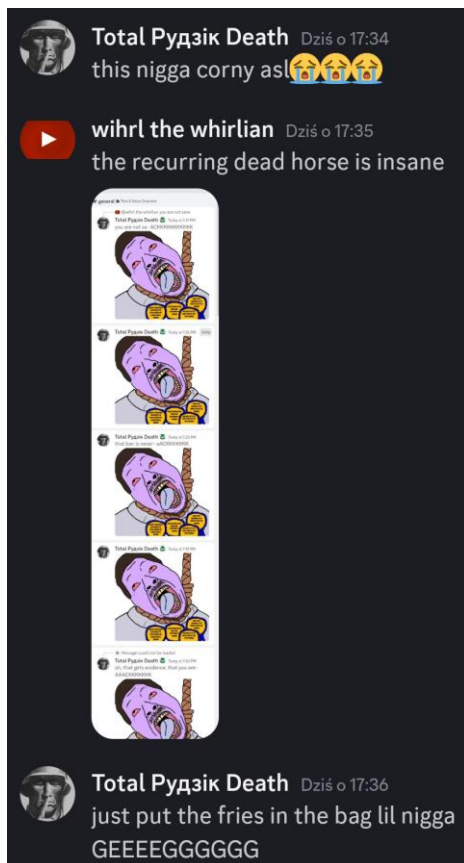

Maybe this genie can find Fjattar a job, preferable that can pay him \$1780 a month or more.

He had used Fjattar’s real name. Looks like the privacy violation is nothing to sulflix.

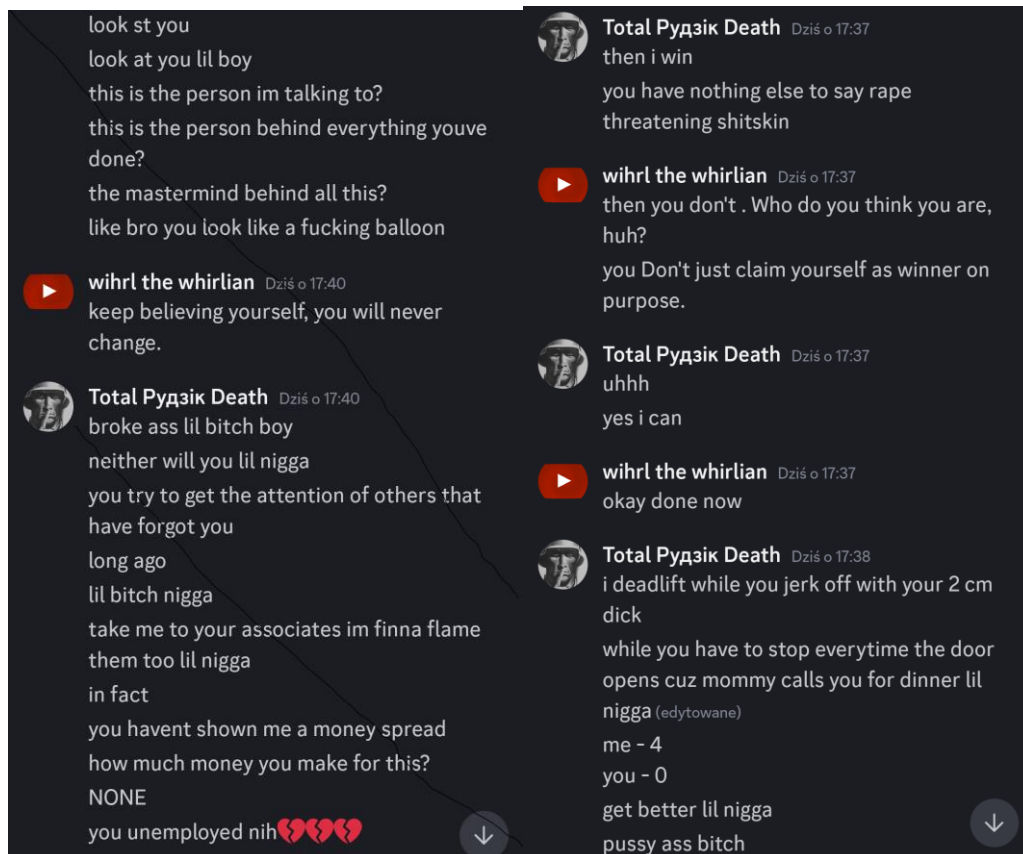

I'm pretty sure Fjattar did not draw soyjacks committing it to people he doesn't like.

Total/sulflix spams it all on this server.

I don't care about what you two did to each other in 2020, because that Soyjack obscenity had posted in 2025.

The reward of Total victory is, of course, being featured on “The problem with Chromatic and his immature friends”.

Now, i have nothing much to say about them, because it’s Fjattar vs sulflix. It’s two baddies fighting each other, so there we can only observe them, not to be a part of Fjattar-Chromatican racist drama.

Prismatic Plagiarism

Reisuverse: Chromatic’s OS Concepts are just as bad as your average logo editor intros. They’re astroturfed, but on far less scale than Nostalgia Channel (apparently the channel name brought back to Windows Expert).

It is very convenient to steal the ideas and concepts from Spyonclear.

And some OS Concepts events made possible by Spy.

Bro, it’s an interesting observation that the 2020 megamix down here:

OS Mockups HD Edition

The terror figure who was revealed on the 2022 Windows Never Released X

...Happens to be imitated four years later

Hosted by **Files Tsar**

This must be the Jexxinium's Unquoxium.

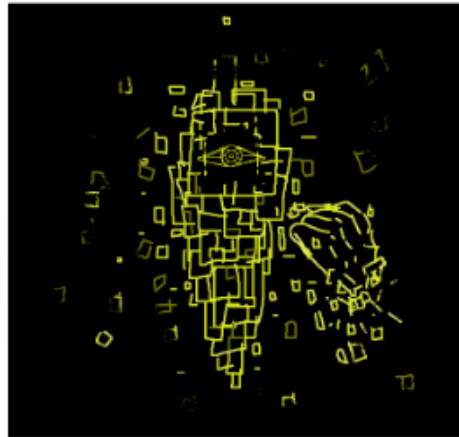

The trope of evil Microsoft Windows Concepts entity must be as old as the community itself.

But I would also mention that he used his feud with Spy as a coping mechanism.

It sounds like a skill issue that you are rivaling with the influential person, who made this kind of a sitcom 3 to 4 years earlier.

Contrary to the evidence, Chromatic denies the nature of a Spyonclear-branding-colored Unquoxium. He also gave the Unquoxium knockoff a name.

CHRONOROT

NOTE: This character has absolutely nothing to do with a certain [S] dramamaker.
Don't judge just because it's green.

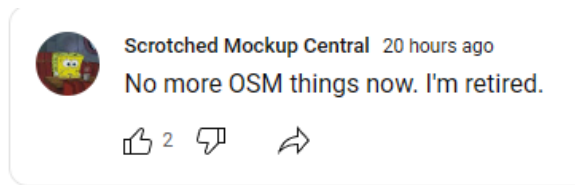

(BACKSTORY) He appeared starting from May 31st 2019 in some computer in eastern europe, it's creator is still unknown as of today. He had the capability to travel through international servers, discord servers and the entire world wide web. He had no plan of torturing anyone at the time, but he was aware of the OSM Community dramas, and began watching, endlessly. Little did he know he was feeding himself with it. Years passed and

He ran out of ideas on what to call his own fictional arch nemesis. It's the Chronic Rot, have "nothing to do with" Spyonclear, but loosely coinciding with him (Spy being eastern european/russian, and him adopting his *Spyonclear* branding in May 2019).

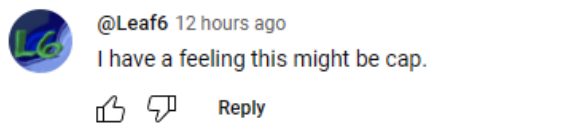

I changed my mind. It is Spyonclear on Gabriel's twisted mind.

also Sermocinatio...

Dzen: Fjattar has said to retire from OS Concepts community. I thought his haters would leave him alone with it.

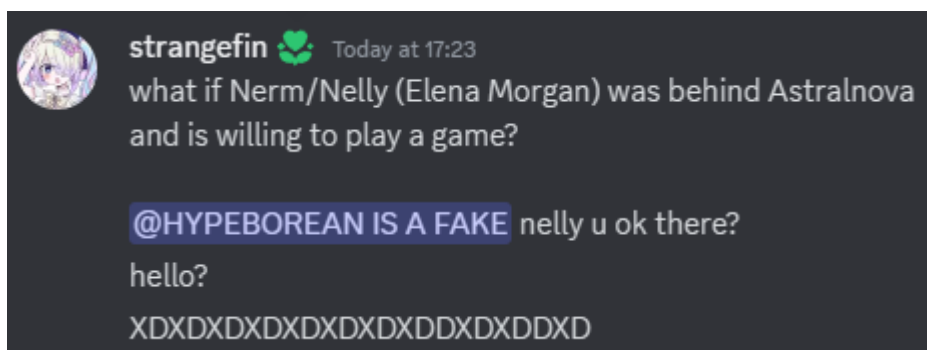

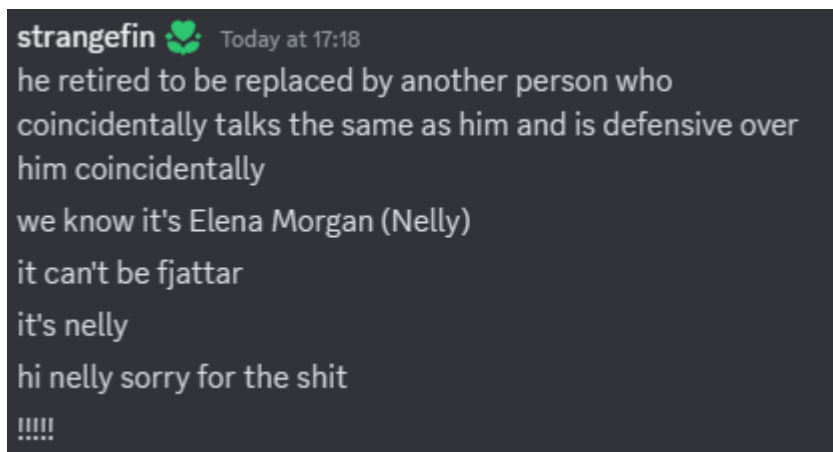

1 Comment Sort by

Should had left him alone, but we only would get to more pages about certain people
slandering Fjattar, or the people behind Astralnova.

I would rather not to get involved on this at the moment. Strangefin and RDesign was at
Astranova's mercy in 17:20 on March 11.

Making a joke at the expense of Nelly.

Reisuverse: As of the bonus:

Hosted by **Files Tsar**

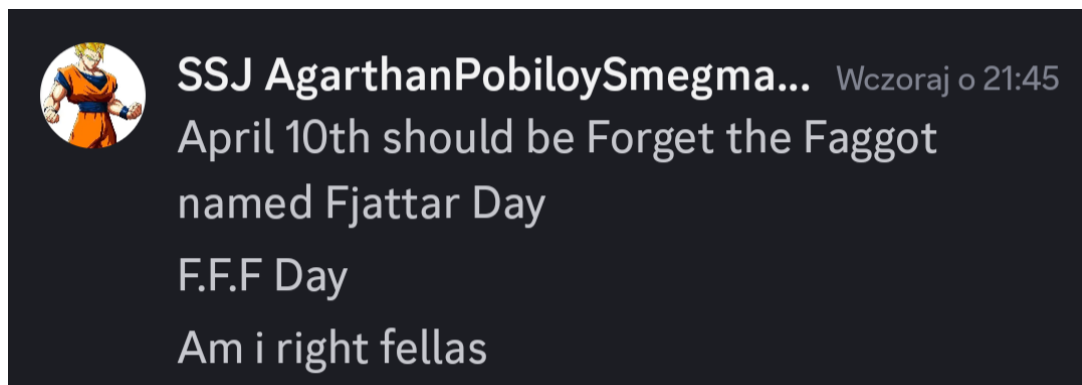

There's no way it doesn't means something else!

Noun

пидар • (pídar) *m anim* (genitive **пидара**, nominative plural **пидары**, genitive plural **пидаров**)

1. (*vulgar, offensive*) Alternative form of **пидор** (pidor).

Thanks for indirectly calling people pidars, using russian homophobic slur, Sulflix.

Screw it, LET'S GO RAW!

I would be surprised if on April 10, Sulflix's alt account would still write homophobic slurs at Fjattar.

You got problems with gays yourself? Or you are the exception on the no-f-slur rule that Fjattar, Spyonclear and everyone you hate has to follow?

RDesign denies his wrongdoings

Reisuverse: Quite amusing that this document is having 305 pages at the time of writing, and yet Retiznyk had learned nothing. He was happy to jump to another controversy to have people distract from the controversies of RDesign's own.

Gonna burst the bubble. Sulflix, you didn't think this through when accusing me of "being not real". That guy's screenshots would be mine, and your ass would still think I'm someone else.

And that's only 5 years in, and on April 8th, 2025 edition of this document.

We would get to more topics, don't worry.

What was that? Blaming Spy over your another controversy?

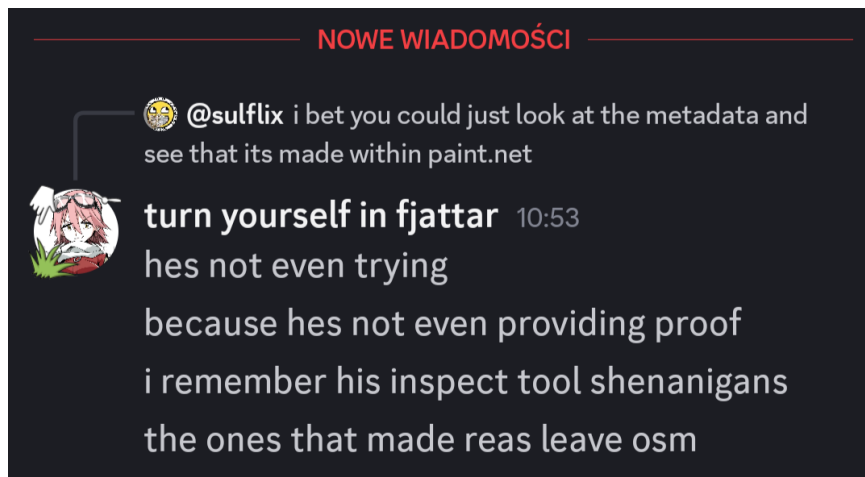

There's surprisingly a lot of talks RDesign making about Spy, calling Retiznyk's controversial documented history "misinfo Spyonclear is spreading". Boy, his entire documented history is "Spyonclear's misinformation", and that is like a quarter of Retiznyk's life. That is amazing!

I don't understand the other things he has said, as the screenshot above can be interpreted to our team as "the last 5 years I was living is Spyonclear's lie". Next time I would learn that RDesign's immigration is Spy's lie too, won't I?

Hmm... Using "gay couple" as a slur towards a strategic guild? What happened to "homophobia" narrative? Oh right, you have never been for LGBT.

I wonder if you could embrace your indifference, or claim your support after calling your opponents gays as in weaklings.

I don't even understand what they are talking about.

Spyonclear uses Photoshop for OS Concepts.

I don't understand who is reas, and how did you used inspect tool on Discord to say that?

"RDesign denies his wrongdoings" trope would be present on "Arch Linux skill issues" on the same fourth issue.

OSM 87 shenanigans

Reisaverse: Back to the topic of plagiarism. As everyone who is not Chromatic follower, ChromaticAeternus makes slop. He makes his new compilation for 10 minutes or long, as to conveniently earn money from this.

Most of screenshots are Spyonclear's

As for a few of controversies from his prior OS Concepts are:

Studio on his laptop. Piracy is least of concern, unless we would point out his 2093rd hypocrisy.

Looking on Episode 69:

Did a human had made the background?

- 5:19 **Redurn** 🔧 btw the backround in this bootscreen is made by an ai
- 5:20 **Vladislav Fesko** @LineHotBall same question
- 5:25 **Redurn** 🔧 (referring to lightdreams)

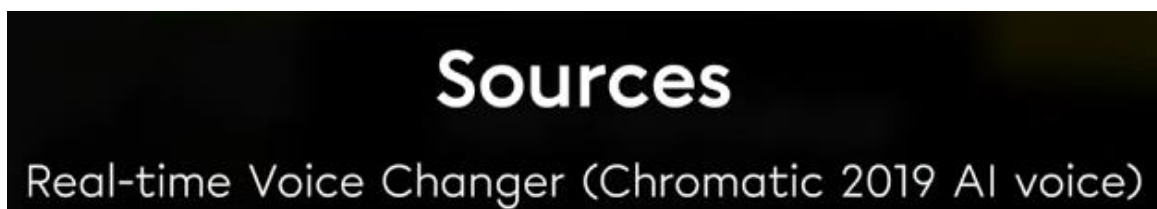

No? That's funny.

He wants Spy's attention with this?

- @ChromaticAeternus** 3 dni
he knows my stuff is better,

Better than whose? Valy Jean's?

He would also AI generating his own voice on 84...

...instead of making a simple task of voice acting, he had no problem doing that for the rest of the OSM#84 intro. Can't high-pitch audio, huh? Not even sentence mixed the 2019 part? That sounds like a skill issue.

As for the video in question:

Controversy #1:

SpiritOS in France.

I hope I'm mistaken, but this is the idea made by Fjattar.

Update May 17: Fjattar indirectly referenced that.

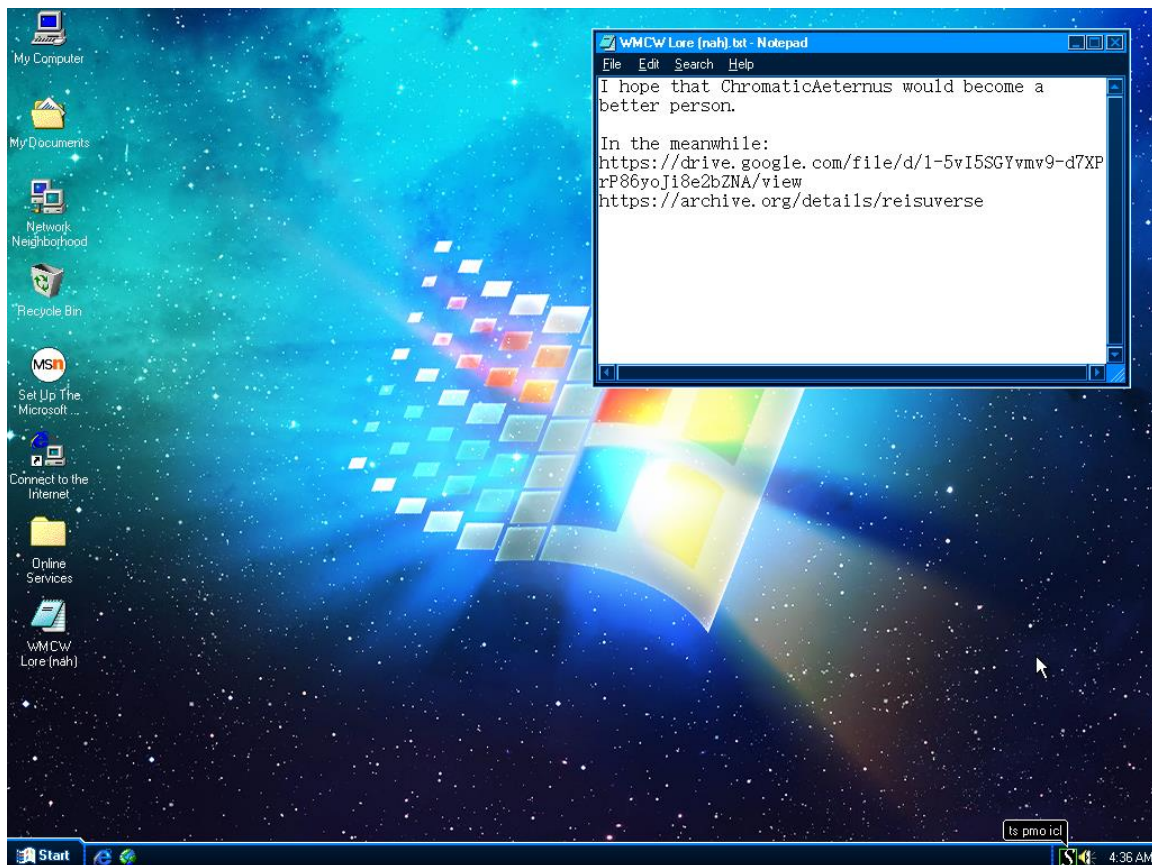

wow chroma didn't left credits to anyone in this osm that time

Spy's response...

of course he won't. dude caught up on controversies for not crediting fjattar for spiritos, and crashing out on me

Actually, Chromatic had credited C418 and ColBreakZ, but it hardly matters, because they have not been involved on OS Concepts community.

Controversy #2:

Holding a grudge over your own OSM Episode 58.

Due to inappropriate timing²⁸, Windows Z²⁹ was ridiculed.

²⁸ OS Mockups 58 "Ethereal Paradise" has been released in May 28, 2022 – three months after the launch of Russian invasion of Ukraine.

²⁹ Due to its association with the war in Ukraine, the Z has become a militarist symbol in Russian propaganda and is used by Russian civilians to indicate support for the invasion, further adopted later by Hosted by **Files Tsar**

The primitive intro of Chromatic got parodied.

Gabriel would have a vendetta over how his OSM 58 is thought of, as if it supports the war, while leading the WMCW. And OSM 87 must've destined to be the answer for Windows Z controversy.

im z-ing it im z-ing so good

Chromatic is not 7 years old, trust me. Do not put him on r/youngpeopleyoutube, or else you would be featured on Windows 𐀀 on any future OS Mockups episode of his.

Controversy #3:

Russian far-right organizations. The symbol has subsequently been banned from public display in various countries, and its use has been criminalized by several European governments. Opponents of the war have pejoratively called the Z symbol a **zwastika** or **zwaztika**, in reference to the Nazi swastika, or derisively in Russian and Ukrainian as **ziga** (Russian: зига), in reference to Sieg Heil.

Spyonclear to have free text? I think Spy owes him “thank you” for Chromatic’s crashouts while he developed Zetta-Frutti³⁰ disease.

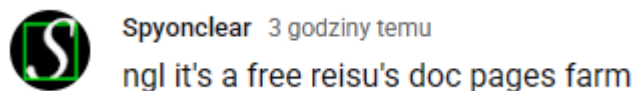

³⁰ Frutiger Aero in 2025? No way. Also, Gabriel was a toddler when Windows Vista and OS X Snow Leopard were the things.

I don't know what he's talking about, but I think it's Spy who should had thank Chromatic for grinding yet another page for us.

Controversy #4:

Racism? Make France Great Again? Make Europe Great Again?

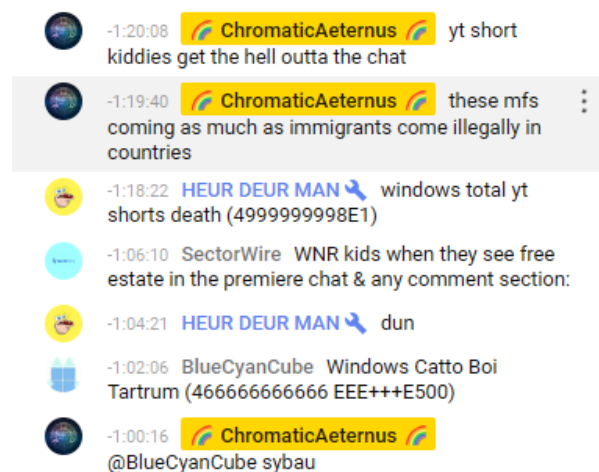

Fuck... give me a break.

I downloaded the screenshots of what happened during the premiere.

... and I'll screenshot this incase next time you tell me I never told you

Absolute cinema.

1. Quite ironic, as you had used YT Shorts and TikTok slang, including but not limited to “ts pmo icl”, “sybau”, “your green-square f-boy”. I wonder who’s the immigrant here... Speaking of which...
2. What’s with migrants that you don’t like? Did any of them bullied you at school and college?

3. “kiddies” must have been one of you, at the first year of coming to Operating System Concepts community. It’s possibly the person who came to OSC that year, and you disrespected them, huh?

Thought, he couldn’t resist to comment about Spyonclear, with the infamous first words 🤔

C: Result: He, of course, had to make 3 more posts about me mimicking my words, crying over his "ideas" being "copied" (dude still has the 2017 fjattar mindset), and still posts his doc of blank air as if anyone will check it. Can tell what I said above will be remixed, rephrased, or set in some random image under his own rambling, but you know, nothing's unpredictable when it comes to spy's actions Still 0/10 ragebait, try again, or just stop

Just accept your fate as a stealer.

I don’t get why Chromatic had got reactive as yet another OSC shoplifter.

S: dude is so angry he reposted my message lol anyway i found him amusing. here's the list of his controversies

Spyonclear dropped the links to this very document, while pointing the controversies on “Prismatic Plagiarism” section.

Later on May 16, at one point Chromatic threaten him with copyright strikes³¹, because “yay conflict escalation”?

Chromatic screwed up so badly, he did not accept the emails for his OS Mockups #90. Citing: *Reviewing current personal attacks & harassment, we no longer accept from emails, thank you for your understanding. This parasite has been quarantined in the spam now.* It is quite ironic that it came from a guy that harassed Spyonclear religiously on Chromaverse and outside of that server. Fuck around, find out, and remove your email address.

In other words, Gabriel took a shot of his own medicine, after making a slander on Spy on Gabe's own OSM#87.

Thought he would gladly ragebait his own fanboys to attack Spyonclear.

Spyonclear’s reaction to that information:

...and gabe made a fool on himself to call people he doesn't likes "parasites"

³¹ “that will never happen, unless copyright strikes are done”. Sounds good enough evidence to me. “the context does **Not** matter in this scenario”, as Sulflix said.

Chromatic's email saga would continue well into eSpyzem-Chromaverse conversation...

Chromaverse: Next time don't use my email to go and harass me, Denis Nikolaev. Thank you. You dare say I'm 18 years old only "physically", but you look at you bro, sending me this shit as you were any better. Grow up, you are being the "kid" here.

eSpyzem: gabe legit had a chashout over being called out of stealing ideas from the people he hates, his racism and chauvinism

Yes he dares, because you tried to ragebait Spy over stolen SpiritOS, and you handled the call-out like a little child. That is the key word "physically".

And now, please excuse Chromaverse's language, that's coming from a person who, as of the time of writing, insisted he's 18 not only "physically", but "mentally".

Chromaverse: Dude's so retarded he links his harassment mail with false allegations, stop being retarded buddy;.. [[link to RDesign's complaint](#)] not the first time he does this typa shit btw;.. You done boy?

eSpyzem: and he used the RDesign word 🤪 can't gabe stop being controversial?

Chromaverse: Dipshit you're the one who started this shit shut the fuck up lmao

eSpyzem: gabe, you wanna talk? join [The MAWXP Arena]

Chromaverse: Ah hell nah br

Chromaverse indirectly insisted to continue rioting to eSpyzem

eSpyzem: i like how you insisting to talk on #outside instead of duking it out on a separate server.

Chromaverse: Dude you literally started harassing me via email and you blame me for it, how about fucking stop it already.

Gaslighting Spy already? As I have mentioned, the recent developments started on OSM#87 and the stolen Fjattar's idea.

eSpyzem: babe, you literally had the opportunity to stop the war

The link in question sent from eSpyzem is Treaty of Fardary submitted by Bogal25. More of that later.

Chromaverse: Unbanning you = Submission, we are NOT doing it

eSpyzem: well, you already submitted to me the second you posted your cringe
osm episode

Chromatic's -tistic confusion came after. Also echoing after sending "???"

Spy: the fuck u talking about
it's not hard to follow Treaty of Fardary

Spy added two cents on that:

unbanning won't hurt at all

Chromatic didn't learn at all. Took the L at the age of 12 to 13, took it again at the age of
14, and still taking the L at 18.

But it appears he³² realized the reality of the situation, albeit on the most insignificant
moment.

Chromaverse: cross-server argument goes crazy; maybe spyon was right about
calling it a cold war

Sure, buddy. It's not like you religiously committed war denial for five years.

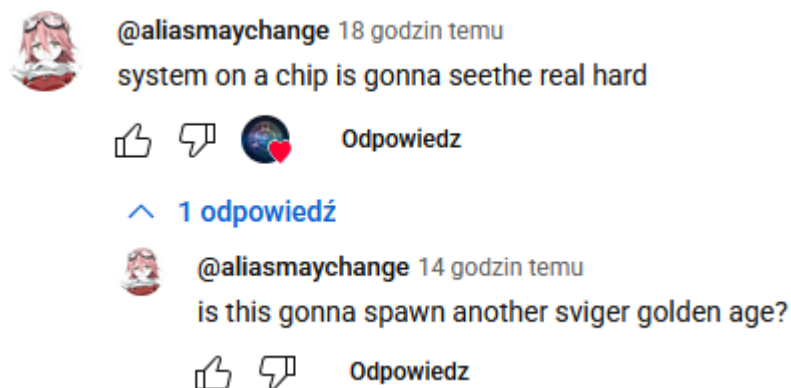

Attempting on Sviger hype

Reisuverse: After the 2025 Sviger Kit has been announced, Chromatic tried to get on
it's hype, posting inflammatory image

³² Or certain person on behalf of Chromaverse. All of the messages were unmarked, therefore,
the previous messages had been tagged as "Chromaverse".

They're not even hiding it's purpose. The image in question made by Retiznyk, quite more political than his previous remakes.

The "system-on-a-chip" remark, and the politically incorrect nature of his works has made to the parody of it, when a chip was faking his outrage over someone making a confederate Windows concept (or Windows Never Released, if you will). This ends up on a trailer.

Arch Linux skill issues

Reisuverse: Well, let's try to install and use Davinci Resolve on unsupported hardware and operating system.

As pointed out on Spyonclear's video, for DR19 on Linux, you need:

- Rocky Linux 8.6
- 32 GB of system memory (swap would not save it)
- GPU with at least 4 GB of memory, supporting OpenCL 1.2 or CUDA 12
- Official, up to date drivers
- Blackmagic Design Desktop Video

You can just install Windows 11, or at least Windows 10 Creators Update (1703).

The complaint about Linux is more popular than his flagship video. Everyone loves tech bros who's trying to install and use Resolve on Arch Linux.

That, or this video is the engagement bait.

Not only is it long overdue, but also companies not making software work well enough on Linux singlehandedly delayed this by an entire month.

It's a RDesign problem. More precisely, skill issues. No business would waste their time for 3%ers. It's like asking proprietary websites to support Internet Explorer in 2025. They know well it's not worth their time. RDesign did not took the use of the softwares that do support Linux, or prefer to try to use unsupported softwares, and try to fix the unfixable.

I think Arch users would be piss themselves regarding what am I going to say.

The definition of insanity is trying to do the same thing over and over expecting different results, that's how it is with that manchild, I'm tired of repeating the same exact things to this man so I'm won't even bother anymore.

Let my team member rephrase...

insanity. noun. in-san-i-ty. 1. : failure to solve conflicts by being open to the man you had banned for years, the refusal to unblock your rival since the age of Covid-19 Pandemic. 2. : installing linux and excepting everything to work as fine as excepted for Microsoft Windows 10 or Windows 11.

Windows and Linux are not the same operating systems. RDesign, fresh out of Windows 10 or a Mac, expects his software to work the same for Arch Linux. Did he even read the software requirements?

Oh, check out this meme.

A Linux user coming in to tell you that ...uhmmm actually most of the world's servers are running Linux. Also That android phone in your pocket is also running Linux because Linux is a ke

I would beg to differ. Android, Red Hat and Arch are different cans of “food”. Android is edible, Red Hat³³ is a stone, Arch is the shit. Who is proud to eat shit? RDesign is proud about that.

³³ And for better part – CentOS and Rocky Linux
Hosted by **Files Tsar**

That's enough of a conclusion.

In fact, some people beg for a different conclusion, that Linux itself is the worst of them all.

Even NT 3.5x can beat Linux 6.18 on usability.

But the only Desktop Linux™ distributions I, and the gang, would tolerate is HyperOS, HarmonyOS, One UI, 氧OS, ColorOS, MagicOS and Nothing OS. All of them are Android reskins, but they are more usable.

Apple operating systems are supreme, but they are not Linux, they are XNU, or BSD, if you wish.

Spyonclear had tried dozens linux distributions on a virtual machine. But they're like a toy to him. Arch Linux in question had been featured on 267th episode of his OS Showcase.

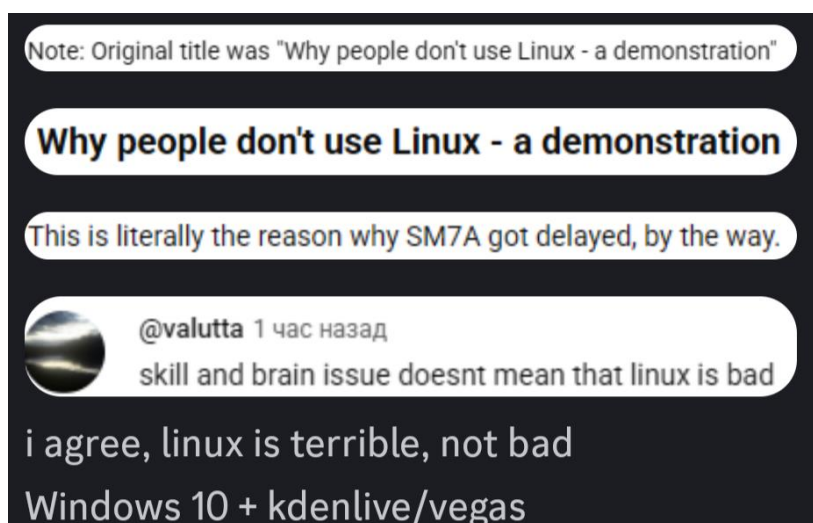

X Server failed to launch on Arch Linux. Mind you, it's on Linux 6.14.9. With how popular Arch is, you'd expect it to work just fine on any x64 PC, or QEMU, Virtualbox and VMware.

Well, did RDesign know about barebone nature on Arch Linux? And did he except for Rocky-only-supported software to work out of the box?

But we are here not for skill issues, we are here for different skill issues, to make sure (or failing to do so) that you're not hate Linux.

Let's have a reaction from the man:

He didn't bother to change the title on his rant video but still made the note that "Why people don't use Linux" is the former title, but not before our document gets the July 4th

update. It took a day for the title to change to non-offensive and tolerant “Blackmagic, why?”, putting the whole blame for a skill issue to Blackmagic Design.

The interesting thing is that KDElive can support Linux

I searched for Kdenlive’s system requirements:

- 64-bit distribution, they didn’t pointed out the list of supported distro.
- 8 GB RAM
- OpenGL 2.0
- Quad core CPU

That’s for PCs who can do HD videos.

That is, if he’s not planning to make 4K or 8K videos.

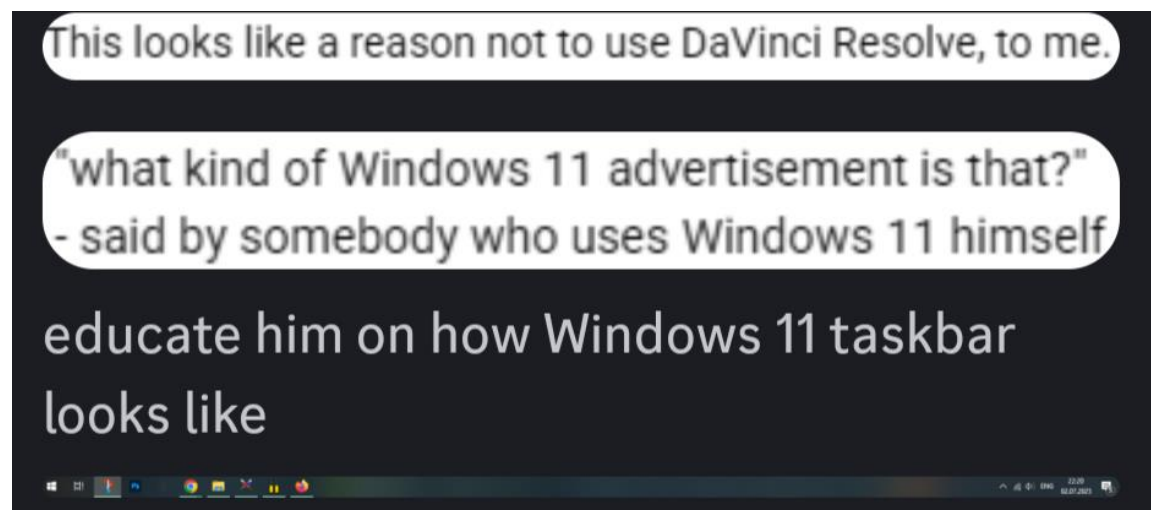

Linux is a very good ecosystem, I love it and you should too. And yet, it comes with heaps of shortcomings in terms of software support, purely because Apple's and Microsoft's duopoly. Is it the fault of Linus Torvalds that DaVinci Resolve refuses to work like it did on Windows? Of course not, it's the fault of Blackmagic for not giving in enough to the Linux community, some of which might be Windows 10 refugees due to the awful EoL plan Microsoft is pushing, specifically forcing you to basically throw away your perfectly fine computer (if it is marked as "obsolete") and spend a lot of money into a computer with integrated AI slop. While I do have a computer that supports Windows 11, truth is, Windows 11 sucks from my experience, that's why I'm actively dodging it. I have used Linux prior too and I've had even worse issues with DaVinci Resolve on Fedora and Debian, I couldn't get it running at all because of the fact that you are literally forced to use open-source drivers, which are incompatible with DaVinci Resolve, one of the more consumer-friendly (credit where it's due) industry standard tools. I couldn't figure out how to change said drivers as well, it's not a "two clicks away" experience like it was on Mint for basically no reason, not on GNOME, nor on KDE (as far as I have found). DaVinci Resolve is all but a glaring example for me, I know there are more Linux users who are just as frustrated with other big tech-only software which they use in their daily life, thus resorting to solutions like dualbooting, using Wine (I do not like Wine) or using virtual machines (very awful in my experience). Only way to use said software natively is for there to be more Linux users, GNU or not, to the point that developers literally cannot ignore the existence of Linux on the desktop. Dare I say, it's starting to get close to reality with even PewDiePie starting to use Arch Linux.

I don’t think you have valid reasons to make a rant on Windows 11, within the rant video about Linux, while using modern GNOME. TPM is cheap, and... well... secure. That would be 10 dollars, a hundredfold cheaper than the Average Joe’s PC.

And that is, one of the proofs on why RDesign can’t move on. This happened with the ban of Spyonclear, and the other happens with the unacceptance of the newer Windows version. He’s rather to have a controversial Arch Linux experience with no less controversial³⁴ GNOME 40+ experience.

³⁴ Gnome 3 devs have a very strong opinion about how the desktop should be and if you disagree with them you can f-off. Their opinion is unfortunately very different to what a lot of users actually want and what they have come to expect from their computers. This feedback falls in deaf ears.

The reasoning behind Gnome's opinion is varied: some say it's for non-technical people, some say it's UX designers wanking their dicks with touch-friendly UIs that never get implemented on touch devices. Some say it's to help kids in undeveloped countries(yea no kidding) by offering a simple experience. I've seen people debunk all these assumptions.

What if any of our team says that Windows 11 is a superior desktop operating system than Arch Linux + GNOME 40+?

Spyonclear used Windows 11 as much as Arch Linux and 8999 other operating systems, Windows, Linux, PowerPoint Oses, or Scratch Oses. And yet, the default operating systems is the best choices, because the personal computers has been built with default system softwares³⁵ in mind.

i think ts reached linux white knighthood
thanks algorithm

This.

Because he had feared criticism from Linux fans, RDesign had put the disclaimer to say that his video did not mean to advertise Windows 11.

I feel like people are jumping to conclusions purely because of the title which may insinuate me saying "don't use Linux", which is something that is anything but what I want to say, given that I've been encouraging switching to Linux. As such, I'd like to apologize (and I don't think I'm doing enough by pure apologies, in fact I feel like I owe people something as compensation now) for the unintentional ragebait, I'll fix this soon.

This is not some reddit sensation. People care enough for multiple long-maintained and high quality forks of gnome 2 to appear. I think this is all coming back now as far as userbase numbers are concerned but we haven't seen it yet as people don't collect that many metrics on linux.

³⁵ Windows or Mac, or even C64 and OS/2.

Not as soon as he complains about Spyonclear, and how RDesign's crimes has (not) have the expiration dates set in May 2025³⁶. We would start with RDesign failing to install the iron curtain, and complain about that.

I thought I got my block filters working properly, some known manchild managed to circumvent them on my complaint towards developers not giving their all towards Linux. I'm going to double check if the channels are actually blocked in this channel or not.

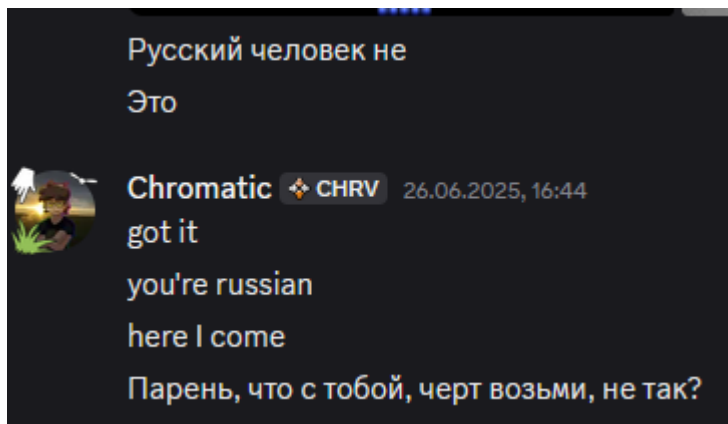

I think I'm done "trying" to hide the fact that it's the "old friend" we left in May, didn't even check his channel until someone told me about what he posted (that being him once again hurling insults). He's once again harassing me about the unban from a server I don't even own (even if I moderate it) with multiple community posts in a single day and for some reason he's desperately spreading anti-Linux propaganda (which I think is a very braindead way to get my attention). This is all you get for a recap of what's happening.

What insults? A meme out of your skill issues?

Speaking of leaving friends, you and your boyfriend had made a visit on *Discord 6* server.

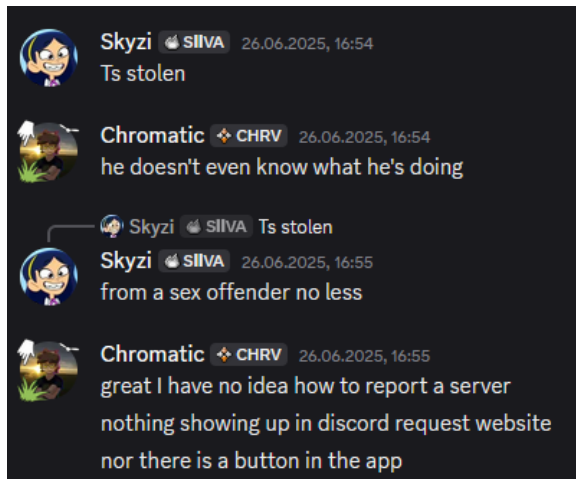

Discord 6 server shenanigans

Reisuverse: Let's start with Chromatic assumes Discord 6 is russian based on what he wrote. Spy's screenshots, once again.

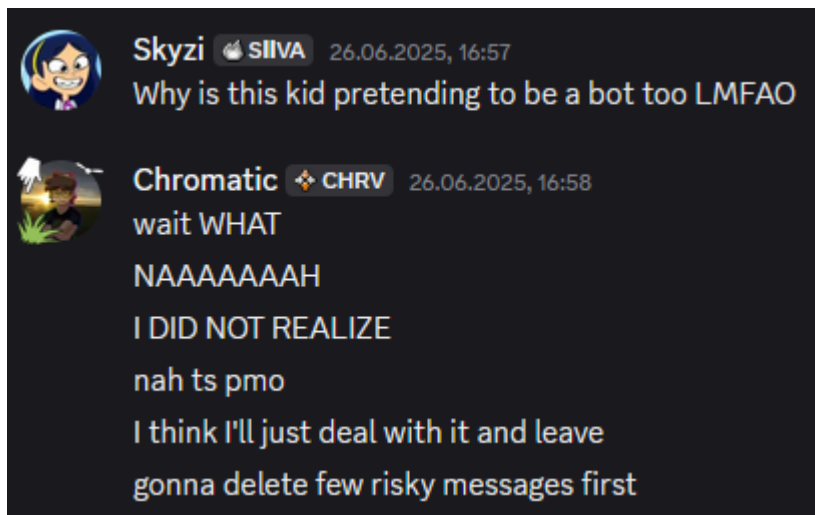

Chromatic proceeds to use equally broken Russian on to him. Twice, but i won't bother to repost.

³⁶ I think i had also explicitly stated that the old version of this document had set to June 1st, so it's quite ironic that they prefer to shy away from consequences.

Why Chromatic didn't left Discord 6 alone, no idea.

It's up to your imagination which risky comments he had made, let's just default to "Care about certain words", "Jeffrey Epstein, is that you?" and "Jeffrey Epstein Strikes Back" styles incident.

With that said, on July 20, Chromatic complained about Discord 6 on YouTube.

Been like more than 10 times this kid is trying to add me not just through Discord, Instagram, but now Snapchat and go on servers while he's 7 fucking years old. Obviously can't even speak english properly and speaks without knowing sh. Can't blame him tho, his parents are to be blamed. Where the hell are they?

This is concerning.

The only person we're having concerns about is ChromaticAeternus.

And no this isn't another Hayna or defense against other kids type sh, as long as they only stay on Youtube there's no prob. But this kid is lot more different. Why are they not monitored nowadays what is that bro

Spy steps in on Chromatic's attacks on Discord 6

Spy: gabe speak for yourself lil bro you're dedicating to me and other people u don't like 20 posts and 10 wnr\osm videos edit: bro made another comment regarding it lol

Gabe: Spy get a job you haven't even been targetted³⁷ lol

(acting as Chrom didn't bashed on Vetshnost YTP Tennis that week.)

Chromatic: oh god he shot himself right in the foot with that answer LMFAOOOO quit the victim card fatass

also³⁸ I can tell you're spending more time stalking my channel than getting a life or a job

dude just stop shooting yourself on the damn foot lmao 🤔 🤔 🤔

And as usual, justifies his harassment campaign as "iTs oNLY YtP rOUNdS Not That DeEp".

Speaking on Vetshnost:

CA: the desperate attention seeking can't be that bad [Round 2802 of Vetshnost] 🤔 You can totally make your YTP Tennis without having to make references of somebody you hate because "wah wah i got banned fuck them I prefer their past-self!!!" lmao. Lower that ego of yours, boy, soon to be 5 years of you being butthurt and you still can't get over it.

Who stalking whom, again? Since when Vetshnost YTP Tennis cannot make jokes about lolcows like you? Didn't you make jokes at the expence of other people in any channels of yours?

There's several cases present on this document. Stop shooting yourself on the foot 90 times. One is enough.

It was already 337 pages long at this moment.

We can beat Leo Tolstoy's War and Peace if he continues.

"shot yourself right in the foot, quit your bs pedo" Says a friend of a pedophile. And he said that... because RDesign had acted like a groomer to Bogal, and he have to call people he and RD don't like pedos?

Also he shared a JD Vance meme. With our familiar lolcow's face. It's not that big.

And you're doing the same with the hundreds of posts you've done (however your "audience" appears to just be your alts and random kids)

Spyonclear: list at least one hundred community posts i'll wait.

What's Chromatic's reaction of a expose?

CA: i was expecting it ngl, pedo using shit from 2022 and a ms paint image
😭😭😭 just get over it

Hey, didn't Chromatic and RDesign did just that? Or is it just different, and "from 2022" doesn't apply to their case? Except theirs are even fabricated, and it doesn't even matter in the case of Discord 6 drama.

This topic has been derailed. I'll applaud Chromatic for making this happen. Here's Spy's laconic answer:

bro did a cross server talk to my server just to try to defend his D6 comment

remind me how old your ban reason was? oh wait it's 2020. the rights to use year excuses is revoked. "shit from 2022" lmfao

Chromatic's response?

*could've been 2022, 2021, 2020 or even 2019, brochacho, ur still speaking out
nothing but air lol 🌹 you got no real arguments now*

Whatever language was that he used. Gabriel was on the same mindset as in 2019.
Hence why we had to start the document with 2019 events.

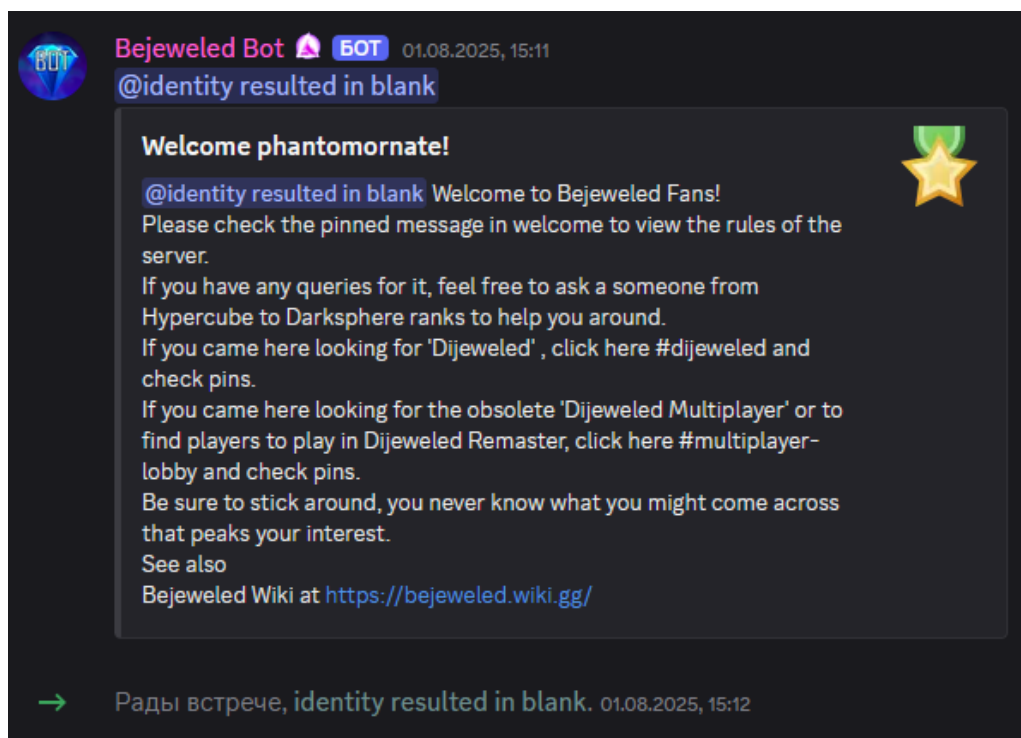

Bejeweled Fans server incident

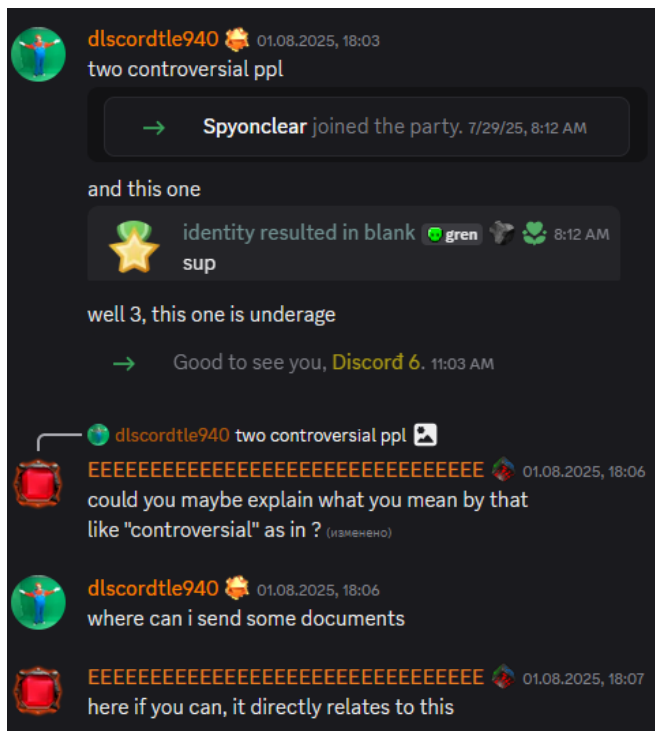

Reisuverse: Just because Spyonclear is in Bejeweled server, and posts Bejeweled gameplay, doesn't mean you can harass him and *Bejeweled Fans* server members.

It has caught my attention that The Logo Editor and Fjattar has joined this server to confront the mods about. Possibly they want Spy to be dragged in a conflict, or be banned from this server. As of August 5, 2025. Spyonclear has not been banned yet, much to their expectations.

Most of the screenshots is Spyonclear's, once again. Spyonclear was on that server at that time, minding his business.

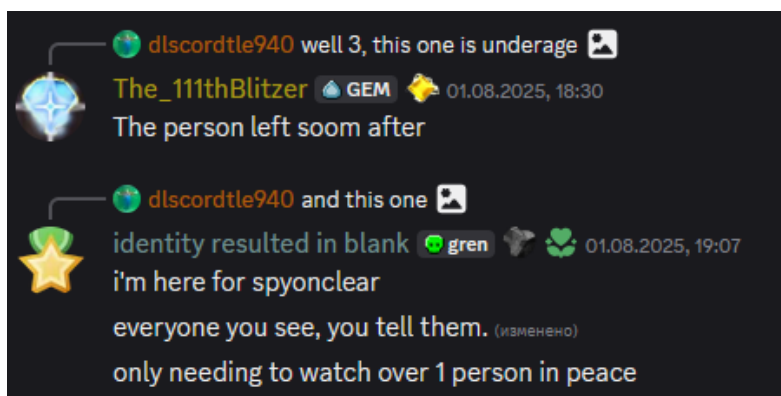

Apparently, The Logo Editor was already here since January, thought he would witch hunt Spy, and Fjattar would do that too.

As if we did not already document hundreds of pages of The Logo Editor being controversial person, alongside several subjects.

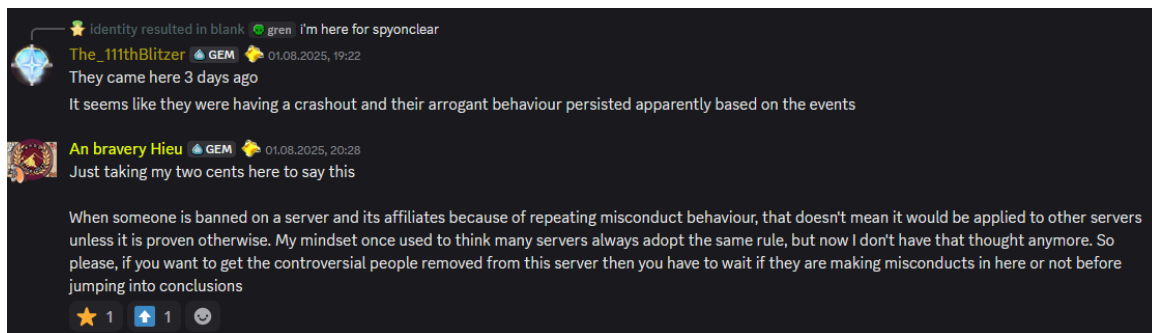

The interest of this server has been ignited after it was featured on Spyonclear's badge.

How about leaving Spyonclear be?

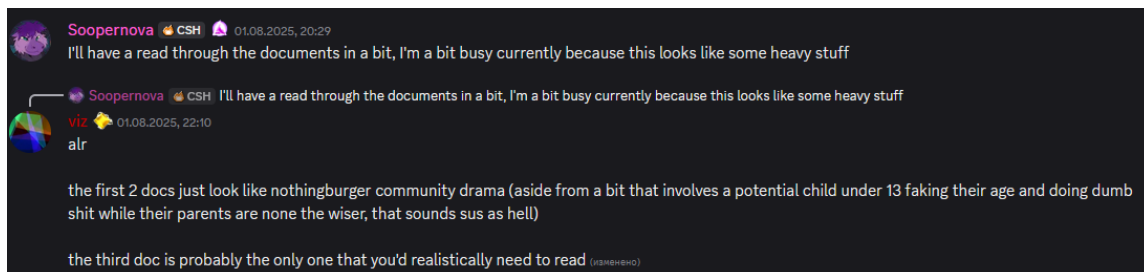

TLE's life depends on Spyonclear getting banned from that server.

Also, Spyonclear is a singular person (at least at that time), unless Spyonclear became a community platform.

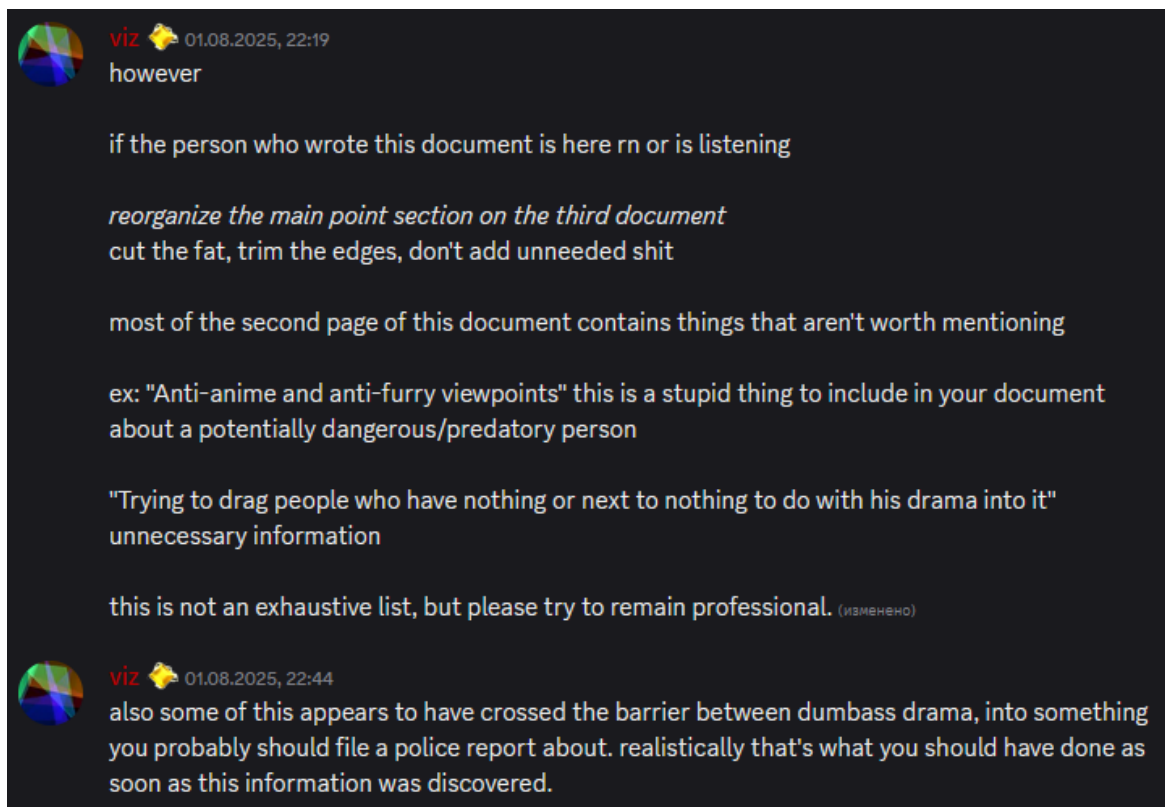

The sole person starring this is Fjattar. Keep in mind hieu021102 said that under the influence of RDesign's document.

Vix is not quite following the said document.

The next image is addressing the editors of The Fjattar Files.

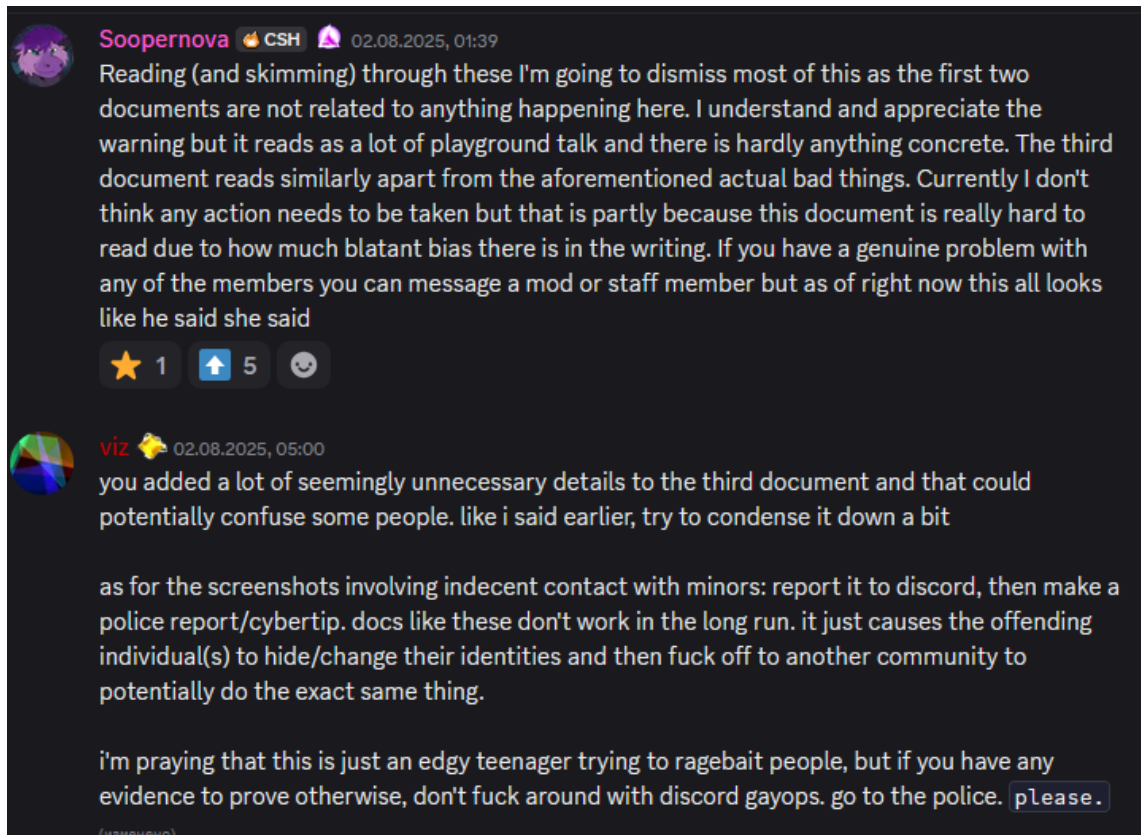

One of the big issues are about “anti-anime and anti-furry viewpoints”.

Oh well. What about the next person?

Why Fjattar starred this? Is this because of The Fjattar Files being dismissed there?

The most bites came to anti-Fjattar document. Viz tells TLE to not “fuck around with discord gayops³⁹”.

Also starred by Fjattar.

This section must be here for preservation and study. Even if this is irrelevant to the stories about ChromaticAeternus and RDesign, it must help visualizing on what extent Fjattar and TLE are willing to do to not Spyonclear be on his spaces.

³⁹ What the fuck is that word? Search results for this word are not helpful!

Issue 5 – 2026

To be documented...

In Conclusion...

As with The Fjattar Files, we got to say something about the Chromaticans. When they picked a fight with Spyonclear in 2019, I thought this would be over when i would make a peace treaty back in February 14, 2022.

...treaty of peace between the @root ecosystem with associated powers and Chromaticans + treaty in the event of unprecedented 9/20 attacks of 2021. Basically unban each others from respective servers (eSpyzem, Chromaverse, The Mockups Server), and then stop hating each others.

We're having nothing of that, after 3 years.

For 6 years, the half of Chromatic's supporter's age, they have not let Spyonclear be on peace, freely communicate with people on his community (then known as Windows Never Released and OS Mockups).

The first of many results, is the page on Windows Mockups Cold War has been made with many documentations.

The WMCW page, in part of, was transformed to yours truly's document, The problem with Chromatic and his immature friends.

You don't hate them enough.

Milestones?

237 pages: Initial release

300 pages: April 3rd, 2025

It is no more than The Fjattar Files with their 576 pages. Fjattar in question is equally controversial as ChromaticAeternus and RDesign.

If you are not the person involved on this document, and you had read this document, thank you for reading and bringing the attention about ChromaticAeternus.

And as always:
